78. DEPARTMENT OF TRANSPORTATION 60. TRANSPORTATION PROGRAMS 61. STATE HIGHWAY FACILITIES

OBJECTIVES

- 1. To maintain State roads, bridges and railroad properties, to ensure safe and efficient movement of traffic.
- 2. To maintain and install all electrical devices required for traffic control, direction or illumination.
- 3. To maintain and operate the physical plant required to carry out Departmental responsibilities and objectives.
- 4. To maintain and improve the vehicular fleet of the Department.
- 5. To connect the principal metropolitan areas, cities, industrial centers and recreation areas with a major highway network.
- 6. To connect at the State's borders with routes of the interstate system and continue these roads through New Jersey.
- 7. To provide a system of rural and suburban highways that facilitate travel from farm-to-market, travel on rural mail routes, safe school bus routes and travel from home to job for all citizens.
- 8. To provide the Department with the physical plant necessary to carry out its responsibilities.
- To do the above in a manner consistent with protecting the environment, minimizing residential and commercial relocation, while utilizing a high standard of design.

Program Classifications

- 06. Roadway and Bridge Maintenance--Rehabilitates existing roads and bridges on the State highway system for greater safety and convenience and to decrease maintenance costs; provides preventive maintenance programs for highways, bridges, signs and lines for public safety and convenience. Provides an efficient snow and ice control program for improved public safety and convenience in inclement weather. Safeguards the roadside through programs for landscape maintenance, control of roadside advertising and junkyards, and control of access to and openings on State highway and public transportation properties. Provides for maintenance programs on non-operating State-owned railroad properties to preserve the capital investment and public safety.
- 07. Electrical Operations—Constructs, maintains and operates traffic signals, highway lighting facilities, sign illumination and miscellaneous electrical devices constructed on the State Highway System; and maintains and operates movable bridges.
- .08. Physical Plant—Maintains and repairs the physical plant to ensure safe and healthy working conditions and preclude unnecessary and costly deterioration of capital investment. The physical plant, capital and additions and improvement programs provide the office, garage and shop facilities, major maintenance facilities, salt and chemical storage and equipment storage buildings, warehouses and laboratories needed.
- 09. Equipment Maintenance and Operations—Provides and maintains the equipment fleet of the Department, including highway maintenance and repair equipment, administrative and support vehicles; provides specifications and inspection of new equipment, purchased by or for other units of the Department; operates a Statewide network of service facilities, including fuel dispensing for other agencies of the State; evaluates new developments in equipment design and usage; fabricates specialized equipment as needed and provides driver and specialized equipment operator services and maintains the Department's mobile radio system.
- 10. Federal Aid Interstate Highway Projects--The Interstate Highway Network is a Federally aided system designed to provide limited access highways connecting the nation's principal metropolitan areas, industrial centers and to serve national defense. Federal aid for this system amounts to 90% of eligible costs.
- 20. Federal Aid Urban System Highway Projects—Funds projects in urban areas consisting of high volume traffic arterials and collector routes serving the major centers of activity in urban areas of the State. Federal aid for these projects is 75% of the eligible cost.
- 25, Federal Aid Consolidated Primary Highway Projects—The Consolidated Primary System consists of connected main roads important to interstate, Statewide and regional travel and includes rural arterial routes and their extensions into or through urban areas. The majority of State highways in New Jersey are on the primary system. Federal aid for these projects is 75% of the eligible cost.
- 30. Federal Aid Rural Highway Projects--Funds construction improvements on rural roads which contribute to bettering farm-to-market roads, rural mail routes and public school bus routes. Federal share for these projects is 75% of the eligible cost.
- 40. Federal Aid Bridge and Highway Safety Projects—Included are funds for the elimination of hazards at rail-highway crossings and the reduction or elimination of hazards at high hazard (as defined in 23 U.S.C. 152) locations throughout the State. Additionally, a program for the rehabilitation or replacement of functionally obsolescent, structurally deficient or physically deteriorated bridges on the state system is funded from this element. Federal share for the bridge replacement program is 80%, while the safety program share is 90%.
- 60. Non-Federal Aid Highway Projects---Highway construction needs of the State, which are not within the Federal aid programs, are funded from this element. Non-participating costs of Federal aid highway projects are also included when it is necessary to use state design criteria which may exceed federal requirements because of conditions unique to New Jersey.
- 65. Rail Freight Lines--Through acquisition and/or rehabilitation of rail freight lines, this State funded program is designed to prevent the deterioration and abandonment of rail freight service essential to New Jersey's economy.
- 71. Transportation Construction Engineering—Supervises the design, conducts inspection of construction in progress and administers the acquisition of right-of-way, relocation and environmental engineering for projects on the State, County and Municipal road system and the railroad and bus system. Designs traffic control devices, highway lighting facilities, sign illumination and miscellaneous electrical devices. Administers and approves traffic regulations, speed zones, no passing zones, sign installations, and areas of stage construction. Administers and coordinates highway safety programs by analyzing accident and roadway inventory data and developing countermeasures which will eliminate or substantially reduce the potential for accidents.

