January 9, 2002

Version 3.0

Summary of Changes

June 29, 1999 Version 1.0	Initial Release. Changes since last release: <ul style="list-style-type: none"> • Changed “EGS” to “ESP” and “EDC” to “LDC” throughout the guideline. Removed “NJ Definitions” and replaced it with “LDC Definitions” and “ESP Definitions” in the Notes section. • Added “How to use the implementation guideline” page. In addition, changed all headers to the true X12 definition. Also corrected the Table on Page 4 to reflect X12 definitions and added the words “X12 Structure” to the title on that page.
July 14, 1999 Version 1.1	Change Control Process Change #002 – Emergency Change: <ul style="list-style-type: none"> • Corrected X12 Error – changed BGN07 segment to BGN08
October 1, 1999 Version 1.1b	Change Control Process Change #004: <ul style="list-style-type: none"> • Fixed PER examples • Clarified FRF Rejection Code for 810 • Added FRG Rejection Code for 810 <p>Additional changes:</p> <ul style="list-style-type: none"> • Clarified that all day requirements in the Notes section are “business” days. • Moved NJ Notes to its own page • Added Conectiv Delaware information • Removed Rejection Codes “OBW” and “W06” for 867
November 4, 1999 Version 1.2	This is a FINAL version for Pennsylvania and New Jersey
December , 1999 Draft version 1.2MD1	<ul style="list-style-type: none"> • Add Maryland use to document – the changes were added to the version 1.2 of the regional standards • Added Table of Contents • Added Data Dictionary • Added example of rejecting an entire 820 transaction
December 23, 1999 Version 1.2MD2	<ul style="list-style-type: none"> • Added “Accept” values for the BGN08 and OTI01 fields. These values still need to be verified and the rules for using them clarified. • Added positive acknowledgement for 810 for Maryland • Corrected code for positive acknowledgement of 810 to “CF” (Confirm). • Added DTM segments for Date Bill Rendered and Bill Due Date • Added AMT segment for outstanding balance • Create example of rejecting a single account from an 820 • Create example of confirming a bill ready 810
January 17, 2000 Version 1.2MD3	<ul style="list-style-type: none"> • Clarified REF*45 only used when LDC is sending transaction • Clarified several error messages (FRF and TCN)
May 30, 2000 Version 1.2MD4	Clarified use of old account number for MD Corrected data dictionary to show customer name in MD as 60 characters Change Control Process Change #005 <ul style="list-style-type: none"> ▪ Added ADM, NCP, and 008 Rejection Codes for 810 Change Control Process Change #007 <ul style="list-style-type: none"> ▪ Added IIS Rejection Code for 867 Change Control Process Change #013 <ul style="list-style-type: none"> ▪ Added EXP Rejection Code for 810 Change Control Process Change #014 <ul style="list-style-type: none"> ▪ Added PCR Rejection Code for 810 Added Pennsylvania Notes section
July 22, 2000 Version 1.2MD5	<ul style="list-style-type: none"> • Modified MD use of NTE to reflect it is only required if TED02 value is A13 or API. • Remove TCN from valid 867 reject reason. • Correct references to BGN08 (was BGN07). • Added clarifications to improve understanding of transaction

January 9, 2002

Version 3.0

August 14, 2000 Version 1.2MD6	<ul style="list-style-type: none"> • Corrected information in examples, added further clarification notes to examples. • Add 867HU to list of PA transactions on Pennsylvania Notes page. • Made REF*6O optional for 810 (never discussed as required) • Change MD email id to edi@psc.state.md.us • Add TED02 value TXI for invalid TXI information on the 810
August 22, 2000 Version 1.2MD7	<ul style="list-style-type: none"> • Add Note to New Jersey Notes for each LDC's Use of 824 transaction • Incorporate PA Change Control X026 for no current charges on bill • Document PSE&G sending 824 when no supplier charges are on bill
September 10, 2000 Version 1.3	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Conectiv only).
January 7, 2001 Version 2.0	Added Rejection codes to TED segment page 32
October 19, 2001 Version 2.0rev01	<ul style="list-style-type: none"> • Incorporate Delaware Electric Coop (DEC) information for Delaware • Correct BGN01 to allow value of 00 – some examples showed it, but BGN segment based had not included it.
January 9, 2002 Version 3.0	<ul style="list-style-type: none"> • Incorporate SMECO specifics for MD (MD Change Control 003) <p>This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.</p>

Purpose of 824

To automate the communication of application problems occurring with EDI transactions other than the 814's.

Situations and Procedure for Use

This list of "Situations for Use" reflects all situations used by any state using this document. To see which transactions are used by each state, refer to the state-specific "Notes" section.

1. Non-billing party may reject bad 867MU or IU

- a. If 824 action code indicates resend, metering party must correct and resend the transaction within 5 business days or contact the trading partner to agree on an alternative. You need only send the corrected 867, but you may send a cancel 867 and corrected 867 if your system requires that to correct the problem.
- b. If Rate Ready and you sent a good 810, you do not need to resend 810. But you may resend 810 if your system requires that to correct the problem.
- c. If Bill Ready Consolidated Billing, Billing Party must hold bill and restart bill window from time corrected 867 is sent. Corrected 867 shall contain new document due date.
 - ◆ If corrected 867 is good, Non-Billing party must return good 810 by new document due date
 - ◆ If corrected 867 is bad, repeat a-c, until a good 867 is received or other agreement is made between LDC and ESP.

