# SUMMARIES OF REVENUES EXPENDITURES AND FUND BALANCES

This section provides an overview of the major revenue assumptions incorporated in the Governor's Budget recommendations. The tables included in this section highlight the State's major revenue sources, such as the income tax, sales tax, corporation tax, etc. and provides projections for the upcoming fiscal year.

Combined Summary of Revenues, expenditures and fund balances;

Overview of State and National economies and revenue outlook;

Anticipated revenues (Schedule I) used to support general State Operations and State Aid and Grant Programs;

Appropriated Revenues (Schedule II) dedicated to the support of specific programs or activities.

#### SUMMARIES OF REVENUES, EXPENDITURES AND FUND BALANCES

The basis of budgeting in New Jersey is in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB) with certain exceptions. GAAP is the same basis utilized in the preparation of the State's audited Comprehensive Annual Financial Report. In accordance with this basis, revenues are estimated and recognized when they can be accrued; that is, when they become both measurable and available to finance expenditures of the fiscal period. Appropriations are recommended at a level sufficient to recognize all accrued expenditures applicable to the fiscal period. Goods and services delivered during a fiscal period are accrued as expenditures if not actually paid for by year end. Note that the use of the term "expended" to report the most recent actual year activity in this budget is not in strict accordance with GAAP, in that this amount includes encumbrances which under GAAP are reservations of fund balance. In addition, under GAAP certain grants and other financial assistance programs are required to be recorded as revenues and expenditures but are not part of the budget.

The schedules and exhibits contained in this section provide both summary and detailed financial information for all funds maintained by the State. Individual funds are grouped into one of the following categories--General State Funds, Special Revenue, Capital Projects, Trust Funds.

GENERAL STATE FUNDS include the General Fund, Property Tax Relief Fund, Casino Revenue Fund, Casino Control Fund and Gubernatorial Elections Fund.

The General Fund is the fund into which all State revenues, not otherwise restricted by statute, are deposited and from which appropriations are made. The largest part of the total financial operations of the State is accounted for in the General Fund. Revenues received from most taxes, federal revenues, and certain miscellaneous revenue items are recorded in the General Fund.

The Property Tax Relief Fund accounts for revenues from the New Jersey Gross Income Tax. Revenues realized from the Gross Income Tax

are dedicated by the State Constitution. All receipts from taxes levied on personal income of individuals, estates, and trusts must be appropriated exclusively for the purpose of reducing or offsetting property taxes. Annual appropriations are made from the fund, pursuant to formulae established by the Legislature, to counties, municipalities, and school districts.

The Casino Revenue Fund accounts for the tax on gross revenues generated by the casinos. Gross revenue refers to the total of all sums actually received by a licensee from gaming operations, less the total sums paid out as winnings to patrons. Appropriations from this fund must be used for reductions in property taxes, utility charges and other specified expenses of eligible senior and disabled citizens.

The Casino Control Fund accounts for fees from the issuance and annual renewal of casino licenses, work permit fees, and other license fees. Appropriations are made to fund the operations of the Casino Control Commission and the Division of Gaming Enforcement.

The Gubernatorial Elections Fund is used to account for receipts from the one dollar designations on New Jersey Gross Income Tax returns. When indicated by the taxpayer, one dollar of the tax is reserved from gross income tax revenues (Property Tax Relief Fund) and credited to the Gubernatorial Elections Fund. These funds are available for appropriations pursuant to the New Jersey Campaign Contributions and Expenditures Reporting Act, as amended.

SPECIAL REVENUE FUNDS account for resources legally restricted to expenditure for specified current operating purposes. (While the Property Tax Relief, Casino Revenue, Casino Control, and Gubernatorial Elections Funds actually fall into this category, they are included under General State Funds as they make up an integral portion of the State's Annual Budget).

CAPITAL PROJECT FUNDS account for financial resources used for the acquisition or construction of major capital facilities for State use.

TRUST FUNDS account for the transactions related to assets, liabilities and fund equity held in a trustee capacity by the State.

### COMBINED SUMMARY—ALL FUNDS REVENUES, EXPENDITURES AND FUND BALANCES (thousands of dollars)

#### **National Economy Overview**

Gross Domestic Product continued to expand through 2000 at a record pace, making it the second best year since 1984. The economic expansion is projected to continue at more moderate rates of 3.0+% in the next two fiscal years.

In 2000, Real Gross Domestic Product (GDP) grew at 5.2%, above the revised 1999 rate of 4.2%. The 117-month expansion through 2000 marks the longest in history, with continued employment growth (2.1%) and mild inflation (3.5%).

