	Summary of Changes
June 11, 1999 Version 1.0	 Added ability for an ESP to request a secondary service of receiving Summary level Interval information for Pennsylvania (See Notes section for description of service). New features include use of a LIN05 value "SI" and use of an account level REF segment "17". If secondary service is not requested, and interval data exists for the account, the ESP will receive interval data and its related summary data in a single transaction (867IU). If the code is sent, the ESP will receive summarized data only on a monthly basis (867IU). Note: This option may not be offered at the account level by all LDCs – some LDCs may only offer it for all customers of an ESP. Added clarification that Rockland Electric's system maintains the duplicate bill and notice to third party. Transaction is considered FINAL in Pennsylvania.
June 29, 1999	Issued as FINAL for New Jersey.
Version 2.0	 Changed "EGS" to "ESP" and "EDC" to "LDC" throughout the guideline. Removed "NJ Definitions" and replaced it with "LDC Definitions" and "ESP Definitions" in the Notes section. Changed LIN01 to say that the tracking number must be unique over all time. Corrected LIN03 to "Identifies the product" instead of "Indicates a customer request to obtain Electric Service" Clarified requirement of REF*17 Corrected spelling errors and formatting. Added "How to use the implementation guideline" page. In addition, changed all headers to the true X12 definition correcting some mistakes that were missed in the upgrade from Version 3070 to Version 4010. Also corrected the Table on Page 4 to reflect X12 definitions and added the words "X12 Structure" to the title on that page. Added examples (Zip+4 on N4, FX & EM on PER, etc.) Updated rules for status and rejection reasons. Combined "PA Implementation" with "PA Use" On the REF*MT & REF*TU segments, changed "This segment must also be sent when account has UNMETERED services available for generation service (Rate Ready)." to "This segment will not be provided in the NM1 loop for UNMETERED services." Changed Note from "One 814 per Account" to "One Account per 814". Clarified text explaining "Unknown LIN05 Codes" Clarified text explaining "Rejection vs. Acceptance with Status Reason code" Clarified text explaining "Rejection vs. Acceptance with Status Reason code" Clarified text explaining "Rejection vs. Acceptance with Status Reason code" Clarified DTM129 "Customer Contract Effective Date" to indicate the Date is required for CE Request only - not all Requests Removed the following note from all QTY02 elements: "Note that a more appropriate segment would be the QTY (quantity), however until we can petition X12 to add a QTY segment to the 814, we must use the AMT segment"
July 2, 1999	Spell check corrections
Version 2.1	Formatting corrections
July 14, 1999 Version 2.2	 Change Control Process Change #001: Corrected On/Off Peak in REF*TU and examples. The codes 41 and 42 were reversed. Corrected X12 code description for REF*IX to "Item Number"
October 1, 1999	Change Control Process Change #004:
DRAFT Version 2.2b	 N1*8R – corrected examples for customer reference number Reordered the REF*7G Error codes alphabetically

	All I DEPUTE A DOM
November 4, 1999 Version 2.3	 Added note to REF*TZ (LDC Meter Cycle) that it is optional for Unmetered Historical Usage, Meter Information and Summary Interval Response Examples - changed "13" to "11" in BGN01 Special Meter Read Example – changed "029" to "021" in multiple request AMT*DP provided in Multiple Response Example (and should not be) Modified Notes section on unknown LIN05 codes to be consistent with other content in Implementation Guide. Added tentative use for Delaware Delmarva Added clarifying note for meter type – if COMBO, only send one REF*MT. Added note for Delmarva indicating they will only be storing 20 characters. Rejection Examples: Remove sending of echoed fields. It is allowed, but is optional, and most utilities will not be sending it. Added clarifying note for use of tax exemption percent in NJ Fixed some X12 definitions Added clarifying note regarding invalid LIN05 codes Added clarifying note regarding REF03 field for meter ("COMBO" is not valid) This is a FINAL version for Pennsylvania and New Jersey
v C181011 2.3	
November 1999 Draft version 2.3MD1	 Add Maryland use to document – the changes were added to the version 2.3 of the regional standards Added Data Dictionary Added Table of Contents Added REF03 to REF*BF for special condition for bill cycle for MD
December 23, 1999	Clarified Delmarva and Allegheny plans for sending monthly interval data
Version 2.3MD2	 Remove REF*17 (Field 57) from CE Lin Data Dictionary Modified Data Dictionary Customer Name and Billing Name length to allow for 60 for Maryland Clarified APS use of N1*2C (Party to Receive Copy of Bills) Move Maryland Historical Usage notes from REF*1P to General Notes section Remove REF*PRT for Load Cycling Device for Md (this method did not solve issue since it was at meter level and did not indicate quantity) Clarified use of REF*NR for Maryland utilities Added 4 new AMT segments for the Maryland taxes (AAO-Local/County tax, BAK-Franchise tax, F7-State Sales Tax, N8-Environmental tax) Added 2 new AMT segments for Load Management program (L0-Water Heater, 5J-Air Conditioners) Added Rejection Reason codes ANQ (Billing Agent not certified by utility) and C02 (customer on credit hold) to support ESP consolidated billing (PA)
February 24, 2000 Version 2.3MD3	 Clarified County field for N1*8R for Maryland Added City tax for MD Added clarification for APS in MD on sending of 867HU Renumbered items in data dictionary where City added Added FRD as rejection code for MD and DE (Delmarva) - (Bill Option not valid for this type of document)
March 31, 2000 Version 2.3MD4	 Corrected TOC for REF=PR Added MD comment to indicate Historical Usage request was initially only considered for already enrolled customers. Its use for Pre-enrollment still being negotiated as of 3/2000. This transaction is considered FINAL for Maryland
March 31, 2000	Clarified PA Notes on response when using SI secondary service request BY account
Version 2.3MD5	Corrected LIN examples from LIN*SH to LIN*1*SH

 Incorporate PA Change Request X020 – Two new REF*7G codes (NCB and NEB) for supplier consolidated billing Incorporate PA Change Request X022 – Add clarification to Bill Cycle (REF*BF) as it relates to summary billing Incorporate MD Change Control M001 – Several tax exemption segments had been added for MD use. After further review, it was determined they are not needed to support generation charges. As MD was only state using these segments, the segments will be removed from the document. They are AMT*C (City Tax), AMT*BAK (Franchise Tax), AMT*AAO (County/Local Tax) and the AMT*N8 (Environmental Tax) segments. This document is a new finalized version of PA and MD. NJ is still using Version 2.3. REF*BF – modify NJ Use to reflect what use is. Note that had been added for PA was only addressed for PA. Indicate DE Delmarva and MD as same as NJ. Indicated DTM*MRR not used Day 1 for NJ or DE Delmarva Indicate PSEG does not provide Bill Address information (N1*BT). REF*7G responses for CE – Indicate following codes are not valid for NJ: ANQ, NCB, NEB, RCF Change LIN*1 to LIN*23451 to minimize confusion with people thinking this is a counter within the transaction. Add clarification to PSEG sending of City / State in N4 segment in N1*8R loop. Add clarification to DTM*129 field to indicate PSE&G expects to receive only eastern time. 		
This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Delmarva only).		
REF*7G (Rejection Reason Code) – modified note on rejection code "CO2" to included		
NJ.		
Incorporate Delaware Electric Coop (DEC) information for Delaware		
 Incorporate PA Change Control 027 – Allow use of D30 as a valid rejection code (customer has requested rejections of enrollments by this ESP) Incorporate PA Change Control 029 – ESP Account number should exclude punctuation, and must include significant leading and trailing zeros. Incorporate PA Change Control 031 – Add REF*7G code of UNE to indicate the utility code not be identified. Correct Data Element number (352) for REF03 in REF*BF and REF*SPL segments 		
Incorporate PA Change Control 038 – indicate AMT*7N and AMT*QY must always be		
100% for PA. Also, Change PP&L to PPL EU.		
This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.		
 Incorporate PA Change Control 042 - Modify language throughout EDEWG 814 change, enrollment, & reinstatement transactions to agree with the data dictionary for the LIN. Wording change is related to removal of word 'obligation' and replacement with 'contribution'. Deleted note in first bullet under General Notes section, Unknown LIN05 codes, PA Rules. Also deleted all references to the SNP code in the REF*7G. The SNP code is not longer be in use by any PA EDC. 		
 Incorporate NJ Change Control 003 (Update transaction to reflect actual practices) 		
 Incorporate NJ Change Control 005 (NJ CleanPower program changes) Note NJ Change Control 003 included creating separate boxes for each state's notes. The text of the other state's notes did not change. 		
 Incorporate NJ Change Control 008 to reflect NJ CleanPower – unmetered usage for RECO) Incorporate NJ Change Control 009 to reflect NJ CleanPower change for partial 		
usage.		
 Considered FINAL for PA and NJ 		