2. For Rate Ready Billing, non-billing party may reject bad 810

- a. If 824 action code indicates resend, billing party must correct and resend corrected 810 within 5 business days or contact the trading partner to agree on an alternative.
- b. If sent good 867, do not need to resend 867. But may send cancel 867 and new 867 if your system requires that to correct the problem.

3. For Bill Ready Consolidated Billing, billing party may reject bad 810

- a. If 824 action code indicates resend, non-billing party may correct and resend 810 immediately if still time in billing window. If not, they must wait until next billing window to resend.
- b. If non-billing party resends 810 and misses billing window, they will receive another 824 stating the 810 was outside the billing window.

This 824 notification replaces the current missed billing window e-mail or phone notifications.

4. Non billing party may reject bad 568

Because the 568 transaction may contain many accounts per transaction, it is difficult to automate resolution of problems. Therefore, 824's for bad 568's will be sent as notification only. Corrective actions will be handled outside the EDI process as agreed upon by the billing and non-billing parties.

January 9, 2002

Version 3.0

5. Non billing party may reject bad 248

820 If action code is resend, billing party must correct and resend the 248 within 5 business days or contact the trading partner to agree on an alternative.

6. Non billing party may reject bad 820 remittance received directly from Billing Party or from the Bank.

Because the 820 transaction may contain many accounts per transaction, it is difficult to automate resolution of problems. Therefore, 824's for bad 820's will be sent as notification only.

Corrective actions will be handled outside the EDI process as agreed upon by the billing and non-billing parties.

7. Non metering party may reject bad 867HU

a. If action code is resend, metering party must correct and resend the 867HU within 5 business days or contact the trading partner to agree on an alternative.

8. Bill Ready Billing Party may acknowledge non-billing party charges appeared on bill

a. If the bill print has non-billing party charges, an 824 may be sent. It will contain the date the bill was rendered, the bill due date, and the total supplier amount due (which will include current charges and any arrearages)

9. Bill Ready Billing Party issues bill with no non-billing party charges.

Transaction Structure

867MU, 867IU, 867HU, 810, and 248:

- ◆ One 824 per LDC Account.

Since these transactions are also one per LDC Account, the 824 will match one for one with the originating transaction in these cases.

820 and 568:

Since these transactions may contain many LDC Accounts per transaction, the 824 can be used either at the account or summary level as follows:

- ◆ If there is a problem with one or more accounts on the 820 (such as account number is not in receiver's system), one 824 will be sent for each problem account. Each 824 will be coded as a Transaction Set Partial Accept/Reject (OTI01 = TP) and the appropriate LDC account number will be provided.
- ◆ If there is a problem with the transaction that cannot be attributed to a specific LDC account, the 824 will be coded as a Transaction Set Reject (OTI01 = TR) indicating that the entire transaction is being rejected.

Rejection Reasons

To prevent abuse of the 824, the receiver should only send an 824 Rejection for reasons contained in this guide. The "Other" code (A13) may be used for situations needing immediate attention. However, each time an A13 is used, you must e-mail the appropriate state's listserver so that a new code can be established. See TED segment for further explanation.

Action Code

An Action Code will be used to tell receiver what action to take, if any.

- ◆ Follow Up (BGN08 = 82): This indicates that the receiver of the 824 must resend the transaction. This code should be used when it is possible and desirable to resolve the problem by correcting and resending the transaction.
- ◆ Evaluate (BGN08 = EV): This indicates that the receiver of the 824 should evaluate the problem and make modifications to their system as necessary without resending the transaction. This code should be used when it is not possible to correct the situation automatically (such as problems with the 820 and 568 transactions) or it is not desirable to do so (such as when receiver chooses to make minor corrections because that is the easiest or quickest solution).

Conditions for use of 824

- ◆ Party receiving 867, 810, 568, 248 or 820 may send an 824 when one of the valid reject reasons shown on the implementation guideline is detected. The 824 is mandatory if a transaction cannot be processed by the receiver's system (rejection) and must be resent. The 824 is optional if the receiver needs to manipulate any data required by their application system (accept with error) but they are not asking for the transaction to be resent.
- ◆ Bill Ready 810's that do not appear on the bill: An 824 containing an appropriate rejection code will be sent whenever an 810 is received but the charges are not included on the bill. An 824 will NOT be sent if an 810 is not received by the billing party. This allows the non-billing party to know that any 810's they sent, minus any 997 rejects, minus any 824 rejects, is what was accepted by the receiver and placed on the customer bill.
- ◆ Bill Ready 810's with use of 824 Acceptances: An 824 will be sent for every customer bill that should contain non-billing party charges. If the 810 received was not placed on the bill or no 810 was received, an 824 Rejection will be sent containing an appropriate rejection code. If the 810 received was placed on the bill, an 824 Acceptance will be sent. This allows the non-billing party to know what happened to each bill that should have contained their charges. The non-billing party should receive an 824 for each one-bill 867 they receive.
- ◆ If the receiver detects a problem as listed in the implementation guideline and chooses to send an 824, they must send it within 1 business day of receiving a bad transaction. Otherwise, the sender will not be held to their timing requirements. (i.e., If you do not send an 824 in response to a bad 867 within 1 business day, the billing window may not be held up and the bill may go out without your charges.)
- ◆ If the receiver detects a problem other than the valid reasons listed in the implementation guideline, they should phone or e-mail the sender as soon as possible. The sender should respond as soon as possible.
- ◆ If you receive an 824 with an action flag set to resend (Follow Up), you are required to respond either automatically or manually. You must correct and re-send the transaction within 5 business days or contact your trading partner and agree on an alternative. **Note:** An exception to this is that any rejection of a Bill Ready 810 will not change the billing window.
- ◆ If you receive an 824 with action flag set to notification only (Evaluate), a manual response (e-mail or phone call) to let the sending party know when the problem will be fixed is suggested.

