Key Points and Issues For May 2010

Acting Director's Note

The public equity markets fell in May as illustrated by the loss of 7.89% in the S&P 1500 Index and the 10.46% drop in the Custom International Equity Index. Treasuries, TIPS, Agencies, Corporate Bonds, and the Cash Management were positive performing portfolios as the financial markets faced significant volatility during the month. The domestic equity, TIPS, high yield, and hedge fund portfolios outperformed their benchmarks; however the economy and financial markets continue to face a number of positive and negative economic events creating a challenging environment for investors.

At the positive end of the spectrum, we believe lower interest rates, improving corporate balance sheets and increasing consumer confidence are factors illustrating positive economic growth and a continuing recovery. On the negative end, the European banking and sovereign debt issues, the potential slowdown for the Chinese Economy, the effects of Gulf of Mexico oil spill and the impact of financial regulatory reforms may present challenges for domestic and global economic expansion.

These macroeconomic events change frequently, creating a situation where investors vacillate between positive and negative views of the financial markets and the economy. Assessing these rapidly changing economic events creates a situation where our views and strategies are constantly challenged, as we decipher which information to include in and exclude from our investment decisions. We are still focused on the strategies outlined in the March annual investment plan and we are cautiously optimistic on the future of the domestic and global economies.

The pension fund returned -3.80% versus the Council benchmark return of -3.78%. Our performance for May is primarily attributable to the correction in the domestic and international equity markets.

The market value of the fund is \$67.6 billion as of May 28, 2010, down from \$68.9 billion as of April 30, 2010. For the fiscal year-to-date, the fund is up 14.92% versus the Council benchmark return of 14.09%. We estimate that net benefit payments (i.e., net cash outflows) from the fund since June 30, 2009 are \$6.4 billion. Net benefit payments made in May were \$593 million.

In May, we were net buyers of \$479 million in domestic equities and \$143 million in international equities. We were net sellers of \$125 million in domestic fixed income and we funded approximately \$141.7 million in commitments to alternative investments.

Domestic Equity

- US equities gave back the gains for the calendar year in May. Equities in Common Pension Fund A fell 7.46%, versus a 7.89% drop in the S&P 1500. Relative performance benefitted from the Fund's overweight positions in the airline and wireless telecom industries, both of which had positive returns for the month, and from a continued underweight position in General Electric. For the first five months of calendar 2010, equities in Common Pension Fund A have returned 0.15%, versus a 0.65% decline in the S&P 1500. For the fiscal year-to-date, Common Pension Fund A equities are up 23.10% versus 22.18% for the index.
- The fund was a net buyer of \$479 million of domestic equities in May, partially reversing \$3.7 billion of prior net sales during the fiscal year. May's purchases were heavily weighted toward financial stocks.

Domestic Fixed Income

- Performance for Common Pension Fund B for May was up 0.93%. Excluding the TIPS and high-yield positions contained within Common Pension Fund B, performance was 1.27% versus 1.34% for the Barclays Long Government/Credit Index. For the fiscal year-to-date period, Common Pension Fund B (excluding TIPS and high yield) returned 14.09% versus 12.02% for the Barclays Long Government/Credit Index. The duration of Common Pension Fund B (excluding TIPS and high yield) was 10.68 years as of May 28, 2010.
- The high yield portfolio was down 1.63% for May versus -3.59% for the Barclays High Yield Index. The high yield portfolio was up 30.52% for the fiscal year-to-date period versus 25.2% for the Barclays High Yield Index. The TIPS portfolio returned 0.65% in May versus -0.01% for the Barclays TIPS Index, and was up 10.27% for the fiscal year-to-date versus 7.98% for the Barclays TIPS Index.
- Within domestic fixed income, we were net sellers of \$125.1 million in domestic fixed income in May, consisting of sales of \$432.8 million partially offset by purchases of \$307.7 million.
- Arch Capital Group Ltd., XL Capital Ltd and Nabors Industries Ltd, incorporated in Bermuda, Cayman Islands and Bermuda, respectively, will be classified as U.S. based companies based upon our review of the various factors as set forth in the State Investment Council Regulations.

International Equity/Fixed Income

- Performance for Common Pension Fund D for May was -10.49% versus -10.46% for the Custom International Equity Index, the benchmark for the international

portfolio. For the fiscal year-to-date period, Common Pension Fund D returned 8.78% versus 9.95%.

- The Asia/Pacific ex-Japan region was the best performing area on a relative basis. At the country level, Australia was the strongest positive contributor to return for May on a relative basis. Our performance in Italy at -8.48% versus -14.97% for the benchmark had the second most positive contribution to return as the weighting was 0.8% versus 1.7% for the benchmark. The overweight in the Japan market had a marginally positive contribution to return on a relative basis.
- Underweighting European energy companies had the strongest relative contribution to return for the month of May. In addition, our underweight in European Utilities and overweight in Japan Utilities contributed positively to return. Industrials and Consumer Discretionary contributed negatively to the returns in May.
- We were net buyers of \$143 million of international markets equities in May. We added another \$380 million to Emerging Markets through ETFs and equity investment increasing our weighting in that space from 14.7% at the end of April to 17.6% at the end of May. This strategy is in line with our intent to close the underweight position of this asset class to the benchmark weighting of 22.9%. In Developed Europe, we had sales of \$225 million in equities.
- China Unicom Hong Kong Ltd, Lenovo Group Ltd and Citic Pacific Ltd, all incorporated in Hong Kong, will be classified as emerging market companies based upon our review of the various factors as set forth in the State Investment Council Regulations.

Alternatives

- The commodity portfolio was down 7.20% as compared to -6.92% for the Dow Jones UBS Total Return benchmark. For the fiscal year to date, the commodity portfolio returned 5.89% versus 2.42% for the benchmark. Performance for the first five months of calendar year 2010, the commodity portfolio declined 7.57% versus -9.89% for the Dow Jones UBS Total Return benchmark.
- At the March Council meeting, we presented our intention to purchase up to \$350 million of such investments, the terms of which had not been finalized at that time. We purchased \$150 million in commodity linked notes with J.P. Morgan Chase & Co. during May. The note has a maturity of one year and we will receive our principal plus/minus the return on customized commodity indices.
- We funded approximately \$141.7 million of commitments to private equity and real estate investments in May. Additionally, we received distributions of approximately \$38.1 million during the month. The major investment for the month was \$15.75 million into Oak Hill Capital Partners III.

- The Hedge Fund portfolio returned -2.67% for May versus its benchmark return of -2.84%. Fiscal year to date, the hedge fund portfolio returned 14.99% versus 5.39% for the HFRI Fund of Funds Composite Index. We received approximately \$1.0 million in distributions from prior redemptions within this portfolio during the month of May.

Cash Management Fund

- Total assets in the Cash Management Fund were \$15.8 billion as of May 28, 2010. The current yield is 0.35% for state participants and 0.25% for “non-State” participants.

* Not Yet Funded as of May 31, 2010

(1) Represents investments made to the underlying funds plus capitalized expenses paid, less recallable returns of capital. A portion of the funded amount may not reduce New Jersey Portfolio's remaining commitment to the underlying funds. (2) Represents remaining commitments calculated by subtracting total capital contributions from total commitment and adding back recallable returns of capital. A portion of the funded amount may not reduce New Jersey Portfolio's remaining commitment to the underlying funds (and therefore the commitment less the funded amount may not equal the remaining commitment). (3) Represents total proceeds returned by underlying funds, excluding recallable returns of capital. (R) These funds are being redeemed and distribution represents current redemptions.
