

Division of Water Quality
Office of Permit Management

The file Mun_Flow_Data_Summary.XLS contains the annual 12 month average flow data from 1994 to 2010 for municipal NJPDES/DSWs. The annual 12 month average flow listed is the average of the monthly average flow values reported by the permittees on their Discharge Monitoring Reports (DMR) for each calendar year. Flow units are Million Gallons per Day (MGD). The spreadsheet also lists the NJPDES permit number, facility name, outfall pipe number, permitted flow, Watershed Management Area (WMA) and a column for STP type code (see key below). The flow for plants not discharging during a calendar year is listed as NODI, and when a permit has been terminated the flow is listed as TERM.

The Watershed Management Areas are as shown on a map that can be viewed on the Division of Water Quality web site at:
<http://www.state.nj.us/dep/dwq/wmas.htm>.

STP Type Code Key

PUB - public facilities such as municipalities, SAs, MUAs, etc.
PRI - private facilities such as restaurants, shopping centers, housing complexes, trailer parks, etc.
INST - institutions such as hospitals, prisons, highway rest areas, etc.
FED - Federal facilities
SCH - schools