August 8, 2009 Version 3.0.7D January 24, 2010 Version 3.1 November 4, 2010 Version 3.1.1D	 Incorporate PA Change Control 050 – changes for 867HI Incorporate NJ Change Control PSEG-E-REF45 and PSEG-E-HI Incorporate MD Change Control RM17-814 Incorporate MD Change Control RM17-HU Incorporate PA Change Control 057 This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware. Incorporate PA Change Control 060 (PA Admin/Cleanup Change Control) Incorporate PA Change Control 061 (Clarify DTM129) Incorporate PA Change Control 065 (Add REFLF and REFSV to NM1 loop) Incorporate PA Change Control 067 (PPLEU Rate Ready) Incorporate PA Change Control 068 (PECO 867HI Implementation)
	 Incorporate PA Change Control 070 (Remove HG from LIN05) Incorporate PA Change Control 073 (Modify language throughout EDEWG 814 change, enrollment, & reinstatement transactions to update wording of AMT*KC and AMT*KZ to reflect appropriate PJM terminology. AMTKC = PLC & AMTKZ=NSPL Incorporate MD Change Control – REF1P (MD notes & use of REF1P for MD) Incorporate MD Change Control – Admin (Admin/cleanup for MD)
February 28, 2011 Version 4.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 16, 2012 Version 4.01	 Incorporate PA Change Control 085 (REF*KY) Incorporate PA Change Control 089 (MTI in REF*7G) Incorporate PA Change Control 090 (REF03 in REF*KY) Incorporate PA Change Control 093 (Admin Updates) Incorporate PA Change Control 094 (new REF*7G codes) Incorporate MD Change Control 008 (clarify PEPCO HU/HI Support) Incorporate MD Change Control 010 (PEPCO AMI/Smart Meter Support)
March 8, 2013 Version 6.0	 Moving to v6.0 to align versions across all transaction sets Cleaned up references to Allegheny and APS throughout document Incorporate PA Change Control 095 (REF03 in REF*KY) Incorporate PA Change Control 096 (clarify AMT*DP) Incorporate PA Change Control 097 (PECO Summary/Interval Support) Incorporate PA Change Control 098 (Add LSI code to REF*7G for CE) Incorporate PA Change Control 100 (Add support for ESP Referral Program Enrollments via EDI) Incorporate PA Change Control 101 (remove AMT*LD from request; rescinds CC 58) Incorporate PA Change Control 102 (increase REF*BF length in Data Dictionary) Incorporate PA Change Control 104 (rescind CC 100 – ESP Referral Program) Incorporate MD Change Control 014 (make REF*LF & REF*SV same as PA) Incorporate MD Change Control 015 (add support of 867HI for MD) Removed Special Read (SR) as valid code in LIN, no utility in region supports
March 17, 2014 Version 6.1	 Incorporate PA Change Control 107 (add APA code to REF*7G in CE, HU & HI) Incorporate PA Change Control 110 (add NIA & IHA to REF*7G in HI) Incorporate MD Change Control 021 (PHI new CIS, changes to 814E) Incorporate MD Change Control 028 (BGE support of 867IU) Incorporate MD Change Control 030 (Net Meter Indicator in REF*KY) Incorporate MD Change Control 032 (BGE pre-enroll HU/HI support) Incorporate MD Change Control 033 (BGE LIN handling / response) Incorporate NJ Change Control Electric 015 (Net Meter Indicator in REF*KY) Incorporate NJ Change Control Electric 022 (ACE new CIS, changes to 814E) Incorporate NJ Change Control Electric 026 (Account arrears in AMT*PJ) Incorporate PA 117 & NJE030 (Add NFI code to REF*7G in CE) Incorporate NJ Change Control Electric 031 (Remove RECO from Guide)

February 18, 2015 Version 6.2	 Incorporate PA Change Control 119 (REFSPL optional), remove ANL from REF7G) Incorporate NJ Change Control Electric 033 (REFSPL optional)
March 14, 2017 Version 6.3	 Incorporate PA Change Control 132 (add Instant Connect flag in REF*IC) Incorporate PA Change Control 137 (remove DTM*MRR from IG)
Version 0.5	• Incorporate NJ Change Control Electric 038 (clarify PLC/NSPL effective dates)
	• Incorporate NJ Change Control Electric 042 (require N1*8R address in 814HU)
	• Incorporate MD Change Control 044 (Aggregate Net Energy Metering family identifier in REF*AN)
	Incorporate MD Change Control 047 (Add MAX code to REF*7G in CE)

	General Notes		
One Account per 814	One customer account per 814.		
Tracking number on Request and Response transactions	transaction. This number must be unique over all time, and is assigned by the sender of the		
Multiple LINs	 There may be multiple detail LIN loops for each customer account. It is important that the sender order the LIN loops in the order they would like them processed for all primary services. Refer to the LIN segment within this document for a better understanding of primary and secondary services. The sender may send one service per account per 814 instead of using multiple LIN segments. 		
Response per LIN	 There must be one response LIN for each request LIN. These responses may be created and sent at different times in different 814 transactions, but all LINs must be responded to within the time limits set by the respective Commission. 		
Rejection vs. Acceptance with Status Reason code	is used to give additional information to the receiving party (an FYI). For example, if a		
LDC Definitions:	The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym: • EDC – Electric Distribution Company (Pennsylvania, Delaware) • LDC – Local Distribution Company (New Jersey) • EC – Electric Company (Maryland)		
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym: • EGS – Electric Generation Supplier (Pennsylvania) • TPS – Third Party Supplier (New Jersey) • ES – Electric Supplier (Delaware) • ES – Electricity Supplier (Maryland)		
Renewable Energy Provider Definition:	The term Renewable Energy Provider in this document refers to the party that provides Renewable Energy Credits (RECs). This party does not provide generation to the account. Each state may refer to the Renewable Energy Provider by a different acronym: • GPM – Green Power Marketer (New Jersey)		
	Note: The transaction will either have an ESP or a Renewable Energy Provider, but not both.		

