Treasurer Scudder Identifies Swing Space for Life-Safety State House Restoration

TRENTON – State Treasurer Ford M. Scudder today outlined plans for the relocation of Governor’s Office and Department of State personnel in preparation for the first comprehensive restoration of the State House in 60 years.

The Department of the Treasury has identified two office locations in Trenton that will serve as swing space during the estimated four-year restoration project. Governor’s Office personnel will relocate to 225 W. State Street, a State-owned building. This location is convenient to the Legislative State House and Annex buildings, allowing for continued collaboration among the Legislative and Executive branches.

Department of State personnel, currently located in 225 W. State Street, will relocate to 33 W. State Street, a building currently leased by the State.

The Department of the Treasury’s Division of Property Management & Construction (DPMC) will immediately begin preparing those spaces for occupancy and will move personnel as soon as practicable.

Treasury and the DPMC will present additional details in the coming weeks.
