I think the area has seen a lot of dredging and construction prior to the Section 106 process - so based on the additional information they provided I am going to change my determination from the need for a marine survey to the following:

The permit area has been so extensively modified that little likelihood exists for the proposed project to impact a historic property.

Thanks for your consultation in this process.

RE yank Marine boat lift and dock

Nikki,

I just received the hard copy of Ms. Egan's packet she sent you. Based on the historic aerials, I was not aware that a previous dock existed in the 1970s in the same location as the new proposed dock. There was a wreck along the shoreline in 1933 but I'm starting to lean more towards low potential based on the submitted research, existing structures and coring data. Just wondering what your thought's are based work in Tx. Have a good weekend!

Vinny