January 9, 2002

Version 3.0

General Notes

LDC Definitions:

The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:

- EDC – Electric Distribution Company (Pennsylvania, Delaware)
- LDC – Local Distribution Company (New Jersey)
- EC – Electric Company (Maryland)

ESP Definitions:

The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:

- EGS – Electric Generation Supplier (Pennsylvania)
- TPS – Third Party Supplier (New Jersey)
- ES – Electric Supplier (Delaware)
- ES – Electricity Supplier (Maryland)

Pennsylvania Notes

Pennsylvania Use:

This transaction is used for rejections of:

- 810 Rate Ready and 810 Bill Ready
- 867 MU and 867 IU
- 867 HU
- 248 Write Off
- 568 Collections
- 820 Payment transaction

PECO will also be sending an 824 when no current charges print on a bill for the non-billing party. (This is an optional purpose in PA)

New Jersey Notes

New Jersey Use:

- This transaction is optional when the market opens.
- The mandatory Implementation Timeline has not been defined by the BPU
- At the current time, only Conectiv plans to implement when the market opens, and only for a limited scope. Conectiv plans to only use the 824 Rejection to respond to Bill Ready 810 documents that are sent and are in error or have missed the billing window.
- The NJ Use section within this document will reflect the ultimate use of the 824.
- Ultimately, New Jersey plans to also use the 824 Acceptance to notify the non-billing party whether supplier charges printed on the bill or not.

PSE&G Use as of CAS:

If no 810 is received within billing window, PSE&G will send bill to customer stating that no ESP charges were available and send an 824 to ESP.

- PSE&G will send at least one 824 for each 810 that PSE&G determines contains error(s). PSE&G will send each error condition found in an 810 as a separate 824.
- PSEG will reject 810's (Action Code BGN08=82) for billings errors, and not print TPS charges or text message on the bill sent to the customer. However PSE&G will send an 824 evaluation notice (Action Code BGN08=EV) to TPS advising that there as an error with TPS's text portion of the 810 but **still** print the TPS charges on the customers bill if the 810 contained no billing errors.
- PSE&G will send 824 with the customer name missing for any 824 notifying TPS of a text error.
- PSE&G will send 824 with customer name missing for any customer account number not found in PSE&G's system.

GPU Use as of 9/2000:

Same as PA

Conectiv Use as of
9/2000:

Same as Maryland

January 9, 2002

Version 3.0

Delaware Notes

Delaware (Connectiv
only) Use:

- This transaction is optional when the market opens.
- At the current time, Conectiv plans to implement when the market opens, but only for a limited scope. Conectiv plans to only use the 824 Rejection to respond to Bill Ready 810 documents that are sent and are in error or have missed the billing window.
- The DE Use for Conectiv section within this document will reflect the ultimate use of the 824.
- Ultimately, Delaware Conectiv plans to also use the 824 Acceptance to notify the non-billing party whether supplier charges printed on the bill or not.
- This transaction will not be used Day 1. When it is implemented, The "use" fields must be updated.

Delaware (Delaware
Electric Coop) Use:

Maryland Notes

Maryland Use:

- When the market opens, this transaction will be used for rejection of:
 - 810 Rate Ready and 810 Bill Ready
 - 867 MU and 867 IU
 - 248 Write Off
 - 820 Payment transaction

Note: This feature will not be implemented when the market opens.

- The plans are to also send an 824 Acceptance to confirm Bill Ready charges appeared on the bill.

SMECO Notes:

Supplier rejection of bad 867 - If the action code indicates resend (BGN08 = "82"), SMECO will resend the 867 transaction. If the action code indicates evaluate (BGN08 = "EV"), SMECO will obtain a check reading on the account to verify the usage. If the check read indicates that the original transaction was correct, SMECO will resend the original 867, and will charge the supplier for a special meter read. If not, SMECO will correct and resend. In all cases, SMECO will reset the billing window for bill-ready consolidated customers to begin the date the valid 867 is sent.

Supplier rejection of bad 820 - SMECO will in all cases resolve this manually.

Supplier rejection of bad 248 - SMECO will in all cases resolve this manually.

LDC rejection of bad 810 - SMECO will reject supplier 810s for the following conditions: More than one IT1 loop (TED02 = "A13", NTE02 = "IT1 Loop Limit Exceeded"), account not found (TED02 = "A76"), invalid relationship ("A84"), invalid bill date ("DIV"), invoice for period greater than one year ago or in the future ("EXP"), billing type mismatch ("FRF"), billing calculation method mismatch ("FRG"), invalid tax information ("TXI"), and account exists but is not active ("008"). SMECO does not validate that the sum of the details equals the total, and does not check to ensure that service start and end dates match those on an 867. SMECO also does not validate invoice numbers to ensure against duplicates.