	Pennsylvania Notes
Unknown LIN05 codes	 PA Rules: If an LDC receives a request for a service that the state does not support, the LDC should reject it with a REF*7G*SDE*SERVICE DOES NOT EXIST If an LDC receives a request for a service that the state supports, but the LDC does not, the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED
Requesting Summary Only information for Interval Data (PA Only)	Every utility must provide the ability for a supplier to receive interval data at either the summary level or the detail level. The default, except for PPL EU and PECO, is that an ESP will receive interval data at the summary and the detail level. If an ESP wants interval data at both the summary and the detail level. If an ESP wants interval data at both the summary and the detail levels, the ESP must submit "SI" and include the ESP to receive summary data only. If an ESP wants interval data at both the summary and detail levels, the ESP must submit "SI" and include the REF*17*DETAIL segment. For PECO, the default is also for the ESP to receive summary data. If an ESP wants interval data at the detail level, the ESP must submit "SI" and specify account-level versus meter-level detail via the REF*17 segment. Please note that, unlike PPL EU, PECO does not provide interval data for billing at both the summary and detail levels; The ESP may receive either summary or detail, but not both. If an ESP wants to receive interval data at only the summary level, the ESP must: Contact the LDC to determine if the LDC supports summary level data by account or by ESP If the LDC supports summary level interval data by account, the ESP must submit "SI" in the LINO5 to indicate that only summary level interval data is requested for the account. If the LDC supports summary level interval data by ESP (PECO follows this practice), the "SI" in the LINO5 is not used. The ESP must call the supplier interface group at the LDC to request summary level interval data. The LDC will then return summary level interval data for ALL accounts for that ESP. For PPL EU, if an ESP wants interval data at both the summary and detail levels, the ESP must submit "SI" and include the REF*17*DETAIL segment As stated above, PECO does not provide interval data for billing at both the summary and detail levels; The ESP may receive either summary or detail, but not both. Responses to a Summary Interval Request (LINO5=SI): If the utility does not p
	If the utility provides this service by account, and the account is an interval account, the utility will accept this request, and in their response send a REF*17*SUMMARY.

	New Jersey Notes
Unknown LIN05 codes	 NJ Rules: If an LDC receives a request for a service that it does not support (whether the state supports it or not), the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED
Requesting Summary Only information for Monthly Interval Data	 Details for each EDC: PSE&G – all interval accounts will receive interval details. Accounts that have both interval and non-interval meters will receive the 867IU with information relating to both interval and non-interval meters. JCP&L – An enrollment for an interval account will automatically default to receive an 867 IU with interval detail. A TPS can request to receive interval summary by sending a LIN loop with LIN05 = SI and REF*17*SUMMARY. Atlantic City Electric – Effective with new CIS, an enrollment for an interval account will automatically default to receive and 867IU with interval detail. A TPS can request to receive interval summary by sending a LIN loop with LIN05 = SI and REF*17 = SUMMARY. ACE will also state if the account being enrolled has an actively interval billed AMI SMART meter. ACE will also support the use of the EDI 867 Historical Interval Usage transaction set.
Rockland Electric Co (RECO)	Rockland Electric Co. does not follow this regional EDI implementation guideline. Instead RECO utilizes the New York EDI standards.
PLC Tag Calculation	 The following information may be used to determine the PLC/NSPL effective dates for the tags received on the Enrollment Response. ACE – The PLC/NSPL tags on the Enrollment Response are for the period identified by the Service Start Date (DTM*150). JCPL - If processed the last business day prior to June 1, the "current" tag would be sent. Starting June 1 the "new" tag would be sent. PSEG – Changing their process so that if the tag is processed on the last business day prior to January 1, June 1 or October 1, the "current" tag will be sent. Starting with the effective date, the "new" tag would be sent. Implementation targeted for the 1st quarter of 2016. Rockland - If processed the last business day prior to June 1, the "current" tag would be sent. Starting June 1 the "new" tag would be sent.

	Delaware	
Unknown LIN05 codes	 DE Rules: If an LDC receives a request for a service that it does not support (whether the state supports it or not), the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED 	
Requesting Summary Only information for Monthly Interval Data	Follows Delmarva MD processes	
Handling of Historical Usage Requests:	Follows Delmarva MD processes	
	Maryland Notes	

Requesting Summary Only information for Monthly Interval Data

(MD Only)

Unknown LIN05 codes

MD Rules:

• If an LDC receives a request for a service that it does not support (whether the state supports it or not), the LDC should **accept** it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED

Every utility must provide the ability for a supplier to receive interval data at either the summary level or the detail level. If Interval Summary is to be provided, all utilities will provide 867MU.

Delmarva, PEPCO, Potomac Edison (FE) - The default is that an ESP will receive interval data at the summary and the detail level. If an ESP wants interval data at both the summary and the detail level the ESP does not need to take any action.

- If an ESP wants to receive interval data at only the summary level, the ESP must submit "SI" in the LIN05 and REF*17 = 'SUMMARY' to indicate that only summary level interval data is requested for the account.
- The ESP may request summary level interval data post enrollment by submitting a Change Request at a later date.

BGE – The default is that an ESP will receive interval data at the summary level only.

- If an ESP wants to receive interval data at the detail level for AMI/Smart metered accounts, the ESP must submit "SI" in the LIN05 and "DETAIL" in the REF17.
- The ESP may request detail level interval data post enrollment by submitting a Change Request at a later date.
- For non-AMI/Smart metered interval accounts, the ESP will receive 867MU with the detail interval data posted to BGE's website.
- BGE has special transaction handling scenarios which may be unique to BGE. The following table outlines BGE processing...

