# **February 16, 2012** Version 2.0

	Summary of Changes
November 12, 1999 Version 0.1	Initial Release
February 15, 2000 Version 0.1MD2	Added SAC04 values
February 17, 2000 Version 0.1MD3	<ul> <li>Mark REF*OI as mandatory</li> <li>Correct words on REF*PR loop section, make PA Use words the same as 814.</li> <li>IT109 options – remove UNMET (only ACCOUNT and RATE will be valid)</li> <li>Make TXI10 optional – make words consistent with other sequence fields</li> <li>IT1 segment – explain use of ACCOUNT/RATE</li> <li>SLN segment – remove example at bottom of page – examples in back explain it bette</li> <li>Remove NTE from X12 structure page</li> <li>Clarified missed bill window for reciprocity</li> <li>Correct examples</li> </ul>
March 23, 2000 Version 1.0	<ul> <li>Clarified use of sequence number</li> <li>Correct IT1 segment for Rate</li> <li>Correct placement of PID in examples</li> <li>This version is considered FINAL for Pennsylvania. Maryland and Delaware are still considered in draft status.</li> </ul>
July 22,2000 Version 1.0-1	• Incorporate PA Change Control X019 – add optional PER segment for utility contact phone number
September 10, 2000 Version 1.1	This transaction is a new FINAL version for Pennsylvania. This transaction is not currently used in New Jersey, Maryland, and Delaware (Conectiv only).
October 19, 2001 Version 1.1rev01	Incorporate Delaware Electric Coop (DEC) information for Delaware
December 13, 2001 Version 1.1rev02	• Incorporate PA Change Control 038 – change all references to PPL and PP&L to PPL EU.
January 9, 2002 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
January 24, 2010 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (no changes from January 9, 2002 version).
February 28, 2011 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (no changes from January 9, 2002 version).
February 16, 2012 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (no changes from January 9, 2002 version).

	General Notes
LDC Definitions:	<ul> <li>The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:</li> <li>EDC – Electric Distribution Company (Pennsylvania, Delaware)</li> <li>LDC – Local Distribution Company (New Jersey)</li> <li>EC – Electric Company (Maryland)</li> </ul>
ESP Definitions:	<ul> <li>The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:</li> <li>EGS – Electric Generation Supplier (Pennsylvania)</li> <li>TPS – Third Party Supplier (New Jersey)</li> <li>ES – Electric Supplier (Delaware)</li> <li>ES – Electricity Supplier (Maryland)</li> </ul>
General Notes	This document is used to define the requirements of the ESP Consolidated Bills. The non-billing parties will calculate their own charges and send 810 to ESP. ESP Consolidated Billing will always be considered Bill Ready. This transaction will always be sent from the LDC to the ESP.
IT1 Loop	<ul> <li>The IT1 is used to indicate whether the charge/tax is at a rate level, account level, or unmetered level.</li> <li>IT109 = "ACCOUNT" for billing information that pertains to the entire account.</li> <li>Pennsylvania Gross Receipts Tax and Estimated PA State Tax must always be provided in the Account Loop</li> <li>Account Loop may contain all charges and taxes for the customer's account, e.g., Customer Account Charge, Meter Charge, State Sales Tax, County Tax and all regulated charges.</li> <li>Account Loop may be used in Bill Ready ESP Consolidated Billing and may contain just account level charges and all taxes, e.g. Customer Account Charge, Meter Charge, state Sales Tax and County Tax, with generation charges itemized in the Rate Loop (IT109=RATE) and/or Unmetered Loop (IT109=UNMET). Each LDC will indicate the method they will be sending, which should be consistent with what they are accepting in EDC Bill Ready.</li> <li>IT109 = "RATE" when billing information is being provided at a Rate level.</li> <li>Pennsylvania Gross Receipts Tax and Estimated PA State Tax must never be provided in the Rate Loop.</li> <li>Rate Loop may be used in Bill Ready ESP Consolidated Billing. Each LDC will indicate the method they will be sending, which should be consistent with what they are accepting in the Rate Loop.</li> </ul>
Bill Ready – Sending Multiple 810s:	<ul> <li>The dates (DTM segments) in the 810 must match the dates (DTM segments) in the corresponding 867.</li> <li>Prior period charges must be sent in separate 810 sets (ST segment to SE segment) within one ISA.</li> <li>ESPs will initiate the billing process upon the receipt of the current charges so LDCs must ensure prior period charges are sent prior to the current charges during the current bill window.</li> </ul>
Bill Ready – Sequencing Numbers Cross Reference Number between 867, 810, and 820	<ul> <li>Print sequencing numbers must be unique and sequential within each 810. If print sequencing numbers are not unique and sequential, the billing party will determine the order on the bill (i.e., the 810 will not be rejected because the sequencing numbers are not unique).</li> <li>There is a cross reference between billing related documents.</li> <li>867 – BPT02 – This document establishes the cross reference number.</li> <li>810 – BIG05 – This document must have the cross reference number from the respective 867.</li> <li>820 – REF6O (letter O) – When making the other party whole, the 820 to the non-billing party must also include the cross reference number from 867/810 document.</li> </ul>

