Verizon should complete the FIOS build or give back the 13 billion dollars granted to them. This is just another big company that is using our money for their profits. The BPU needs to represent the citizens of NJ.

The BPU has the authority to make Verizon do what was promised in 1993. I as a taxpayer implore that you stand up for the residents of NJ. If feel that you should side with Verizon you are not representing NJ.

The BPU should then be disbanded.

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
William sweeney
