#### Formatted Table

	Summary of Changes
May 21, 1999 Initial Draft	Initial Release 4010
June 8, 1999 Version 2.0	<ul> <li>Added second option for negative remittances that was in version 3070</li> <li>Added some New Jersey rules</li> <li>Document should be FINAL for Pennsylvania</li> </ul>
June 29, 1999 Version 2.1	<ul> <li>Changed "EGS" to "ESP" and "EDC" to "LDC" throughout the guideline. Removed "NJ Definitions" and replaced it with "LDC Definitions" and "ESP Definitions" in the Notes section.</li> <li>Added "How to use the implementation guideline" page. In addition, changed all headers to the true X12 definition. Also corrected the Table on Page 4 to reflect X12 definitions and added the words "X12 Structure" to the title on that page.</li> <li>Clarified the Notes section, including</li> <li>Removed "no lower than ASC X12 Version 003030" from the Notes section in regards to what version you use when sending information through the banking system.</li> <li>Removed, "The data contained in the segments has not changed with any versions above 003030."</li> <li>Removed, "If the remittance is going through the bank, you will receive a minimum of the segments presented in the guideline."</li> <li>Separated Making the other party whole and Not making the other party whole examples.</li> <li>On RMR04, removed "If the total of all RMRs is negative, see Instructions for Handling a Negative Remittance in NOTES Section of this Guideline." This statement is covered on the BPR02 where it is applicable.</li> </ul>
July 1, 1999 Version 2.2	<ul> <li>Fixed examples to show that the Cross Reference Number is required when Making the Other Party Whole and the Posted Date is required when Not Making the Other Party Whole.</li> <li>Added "Must Use" to Payee Name and Payer Name.</li> <li>Added "Must Use" to REF02 segments.</li> </ul>
October 1, 1999 Version 2.2c	<ul> <li>Corrected Notes Instructions for Handling of Negative Remittance Option 2 to state BPR02 versus BRP02.</li> <li>Corrected DTM*809 (Date Posted) for New Jersey to specify this applies when not making the other party whole</li> <li>Added clarifying note on RMR04 when total is a negative remittance</li> <li>Added Delaware Information</li> <li>Removed confusing information on BPR05.</li> <li>Moved note at the bottom of BPR segment to the Notes section of BPR segment.</li> </ul>
November 4, 1999 Version 2.3	This is a FINAL version for Pennsylvania and New Jersey
December 1999 Version 2.3MD1	<ul> <li>Add Maryland use to document – the changes were added to the version 2.3 of the regional standards</li> <li>Added Table of Contents</li> <li>Added Data Dictionary</li> </ul>
December 23, 1999 Version 2.3MD2	<ul> <li>Added clarifying note to N1*PR and N1*PE for Supplier Consolidated Billing.</li> <li>Added recommendation for beginning value of TRN02 for Maryland</li> </ul>
January 17, 2000 Version 2.3MD3	• Clarified REF*45 is only used when LDC is sending transaction.
April 12, 2000 Version 2.3MD4	<ul> <li>Clarified use of REF*45 for MD.</li> <li>This transaction is considered FINAL for MD</li> </ul>

		<b>July 4, 2009</b> Version 3.0.2D
June 26, 2 Version 2.3M		<ul> <li>Added Note to Option 2 Negative charges to indicate communication needed between payer and payee.</li> <li>Corrected Note on TRN segment to indicate trace number is in TRN02 not TRN01.</li> <li>Correct BPR05 field in example 3 and 4</li> </ul>
September 10, 2 Version		This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Conectiv only).
October 19 ,2 Version 2.4re	-	Incorporate Delaware Electric Coop (DEC) information for Delaware
January 9, 2 Version		This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 22, 2 Version 3.0		Incorporate PA Change Control 046 (Note: RMR03=PR was added for PA for Duquesne Light)