LDC Positive Notification of Charges Billed - Whenever SMECO bills a customer with a consolidated bill option, SMECO will notify the supplier of the balance billed to the customer on the supplier's behalf. Note that this transaction is *not* a confirmation that an

January 9, 2002

Version 3.0

810 has been received, but is intended to inform the supplier of the supplier's balance with that customer on SMECO's books at the time of billing. SMECO will send this transaction to any supplier whose charges are being printed on a SMECO bill (including those customers on SOS following a switch from a supplier). SMECO will send zero amounts to the current active supplier if SMECO has no current charges on record for that supplier (i.e., this is the customer's first month with the supplier and the supplier has missed the billing window).

Note: Note that this transaction replaces any missed bill window notifications implemented elsewhere.

How to Use the Implementation Guideline

Segment: **REF** Reference Identification
Position: 030
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1
Purpose: To specify identifying information
Syntax Notes:
 1 At least one of REF02 or REF03 is required.
 2 If either C04003 or C04004 is present, then the other is required.
 3 If either C04005 or C04006 is present, then the other is required.
Semantic Notes:
 1 REF04 contains data relating to the value cited in REF02.

This section is used to show the X12 Rules for this segment. You must look further into the grayboxes below for State Rules.

Comments:

Notes:	Recommended by UIG
PA Use:	Must be identical to account number as it appears on the customer's bill, excluding punctuation (spaces, dashes, etc.). Significant leading and trailing zeros must be included.
	Request: Required Accept Response: Required Reject Response: Required
NJ Use:	Same as PA
Example:	REF*12*2931839200

The "Notes:" section generally contains notes by the Utility Industry Group (UIG).

This section is used to show the individual State's Rules for implementation of this segment.

One or more examples.

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>X12 Attributes</u>
Must Use	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification 12 Billing Account	M ID 2/3
Must Use	REF02	127	Reference Identification Qualifier Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier LDC assigned account number for end use customer.	X AN 1/30

This column shows the use of each data element. If state rules differ, this will show "Conditional" and the conditions will be explained in the appropriate grayboxes.

These are X12 code descriptions, which often do not relate to the information we are trying to send. Unfortunately, X12 cannot keep up with our code needs so we often change the meanings of existing codes. See graybox for the UIG or state definitions.

This column shows the X12 attributes for each data element. Please refer to Data Dictionary for individual state rules.
 M = Mandatory, O= Optional, X = Conditional
 AN = Alphanumeric, N# = Decimal value, ID = Identification, R = Real

Transaction Set Notes

1. The OTI loop is intended to provide a unique identification of the transaction set that is the subject of this application acknowledgment.
2. The REF segment allows for the provision of secondary reference identification or numbers required to uniquely identify the original transaction set. The primary reference identification or number should be provided in elements OTI02-03.
3. The DTM segment allows for the provision of date, time, or date and time information required to uniquely identify the original transaction set.
4. The AMT segment should be utilized if monetary amount information is important to the unique identification of the original transaction set.

Version 3.0

17	Cross Reference Number	Cross Reference Number from the 810 and 820 transaction.	REF02	OTI: REF01 = 60	X(30)
18	Date Bill Rendered	Date bill was rendered to the customer (for 824 Acceptance of a Bill Ready 810)	DTM02	OTI: DTM01 = 003	9(8)
19	Bill Due Date	Date customer payment is due (for 824 Acceptance of a Bill Ready 810)	DTM02	OTI: DTM01 = 814	9(8)
20	Outstanding Balance	Total outstanding balance that printed on bill for non-billing party (for 824 Acceptance of a Bill Ready 810)	AMT02	OTI: AMT01 = BD	9(11),99
21	Rejection Reason Code	Code indicating rejection reason. See implementation guideline for valid codes.	TED02	TED: TED01 = 848	X(3)
22	Rejection Text	Text explaining rejection reason	NTE02	TED: NTE01 = ADD	X(80)

January 9, 2002

Version 3.0

Segment: **ST** Transaction Set Header
Position: 010
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Syntax Notes:
Semantic Notes: 1 The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

Comments:

PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use:	Required
Example:	ST*824*00000001

Data Element Summary

	Ref.	Data		Attributes
	Des.	Element	Name	
Must Use	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set 824 Application Advice	M ID 3/3
Must Use	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

January 9, 2002

Version 3.0

Segment: **BGN** Beginning Segment
Position: 020
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the beginning of a transaction set
Syntax Notes: 1 If BGN05 is present, then BGN04 is required.
Semantic Notes: 1 BGN02 is the transaction set reference number.
 2 BGN03 is the transaction set date.
 3 BGN04 is the transaction set time.
 4 BGN05 is the transaction set time qualifier.
 5 BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

Comments:

PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use:	Required
Example:	BGN*11*199907111230001*19990711*****82

Data Element Summary

	Ref.	Data	Attributes
	Des.	Element Name	
Must Use	BGN01	353 Transaction Set Purpose Code Code identifying purpose of transaction set	M ID 2/2
		00 Original Indicates this transaction is not specifically being used to respond to another transaction.	
		11 Response Signifies that the requested service will be addressed as described in this transaction	
Must Use	BGN02	127 Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier A unique transaction identification number, assigned by the originator of this transaction. This number must be unique over time.	M AN 1/30
Must Use	BGN03	373 Date Date expressed as CCYYMMDD The transaction creation date – the date that the data was processed by the sender's application system.	M DT 8/8
Must Use	BGN08	306 Action Code Code indicating type of action	O ID 1/2
		82 Follow Up Indicates that the receiver of the transaction must correct and resend the transaction.	
		EV Evaluate Indicates that the receiver of the transaction must evaluate the error, but the transaction should NOT be resent.	
		CF Confirm Used on an accept response to an 810 transaction to indicate the non-billing party's charges will appear on the customer's bill. Note: Only valid in MD.	