It is recommended that the unexpended balance as of June 30, 1986 in this account be appropriated.

It is further recommended that the Department be permitted to transfer, in an amount as approved by the Director of the Division of Budget and Accounting, funds previously appropriated for State highway projects, from the Transportation Rehabilitation and Improvement Fund, (Pt. 1979, c. 165) for planning, engineering, design, right-of-way acquisition, or other costs related to the construction of projects financed from the Fund.

- (a) The 1986 appropriation has been adjusted for the allocation of the salary program.
- (b) Appropriation of \$1,500,000 for Roadway Aesthetics was transferred to applicable operating accounts.
- (c) Amounts shown do not represent estimates of bonds to be issued, but merely represent that amount, when added to funds appropriated to the Transportation Trust Fund Authority, will equal the total program authorized for the Department of Transportation.

60. TRANSPORTATION PROGRAMS 62. PUBLIC TRANSPORTATION

OBJECTIVES

- 1. To assure the availability to the public of a viable public transportation system which serves the needs of commuters, the elderly, the handicapped and the transportation disadvantaged, and to provide alternatives to the continuing increase in automobile reliance.
- 2. To continue and improve essential public transportation services through capital improvements.

78. DEPARTMENT OF TRANSPORTATION -- Continued 60. TRANSPORTATION PROGRAMS 62. PUBLIC TRANSPORTATION

Program Classification

04. Railroad and Bus Operations—Maintains essential public transportation services in the State by contracting for services, marketing efforts to increase use of these services, and capital improvements, including the purchase of new and rehabilitation of old equipment and facilities. The elderly and handicapped programs permit eligible citizens to utilize passenger services for reduced fares during off-peak hours and provide special equipment to non-profit organizations to assist those who cannot use scheduled services.

60. TRANSPORTATION PROGRAMS

OBJECTIVES

- 1. To provide financial aid for local highway construction and maintenance.
- 2. To improve and upgrade local roads and streets.

Program Classifications

- 20. Federal Aid Urban System Highway Projects—Funds projects in urban areas consisting of high volume traffic arterials and collector routes serving the major centers of activity in urban areas of the State. Federal aid for these projects is 75% of the eligible cost.
- 30. Federal Aid Rural Highway Projects--Provides funds for construction improvements to rural roads on the secondary system, to provide better farm-to-market roads, rural mail routes and school bus routes. Federal aid for these projects is 75% of the eligible cost.
- 40. Federal Aid Bridge and Highway Safety Projects—Included are funds for the elimination of hazards at rail highway crossings and the reduction or elimination of hazards at high hazard locations throughout the State. Additionally, a program for the rehabilitation or replacement of functionally obsolescent, structurally deficient or physically deteriorated bridges on the local system is funded from this element. Federal share for the bridge replacement program is 80%, while the safety program share is 90%.
- 80. County and Municipal Aid-Provides funds for the laws which finance aid to county and municipal governments for the maintenance of highways, streets, bridges and highway lighting.
- 87. State Aid Road System Projects--Provides funds to assist local governments by contributing to the cost of constructing local roads and streets as part of a Statewide secondary road network. Such aid is 50% for county roads and 75% for municipal streets.

⁽b) Federal and All Other Funds go directly to NJ Transit and are shown here for informational purposes only.

60. TRANSPORTATION PROGRAMS 64. PLANNING AND GENERAL MANAGEMENT SUPPORT

OBJECTIVES

- 1. To develop, revise and maintain a comprehensive master plan for transportation development.
- 2. To oversee the development, revision, and maintenance of urban transportation plans for the metropolitan areas of the State, consistent with federal requirements and directives.
- To assure the continuation of freight service on certain light density rail lines which serve business and industry having local or regional importance to the people of New Jersey.
- 4. To review access permits for the purpose of analyzing transportation impacts both locally and regionally.
- 5. To undertake corridor, area-wide, and site specific studies of traffic and transportation problems to define needs and conceptual solutions for subsequent engineering and environmental investigation.
- b. To perform scientific research and evaluation pertaining, but not limited, to materials; multi-modal transportation structures and components; traffic safety; transport of people and commodities; and systems and techniques pertaining to design, construction, maintenance and operation of multi-modal transportation networks and the cultural and economic impact on the public of planning, acquiring and operating transport systems.
- 7. To promote an orderly and progressive development of the airport system to meet growing air traffic needs: improve the quality of aeronautical facilities; promote flight safety; conduct noise abatement programs and promote air transportation.