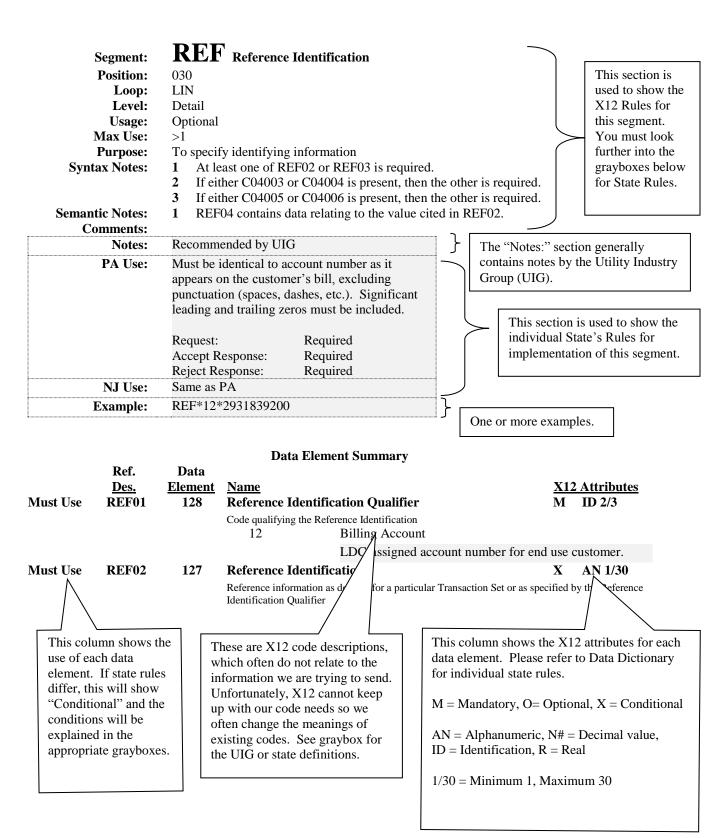

Scenario	Type of Acct.	Reaction
CE, SI - DETAIL, HU, HI	AMI	Accept all
CE, SI - DETAIL, HI	Non-AMI	Accept CE, Accept SI - UMA, Accept HI - HIU (send HU)
CE, SI - DETAIL, HU, HI	Non-AMI	Accept CE, Accept SI - UMA, Accept HU, Accept HI - HIU (don't send another HU)
CE, SI - SUM, HU, HI	AMI	Accept all
CE, SI - SUM, HI	Non-AMI	Accept CE, Accept SI - UMA, Accept HI - HIU (send HU)
CE, SI - SUM, HU, HI	Non-AMI	Accept CE, Accept SI - UMA, Accept HU, Accept HI - HIU (don't send another HU)
SI (no CE)	Either	Reject SSR - Secondary service rejected
SI, HI, HU	Either	Reject SSR - Secondary service rejected
CE, SI - No REF17	AMI	Accept CE, Accept SI - A13 – SSR-Required info missing or invalid
ні	Non-AMI	Accept HI - HIU (send HU)
CE, SI	PBS	Accept CE, Accept SI - SNP – Service Not Provided

Responses to a Summary Interval Request (LIN05=SI):

- If the utility does not provide this capability at the account level, they will accept the request, but respond with a Status Reason code (1P) of SNP for "Service Not Provided".
- If the utility provides this service at the account level, but the account is not an interval account, they will accept the request, but respond with a Status Reason code (1P) of UMA for "Unmetered or non-interval account".
- If the utility provides this service at the account level, and the account is an interval account, the utility will accept this request, and in their response send a REF*17*SUMMARY.

	If Internal Detail is to be availed the faller in one the above to the city.
Maryland – Handling of Historical Usage	 If Interval Detail is to be provided, the following are the plans by utility: BG&E – For AMI/Smart metered accounts, BGE will provide 867IU if requested as stated above. For non-AMI/Smart metered accounts, no 867IU will be sent. Interval data will be provided on web; however, an 867MU will be provided for the Summary data. Delmarva & Potomac Edison – Will provide 867IU PEPCO / Delmarva— Will provide 867IU for both non-AMI/Smarts Meter billed accounts and AMI/Smart Interval Meter Billed accounts. AMI/Smart Interval Billed accounts will be denoted accordingly. Additionally, PEPCO and Delmarva state if the meter being enrolled is an actively interval billed AMI SMART meter and if LIN05 "SI" is not populated on an active interval billed AMI SMART metered account, the 867IU will be sent. PEPCO will no longer support posting interval usage on the Supplier Web Portal. Special Historical Usage Notes:
Requests:	Maryland EDI CC 15 added support of the EDI 867 Historical Interval (HI) transaction
	for Maryland.
	BGE – live January 2014, supports account level
	Potomac Edison – TBD, will support account level PHI (Delmarva MD & PEPCO MD) – with new CIS (est. early-mid 2015), will support
	account level
	BG&E Note: For Historical Usage (HU) requests on a non-interval account, the response will be accepted and the historical usage will be provided via an 867HU. As of January 16, 2014 BGE supports EDI requests for pre-enrollment historical data. See table in above section for special response handling relative to BGE historical usage requests. PEPCO / Delmarva Note: Will support the 867 HI (Historical Interval Usage) transaction set as follows: Interval Metered Accounts – The HI request will be accepted with REF*1P=HIA and
	867HI will be sent.
	• Non-Interval Metered Accounts – The HU request will be accepted with REF*1P = HUA and the 867HU will be sent.
	If no historical usage is available, the request will be accepted with REF*1P = HUU and
	no 867 will be sent. Historical Interval readings will not be posted on the Supplier Web portal.
	Potomac Edison Note: PE will provide an 867HU (Monthly Historical Information) for all Historical usage (HU) requests. Requests for historical interval data must be made outside of EDI.
Maryland – Handling of	BGE, Potomac Edison, Delmarva, and PEPCO support using EDI to satisfy summary
Pre-Enrollment	level pre-enrollment historical usage requests for supplier who have met state and utility
Historical Usage Requests:	specific requirements.
Maryland – RM17 814	The following fields will be continued and in the 014 Historical Hyperson in the 114 Historic
HU Responses:	The following fields will be sent in the 814 Historical Usage accept response transaction from the LDC to the ESP:
	Service Address fields (N1*8R - N3, N4, PER segments)
	Billing Address fields (N1*BT - N3, N4, PER segments)

How to Use the Implementation Guideline

55	Billing Type	Indicates type of billing • LDC consolidated Billing (REF02=LDC) • ESP consolidated Billing (REF02=ESP) • Dual bills (REF02=DUAL)	REF02	LIN: REF01= BLT	X(4)
56	Billing Calculation Method	Indicates party to calculate bill. LDC calculates bill (REF02=LDC) Lach party calculates its portion of the bill (REF02=DUAL)	REF02	LIN: REF01= PC	X(4)
57	LDC Budget Billing Status	Transmits the current budget billing status shown for this customer on the LDC system.	REF02= Y or N	LIN: REF01= NR	X(1)
58	PJM LMP Bus	Point at which the customer is connected to the transmission grid	REF03	LIN: REF01= SPL	X(80)
59	Summary Interval	Used to convey the level of interval data the ESP will receive (REF03=SUMMARY) information, or detail and summary (REF03=DETAIL) information for an interval usage account. For PECO this is Account-Level Detail data. (REF03=METERDETAIL) information for an interval usage account at meter level (PECO only)	REF03	LIN: REF01= 17	X(80)
60	Special Meter Configuration Code	Used to convey there's a special meter present on the account. For example, Net Metering	REF02	LIN: REF01 = KY	X(3)
61	Special Meter Configuration Information	PPLEU-used to report the max K1 (demand) the special meter supports	REF03	LIN: REF01 = KY	X(80)
61.1	Instant Connect	Used to indicate the customer is establishing service under the rules established for Instant Connects. (FirstEnergy in PA only)	REF02= Y or N	LIN: REF01 = IC	X(80)
62	Customer Contract Effective Date/Time	Date/Time ESP entered into contract with customer – used to determine which supplier is the last one in. CCYYMMDD HHMM ZZ	DTM02, DTM03 & DTM04	LIN: DTM01 = 129	See EDI Guide
63	Service Period Start	Date on which energy is expected to flow to this customer for the designated ESP.	DTM02	LIN: DTM01 = 150	9(8)
Note th	hat the following AMT se	gments may appear in any order on the actu	al EDI trai	isaction.	
64	Participating Interest	Percent of the customer's load the ESP is requesting service for. If an ESP is only responsible for half of the customer's eligible load, the amount .5 will be returned.	AMT02	LIN: AMT01= 7N	9(1).9999