January 9, 2002

Version 3.0

Segment: **N1** Name (8S=LDC Name)
Position: 030
Loop: N1
Level: Heading
Usage: Recommended
Max Use: 1
Purpose: To identify a party by type of organization, name, and code
Syntax Notes: 1 At least one of N102 or N103 is required.
 2 If either N103 or N104 is present, then the other is required.
Semantic Notes:
Comments: 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
 2 N105 and N106 further define the type of entity in N101.

PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use:	Required
Example:	N1*8S*LDC COMPANY*1*007909411

Data Element Summary

	Ref.	Data	X12 Attributes
	Des.	Element Name	
Must Use	N101	98 Entity Identifier Code	M ID 2/3
		Code identifying an organizational entity, a physical location, property or an individual 8S Consumer Service Provider (CSP) LDC	
Must Use	N102	93 Name	X AN 1/60
		Free-form name LDC Company Name

Version 3.0

Segment: **REF** Reference Identification (11=ESP Account Number)
Position: 070
Loop: N1
Level: Heading
Usage: Optional
Max Use: 12
Purpose: To specify identifying information
Syntax Notes: 1 At least one of REF02 or REF03 is required.
Semantic Notes:
Comments:

PA Use:	Not used on the 568 or 820 when rejecting the entire transaction. Otherwise required if it was previously provided to the LDC.
NJ Use:	Not used on the 568 or 820 when rejecting the entire transaction. Otherwise, conditional (See **) **Note: In New Jersey, Conectiv, GPU and PSE&G will store ESP account number and will be required to send it in response if it was provided on the request. Rockland Electric will not be storing ESP account number, and will never send it on a response transaction. Conectiv will only be storing 20 characters.
DE use for Conectiv:	Conectiv will store ESP account number and will be required to send it if it was previously provided to the LDC. Conectiv will only be storing 20 characters.
MD Use:	Same as PA Note: Conectiv will store ESP account number, but will only store 20 characters.
Example:	REF*11*2348400586

Data Element Summary

	Ref. Des.	Data Element	Name	X12 Attributes
Must Use	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification 11 Account Number ESP-assigned account number for end use customer.	M ID 2/3
Must Use	REF02	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	X AN 1/30

January 9, 2002

Version 3.0

Segment: **REF** Reference Identification (12=LDC Account Number)
Position: 070
Loop: N1
Level: Heading
Usage: Optional
Max Use: 12
Purpose: To specify identifying information
Syntax Notes: 1 At least one of REF02 or REF03 is required.
Semantic Notes:
Comments:

PA Use:	Must be identical to account number as it appears on the customer's bill, excluding punctuation (spaces, dashes, etc.). Significant leading and trailing zeros must be included. Not used for the 568 or 820 when rejecting the entire transaction. Otherwise, required. When the rejection reason is due to an LDC account number not being provided in the original transaction, this segment must not be sent on the 824.
NJ Use:	Same as PA
DE Use for Conectiv:	Same as PA
MD Use:	Same as PA
Example:	REF*12*2931839200

Data Element Summary

Level: Heading
Usage: Optional
Max Use: 12
Purpose: To specify identifying information
Syntax Notes: 1 At least one of REF02 or REF03 is required.
Semantic Notes:
Comments:

PA Use:	Not used for the 820 or 568 when rejecting the entire transaction. Otherwise required if account number changed in the last 60 days. Note: Only used when LDC is sending this transaction.
NJ Use:	Same as PA Note: PSE&G will not provide old LDC Account Number.
DE Use for Conectiv:	Not used – Conectiv will not change LDC Account Number.
MD Use:	Not Used by BGE, PEPCO, or Conectiv. APS: Required if the account number has changed in the last 60 days.
Example:	REF*45*1105687500

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>X12 Attributes</u>
Must Use	REF01	128	Reference Identification Qualifier Code qualifying the Reference Identification 45 Old Account Number LDC's previous account number for the end use customer.	M ID 2/3
Must Use	REF02	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	X AN 1/30

January 9, 2002

Version 3.0

Segment:	OTI Original Transaction Identification
Position:	010
Loop:	OTI
Level:	Detail
Usage:	Mandatory
Max Use:	1
Purpose:	To identify the edited transaction set and the level at which the results of the edit are reported, and to indicate the accepted, rejected, or accepted-with-change edit result
Syntax Notes:	
Semantic Notes:	<ol style="list-style-type: none"> 1 OTI03 is the primary reference identification or number used to uniquely identify the original transaction set.
Comments:	<ol style="list-style-type: none"> 1 OTI02 contains the qualifier identifying the business transaction from the original business application, and OTI03 will contain the original business application identification. 2 If used, OTI09 through OTI10 will contain values from the original electronic transaction set generated by the sender.

PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use	Required Note: Used for all transaction identified with the exception of the 568, since the 568 is not used in MD.
Example:	OTI*TR*TN*1999010100001*****867

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
Must Use	OTI01	110	Application Acknowledgment Code Code indicating the application system edit results of the business data	M ID 1/2
			TP Transaction Set Partial Accept/Reject Used to reject one or more individual accounts on the transaction. Applicable only as a response to the 568 and 820 transactions.	
			TR Transaction Set Reject Used to reject the entire transaction. Applicable for 248, 568, 810, 820 and 867 transactions.	
			TA Transaction Set Accept Used to accept the entire transaction. Applicable for a Bill Ready 810 only when confirming charges printed on the bill. Note: Only valid in MD.	
			IR Item Reject Indicates an item has been rejected. Note: Used in PA when no current charges print on bill.	
Must Use	OTI02	128	Reference Identification Qualifier Code qualifying the Reference Identification	M ID 2/3
			TN Transaction Reference Number	
Must Use	OTI03	127	Reference Identification Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	M AN 1/30

January 9, 2002

Version 3.0

This data element is populated from the following data elements of the original transaction:

248 – BHT03
 568 – BGN02
 810 – BIG02
 820 – TRN02
 867 – BPT02

For case when PSE&G is sending 824 when no charges on are on bill, this field will contain:

MISSED BILLING WINDOW

Must Use **OTI10** **143** **Transaction Set Identifier Code** **O** **ID 3/3**

Code uniquely identifying a Transaction Set

The EDI Transaction Set number of the transaction being responded to.

248	Account Assignment/Inquiry and Service/Status
568	Contract Payment Management Report
810	Invoice
820	Payment Order/Remittance Advice
867	Product Transfer and Resale Report

Version 3.0

Segment: **AMT** Monetary Amount (BD=Outstanding Customer Balance)
Position: 050
Loop: OTI
Level: Detail
Usage: Optional
Max Use: >1
Purpose: To indicate the total monetary amount
Syntax Notes:
Semantic Notes:
Comments:

PA Use:	Not Used
NJ Use:	Not Used
DE Use for Conectiv:	Not Used
MD Use:	Total non-billing party charges due (reflects total balance due for non-billing party that appeared on customer bill)- Used when confirming non-billing party charges appear on a customer bill. Used only with 824 "Acceptance" of a Bill Ready 810.
Example:	AMT*BD*325.75

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
Must Use	AMT01	522	Amount Qualifier Code Code to qualify amount BD Balance Due	M ID 1/3
			Used on an accept response to an 810 transaction to indicate the non-billing party balance due that was included on the consolidated bill to the customer.	
Must Use	AMT02	782	Monetary Amount Monetary amount	M R 1/18

January 9, 2002

Version 3.0

Segment: **TED** Technical Error Description (Error Code)
Position: 070
Loop: TED
Level: Detail
Usage: Optional
Max Use: 1
Purpose: To identify the error and, if feasible, the erroneous segment, or data element, or both
Syntax Notes:
Semantic Notes:
Comments: 1 If used, TED02 will contain a generic description of the data in error (e.g., part number, date, reference number, etc.).

Notes:	The TED/NTE may loop as many times as necessary to provide all rejection reasons.
PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use:	Required if transaction sent was rejected Not used when “confirming” Bill Ready 810.
Example:	TED*848*A76

Data Element Summary

	<u>Ref.</u>	<u>Data</u>	<u>Attributes</u>
	<u>Des.</u>	<u>Element</u> <u>Name</u>	
Must Use	TED01	647 Application Error Condition Code Code indicating application error condition 848 Incorrect Data	M ID 1/3

Rules for Rejection Reason Codes

The codes on the next several pages have been identified by the UIG to convey rejection reasons. Only the codes listed for each service are valid for that service. If you require additional codes, send an email to the appropriate state’s listserver.

“A13” (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time “A13” (Other) is used for a new purpose, an E-mail must be sent to the appropriate state’s listserver by the party sending the code, to notify the market participants about the text explanation for A13. This information will be compiled and new codes will be issued on a periodic basis.

PA Listserver: edtwg@ls.eei.org

NJ Listserver: njbpu@ls.eei.org

MD: edi@psc.state.md.us

DE: not determined as of July 2000

January 9, 2002

Version 3.0

Rejection Reason Codes in Response to a 248, 568 & 820

Must Use	TED02	3	Free Form Message	O	AN 1/60
			Free-form text		
			A13	Other	
				See note above regarding the use of the A13 code	
			A76	Account Not Found	
			API	Required Information Missing	
			SUM	Sum of Details does not equal total (does not apply to 248)	
			DIV	Invalid or missing date	

Rejection Reason Codes in Response to an 810

Must Use	TED02	3	Free Form Message	O	AN 1/60
			Free-form text		
			A13	Other	
				See note above regarding the use of the A13 code	
			A76	Account Not Found	
			A84	Invalid Relationship	
				Supplier is not the supplier of record	
			ABN	Duplicate Request Received	
				Duplicate 810 received	
			ADM	Amount Does Not Match	
				The amount within the 810 Cancellation/Reversal does not match the original 810.	
			API	Required Information Missing	
			CRI	Cross Reference Number Invalid	
				The cross reference number provided on the 810 does not match the cross reference number on an open 867.	
			DDM	Dates Do Not Match	
				810 Service Period Begin and End Dates do not match the same dates on an open 867	
			DIV	Invalid or missing date	
				Includes date ranges for billing periods no longer supported by CIS system	
			EXP	810 Received for billing period older than that supported by the Billing System	
			FRF	Bill Type Mismatch	
				Supplier and utility system do not have same bill type. For instance, an 810 was received by the LDC for a customer that is listed as a DUAL bill option in the receiver's system. BGN08 must be EV for this rejection reason.	
			FRG	Bill Calculator Mismatch	
				An 810 was received for a customer with a bill calculator (REF*PC) different than what is listed in the recipient's system. BGN08 must be EV for this rejection reason.	
			IVL	SAC (charges and/or adjustments) sent in incorrect IT1 Loop	