Real consumer spending continued to grow at the same record pace of 5.3% set in 1999, the highest rate since the recovery began in 1992. Real consumption of durable goods continued its rapid double-digit surge at 10+%, somewhat below the revised 1999 rate of 12.4%. The cycle of the Federal Reserve's interest rate hikes, turmoil in international currency markets, and stock market fluctuations contributed to recent softness in consumer confidence and spending. NASDAQ closed down 39.2% for the year, posting the worst yearly decline in history. The Dow Jones Industrial Index and S&P 500 also declined by 6.1% and 10.1%, respectively in 2000.

Most national forecasters expect a soft landing scenario with slower GDP growth in 2001 and 2002 but not an economic recession. Uncertainties in the international economies are likely to remain due to oil price and currency issues. The recent interest rate cut by the Federal Reserve with further cuts likely would hold the slide in consumer spending, particularly on durable goods. Business investment is expected to slow down amidst worries of future corporate earnings.

National economic growth will continue in 2001 and beyond at a more moderate pace, with GDP growth in the range of 3.2% to 3.5%. Real

consumer spending is expected to moderate in 2001 at 3.0%, as consumers turn more cautious. Income growth is anticipated to remain strong at 5.6% in 2001 and 5.2% in 2002. Employment growth rates are expected to drop below 2% for the first time in seven years but still remain strong. Business investment in durable equipment is expected to slow in 2001 with the real growth rate dropping under 10% for the first time in nine years.

#### **New Jersey Economy Overview**

During 2000, the New Jersey economy enjoyed another strong year, making it the second best year since 1988. Employment grew for the eighth consecutive year since the bottom of the recession in 1992. Strong employment growth of 1.5% drove employment to a record level of 3.92 million, adding 439,400 jobs since January 1994. Personal income grew at a record pace of 5.4%, surpassing the growth rate in 1999. Real Gross State Product (GSP) increased 3.5% in 2000, the second highest growth since 1988. Employment growth has been strong since mid-1996, with growth for the past four years ranging between 1.5% and 2.4%. This is the best growth in the mid-Atlantic region. Although the national employment growth has been above the New Jersey rate since 1987, the difference has narrowed substantially since 1997. Most of the job growth was in the service sector, which increased at 2%, adding over

50,000 jobs in 2000. Construction jobs

continued to bounce up at the strong pace set in

1997, increasing at 4.9%, more than double the rate experienced in 1999. Manufacturing jobs

declined by 1.4% in 2000, continuing the

generally declining trend in this sector.

However, job losses in manufacturing were

slower in 2000, relative to the steep drop in the

The strong income picture along with a low unemployment rate supported a resurgence in consumer spending. The 8.5% growth in durable goods retail sales surpassed the national

previous year.

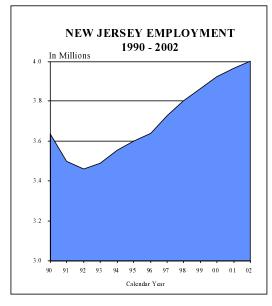

rate for the second consecutive year in 2000. New vehicle registrations grew at 10.5%, faster than the national rate, hitting their highest level since 1986. Sales of existing homes fell sharply, in line with the declining trend nationally.

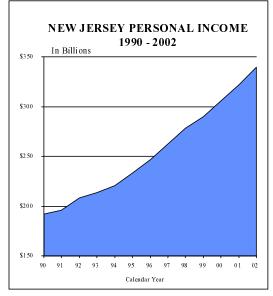

#### **Economic Forecast**

The outlook for the national economy, as well as the New Jersey economy, is for continued growth at lower rates. Even though the economic performance is forecasted to erode somewhat, all national models assign the threat of economic recession during 2001 and 2002 a low probability. The international economic health, particularly of national trading partners, is likely to continue the improvement started during 1999. If productivity holds and the interest rate environment continues to improve, the economy should be able to sail through rough waters without a hard landing. The Consumer Price Index is anticipated to remain modest, at around 2.5% to 3.0% level, in 2001 and 2002.

Continuing healthy employment levels, steady personal income growth and relatively low interest rates will continue to support consumer and business spending. National employment growth is expected to moderate to 2.1% in fiscal 2001 and 1.2% in 2002. Personal income growth is projected to moderate at 5.6% in 2001 5.2% in 2002. Consumer durable and expenditures are expected to grow at moderate rates of 3.4% in 2001 and bounce up to 4.1% in 2002.