	Version 2.0
Classic 56	Pennsylvania Notes
Chapter 56	• In order to understand all the billing rules applicable in PA, this document must be used in
	conjunction with Chapter 56. Residential, Commercial and Industrial customer classes each
	have different billing rules and requirements.
Supplier Consolidated	Note: As of March 2000, this document only reflects requirements to support Supplier Consolidated
Billing	Billing where the party doing the billing is the party supplying generation services. The
	requirements for third party billing have not been addressed, and are not included in this document.
Billing Information:	<ul> <li>Allegheny – Will support ESP Consolidated Bill Ready 9/2000</li> </ul>
	<ul> <li>Duquesne – Does not support ESP Consolidated billing.</li> </ul>
	• GPU – Will support ESP Consolidated billing 9/2000
	<ul> <li>PECO – Will support ESP Consolidated billing 7/2000</li> </ul>
	<ul> <li>PPL EU – Will support ESP Consolidated billing 7/2000</li> </ul>
	<ul> <li>Penn Power – Does not support ESP Consolidated billing.</li> </ul>
	• UGI – Does not support ESP Consolidated billing.
Calculating Previous	The billing party has the responsibility of calculating the previous unpaid balance, regardless of
Unpaid Balance	whether or not the billing party is making the non-billing party whole.
Cancellation	
Scenarios: Bill Ready	<ul> <li>ESP Consolidated with LDC Meter Read:</li> <li>PPL EU, PECO – the 867 sent by the LDC will cancel the 810 – a separate cancel 810 will not</li> </ul>
- Directly Related to	be sent.
Usage	• GPU – an 867 cancel and an 810 cancel (BIG08=01) will both be sent.
0	• Allegheny – To be determined
	ESP Consolidated with Third Party Meter Read:
	• PPL EU, PECO – the LDC charges will be cancelled with an 810 (BIG08=17).
	• GPU – The LDC charges will be cancelled with an 810 (BIG08=01).
Cancellation	PPL EU, PECO
Scenarios: Bill Ready	• The LDC charges will be cancelled with an 810 (BIG08=17). The new charges will be sent
– NOT Related to	with an 810 (BIG08=18).
Usage	
	<u>GPU</u>
	• The LDC charges will be cancelled with an 810 (BIG08=01). The new charges will be sent
	with an 810 (BIG08=00).
	Allachamy
	<u>Allegheny</u> Not determined as of 1/31/2000.
Switch from LDC	If on the last month of an LDC Consolidated Bill, the supplier misses the bill window, and charges
Consolidated to ESP	are sent the following month, they will be rejected with an 824 (A84 – Not ESP of Record)
Consolidated	
	GPU Note: If GPU is holding those charges for the next bill window, they will need to inform the
	supplier that they will not be presenting them on the next bill.
Bill Ready Missed	Each I DC has distinct rules on how a missed hill window will be handled, and avagate regimerative
Bill Ready - Missed Window:	Each LDC has distinct rules on how a missed bill window will be handled, and expects reciprocity:
vindow.	PPL EU
	• If the ESP does not get the 810 to the LDC in time for the charges to be added to the bill, the
	ESP will send as many 810s (ST segment through SE segment) within the same ISA Envelope
	as required to submit previous periods (if three periods were missed, four 810s will be sent: the
	three missed prior periods and the current month). All 810s must be in the same ISA envelope,
	as receipt of the 810s within the bill window triggers billing by PPL EU. Only the most current
	month's 810 will be used for text messages.
	PECO
	1ECO