January 9, 2002

Version 3.0

IVT	PID segment(s) sent in incorrect IT1 Loop
NCC	No current charges Used in PA and NJ (PSE&G) only when bill issued with no current charges
NCP	No Cancellation Processed 810 re-bill received before or not with 810 cancellation
OBW	Outside Bill Window The 810 was received outside of the billing window.
PCR	810 Rejected – Pending Cancel/Rebill
RBT	Over 50 PID segments (text) lines received and A PID05 element contained over 60 characters
RNA	Rolling text page Not Authorized
R50	Over 50 PID segments (text) lines received
R60	A PID05 element contained over 60 characters
SUM	Sum of Details does not equal total
TCN	Total Charges Negative (for billing parties that do not allow negative charges)
TXI	Invalid TXI information
W06	Duplicate Rates Found (PECO Only)
008	Account exists but is not active

Rejection Reason Codes in Response to an 867

Must Use	TED02	3	Free Form Message	O	AN 1/60
			Free-form text		
			A13		Other See note above regarding the use of the A13 code
			A76		Account Not Found
			ABO		Corrected transaction received prior to cancellation or rejection transaction. A corrected 867 was received without first receiving a Cancellation 867 or having sent an 824 rejecting the original 867.
			API		Required Information Missing
			DIV		Invalid or missing date
			FRF		Bill Type Mismatch Supplier and utility system do not have same bill type. For instance, an 867 was received for a customer with a bill type (REF*BLT) different than what is listed in the ESP system. BGN08 must be EV for this rejection reason.
			FRG		Bill Calculator Mismatch An 867 was received for a customer with a bill calculator (REF*PC) different than what is listed in the ESP system. BGN08 must be EV for this rejection reason.
			IIS		Invalid Interval Status Interval Detail usage data is sent when Interval Summary Usage Data was requested or vice versa.
			SUM		Sum of Details does not equal total

Version 3.0

Segment: **NTE** Note/Special Instruction (Error Reason)
Position: 080
Loop: TED
Level: Detail
Usage: Optional
Max Use: 100
Purpose: To transmit information in a free-form format, if necessary, for comment or special instruction

Syntax Notes:
Semantic Notes:
Comments: 1 The NTE segment permits free-form information/data which, under ANSI X12 standard implementations, is not machine processable. The use of the NTE segment should therefore be avoided, if at all possible, in an automated environment.

PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use:	Required if transaction sent was rejected and TED02 value is A13 or API; otherwise, NTE segment is optional. Not used when "confirming" Bill Ready 810.
Example:	NTE*ADD*ACCOUNT NOT FOUND

Data Element Summary

	<u>Ref. Des.</u>	<u>Data Element</u>	<u>Name</u>	<u>Attributes</u>
Must Use	NTE01	363	Note Reference Code Code identifying the functional area or purpose for which the note applies ADD Additional Information	O ID 3/3
Must Use	NTE02	352	Description A free-form description to clarify the related data elements and their content Rejection Reason Text	M AN 1/80

January 9, 2002

Version 3.0

Segment: **SE** Transaction Set Trailer
Position: 090
Loop:
Level: Summary
Usage: Mandatory
Max Use: 1
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments)

Syntax Notes:**Semantic Notes:****Comments:** 1 SE is the last segment of each transaction set.

PA Use:	Required
NJ Use:	Required
DE Use for Conectiv:	Required
MD Use:	Required
Example:	SE*28*000000001

Data Element Summary

	Ref.	Data		X12 Attributes
	Des.	Element	Name	
Must Use	SE01	96	Number of Included Segments	M N0 1/10
			Total number of segments included in a transaction set including ST and SE segments	
Must Use	SE02	329	Transaction Set Control Number	M AN 4/9
			Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set

Version 3.0

Examples for 824

Example: 824 Rejection of an 867 Transaction for bad account number

For instance, ESP sending 824 on 867 from LDC when LDC is metering agent.

BGN*11*REJ867-199907110719-001*19990711*****82	Beginning Segment - Contains transaction reference number and system date. Indicates Follow-Up – receiver of transaction must correct error and resend the transaction.
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
PER*IC*ESP TECHNICAL CONTACT*TE*8005551212*EM*CONTACT@COMPANY.COM	ESP Technical contact to resolve this particular issue
N1*8R*CUSTOMER NAME	Customer Name
REF*11*2348400586	ESP Account Number
REF*12*293839200	LDC Account Number
OTI*TR*TN*ORIGTRANNUMB000001*****867	Indicates a Transaction Set Reject and provides the transaction reference number from the original transaction and the transaction set id.
TED*848*A76	Indicates that the account number was not found.
NTE*ADD*ACCOUNT NOT FOUND	Gives further description of error

Example: 824 Rejection of a Bill Ready 810 Transaction for multiple reasons

For instance, LDC sending 824 on 810 from ESP when LDC is billing agent.