820 Payment/Remittance (4010)

E EDI 820 Payment Remittance Jul 4 2009 3\_0\_2D 4

ASC X12 Version       When sending the remittance advice separate from the payment, you are required to use the ASC X12 version 04010 as documented in this guideline. When making payments through the banking system, you may use whatever ASC X12 version your bank will accept.         You must have a relationship determines what version of the ASC X12 standards you will receive. While a sender may use version 004010, the bank may only be capable of supporting a lower version.         Use of CCD+       EDEWG requires that if the payment and remittance are sent separately and the payment is tability to carry an addendar record that can be used to reassociate the payment and remittance advice and it is inexpensive.         If you currently have a relationship with your bank for sending EDI 820 CCD+ transaction sing is negotiable between you and your bank. The value of the COD+ transaction is use the process you have in place. The standard you are currently using is negotiable between you and your bank. The value of the COD+ transaction is sent without remittance advice.         Reassociation       If a COD+ transaction is sent without remittance advice.         Reassociation       If a COD+ transaction is sent without remittance advice.         Receiver       If a addenda record is used the payment that will also appear on the TRN of the remittance advice.         Receiver       If a COD+ transaction is sent without remittance advice.         Receiver       If a COD+ transaction is sent without remittance advice.         Not have a nED 430 pertainship with the banking system, in the addenda record is built from the information contained in the segmearon the TRN of the remittance advice that is		
electronically. This relationship determines what version of the ASC X12 standards you will receive. While a sender may use version 004010, the bank may only be capable of supporting a lower version.           Use of CD+ Transaction         EDEWG requires that if the payment and remittance are sent separately and the payment is made electronically, a CCD+ transaction will be used. The CCD+ was chosen because of its ability to carry an addenda record that can be used to reassociate the payment and remittance advice and it is inexpensive.           If you currently have a relationship with your bank for sending EDI 820 CCD+ transactions, you can continue to use the process you have in place. The standard you are currently using is negotiable between you and your bank. and does not affect your trading partner because they do not see the data you send to your bank. The value of the CCD+ is the addenda record. The addenda record is used to reassociate the payment and remittance; how that is accomplished is up to the receiver and their bank. Those who do not have an EDI 820 relationship with their bank for CCD+ transactions, may use this document as a starting point for discussions with their bank. The bank may have specific requirements. EDEWG's only requirement is that the trace number be passed on with the payment instruction and also be present in the remittance information through the banking system, it will contain a TRN segment that will contain a trace number that will also appear on the TRN of the remittance advice that is sent directly to the trading partner.           Addenda Record         The addenda record is built from the information contained in the segment(s) for the payment and payment application process. For instance, Mellon Bank may add           • DTM*234 segment that provides the actual date the settlement took place	ASC X12 Version	the ASC X12 Version 004010 as documented in this guideline. When making payments through the banking system, you may use whatever ASC X12 version your bank will
Transaction       made electronically, a CCD+ transaction will be used. The CCD+ was chosen because of its ability to carry an addenda record that can be used to reassociate the payment and remittance advice and it is inexpensive.         If you currently have a relationship with your bank for sending EDI 820 CCD+ transactions, you can continue to use the process you have in place. The standard you are currently using is negotiable between you and your bank. The value of the CCD+ is the addenda record. The addenda record is used to reassociate the payment and remittance; how that is accomplished is up to the receiver and their bank. Those who do not have an EDI 820 relationship with their bank for CCD+ transactions, may use this document as a starting point for discussions with their bank. The bank may have specific requirements. EDEWG's only requirement is that the trace number be passed on with the payment instruction and also be present in the remittance advice.         Reassociation       If a CCD+ transaction is sent without remittance information through the banking system, it will contain a TRN segment that will contain a trace number that will also appear on the TRN of the remittance advice that is sent directly to the trading partner.         Addenda Record       The addenda record is used additional segments to help the receiver in the reconciliation and payment application process. For instance, Mellon Bank may add         •       DTM*234 segment that provides the actual date the settlement took place         •       PER segment with contact information for Mellon ACH Operations         •       PER segment with contact information to Mellon EDI Operations         •       PER segment with contact information for Mellon EDI Oper		electronically. This relationship determines what version of the ASC X12 standards you will receive. While a sender may use version 004010, the bank may only be capable of
transactions, you can continue to use the process you have in place. The standard you are currently using is negotiable between you and your bank and does not affect your trading partner because they do not see the data you send to your bank. The value of the CCD+ is the addenda record. The addenda record is used to reassociate the payment and remittance; how that is accomplished is up to the receiver and their bank. Those who do not have an EDI 820 relationship with their bank for CCD+ transactions, may use this document as a starting point for discussions with their bank. The bank may have specific requirements. EDEWG's only requirement is that the trace number be passed on with the payment instruction and also be present in the remittance advice. E EDI 820 Payment Remittance Jul 4 2009 3\_0\_2D