65	Eligible Load Percentage	Percent of the customer's load that is eligible for competition. For example, if 2/3 of the customer's load is eligible, the amount .66667 will be returned.	AMT02	LIN: AMT01= QY	9(1).9999
66	Percent Tax Exemption	Customer's Tax Exemption Percentage – Residential usually 100% (send 1), Commercial/Industrial – anything other than 0% requires you secure tax exemption certificate. (e.g., if 50% send .5)	AMT02	LIN: AMT01= DP	9(1).9(4)
67	State Sales Tax Exemption	Customer's state sales tax exemption. Anything other than zero, supplier is required to secure tax exemption certificate. If 100% tax exempt, send 1.	AMT02	LIN: AMT01= F7	9(1).9(4)
68	Air Conditioners in Load Management Program	Number of air conditioners that are part of load cycling program	AMT02	LIN: AMT01= 5J	9(2)
69	Water Heaters in Load Management Program	Number of water heaters that are part of load cycling program	AMT02	LIN: AMT01= L0	9(2)
70	Peak Load Contribution	Peak Load Contribution (PLC) provided to PJM for Installed Capacity calculation (coincident with PJM's peak)	AMT02	LIN: AMT01= KC	9(9).99
71	Network Service Peak Load	Customer's Network Service Peak Load (NSPL) provided to PJM for the transmission service calculation (coincident with LDC peak)	AMT02	LIN: AMT01= KZ	9(9).99
72	Number of Months	Number of Months over which the Total kWh (AMT*TA) and/or Peak Demand (AMT*MA) are calculated.	AMT02	LIN: AMT01= LD	9(2)
73	Peak Demand (12 mo)	Highest usage in the last 12 months (kW).	AMT02	LIN: AMT01= MA	9(11).999
73.1	Account Arrearage (Number of Days)	Whole number indicating number of days the customer account is in arrears	AMT02	LIN: AMT01= PJ	9(2)
75	Total kWh	Total kWh for the number of months specified in the AMT*LD segment (actual or estimated).	AMT02	LIN: AMT01= TA	9(15)
76	Meter Number	Number which identifies meter	Request: NM109= ALL Response: NM109= [meter number] or UNMETERE D	NM101= MQ NM102= 3 NM108= 32	X(30)
	Note that the following K	REF segments may appear in any order on	the actual E	EDI transaction	n.
77	Loss Factor	Loss factor	REF02	NM1:REF01	= X(30)
78	Profile Group	A code for the Load Profile used for this customer. Differs by LDC. Codes posted on LDC's Web site.	REF02	NM1: REF01	, ,
79	LDC Rate Code	Code indicating the rate a customer is being charged by LDC per tariff. Codes posted on LDC's Web site	REF02	NM1: REF01 NH	= X(30)

80	LDC Rate Subclass Code	Used to provide further classification of a rate.	REF02	NM1: REF01= PR	X(30)
81	ESP Rate Code	ESP rate code for customer	REF02	NM1: REF01= RB	X(30)
82	Service Voltage	Service voltage	REF02	NM1:REF01= SV	X(30)
83	LDC Meter Cycle	LDC Cycle on which the meter will be read	REF02	NM1: REF01= TZ	X(2)
84	Meter Type	Type of Meter	REF02	NM1: REF01= MT	X(5)
85	Meter Type Additional Information	Additional information for the meter type	REF03	NM1: REF01= MT	X(80)
	The following thr	ee fields each require that the Meter Type	be shown in R	REF03:	
86	Meter Constant/Meter Multiplier	Some factor multiplied by the meter reading to give billed usage.	REF02	NM1: REF01= 4P REF03 = Meter Type (See REF*MT)	9(9).99
87	Number of Dials / Digits and related decimal positions	Needed to determine usage if meter reading rolls over during the billing period. Number of dials on the meter displayed as the number of dials to the left of the decimal, a decimal point, and number of dials to the right of the decimal.	REF02	NM1: REF01= IX REF03 = Meter Type (See REF*MT)	9.9
88	Type of metering used for billing	Indicates the type of metering information that will be sent on the 867 transaction.	REF02= 41 (on peak) or 42 (off peak) 43 (intermediate) or 51 (totalizer)	NM1: REF01 = TU REF03 = Meter Type (See REF*MT)	X(2)

Data Dictionary for Historical Usage Requests (LIN05=HU, HI)

Appl Field	Field Name	Description	EDI Segment	Loop / Related EDI Qualifier	Data Type

ST Transaction Set Header **Segment:**

Position:

Loop:

Level: Heading Usage: Mandatory

Max Use:

Purpose:

To indicate the start of a transaction set and to assign a control number

Syntax Notes:

Semantic Notes:

The transaction set identifier (ST01) is used by the translation routines of the 1 interchange partners to select the appropriate transaction set definition (e.g., 810

selects the Invoice Transaction Set).

Comments:

PA Use:	Required
NJ Use:	Required
DE Use :	Required
MD Use:	Required
Example:	ST*814*000000001

Must Use	Ref. Des.	Data Element	Name Transaction Set Identifier Code		Attributes ID 3/3
Must Use	ST01	143	Transaction Set Identifier Code	M	ID 3/3
			Code uniquely identifying a Transaction Set 814 General Request, Response or Confirm	nation	
Must Use	ST02	329	Transaction Set Control Number	M	AN 4/9
			Identifying control number that must be unique within the transaction set f	unction	nal group assigned

Segment: BGN Beginning Segment

Position: 020

Loop:

Level: Heading Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of a transaction set
 Syntax Notes: 1 If BGN05 is present, then BGN04 is required.
 Semantic Notes: 1 BGN02 is the transaction set reference number.

BGN03 is the transaction set date.BGN04 is the transaction set time.

4 BGN05 is the transaction set time qualifier.

5 BGN06 is the transaction set reference number of a previously sent transaction

affected by the current transaction.

Comments:

PA Use:	Required
NJ Use:	Required
DE Use :	Required
MD Use:	Required
Request Example:	BGN*13*199904011956531*19990401
	(Note: BGN06 not used in the request.)
Response Example:	BGN*11*199904020830531*19990402***199904011956531
	(Note: BGN06 is optional on the response.)

Segment: LIN Item Identification

Position: 010
Loop: LIN
Level: Detail
Usage: Optional

Max Use: 1

Purpose: To specify basic item identification data

Syntax Notes:

1 If either LIN04 or LIN05 is present, then the other is required.

- 2 If either LIN06 or LIN07 is present, then the other is required.
- 3 If either LIN08 or LIN09 is present, then the other is required.
- 4 If either LIN10 or LIN11 is present, then the other is required.
- 5 If either LIN12 or LIN13 is present, then the other is required.
- 6 If either LIN14 or LIN15 is present, then the other is required.
- 7 If either LIN16 or LIN17 is present, then the other is required.
- 8 If either LIN18 or LIN19 is present, then the other is required.
- 9 If either LIN20 or LIN21 is present, then the other is required.
- 10 If either LIN22 or LIN23 is present, then the other is required.
- 11 If either LIN24 or LIN25 is present, then the other is required.
- 12 If either LIN26 or LIN27 is present, then the other is required.
- 13 If either LIN28 or LIN29 is present, then the other is required.
- 14 If either LIN30 or LIN31 is present, then the other is required.

Semantic Notes: 1

Comments:

LIN01 is the line item identification

1 See the Data Dictionary for a complete list of Ids.

2 LIN02 through LIN31 provide for fifteen different product/service Ids for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

PA Use: Required Accept Response: Required Required

Reject Response: Required if it was provided on the request.

PA Options

The only valid codes in Pennsylvania are Generation Services (CE), Historical Usage (HU), Historical Interval (HI), and Summary Interval (SI).

