Portfolio update – May 2011

Total Pension Fund

	April	May	FYTD as of 5/31/11
Total Fund	2.51%	-0.33%	18.16%
Benchmark	2.58%	0.03%	18.20%

- Absolute returns were strong in April as equity markets, particularly outside the US, continued to rally. Total fund performance turned negative in May as US and International equity markets, as well as commodities, sold off.
- Total assets as of May 31, 2011 were \$74.7 billion, an increase of \$1.8 billion since March 31, 2011.

Domestic Equity

	April	May	FYTD as of 5/31/11
Domestic Equity	2.86%	-1.02%	35.12%
Benchmark	2.93%	-1.14%	33.93%

- From a sector allocation perspective FYTD through May, an underweight to Financials and overweights to Industrials and Materials were the largest contributors to relative performance, while an underweight to Telecom was the largest detractor. Stock selection in IT, Energy, Financials, and Materials has been strong for the fiscal year.
- At the end of May, the Fund continued to have a fairly sizable overweight to Domestic Equity (26.5% allocation vs. 19% for the current FY Policy; FY12 Target for DE is 23.5%) which has benefited performance FYTD as Domestic Equity has been the best performing segment of the Total Fund.

International Equity

	April	May	FYTD as of 5/31/11
International Equity	4.61%	-2.74%	27.49%
Benchmark	4.70%	-2.66%	30.76%

- FYTD through May, the emerging markets portfolio is in line with the benchmark, while the developed markets portfolio has trailed the benchmark.
- At the end of May, largest geographic overweight was Europe (390 bps/ \$590 million) and largest underweight was Emerging Markets (416 bps/\$628 million).
- During May we are net sellers of Japan as we have been moving the portfolio closer to a benchmark weight. The Japan overweight has been reduced to 112 bps (\$169 million) as of the end of May.

Fixed Income

	April	May	FYTD as of 5/31/11
Fixed Income	2.09%	1.92%	6.75%
Benchmark	2.21%	2.98%	5.15%

- FYTD High Yield has been the best performing segment of the Fixed Income portfolio, up 20.20%. Much of the strong performance has been driven by the Alternative High Yield assets (Bank Loan Funds) in the portfolio.
- Fund's underweight to fixed income (32% allocation vs. 39% policy with TIPS) has benefited the overall Pension Fund performance for the Fiscal Year through May.
- As of June 1, 2011, duration was 8.5, compared to 10.3 at December 31, 2010.

Hedge Fund

	April	May	FYTD as of 5/31/11
Hedge Funds*	2.22%	-0.22%	11.42%
Benchmark*	-1.14%	1.27%	8.33%

*Based on one month lag –cash adjusted

- The hedge fund portfolio invested approximately \$80million net during the month of May which included \$50 million added to both Pershing Square and ThirdPoint. In May, the portfolio invested approximately \$42 million net which included \$25 million added to both Lynx and Winton. All investments were previously communicated with the SIC.
- FYTD, All segments of the portfolio have produced positive returns, with Equity Long/Short and Event Driven producing the highest returns. The best performing fund has been Omega Overseas (L/S) which is up 39%.

Commodities

	April	May	FYTD as of 5/31/11
Commodities/RA	3.26%	-3.20%	35.51%
Benchmark	3.46%	-5.06%	32.60%

- The Fund remains underweight commodities as we continue to build out the program. The underweight has been intentional as we are concerned about a large pull back in commodities and have been prudent about adding exposure. This underweight has been a detractor for the fiscal year, but was additive to performance in May.
- We have completed two \$50 million commodity linked notes tied to Brent Crude in the last 30 days. Both notes include downside protection in the structure.
- We have begun to add commodity exposure through internal management via ETFs. We have approximately \$50 million of exposure to Gold and a smaller amount to a Dow Jones commodity ETF. We are also hedging ETF positions with options.

Private Equity

- In April, distributions exceeded contributions for the 5th month in a row, with distributions of \$67 million and contributions of \$61 million. In May, distributions were \$76 million and contributions were \$101 million. FYTD through May, we have received \$872 million in distributions and made \$1.1 billion in contributions.
 - As of May 31, 2011 the portfolio has approximately \$4.0 billion remaining in uncalled committed capital based on \$8.8 billion in total commitments. On June 30, 2010, uncalled committed capital was \$4.0 billion.
 - Since inception (July 2005), the private equity portfolio has produced a net IRR of 5.28%, based on the most recent quarterly reports received from General Partners.
-

Real Estate

- In April 2011 we funded \$25 million in capital calls and received distributions of \$10 million. In May 2011 we funded \$34 million in capital calls and received distributions of \$10 million. FYTD through May, we have funded \$599 million in contributions and received \$144 million in distributions from the Real Estate portfolio.
- As of May 31, 2011 the portfolio has approximately \$1.1 billion remaining in uncalled committed capital based on \$4.5 billion in total commitments. On June 30, 2010, uncalled committed capital was \$1.2 billion.
- Since inception, the real estate portfolio has produced a net IRR of -8.2% based on the most recent quarterly reports received from the General Partners.
