

**NEW JERSEY INTERMEDIATE PROCESSING FACILITIES
(CLASS A RECYCLING CENTERS)**

Updated November, 2011

While Intermediate Processing Facility (IPF) is not a regulatory term, it typically refers to a particular Class A recycling center that receives, at a minimum, source separated commingled recyclable containers and processes the recyclable materials through mechanical and manual means into their constituent components.

Intermediate Processing Facilities are not permitted by the NJDEP. However, they must be included in the County Solid Waste Management Plan for the county in which they intend to operate. Contact your county solid waste management office to confirm inclusion in their plan.