New Jersey enters the new millennium with a strong economy and is expected to follow the general national trend in 2001 and 2002. Employment growth is projected to decline slightly to 1.0% in 2001 and in 2002. Personal income growth is expected to remain above 5.0% for the next two years. Housing starts are expected to ease to around 25,000+ units during the next two years, below the 33,000 units level reached in 1999. New vehicle registrations are projected to moderate from the record set in 2000 but remain strong at 600,000+ units during 2001 and 2002.

#### Fiscal 2001 Anticipated Revenue

The current estimate of \$21.5 billion in total fiscal 2001 revenue is \$343.8 million more than when the Governor certified revenues in June 2000.

The three largest taxes, Gross Income, Sales and Use, and Corporation Business, account for 72% of total revenues and are now forecast to yield \$15.6 billion. This is an increase of \$219.7 million over certified revenues, and primarily reflects an upward revision in the Income Tax estimate (+\$572 million) net of the lowered estimates for the Sales and Corporate taxes (-\$352 million), in line with recent downward swings in revenues due to softness in the economy. Total revenues from other major taxes are revised upward by \$33 million, primarily to incorporate trends in year-to-date collection patterns.

The Sales and Use Tax is estimated to generate \$5.84 billion, a 6% rate of growth compared to the 9% rate originally projected. The estimate was lowered because of the softer than expected level of consumer and business purchases in the last half of 2000 when the effect of interest rate increases, instituted by the Federal Reserve over the past 15 months, started to slow the economy. The historic slump of the financial markets, slowing international growth and corporate profits, and softening consumer confidence put a chill on continued high levels of consumer and business durable goods purchases.

The Gross Income Tax forecast for fiscal 2001 is revised up to \$8.31 billion, an increase of \$572 million over the June 2000 certified revenue estimate. This represents a growth of 15.3% rather than the 7.4% growth rate anticipated in June 2000. Stronger than expected employer withholdings growth of 17.8% for 2000 through November underscores the growth of the 2000 tax base. This is the third consecutive year of double-digit growth and the

strongest growth in fifteen years. In addition, the strong flow of estimated payments for tax year 2000, up 20% through November, clearly suggests that 2000 was an extraordinary year. In the past four years estimated payments grew an average 16% annually.

The Corporate Business Tax is revised down by \$168 million to \$1.41 billion for fiscal year 2001. This represents a decline of 2.6% compared to the 3.5% growth in CBT revenues in fiscal 2000. In June the CBT revenues were anticipated to grow nearly 9%. This shift reflects an unexpected weakening in fourth quarter corporate estimated payments for tax year 2000 which implies weaker tentative payments in April 2001 and smaller estimated payments for tax year 2001.

#### **Fiscal 2002 Revenue Projections**

Revenues for fiscal 2002 are expected to grow at a steady pace as the national economy adjusts to more sustainable long-term growth levels.

#### **Sales Tax**

The forecast of \$6.25 billion for fiscal 2002 Sales Tax revenue is an increase of \$408 million, or 7.0%, compared to revised fiscal 2001 with a projected growth of 6%. This reflects an expectation of continued growth with improved underlying economic forces compared to fiscal 2001. The benefits of future interest rate cuts are expected to bode well for fiscal 2002 and stabilize consumer confidence and spending by late 2001.

#### **Corporation Business Tax**

The forecast of \$1.5 billion for fiscal 2002 Corporation Business Tax revenue is an increase of \$134 million, or 9.5%, compared to fiscal 2001. This increase assumes an underlying growth in gross payments of 2% and refund growth of 10%. It also includes \$200 million in revenue from anticipated legislative changes to minimize the use of tax loopholes and \$36

#### **REVENUES AND EXPENDITURES**

million in revenue loss from the first year phasein of the elimination of the tax on subchapter S corporations.

#### **Gross Income Tax**

The forecast of \$8.92 billion for fiscal 2002 is an increase of \$606 million, or 7.3%, over fiscal 2001 revenue. This is lower than the strong double-digit growth in recent years reflecting lower employment and stable wage income growth for 2001-2002 compared to the strong growth in the 1998-2000 period and slower growth at the top of the income distribution due to less frantic financial markets.