PA Processing Order

Only one service may be requested per LIN loop and it is important that the sender order the LIN loops in the order that they would like them processed for all primary services. It is required that the LIN for Generation Services (CE) be sent prior to all secondary services if the secondary services are dependent upon the successful enrollment.

NJ Use: Requiest: Required

Accept Response: Required

Reject Response: Required if it was provided on the request.

NJ Options

The only valid codes in New Jersey are Generation Services (CE), Historical Usage (HU), Historical Interval Usage (HI) - [Atlantic City Electric only], Renewable Energy Certificate Service (RC), and Summary Interval (SI).

Note: For Atlantic City Electric support of the 867HI, see below table under MD use section.

DE Use: Request:

Required

Accept Response:

Required

Reject Response: Required if it was provided on the request.

Delmarva DE Options

The only valid codes in Delaware (Delmarva) are Generation Services (CE), Historical Usage (HU), Historical Interval Usage (HI) and Summary Interval (SI).

Note: Delmarva DE support of the 867HI, see below table under MD use section.

MD Use: Request: Required

Accept Response: Required

Reject Response: Required if it was provided on the request.

MD Options

The only valid codes in Maryland are Generation Services (CE), Historical Usage (HU), Historical Interval (HI), and Summary Interval (SI). See MD notes section for use of HI **Note:** PEPCO in Maryland will accept secondary services request "SI" regardless of meter type (interval or non-interval). If account is interval billed, and SUMMARY is requested by the ESP, the 867MU summary transaction will be sent.

PEPCO & Delmarva support the use of the 867HI transaction, the	following rules apply:
--	------------------------

LIN05	Scenario	REF1P Code	867 Action
LIN05 = HU	HU available on non-interval account	No REF1P sent	867HU sent
LIN05 = HU	HU not available	REF1P = HUU	No 867 sent
LIN05 = HI	HI available	No REF1P sent	867HI sent
LIN05 = HI	Neither historical interval detail or summary data available	REF1P = HIU	No 867 sent
LIN05 = HI	HI data unavailable BUT summary HU	No REF1P sent	867HU sent
	data is available		
LIN05 = HI	HI request on non-interval account	No REF1P sent	867HU sent

Examples:

LIN*CE199912310800000001*SH*EL*SH*CE (Generation Services)
LIN*HU199912310800000002*SH*EL*SH*HU (Historical Usage)
LIN*HU1999123108000000007*SH*EL*SH*HI (Historical Interval Usage)
LIN*SI1999123108000000005*SH*EL*SH*SI (Summary Interval)
LIN*SI1999123108000000006*SH*EL*SH*RC (Renewable Energy Services)

Data Element Summary

	Ref.	Data		
	Des.	Element	<u>Name</u>	X12 Attributes
Must Use	LIN01	350	Assigned Identification	O AN 1/20
			Alphanumeric characters assigned for differentiation within a tran	saction set
			On the request, this is a unique tracking number for e	each line item (LIN) in this
			transaction. This number must be unique over all time	ne. This number must be
			returned on the response transaction in the same elem	nent.
Must Use	LIN02	235	Product/Service ID Qualifier	M ID 2/2
			Code identifying the type/source of the descriptive number used in SH Service Requested	1 Product/Service ID (234)
Must Use	LIN03	234	Product/Service ID	M AN 1/48
			Identifying number for a product or service	
			EL Electric Service	
			Identifies the product	
Must Use	LIN04	235	Product/Service ID Qualifier	M ID 2/2
			Code identifying the type/source of the descriptive number used in	n Product/Service ID (234)
			SH Service Requested	

Primary Service:

Primary Services include the following:

Generation Services (CE)

Renewable Energy Certificate Service (RC)

Primary services must be responded to with an Accept or a Reject at the LIN level. If the transaction *cannot* be processed in the application system (e.g. the enrollment fails due to missing or invalid data) the transaction must be Rejected (ASI01="U") and a Rejection Reason Code is provided in REF*7G. **Note:** In New Jersey, the only valid primary services are Generation Services (CE) and Renewable Energy Certificate Service (RC).

Secondary Service:

Secondary Services include the following:

Historical Usage (HU) Historical Interval (HI) Summary Interval (SI)

	However, th	e "rejection" is tre	sponded to with an Accept or a Reject at the LIN level. ated differently than primary services.
Must Use LIN05	234 Pi	roduct/Service ID	M AN 1/48
"Primary Service"	Ide	entifying number for a p CE	Generation Services
			Indicates this transaction relates to Generation Services.
"Primary Service"		RC	Renewable Energy Certificate Services
"Secondary Service"	,	HU	Indicates this transaction relates to Renewable Energy Certificate Services. Historical Usage
			 Indicates an ESP request to obtain historical usage information for this customer. The usage data is returned on an EDI 867 in addition to the 814 Response If this service cannot be provided, the associated REF*1P can be "HUU" or "HUR"
"Secondary Service"	,	HI	Historical Interval Usage
			Indicates an ESP request to obtain historical interval usage information for this customer. If historical interval not available, a REF*1P will be sent with "HIU". Note - PHI companies –If HI request on a non-interval account, the request is accepted, the response remains REF*1P*HIU and the 867HU is sent
"Secondary Service"	,	SI	Summary Interval
			 Indicates an ESP request to obtain interval data at the level requested in the REF*17 segment This must be sent with a Generation/Renewable Energy Certificate Enrollment or after a Generation / Renewable Energy Certificate Enrollment. If this service is not provided, the associated REF*1P is "SNP". If this service is not provided at an account level (i.e., the meter agent requires that a decision be made for all accounts for the ESP), the associated REF*1P is "SNP".
			Note: Atlantic City Electric will accept secondary service request 'SI' regardless of meter type (interval or non-interval).

Segment: ASI Action or Status Indicator

Position: 020
Loop: LIN
Level: Detail
Usage: Optional
Max Use: 1

Purpose: To indicate the action to be taken with the information provided or the status of the entity

described

Syntax Notes: Semantic Notes: Comments:

Comments:				
Notes:	Identifies the action to be taken or the status of a requested action for the service identified in the LIN segment.			
	Status Reason Codes are conveyed in the REF segment (position 030) rather than in the ASI03, to allow for multiple status reasons.			
PA Use:	Request:	Required		
	Accept Response:	Required		
	Reject Response:	Required		
NJ Use:	Same as PA			
DE Use:	Same as PA			
MD Use:	Same as PA Note: BGE has speciadditional information	ial response handling scenarios. See table in MD Notes section for n.		
Request Example:	ASI*7*021			
Response Examples:	ASI*WQ*021	Accept Response		
	ASI*U*021	Reject Response

			7	Request
			U	Reject
			WQ	Accept
Must Use	ASI02	875	Maintenance T	ype Code M ID 3/3
			Code identifying the	e specific type of item maintenance
			021	Addition
				Used when requesting the following services:
				CE – Generation Services
				RC – Renewable Energy Certificate Services
				SI – Summary Information for Interval Account
			029	Inquiry
				Use when requesting the following services:
				HU – Historical Usage
				HI – Historical Interval Usage

Segment: REF Reference Identification (7G=Rejection Reason)

Position: 030
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: 1 At least one of REF02 or REF03 is required.

If either C04003 or C04004 is present, then the other is required.
 If either C04005 or C04006 is present, then the other is required.