	July 4, 2009	Deleted: January 9, 2
Te administration of the second	Version 3.0.2D	
Instructions for Handling a Negative Remittance	There are 2 options presented below that may be followed for handling a negative remittance. Each "sending" party should always follow one option – they should not switch options without informing their business partners. A zero remittance is not	
Option 1:	considered negative and may be sent through the banking system. <u>Option 1</u> :	
	The 820 payment instruction and remittance advice will be sent on a daily basis and will include all applicable adjustments as outlined in the guides as long as the adjustments are not larger than the payments. If the adjustments are larger than the payments (creating a negative remittance advice), the remittance advice will be held by the sender for one business day with the expectation that additional payments due the next business day will offset the negative remittance amount.	
	If the negative remittance cannot be offset in one business day, the payer will contact the payee and arrange for the adjustment(s) causing the negative condition to be repaid to the payer. The payer will remove the offending adjustment(s) from the remittance advice, bring the remittance advice to a positive status and transmit the remittance advice to the payee.	
	Example:	
	<b>Day 1</b> : Utility X inadvertently transmits a misapplied payment of \$500,000 to Supplier A on Day 1.	
	<b>Day 3</b> : Utility X discovers the problem on Day 3 and reverses the \$500,000 on the remittance advice that also details payments of \$200,000 causing a negative remittance status:	
	<ul> <li>\$500,000 - Reversal of misapplied payment</li> <li><u>200,000</u> - Payment items for Day 3</li> <li>\$300,000 Negative net amount Day 3</li> </ul>	
	Utility X will hold the remittance advice for one business day to accumulate additional payments to Supplier A with the expectation that additional payments will offset the negative balance.	
	<b>Day 4</b> : Utility X accumulates an additional \$100,000 to remit to Supplier A, but the net is still negative:	
	<ul> <li>\$300,000 - Negative net amount from Day 3</li> <li>\$100,000 - Payment items from Day 4</li> <li>\$200,000 Negative net amount Day 4</li> </ul>	
	At this point Utility X must call the Supplier and notify Supplier A that \$500,000 must be returned to Utility X because on Day 1 a payment was misapplied to Supplier A's account. Supplier A must, upon verification of the error, remit \$500,000 immediately to Utility X.	
	Utility X must remove the -\$500,000 that created the negative remittance condition and forward payments for Day 3 and 4 the Supplier A.	
	-\$500,000 – Reversal of misapplied payment from Day 3 + 200,000 – Payment items for Day 3 + 100,000 – Payment items from Day 4	
	<u>+ 500,000</u> – Removal of reversal of misapplied payment from Day 3 \$300,000 Remit to Supplier A	
Option 2:	<u>Option 2:</u> The 820 payment instruction and remittance advice will be sent on a daily basis and will	
820 Payment/Remittance (4	include all applicable adjustments as outlined in the guides as long as the adjustments are 4010) 6 E EDI 820 Payment Remittance Jul 4 2009 3_0_2D	Deleted: IG820v3-0

1				
1	Deleted:	January	9.	2002

	July 4, 2009 Version 3.0.2D
	not larger than the payments. If the adjustments are larger than the payments (creating a negative remittance advice), the remittance advice will be transmitted with a zero in the BPR02.
	The BPR02 will either contain the total positive amount being moved through the ACH system, which will add up to all your detail line items (RMRs), or zero if total of the detail line items is negative.
	<b>Note:</b> Payer must contact payee of the negative balance to determine how payee will return the funds to the original payer.
LDC Definitions:	The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:
	• EDC – Electric Distribution Company (Pennsylvania, Delaware)
	<ul> <li>LDC – Local Distribution Company (New Jersey)</li> </ul>
	• EC – Electric Company (Maryland)
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:
	• EGS – Electric Generation Supplier (Pennsylvania)
	• TPS – Third Party Supplier (New Jersey)
	• ES – Electric Supplier (Delaware)
	• ES – Electricity Supplier (Maryland)
Cross Reference	There is a cross reference between billing related documents.
Number between 867,	<ul> <li>867 – BPT02 – This document establishes the cross reference number.</li> </ul>
810, and 820	• 810 – BIG05 – This document must have the cross reference number from the respective 867.
	<ul> <li>820 – REF6O (letter O) – When making the other party whole, the 820 to the non- billing party must also include the cross reference number from 867/810 document.</li> <li>Note: In NJ, PSE&amp;G will not be supporting the cross reference on the 810.</li> </ul>

