

Department of Community Affairs

Division of Fire Safety

Office of the Director

TO: New Jersey Fire Service
FROM: William Kramer, Jr. Acting Director/State Fire Marshal
DATE: March 22, 2013
SUBJECT: Fire Department to Fire Department Assistance Program

During Super Storm Sandy, a number of fire departments lost apparatus and/or equipment. As a result of salt water intrusion, many fire departments are now starting to suffer additional apparatus and equipment losses.

The Division of Fire Safety has launched a program that allows fire departments in need of apparatus and/or equipment to post that need on the Division's website, where it can be viewed by any fire department in the world that is willing to help.

If your department is in need of apparatus and or/equipment, please go to http://fs6.formsite.com/dca_dfs/fire_dept_assistance/index.html and complete the *Fire Department to Fire Department Assistance Form*. Once it is submitted, we will post the request, including the contact information on the division's website.

Department's willing to assist should visit the website often, as it will be updated continuously as requests are received.

If you are a department requesting assistance, once your request has been met, please contact Karen Luckie at karen.luckie@dca.state.nj.us so that it can be removed from the website.

I trust that together we will be able to meet any need!