v	ersion	21	n
v	CISIOII	2.	υ

	Version 2.0
	• If the ESP does not get the 810 to the LDC in time for the charges to be added to the bill, the ESP will send 810s (ST segment through SE segment) within the same ISA Envelope as required to submit previous periods (if three periods were missed, four 810s will be sent: the three missed prior periods and the current month). All 810s must be in the same ISA envelope, as receipt of the 810s within the bill window triggers billing by PPL EU. Only the most current month's 810 will be used for text messages.
	<ul><li>GPU</li><li>GPU will hold supplier charges and present on the next bill</li></ul>
Budget Billing	<ul> <li>Allegheny <ul> <li>Expects that the EDC would calculate the budget amount for EDC charges and send it to the EGS via an 810.</li> <li>Budget Bill charges will be sent to ESP as charges to print and be calculated in the total</li> <li>Actual charges will be sent to ESP as "ignore" (SAC01=N) in calculating total, but will print on the bill</li> </ul> </li> </ul>
	<ul> <li>GPU</li> <li>Would send actual charges, expect the ESP to calculate the budget and reimburse actual charges.</li> <li>Exception would only apply if an ESP were granted a waiver from budget billing.</li> <li>GPU will settle on the deferred balance upon the switch to the EGS Consolidated Bill.</li> <li>Budget Bill charges will NOT be sent to an ESP</li> </ul>
	<ul> <li>PECO Energy</li> <li>Would send actual charges, expect the EGS to calculate the budget and reimburse actual charges.</li> <li>Exception would only apply if an EGS were granted a waiver from budget billing.</li> <li>PECO will settle on the deferred balance upon the switch to the EGS Consolidated Bill.</li> <li>Budget Bill charges will NOT be sent to an ESP</li> </ul>
	<b>PPL EU</b> Expects that the EDC would calculate the budget amount for EDC charges and send it to the EGS via an 810. If a customer is on Budget Billing and switches to EGS Consolidated Billing, PPL EU will not settle on the deferred balance until the customer's normal settlement month. PPL EU would not settle upon the switch to EGS Consolidated Billing.
	<ul> <li>Budget Bill charges will be sent to ESP as charges to print and be calculated in the total</li> <li>Actual charges will be sent to ESP as "ignore" (SAC01=N) in calculating total, but will print on the bill</li> </ul>
Text	Text will be provided in the IT109 "ACCOUNT" loop. The PID segment will be used for passing these texts.
Use of IT1 Loops	<ul><li>GPU</li><li>GPU plans to send taxes and all line item charges in the ACCOUNT loop.</li></ul>
	<ul> <li>PECO</li> <li>PECO will send all taxes in the ACCOUNT loop.</li> <li>PECO will send all basic charges in either a RATE loop. If there are multiple electric rates on the account, there will be multiple RATE loops. If there is one electric rate code on the account, there will be one RATE loop.</li> </ul>
	<ul><li>PPL EU</li><li>Not determined</li></ul>
	<ul><li>Allegheny</li><li>Allegheny plans to send taxes and all line item charges in the ACCOUNT loop.</li></ul>

#### Delaware (Conectiv) Notes

Conectiv rules:	The Conectiv (Delaware) rules are not developed. There have been no meetings to discuss ESP Consolidated Billing. They will be scheduled to determine the business rules and use of this transaction.
Billing information:	Conectiv – Does not currently support ESP Consolidated Billing
Calculating Previous Unpaid Balance	The billing party has the responsibility of calculating the previous unpaid balance, regardless of whether or not the billing party is making the non-billing party whole.
Cancellations	This section needs to be developed.
Bill Ready - Missed Window:	This section needs to be developed.
Budget Billing	This section needs to be developed.
Bill Ready Text (Regulatory and Other)	• Text will be provided in the IT109 "ACCOUNT" loop. The PID segment will be used for passing these texts.

## Delaware (Delaware Electric Coop) Notes

Delaware Electric	This transaction does not apply to DEC since the only valid billing option is utility consolidated
Coop rules:	Rate Ready.

### New Jersey Notes

New Jersey: Use of ESP Consolidated Billing	As of 11/1999, New Jersey will not be support ESP Consolidated Billing. When this method must be supported in New Jersey, the appropriate changes will be document. For now, every segment will be marked as "Not Applicable".
Dining	

#### Maryland Notes

The Maryland rules are not developed. There have been no meetings to discuss ESP Consolidated Billing. They will be scheduled to determine the business rules and use of this transaction.

Calculating Previous Unpaid Balance	
Cancellations:	Not defined
Bill Ready - Missed Window:	Not defined
Budget Billing	Not defined

TDS Total Monetary Value Summary
010
Summary
Mandatory
1
To specify the total invoice discounts and amounts
<b>1</b> TDS01 is the total amount of invoice (including charges, less allowances) before terms discount (if discount is applicable).
2 TDS02 indicates the amount upon which the terms discount amount is calculated.
<b>3</b> TDS03 is the amount of invoice due if paid by terms discount due date (total invoice or installment amount less cash discount).
<b>4</b> TDS04 indicates the total amount of terms discount.
<b>1</b> TDS02 is required if the dollar value subject to discount is not equal to the dollar value of TDS01.
TDS01 is the total amount due for this invoice and must equal the sum of the amounts in the
TXI02 and SAC05 segments with the exception of any charges that are designated to be
ignored in the calculation in the TXI07 or SAC01. If this amount is negative, send the minus
sign.
Required
Not Applicable
Same as PA
Required
TDS*10000Note: This represents \$100.00 - there is an implied decimal.