It is anticipated that the tax base (New Jersey Total Income) will spike in 2000 to 10.5% after growing 8.2% in 1998 and 8.0% in 1999 due in part to the explosive growth in the financial markets in late 1999. In 2001 and 2002, the tax base is expected to continue to grow but at more moderate rates of 5.2% and 5.9%, respectively. Growth in the amount of income over \$100,000, which has fueled the GIT revenue growth since 1995, has averaged around 18% annually (1995-1998). It is expected that this slowed to 15% in 1999 and will spike up to 20% in 2000, and then fall back to 9% and 10% in tax years 2001-2002, respectively.

#### STATEMENT OF ESTIMATED REVENUES AND EXPENDITURES

A description of the major categories of anticipated revenue sources within the five funds and a description of the principal taxes are discussed in the following.

#### **GENERAL FUND**

#### **Major Taxes**

The Major Taxes category is composed of fourteen taxes or fees which are levied within the State. The majority of the revenue is generated from the sale and use of goods and services; general business taxes, which are received from various corporations; motor vehicle fees; and other excise taxes. A description of principal sources, all raising more than \$200 million, follows:

The Sales and Use Tax Act imposes a tax at the rate of 6 percent on receipts from retail sale, rental or use of tangible personal property; retail sale of producing, fabricating, processing, installing, maintaining, repairing, storing and servicing tangible personal property; certain advertising services; sales of restaurant meals; rental of hotel and motel rooms; telecommunications; alcohol; cigarettes; non-prescription drugs; soaps and detergents; disposable paper products; and certain admission charges. Sales of food, clothing, and personal and business services not specifically enumerated in the law are exempt.

The Corporation Business Tax imposes a franchise tax for the privilege of having or exercising a corporate charter or doing business, employing or owning capital or property, or maintaining an office in New Jersey. The tax is applicable to every corporation not expressly exempted. The effective rate is 9 percent of the entire net income allocated to New Jersey.

The Motor Fuels Tax applies to sales of gasoline, diesel fuel, or liquified petroleum gas and compressed natural gas used in motor vehicles on public highways. The tax is \$.105 per gallon for gasoline and \$.135 per gallon for diesel fuel, and half the gasoline rate for other gases.

The Motor Vehicle Fees include automobile and truck registrations, drivers' licenses, and miscellaneous fees collected by the Division of Motor Vehicles.

The Transfer Inheritance Tax applies to the transfer of personal property and New Jersey real property in estates. The tax rates depend on the amount received and the relationship between the decedent and the beneficiary. No tax is imposed on immediate family or spouses.

The Insurance Premium Tax applies to premiums collected on insurance risks by every insurance company transacting business in New Jersey. The tax base is gross contract premiums less specific deductions.

The Cigarette Tax is imposed at the rate of \$.04 per cigarette. The tax is collected primarily from licensed distributors who receive the cigarettes directly from out-of-state manufacturers.

The Petroleum Products Gross Receipts Tax is imposed on all companies engaged in the refining/distribution of petroleum products in the State. It only applies to the first sale (not exports) of petroleum products in the State.

#### Miscellaneous Taxes, Licenses, and Other Departmental Fees

This category includes revenues received by the various State agencies. Typical items include license and inspection fees, recreation and boating fees, institutional and patient fees, investment earnings, and other similar items.

#### **Interfund Transfers**

The Interfund Transfer category includes monies which were received into various capital projects, special revenue and trust funds because of legal or statutory requirements, and then subsequently transferred into the General Fund as anticipated revenue for expenditure purposes. Included in these types of revenue are the monies received by the State Lottery, and interest earned on investment of bond funds.

#### PROPERTY TAX RELIEF FUND

The Gross Income Tax is a graduated tax levied on gross income earned or received by New Jersey resident and non-resident individuals, estates and trusts. All monies in the fund must be appropriated exclusively for reducing or offsetting property taxes.

#### **GUBERNATORIAL ELECTIONS FUND**

A taxpayer can voluntarily indicate that \$1 of income tax can be set aside into this special fund. Such monies are used to finance a portion of the expenses of gubernatorial primary and general elections.

#### **CASINO REVENUE FUND**

A tax of 8 percent on the gross revenue of all casinos is deposited into the Casino Revenue Fund. All monies in this fund must be used for reduction in property taxes, and utility and rental charges of eligible disabled and senior citizens.

#### **CASINO CONTROL FUND**

License fees for the issuance of annual renewal of casino licenses, slot machines, non-refundable deposits for each application for a license, and fees for the issuance of various work permits are deposited into the Casino Control Fund. Such revenues are used to support the operation of the Casino Control Commission and the Division of Gaming Enforcement.
