June 27 & 28, 2012 Rutgers Septic Inspections for Real Property Transfers 2-Day Course

With septic systems “out-of-sight” and “out-of-mind” to many homeowners, assessing what is underground and exactly what kind of shape it is can be a daunting task when an inspection is called for. Based on NJDEP’s published guidelines on septic inspections, this course has been designed to identify the steps of the inspection sequence, as well as related science and research on the function of individual components.
