REPORT CONTENTS

The data presented in this report is representative of the incident data that was submitted to the Division of Fire Safety's NFIRS Unit by June 29, 2008. Data received has been processed into the State and Federal databases. Please refer to pages **126** through **144** to see if your fire department has contributed to the information in this report.

Based upon incidents received, New Jersey fire departments responded to **425,838** incidents in 2007.

Data submission is broken down as follows:

Of the **744** fire departments in the state, **715 (96%)** submitted data.

Note: **36** fire departments submitted less than six months of data.
29 fire departments did not submit any data.

The number of fire departments in the state differs from 2006 due to the merging of two departments in Cumberland County (Newport Fire Department and Fortescue Fire Company # 1) to create Downe Township Fire and Rescue Company.

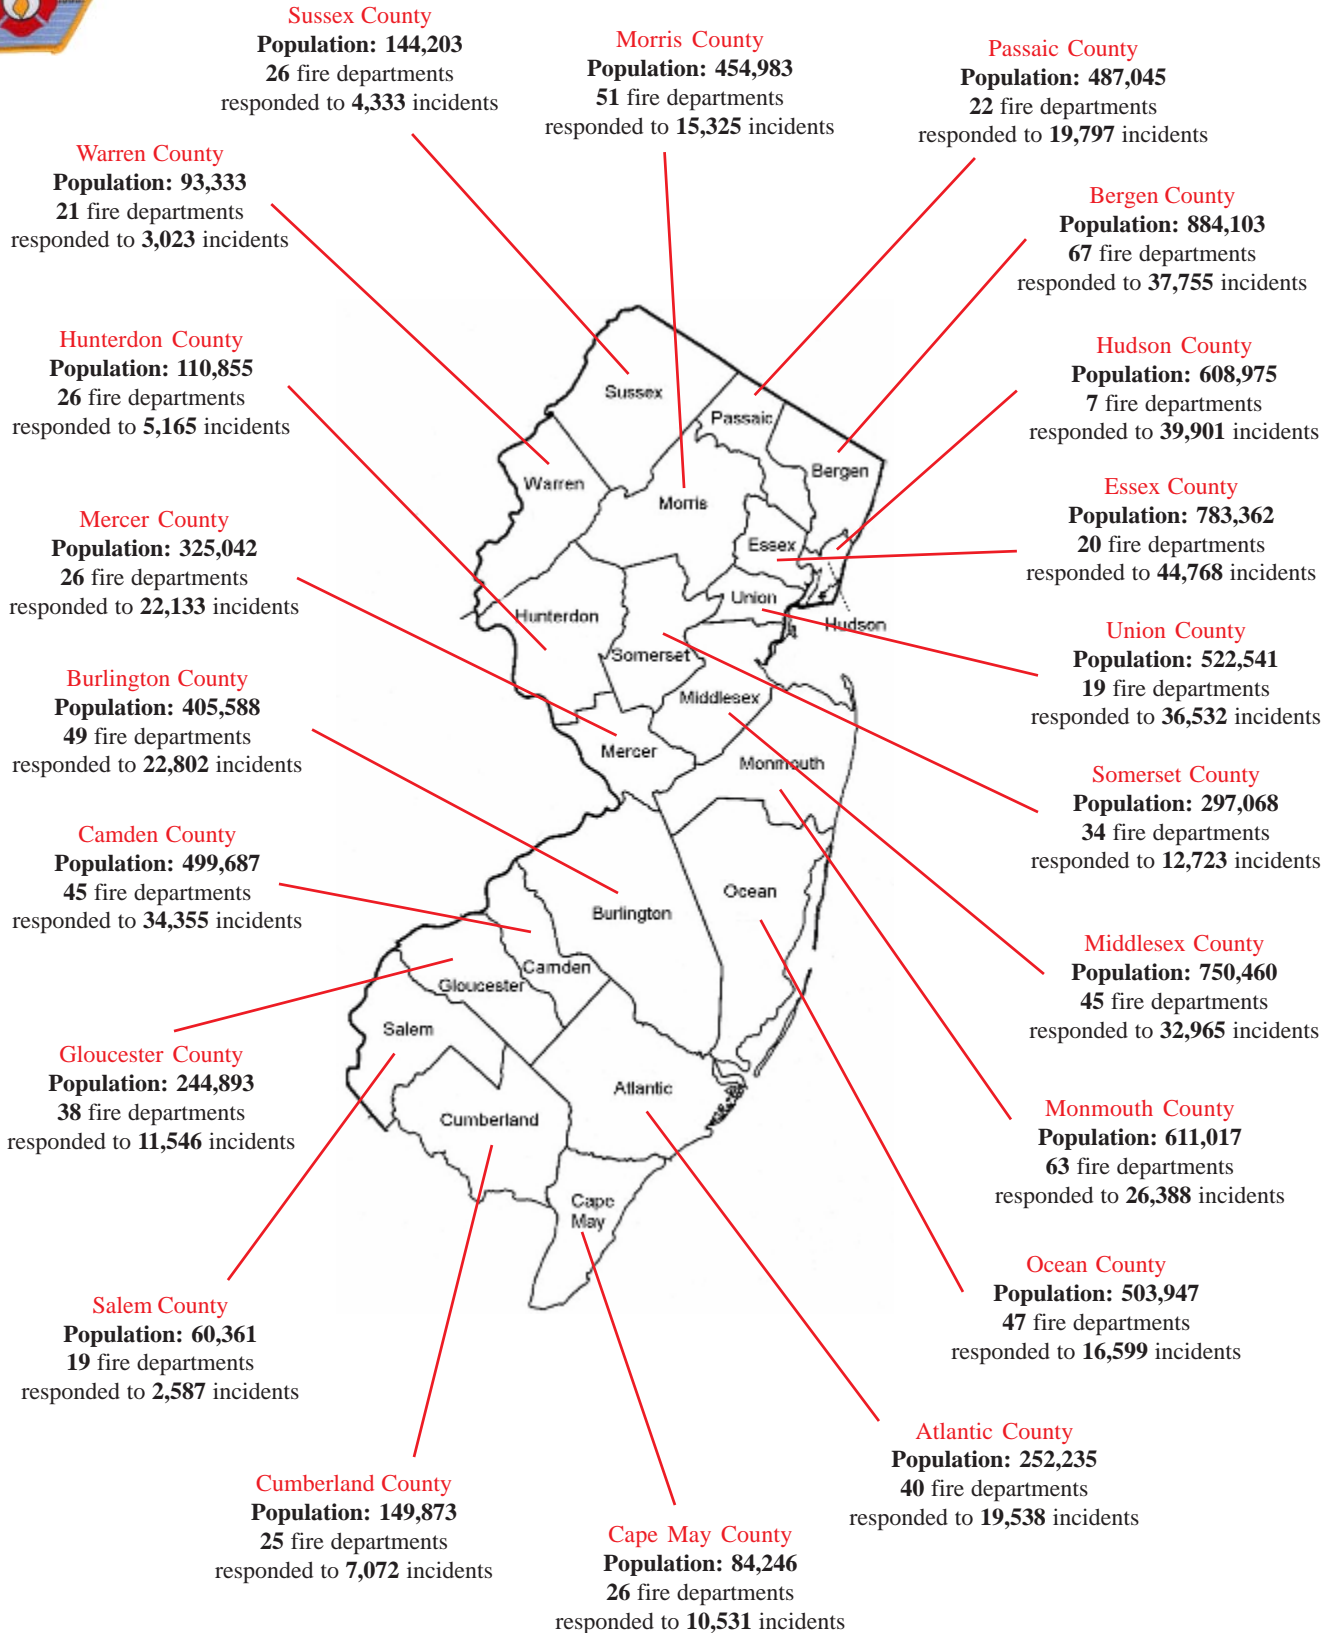

Data in this report does not include military installation fire department data. Military installation fire departments report directly to the Department of Defense.
