Adam,

ENSP has concluded that the project (NCR39452) will not affect Northern Long-Eared Bat.

Best,

Pat

Patrick,

NCR39452 does not require any land use permits. In case there are any issues with the projection of the original shapefile I sent with the original request, attached to this message is one that will work fine.

Thanks,
Adam

Subject: ENSP Consultation for NCR39452

Hello Mr. Woerner:

We are performing an CEST review for the referenced project site as part of the funding process under the New Jersey Economic Development Authority's Neighborhood and Community Revitalization (NCR) program - this application is

identified as NCR39452. Due to the unique nature of this project, there is no centroid data for the site that returns a simple "Yes" or "No" answer for the presence of federally and state-listed T&E species.

Attached are the Natural Heritage Database records received on June 23, 2014 and a shapefile of the project area. The database search results summary includes the following:

On-site Data

-Rare wildlife species or wildlife habitat on the project site: black-crowned night-heron, common tern, least tern, and osprey, fin whale, humpback whale, and North Atlantic Right Whale

Vicinity Data

-Rare wildlife species or wildlife habitat within the immediate vicinity of the project site: black-crowned night-heron, common tern, least tern, and osprey, fin whale, humpback whale, North Atlantic Right Whale, and Atlantic Leatherback

-Other animal species in the immediate vicinity of the project site: bottlenose dolphin

Project Description: The proposed project entails streetscape, landscape, and lighting improvements along Ocean Avenue between Osbourne Place and the Rumson Bridge, in the commercial district of Sea Bright.

Thank you,

Adam Nelson
