Key Points and Issues For April 2010

Acting Director's Note

The public equity markets performed well in April as illustrated by the gain in the S&P 1500 Index of 1.95% and increase in the Barclays Capital Long Government/Credit Index of 3.02%. The domestic equity, emerging market, fixed income including corporate and treasuries, hedge fund, and commodity portfolios all generated positive returns and most portfolios exceeded their benchmarks.

Based upon the leading economic indicators, we believe the global economic recovery will continue with increasing volatility due to instability in the southern European economies. Positive earnings, higher productivity numbers and increasing industrial production surveys illustrate growth, but we are also concerned with the contagion issues presented by Greece's sovereign risk.

The domestic economy continues to illustrate signs of positive growth. Homebuilder equity prices and housing starts are improving; however we continue to watch this sector cautiously as the homebuyer's tax credit has just expired at the end of April. Regulatory reform changes continue to highlight the uncertainty with the financial and healthcare sectors but retail sales, inventories and strong earnings reports demonstrate improvement.

The pension fund returned 1.56% versus the Council benchmark return of 1.52%. Our outperformance for April is primarily attributable to the fixed income relative outperformance as well as positive performance in the domestic and emerging market portfolios.

The market value of the fund is \$68.9 billion as of April 30, 2010, up from \$68.0 billion as of March 31, 2010. For the fiscal year-to-date, the fund is up 19.45% versus the Council benchmark return of 18.57%. We estimate that net benefit payments (i.e., net cash outflows) from the fund since June 30, 2009 are \$5.8 billion. Net benefit payments made in April were \$593 million.

In April, we were net sellers of \$994 million in domestic equities and net buyers of \$508 million in international markets equities. We had net purchases of \$156.8 million in domestic fixed income and we funded approximately \$94 million of commitments to alternative investments.

Domestic Equity

- US equities were strong again in April. Equities in Common Pension Fund A gained 2.30%, versus a 1.95% gain in the S&P 1500. Relative gains came from the Fund's holdings in Apple, ConocoPhillips and United Rental, and a lower-than-index weighting in Berkshire Hathaway, Goldman Sachs and Verizon. For the fiscal year-to-date, equities in Common Pension Fund A have returned 32.95%, as compared to the benchmark S&P 1500's 32.64% return.
- Net sales of domestic equities were \$994 million in April. Sales came mainly from the consumer staples and health care sectors.

Domestic Fixed Income

- Performance for Common Pension Fund B for April was up 3.04%. Excluding the TIPS and high-yield positions contained within Common Pension Fund B, performance was 2.93% versus 3.02% for the Barclays Long Government/Credit Index. For the fiscal year-to-date period, Common Pension Fund B (excluding TIPS and high yield) returned 12.66% versus 10.54% for the Barclays Long Government/Credit Index. The duration of Common Pension Fund B (excluding TIPS and high yield) was 10.91 years as of April 30, 2010.
- The high yield portfolio was up 1.57% for April versus 2.34% for the Barclays High Yield Index. The high yield portfolio was up 32.69% for the fiscal year-to-date period versus 29.87% for the Barclays High Yield Index. The TIPS portfolio returned 4.42% in April versus 2.37% for the Barclays TIPS Index, and was up 9.55% for the fiscal year-to-date versus 7.99% for the Barclays TIPS Index.
- Within domestic fixed income, we had net purchases of \$156.8 million in domestic fixed income in April, consisting of purchases of \$689.6 million partially offset by sales of \$532.8 million.

International Equity/Fixed Income

- Performance for Common Pension Fund D for April was -0.92% versus -0.74% for the Custom International Equity Index, the benchmark for the international portfolio. The Emerging Market portfolio contributed positively during April, with a return of 1.73%. For the fiscal year-to-date period, Common Pension Fund D returned 21.54% versus 22.8%.
- On a country level, United Kingdom was the strongest positive contributor to return for April on a relative basis. An underweight exposure to the materials sector as well as stock selection in the energy sector was the main source of positive contribution. Our performance in Italy at -2.1% had the second most positive contribution to return as the weighting was 0.9% versus 1.8% for the

benchmark. Japan contributed negatively to return on a relative basis because of stock selection.

- Underweighting European Financials had the strongest relative contribution to return for the month of April. More specifically, our underweight stance towards Southern European commercial banks provided the greatest contribution to returns. Metal and mining also contributed positively on a relative basis due to both stock selection and our overall weighting. Industrials and consumer discretionary contributed negatively to the returns in April.
- We were net buyers of \$508 million of international markets equities in April. Furthermore, a net buy of \$687 million of Canadian equities during the month brought our weighting there from 2.2% at the end of March to 7.5% at the end of April. This is in line with the long term positive outlook we have for the Canadian equity market as well as a reflection of the 8.6% weighting Canada has within the new benchmark. We added another \$300 million to Emerging Markets through ETFs increasing our weighting in that space from 12.3% at the end of March to 14.7% at the end of April. In Southern Europe we had sales of \$173.4 million in equities.

Alternatives

- The commodity portfolio was up 2.40% compared to 1.94% for the Dow Jones UBS Total Return benchmark. For the fiscal year to date, the commodity portfolio returned 14.1% versus 10.03% for the benchmark. Performance for the \$300 million infrastructure portfolio in April was -1.21% versus -1.47% for the Macquarie Global Infrastructure 100 Index. The portfolio had an average dividend yield of 4.8% for the month of April.
- We funded approximately \$94 million of commitments to private equity and real estate investments in April. Additionally, we received distributions of approximately \$42 million during the month. The major investment for the month was \$15.0 million into TA Realty Associates IX LP, a real estate fund focused on investing mostly in suburban industrial, office, multifamily and retail properties.
- The Hedge Fund portfolio returned 1.08% for April versus its benchmark return of 0.98%. Fiscal year to date, the hedge fund portfolio returned 18.14% versus 8.6% for the HFRI Fund of Funds Composite Index. We received approximately \$3.1 million in distributions from prior redemptions within this portfolio during the month of April.

Cash Management Fund

- Total assets in the Cash Management Fund were \$14.6 billion as of April 30, 2010. The current yield is 0.39% for state participants and 0.29% for “non-State” participants.

* Not Yet Funded as of April 30, 2010

(1) Represents investments made to the underlying funds plus capitalized expenses paid, less recallable returns of capital. A portion of the funded amount may not reduce New Jersey Portfolio's remaining commitment to the underlying funds. (2) Represents remaining commitments calculated by subtracting total capital contributions for investments and inside expenses from total commitment and adding back recallable returns of capital. A portion of the funded amount may not reduce New Jersey Portfolio's remaining commitment to the underlying funds (and therefore the commitment less the funded amount may not equal the remaining commitment) (3) Represents total proceeds returned by underlying funds, excluding recallable returns of capital. (MW) Contribution represent the current market value of the public Exchange Traded Index as of 4:30 10. (L) The fund is currently being fully deemed with realized loss. (R) These funds are being redeem and distribution represents current redemptions. All Int Infrastructure Stock in Common Pension Fund E has been during the month of April 2010.
