Gary,

I have been involved with this action recently, and have been coordinating directly with Mrs. Yank and representatives from NJDEP (Jerri Weigand). Our District recently extended the expiration date of the Department of the Army permit that was previously issued, and I've provided relevant documents to the State for the NEPA process being carried out for the grant funding. Please feel free to contact me directly with regard to this project, and I'll be glad to provide you with information relevant to the Corps' involvement in the permitting of this project.

Sam Reynolds  
Chief, Application Section II  
Regulatory Branch  
Philadelphia District, USACE

All,

We are currently preparing an Environmental Assessment on behalf of the New Jersey Department of Environmental Protection (NJDEP) for the above-referenced HUD CDBG-DR funded project. This property is located at 487 Main Street in Dorchester, Maurice River Township, New Jersey. The applicant is seeking funding to construct new docks, piers and boat lifts. The applicant previously received an NJDEP Division of Land Use Regulation (DLUR) Waterfront Development Permit and a USACE Permit for their proposed work. In December, the applicant received extensions on both of these permits.

We are conducting an 8-Step Floodplain and Wetland Protection Review pursuant to HUD regulations to satisfy Executive Orders 11988 and 11990. Please refer to the attached public notice, which was published in local English and Spanish newspapers on February 13, 2015. I have also attached a site location map and copies of the approved permits, which include lists of proposed project activities and conditions for approval. Please let me know within two weeks if you have any comments on this project.

Thank you,

Gary Doss