Program Classifications

- 02. Planning--Develops the comprehensive master plan and initiates the project development process considering the priority of need, environmental factors, community development, economic and social activities and availability of funding. This action assists in the development of projects which are the exclusive responsibility of the Department, as well as joint ventures between state and local, federal and public agencies, NJ Transit and the private sector; develops and maintains a staff working relationship with the State's metropolitan planning regions; and plans, directs and supervises the collection, analysis and summarization of basic data related to the identification of transportation problems, needs, and formulation of solutions.
- 03. Research and Demonstration—Performs applied research on geometric design of highways, intermodal operations, parking facilities, traffic control devices and traffic surveillance techniques and devices; performs applied research and evaluation in the areas of materials and equipment used in construction and maintenance, structural design of bridges, pavement and related appurtenances, foundations and soils design, experimental pavements and user protective systems; develops and implements through the demonstration phase various research projects to evaluate their viability and functions; and develops, operates and maintains various specialized instrumentation (electronic, mechanical, telemetric, televisual, photographic) for use in research and evaluation studies.
- OS. Modal Services—Through the Division of Aeronautics coordinates all aviation activities in the State of New Jersey; advises the Commissioner on aviation matters; promotes economic development through aviation by providing State funds to create a safe and orderly airport system; seeks to maximize the federal return to New Jersey of the aviation trust fund; maintains an effective implementation of the 'New Jersey Airport Safety Act of 1983"; maintains an effective flight safety program through licensing, inspection and assurance of compliance with the NJSA Title 6; enforces the provisions of the "Airport Hazards Zoning Act of 1983"; coordinates accident investigations; promotes aviation education programs and conducts flight safety seminars; distributes aircraft accident prevention materials; abates aeronautical hazards and minimizes aircraft noise impact; coordinates aviation planning, airport master planning and special aviation studies; ensures that all airports eligible for federal aid receive it by providing up to 50% of the local match; the Division of Public Transportation Services in cooperation with the NJ Translt Corporation, assists in the development and execution of plans for the preservation and improvement of public transit systems; develops, reviews and maintains a comprehensive master plan for all modes of transportation. The Office of Freight Services administers the rail assistance grant programs, plans for the transportations of hazardous materials and assesses needs for transportation services and determines priorities for implementing programs. The Office of Highway Services coordinates and provides an assessment of State and local highway needs for consideration by management and provides liaison with various transportation authorities, public interest groups, activities and efforts for improvements.

78. DEPARTMENT OF TRANSPORTATION -- Continued 60. TRANSPORTATION PROGRAMS

64. PLANNING AND GENERAL MANAGEMENT SUPPORT

- 97. Financial Management—Administers the financial records and fiscal controls in accordance with Department, State and Federal regulations and sound financial management principles; provides management with financial guidance and audit-oriented assistance pertaining to the establishment and control of their programs and program classes. Objectives of fiscal management are met through the more specific operating objectives of the Divisions of Financial Planning and Evaluation and Accounting and Auditing.
- 98. Employee and Support Services—Provides technical, administrative and general support services for the efficient operation of the Department, which includes the Division of Personnel Services, to ensure that all personnel services are properly rendered in accordance with Department needs, Civil Service rules and regulations and union agreements; and the Division of Central Services, which controls and supervises the purchasing, records, reproduction and mail services of the Department.
- 99. Management and Regulatory Services—The Commissioner, with the Deputy Commissioner, manages the activities of the Department, coordinates communication with other agencies, the public, various levels of government and their elected officials; provides leadership, controls operations and executes plans for the construction, rehabilitation and maintenance of the State's highways, roads and bridges and plans for and authorizes safety grants to meet public aeronautical needs; in cooperation with the NJ TRANSIT Corporation, assists in the development and execution of plans for the preservation and improvement of public transit systems; develops, reviews and maintains a comprehensive master plan for all modes of transportation; coordinates the draft of regulations and policies involving the Department's regulatory responsibilities over rail motor business in the State; to ensure that such regulations are carried out through the Office of Regulatory Affairs; administers the Rail Assistance Grant Programs, plans for the transportation of hazardous materials, and assesses needs for transportation services and determines priorities for implementing programs.

It is recommended that sums allocated by the Commissioner of Transportation for planning and research in the annual construction program be transferred or allocated to this account for expenditure.

DEPARTMENT OF TRANSPORTATION

It is further recommended that revenues derived from the "New Jersey Airport Safety Act of 1983", be appropriated for those purposes intended.

It is further recommended that the unexpended balance as of June 30, 1986 in the Planning and Research and Demonstration program classifications be appropriated.

It is further recommended that the unexpended balance as of June 30, 1986, and the reimbursements in the Department stock purchase revolving fund for the purchase of materials and supplies required for the operation of the Department, be appropriated.

⁽a) The 1986 appropriation has been adjusted for the allocation of the salary program.

It is recommended that any appropriation herein or heretofore made for projects and programs within the purview of C54:8A-1 et seq. (Emergency Transportation Tax Act), as determined by the Director of the Division of Budget and Accounting, first be charged to the Transportation Fund established in such Act.

It is further recommended that receipts from fees collected by the Department of Transportation in excess of those anticipated be appropriated.