1 REF04 contains data relating to the value cited in REF02.

Semantic Notes: Comments:

Comments:				
Notes:	This iteration of the REF segment is used to convey the rejection reason codes in response to a Request. The rejection reason codes are conveyed in this segment rather than in the ASI03 to allow for multiple rejection reasons.			
PA Use:	If an LDC receives a request for a service that the state does not support, the LDC should reject it with a REF*7G*SDE*SERVICE DOES NOT EXIST			
	If an LDC receives a request for a service that the state supports, but the LDC does not, the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED			
	Request: Not Used			
	Accept Response: Not Used Reject Response: Required			
NJ Use:	If an LDC receives a request for a service that it does not support (whether the state supports it or not), the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED			
DE Use:	Same as NJ			
MD Use:	Same as NJ			
Example:	REF*7G*A13*ADDITIONAL REASON TEXT HERE			

Data Element Summary

	Kei.	Data		
	Des.	Element	<u>Name</u>	X12 Attributes
Must Use	REF01	128	Reference Identification Qualifier	M ID 2/3

Code qualifying the Reference Identification

7G Data Quality Reject Reason

Reject reasons associated with a reject status notification.

Rules for Rejection Reason Codes

The codes on the next several pages have been identified by the UIG to convey rejection reasons. Only the codes listed for each service are valid for that service. If you require additional codes, send an email to the appropriate state's listserver.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, an E-mail must be sent to the appropriate state's listserver by the party sending the code, to notify the market participants about the text explanation for A13. This information will be compiled and new codes will be issued on a periodic basis.

PA Listserver: edewg@ls.eei.org
NJ Listserver: njbpu@ls.eei.org

	Gen	eration Service	s (CE) Rejection Codes:
Must Use		27 Reference Identif	
			as defined for a particular Transaction Set or as specified by the Reference
		008 021	Account exists but is not active Move Pending
		021	Customer will be moving before the ESP would become active.
		A13	Other
			REF03 Required. Send email to edewg@ls.eei.org each time A13 is used for a new purpose.
		A76	Account not found
			This includes invalid account numbers as well as no account number being found.
		A91	Service is not offered at customer's location
			For instance, used to indicate that this is a gas only account, no electric service exists on the account.
		ADNI	
		ABN	Duplicate request received
		ACI	Action Code (ASI01) Invalid
		ANE	Account Not Eligible
		ANL ANQ	Service provider not licensed to provide requested service Billing Agent not certified by Utility
			Not valid in NJ
		ANV	Account Not Volunteered
			Not Used in PA
		APA	Account Pending Active
		API	Required information missing (REF03 Required)
		B33	Customer name is missing from the request
		C02	Customer is on Credit Hold
			Valid in PA when consolidated bill requested for customer who has been switched to DUAL billing due to delinquencies
			when making the other party whole. Valid in NJ when consolidated bill requested for customer is
		C02	deemed not creditworthy.
		C03	Customer Enrolled in USF
		CAD	NJ - Only valid in NJ Renewable Energy Provider program
		CAP	CAP accounts must be submitted as dual bill PA – Duquesne Only
		CMP	Customer locked with ESP
		Civii	The customer has enrolled with another ESP and the rescission
			period has expired. The customer cannot be enrolled until the pending enrollment is complete.
			Used in NJ when enrollment is requested for Renewable
			Energy Certificate Services and customer is enrolled with an ESP.
			Used in MD when enrollment is received after allowed time period.
		D30	Customer has indicated they did not want to be marketed to by this ESP
		DIV	Date/Time Invalid or Missing
			Used to indicate any error in the Customer Contract Effective Date (DTM*129). This would indicate an invalid date, such as 2/30/2000.
		FRB	Incorrect Billing Option (REF*BLT) Requested
		FRC	Incorrect Bill Calculation Method (REF*PC) Requested
		FRD	Bill Option not valid for this type of account
			Valid in MD/DE (Delmarva): Used when consolidated bill option selected for manually billed account.

Position: 030
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: 1 At least one of REF02 or REF03 is required.

If either C04003 or C04004 is present, then the other is required.
 If either C04005 or C04006 is present, then the other is required.

1 REF04 contains data relating to the value cited in REF02.

Semantic Notes:

Comments:	
Notes:	This iteration of the REF segment is used primarily to convey status reason codes in response to a Request. The status reason codes are conveyed in this segment rather than in the ASI03 to allow for multiple status reasons.
	A Status Reason code is different than a Rejection Reason code in that it is used to give additional information to the receiving party (an FYI). For example, if a request for Historical Usage is sent and the transaction is valid, but historical usage is not available for that customer, the transaction is accepted and a status reason code is provided to explain that the historical usage would not be sent. Generally, if a transaction is rejected, the sender is expected to follow up and resubmit; whereas if a transaction is accepted with a status reason code, the sender is not expected to take any further action.
DA II.a.	Pagnasti Nat Usad

	the sender is expected to follow up and resubmit; whereas if a transaction is accepted with		
	a status reason code, the sender is not expected to take any further action.		
PA Use:	Request: Not Used		
	Accept Response:	Required when status information must be conveyed.	
	Reject Response:	Required when status information must be conveyed.	
NJ Use:	Same as PA		
DE Use:	Same as PA		
MD Use:	Request:	Required if ESP requests drop reversal or reinstatement	
	Accept Response:	Same as PA	
	Reject Response:	Same as PA	
		See General Notes section for how each Maryland utility	
		handles requests for Historical data for an interval account.	
Example:	REF*1P*A13*ADDITIONAL REASON TEXT HERE		
_	REF*1P*HUU*HIST	ORICAL USAGE UNAVAILABLE	

Data Element Summary

REF*1P*HUR*HISTORICAL USAGE NOT RELEASED

	Des.	Element	<u>Name</u>	X12 Attributes
Must Use	REF01	128	Reference Identification Qualifier	M ID 2/3

Code qualifying the Reference Identification

1P Accessorial Status Code

Used in the instance where the 814 Request is accepted, but additional status information must be provided; e.g. code W09, special off-cycle meter read cannot be performed.

Rules for Status Reason Codes

The codes on the next several pages have been identified by the UIG to convey status reasons. Only the codes listed for each service are valid for that service. If you require additional codes, send an email to the appropriate state's listserver.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, an E-mail must be sent to the appropriate state's listserver by the party sending the code, to notify the market participants about the text explanation for A13. This information will be compiled and new codes will be issued on a periodic basis.

PA Listserver: edewg@ls.eei.org
NJ Listserver: njbpu@ls.eei.org

Generation Services (CE) Status Codes:

Must Use	REF02	127	Reference Ident	dification X AN 1/30
			Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier	
			A13	Other
			B30	REF03 Required. Send email to edewg@ls.eei.org each time A13 is used for a new purpose. Currently Enrolled
			EB1	Used to indicate that the customer is already enrolled with the ESP that is requesting enrollment. The transaction is treated as an inquiry. Enrollment from active or pending supplier
			Used by original active or pending supplier to ha transaction treated a reversal of a drop. [MD On EB2] Enrollment from Incumbent supplier	
				Used by incumbent supplier to have incumbent supplier re-instated. [MD Only]
Optional	REF03	352	Description	X AN 1/80

A free-form description to clarify the related data elements and their content Used to further describe the status reason code sent in REF02. Code "A13" requires a text explanation in this element.

Segment: REF Reference Identification (17=Summary Interval)

Position: 030
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: 1 At least one of REF02 or REF03 is required.

- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required.

Semantic Notes: 1 REF04 contains data relating to the value cited in REF02.