BGN*11*REJ810-199907110719-999*19990711*****EV	Beginning Segment - Contains transaction reference number and system date. Indicates Evaluate – receiver of transaction must evaluate error, but should NOT resend the transaction.
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
PER*IC*LDC TECHNICAL CONTACT*TE*8005551212*EM*CONTACT@COMPANY.COM	LDC Technical contact to resolve this particular issue
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
N1*8R*CUSTOMER NAME	Customer Name
REF*11*2348400586	ESP Account Number
REF*12*293839200	LDC Account Number
REF*45*813483000	LDC Old Account Number
OTI*TR*TN*ORIGTRANNUMB000001*****810	Indicates a Transaction Set Reject and provides the transaction reference number from the original transaction and the transaction set id.
REF*60*CR19990101XXX001	Original Cross Reference Number from 810 Transaction.
TED*848*FRF	Indicates that the bill type on supplier system does not match bill type on utility system
NTE*ADD*BILL TYPE MISMATCH	Gives further description of error
TED*848*FRG	Indicates that the bill calculator on supplier system does not match bill type on utility system
NTE*ADD*BILL CALCULATOR MISMATCH	Gives further description of error

January 9, 2002

Version 3.0

Example: 824 Rejection of an entire 820 Transaction

For instance, ESP sending 824 on 820 from LDC when LDC is billing agent.

BGN*11*REJ820-199907110719-999*19990711*****EV	Beginning Segment - Contains transaction reference number and system date. Indicates Evaluate – receiver of transaction must evaluate error, but should NOT re-send the transaction.
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
PER*IC*LDC TECHNICAL CONTACT*TE*8005551212*EM*CONTACT@COMPANY.COM	LDC Technical contact to resolve this particular issue
OTI*TR*TN*ORIGTRACENUMB000003*****820	Indicates a Transaction Set Reject and provides the trace number (TRN02) from the original transaction and the transaction set id.
TED*848*SUM	Indicates that the sum of the details doesn't match the total
NTE*ADD*SUM OF DETAILS DOES NOT MATCH TOTAL	Gives further description of error

Example: 824 Rejection of single account for a bad account number on an 820

Note: If there are multiple accounts that are rejected, each one must be a separate 824.

For instance, ESP sending 824 on 820 from LDC when LDC is billing agent.

BGN*11*REJ820-199907110719-001*19990711*****EV	Beginning Segment - Contains transaction reference number and system date. Indicates Evaluate – receiver of transaction must evaluate error, but should NOT re-send the transaction.
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
PER*IC*ESP TECHNICAL CONTACT*TE*8005551212*EM*CONTACT@COMPANY.COM	ESP Technical contact to resolve this particular issue
N1*8R*CUSTOMER NAME	Customer Name
REF*11*2348400586	ESP Account Number
REF*12*293839200	LDC Account Number
OTI*TP*TN*ORIGTRANNUMB000001*****820	Indicates a Transaction Set Partial Reject and provides the trace number (TRN02) from the original transaction and the transaction set id.
REF*6O*CR19990101XXX001	Original Cross Reference Number from 820 Note: This segment is only sent when making the other party whole.
TED*848*A76	Indicates that the account number was not found.
NTE*ADD*ACCOUNT NOT FOUND	Gives further description of error

January 9, 2002

Version 3.0

Example: 824 Confirmation that non-billing party charges (810) appeared on bill

For instance, LDC sending 824 Acceptance on 810 from ESP when LDC is billing agent.

BGN*11*ACC810-19991227-001*19991227*****CF	Beginning Segment - Contains transaction reference number and system date. Indicates Confirm – non-billing party’s charges will appear on the customer’s bill.
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
N1*8R*CUSTOMER NAME	Customer Name
REF*11*2348400586	ESP Account Number
REF*12*293839200	LDC Account Number
OTI*TA*TN*ORIGTRANNUMB000001*****810	Indicates the entire 810 transaction was accepted.
REF*6O*CR19991227XXX001	Original Cross Reference Number from 810 (BIG05)
DTM*003*19991227	Indicates the date bill was rendered
DTM*814*20000120	Indicates the bill due date
AMT*BD*325.75	Indicated outstanding customer balance

January 9, 2002

Version 3.0

Example: 824 Rejection – Bill sent with no current supplier charges (PA)

BGN*00*REJ810-2000820-21999*19990820*****82	Beginning Segment
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
PER*IC*LDC TECHNICAL CONTACT*TE*8005551212*EM*CONTACT@xx.COM	LDC Technical contact to resolve this particular issue
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
N1*8R*CUSTOMER NAME	Customer Name
REF*11*2348400586	ESP Account Number
REF*12*293839200	LDC Account Number
REF*45*813483000	LDC Old Account Number
OTI*IR*TN*12948320580-32033*****810	Indicates an Item Reject and indicates the transaction reference number from the original 867. Also indicates an 810 is transaction that is missing.
DTM*003*20000820	Indicates the date bill was rendered
TED*848*NCC	Indicates that the bill was issued with no current supplier charges.
NTE*ADD*NO CURRENT SUPPLIER CHARGES ON BILL	

Example: 824 Rejection – Bill sent with no supplier charges (PSE&G)

BGN*00*REJ810-2000820-21999*19990820*****82	Beginning Segment
N1*8S*LDC COMPANY*1*007909411	LDC Name and DUNS information
N1*SJ*ESP COMPANY*9*007909422ESP1	ESP Name and DUNS information
N1*8R*CUSTOMER NAME	Customer Name
REF*11*2348400586	ESP Account Number
REF*12*293839200	LDC Account Number
OTI*TP*TN*MISSED BILLING WINDOW*****810	Indicates a Transaction Set and an 810 transaction is missing.
TED*848*OBW	Indicates that the bill was issued with no supplier charges.
NTE*ADD* MISSED BILLING WINDOW