820 Payment/Remittance (4010)

12 <u>E EDI 820 Payment Remittance Jul 4 2009 3\_0\_2D</u>

Segment:	<b>BPR</b> Beginning Segment for Payment Order/Remittance Advice
Position:	020
Loop:	
Level:	Heading
Usage:	Mandatory
Max Use:	1
Purpose:	To indicate the beginning of a Payment Order/Remittance Advice Transaction Set and
	total payment amount, or to enable related transfer of funds and/or information from
	payer to payee to occur
Syntax Notes:	1 If either BPR06 or BPR07 is present, then the other is required.
	2 If BPR08 is present, then BPR09 is required.
	3 If either BPR12 or BPR13 is present, then the other is required.
	4 If BPR14 is present, then BPR15 is required.
	5 If either BPR18 or BPR19 is present, then the other is required.
	6 If BPR20 is present, then BPR21 is required.
Semantic Notes:	1 BPR02 specifies the payment amount.
	2 When using this transaction set to initiate a payment, all or some of BPR06 through
	BPR16 may be required, depending on the conventions of the specific financial
	channel being used.
	BPR06 and BPR07 relate to the originating depository financial institution (ODFI).
	<b>3</b> BPR08 is a code identifying the type of bank account or other financial asset.
	4 BPR09 is the account of the company originating the payment. This account may be
	debited or credited depending on the type of payment order.
	5 BPR12 and BPR13 relate to the receiving depository financial institution (RDFI).
	6 BPR14 is a code identifying the type of bank account or other financial asset.
	7 BPR15 is the account number of the receiving company to be debited or credited
	with the payment order.
	8 BPR16 is the date the originating company intends for the transaction to be settled
	(i.e., Payment Effective Date).
	<b>9</b> BPR17 is a code identifying the business reason for this payment.
	10 BPR18, BPR19, BPR20 and BPR21, if used, identify a third bank identification
	number and account to be used for return items only.
	<b>11</b> BPR20 is a code identifying the type of bank account or other financial asset.
Comments:	
Notes:	Specific qualifiers used in data elements BPR01, BPR03, BPR04 and BPR05 need to be
	discussed and agreed upon between the originator and the originator's financial
	institution prior to using the transaction. In addition to testing with your trading partner,
	you must allow sufficient time to test with your bank. Most banks require setup/lead
	time to implement new trading partners. It is recommended that all new trading partners
	send/receive a prenote in advance of moving live payments.
	For CTX payments and remittance details that travel together. These items may or may
	not be required by your bank. Different banks have different requirements related to the
	BPR elements. Your relationship with your bank will be the deciding factor on what
	information you will send and receive.

2 <u>E EDI 820 Payment Remittance Jul 4 2009 3\_0\_2D</u>

**July 4, 2009** Version 3.0<u>.2D</u>

Segment:	<b>REF</b> Reference Identification (11=ESP Account Number)								
Position:	170								
Loop:	RMR								
Level:	Detail								
Usage:	Optional								
Max Use:	>1								
Purpose:	To specify identifying information								
Syntax Notes:	1 At least one of REF02 or REF03 is required.								
	2 If either C04003 or C04004 is present, then the other is required.								
	<b>3</b> If either C04005 or C04006 is present, then the other is required.								
Semantic Notes:	1 REF04 contains data relating to the value cited in REF02.								
Comments:									
PA Use:	Required if previously provided to LDC.								
NJ Use:	<b>Note</b> : In New Jersey, Conectiv, GPU and PSE&G will store ESP account number and will be required to send it if it was previously provided to the LDC. Rockland Electric will not be storing ESP account number, and will never send it. Conectiv will only be storing 20 characters.								
DE Use:	Conectiv will store ESP account number and will be required to send it if it was previous provided to the LDC. Conectiv will only be storing 20 characters. DEC will store 30 characters.								
MD Use:	Same as PA								
	Note: Conectiv will store ESP account number, but will only store 20 characters.								
Example:	REF*11*1394959								

#### **Data Element Summary**

	Ref.	Data