Comments:

PA Use:

- Every utility must provide the ability for a supplier to receive interval data at either the summary level or the detail level. The default, except for PPL EU and PECO, is that an ESP will receive interval data at the summary and the detail level. If an ESP wants interval data at both the summary and the detail level the ESP does not need to take any action.
 - For PPL EU, because nearly all customers have interval meters, the default is for the ESP to receive summary data only. If an ESP wants interval data at both the summary and detail levels, the ESP must submit "SI" and include the REF*17*DETAIL segment.
 - For PECO, the default is also for the ESP to receive summary data only. If an ESP wants interval data at the detail level, the ESP must submit "SI" and specify account-level versus meter-level detail via the REF*17 segment. Please note that, unlike PPL EU, PECO does not provide interval data for billing at both the summary and detail levels; The ESP may receive either summary or detail, but not both
- If an ESP wants to receive interval data at only the summary level, the ESP must:
 - Contact the LDC to determine if the LDC supports summary level data by account or by ESP
 - If the LDC supports summary level interval data by account, the ESP must submit "SI" in the LIN05 to indicate that only summary level interval data is requested for the account.
 - If the LDC supports summary level interval data by ESP, the "SI" in the LIN05 is not used. The ESP must call the supplier interface group at the LDC to request summary level interval data. The LDC will then return summary level interval data for ALL accounts for that ESP.
 - For PPL EU, the default is summary. If an ESP wants interval data at both the summary and detail levels, the ESP must submit "SI" and include the REF*17*DETAIL segment.
- As stated above, PECO does not provide interval data for billing at both the summary and detail levels; The ESP may receive either summary or detail, but not both.

Responses to a Summary Interval Request (LIN05=SI):

- If the utility does not provide this capability at the account level, they will accept the request, but respond with a Status Reason code (1P) of SNP for "Service Not Provided".
- If the utility provides this service at the account level, but the account is not an interval account, they will accept the request, but respond with a Status Reason code (1P) of UMA for "Unmetered or non-interval account".
- If the utility provides this service at the account level, and the account is an interval
 account, the utility will accept this request, and in their response send a
 REF*17*SUMMARY.

SI Request: Required by PPL EU and PECO in the LIN loop where LIN05=SI if the ESP wants to receive Interval Details.

	SI Accept Response:	Required if service was requested and will be provided.		
	SI Reject Response	Not Used		
	All other Requests:	Not Used		
	All other Accept Responses:	Not Used		
	All other Reject Responses:	Not Used		
NJ Use:	Optional for JCP&L and Atlantic City Electric			
DE Use:	Same as Delmarva MD			
MD Use:	Same as PA as far as 814 Enrollment transaction.			
	Refer to General Notes section for each utility's plans to provide interval details.			
Example:	REF*17*SUMMARY

Segment: AMT Monetary Amount (DP=Tax Exemption Percent)

Position: 060
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To indicate the total monetary amount

Syntax Notes: Semantic Notes: Comments:

PA Use:

This field is used for the non-billing party to tell the billing party the tax exemption amount that should be entered into the billing party's system in order to calculate a bill on the sender's behalf. This is required only for rate-ready LDC Consolidated billing where the LDC has loaded the ESP rates into their system, the LDC calculates the ESP charges, and places the ESP charges on the LDC bill. The following generic rules are offered to better explain the use of the segment for PA:

- Residential customers default to '1' (AMT*DP*1~) as 100% tax exempt unless the residence is used for business purposes or vacation home.
- Commercial customers default to '0' (AMT*DP*0~) being 0% tax exempt unless the customer presents a sales tax exemption certificate. Should the customer have a tax exemption percentage less than 100% but greater than 0%, the value would be reported as a decimal (AMT*DP*.5~). A tax exemption certificate must be secured from the customer.

It's the ESP's responsibility to ensure the value in the AMTDP is accurate based on the customer's tax status. Under Rate Ready billing, correcting inaccurate customer bills due to incorrect tax exemption is not the LDC's responsibility and in most cases requires the Supplier to rectify directly with the customer.

CE Request: Required if LDC is calculating the ESP portion of the bill

Accept Response: Optional

CE Reject Response: Return on response if it was provided on the request

All other Reject Responses: Not Used

NJ Use: Same as PA Note: For Rate Ready, since rate must include taxes, ESP should always set

this to 100% tax exempt in NJ.

DE Use: Same as PA

MD Use: Not used – Maryland tax exemptions apply to a specific tax. Each tax has a separate AMT

segment. The current applicable tax is State Sales tax (AMT*F7)

Examples: AMT*DP*.75

AMT*DP*.7599

Data Element Summary

REF*MT*COMBO*SMART REF*MT*COMBO*I

Data Element Summary

Must Use	Ref. <u>Des.</u> REF01	Data Element 128	<u>Name</u> Reference Ide	entification Qualifier	<u>X12</u> M	Attributes ID 2/3
			Code qualifying t	the Reference Identification Meter Ticket Number		
				Meter Type		
Must Use	REF02	127	Reference Ide	entification	X	AN 1/30

Reference information as defined for a particular Transaction Set or as specified by the Reference

Identification Qualifier

When REF01 is MT, the meter type is expressed as a five-character field. The first two characters are the type of consumption the last three characters are the metering interval. "COMBO" is used for a meter that records more than one measurement. Valid values can be a combination of the following values:

Nnn

Type of Consumption Metering Interval Kilowatt Demand Number of minutes from 001 to 999

K2	Kilovolt Amperes Reactive Demand	ANN	Annual
K3	Kilovolt Amperes Reactive Hour	BIA	Bi-annual
K4	Kilovolt Amperes	BIM	Bi-monthly
K5	Kilovolt Amperes Reactive	DAY	Daily
KH	Kilowatt Hour	MON	Monthly
T9	Thousand Kilowatt Hours	QTR	Quarterly

For Example:

K1

KHMON Kilowatt Hours Per Month

K1015 Kilowatt Demand per 15 minute interval

Other Valid Codes

COMBO This code is used to indicate that the meter has multiple measurements, e.g., one meter that measures both kWh and Demand.

Optional REF03 352 Description

A free-form description to clarify the related data elements and their content Atlantic City Electric, Delmarva DE, PEPCO MD & Delmarva MD Use: will send 'SMART' in the REF03 to denote meter is an AMI/Smart meter.

PECO PA Use: When REF01 is MT, valid values for REF03 are:

I – Interval data available

M – Interval data NOT available

Position: 130
Loop: NM1
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: 1 At least one of REF02 or REF03 is required.

If either C04003 or C04004 is present, then the other is required.
If either C04005 or C04006 is present, then the other is required.

Semantic Notes: 1 REF04 contains data relating to the value cited in REF02.

Comments

Comments:				
PA Use:	There will be one REF*4P segment for each Meter Type. This means that there may be more than one REF*4P segment per meter. For instance, when meter type is "COMBO", there may be a REF*4P to indicate the meter constant for the demand (example: REF*4P*1200*K1015) and a REF*4P to indicate the meter constant for the kWh (example: REF*4P*2400*KH015).			
	Request:	Not Used		
	CE Accept Response:	Required for each meter type for each meter that is used for billing purposes. This segment will not be provided in the NM1 loop for UNMETERED services.		
	All other Accept Responses:	Not Used		
	Reject Response:	Not Used		
NJ Use:	Same as PA			
DE Use:	Same as PA			
MD Use:	Same as PA
