Managing Your Hazardous Waste: A Guide for Small Businesses

This user-friendly manual is targeted to small quantity generators of hazardous wastes.

The manual helps small businesses determine whether they generate hazardous waste and provides comprehensive information on how to comply with the federal hazardous waste regulations for small quantity generators. It explains how to obtain an EPA identification number, manage hazardous waste on site, ship hazardous waste off site, comply with land disposal restrictions, and conduct good housekeeping.

RCRA Orientation Manual

This updated manual provides introductory information on the solid and hazardous waste management programs under the Resource Conservation and Recovery Act (RCRA). Designed for EPA and state staff, members of the regulated community, and the general public who wish to better understand RCRA, this document constitutes a review of the RCRA program and is not a substitute for RCRA or its implementing regulations. The manual comprises seven sections:

- Introduction to the Resource Conservation and Recovery Act;
- Managing solid waste - RCRA Subtitle D;
- Managing hazardous waste - RCRA Subtitle C;
- Managing underground storage tanks - RCRA Subtitle I;
- Miscellaneous statutory provisions;
- RCRA and its relationship to other environmental statutes; and
- Public participation in the RCRA program.

ORIENTATION

MANUAL

Resource Conservation and Recovery Act

25 Years of RCRA: Building on Our Past To Protect Our Future

The year 2001 was an important milestone in environmental protection: the 25th anniversary of the Resource Conservation and Recovery Act (RCRA). The RCRA statute, regulations, and programs were created at a time when we did not know how much waste was produced or what happened to it. What we knew for certain was that waste needed to be safely managed.....

Welcome to RCRA Online

What is RCRA Online?

The RCRA Online database is designed to enable users to locate documents, including publications and other outreach materials, that cover a wide range of RCRA issues and topics.

While OSW makes every effort to keep this information timely and accurate, EPA makes no expressed or implied guarantees as to the accuracy or timeliness of the information contained in this database, the documents referenced in this database, or the choice of documents referenced in this database. OSW will, however, make an effort to correct errors brought to its attention.

In addition, since EPA cannot guarantee protection from potential alteration of or tampering with the materials on this server by outside parties, these materials do not constitute 'official' versions, and they are not intended, nor can they be relied upon, to create any rights enforceable by any party in litigation with the United States.

MEMORANDUM

SUBJECT: Management of Remediation Waste Under RCRA

TO: RCRA/CERCLA Senior Policy Managers
Regional Counsels

FROM: Timothy Fields, Jr., Acting Assistant Administrator for
Solid Waste and Emergency Response /signed/
Steven A. Herman, Assistant Administrator for
Enforcement and Compliance Assurance /signed/

Rapid clean up of RCRA corrective action facilities and Superfund sites is one of the Agency's highest priorities. In this context, we often receive questions about management of remediation waste under the Resource Conservation and Recovery Act (RCRA). To assist you in successfully implementing RCRA requirements for remediation waste, this memorandum consolidates existing guidance on the RCRA regulations and policies that most often affect remediation waste management. We encourage you to work with the regulations, policies and approaches outlined in this memorandum to achieve our cleanup goals as quickly and efficiently as possible.

Note that not all remediation wastes are subject to RCRA Subtitle C hazardous waste requirements. As with any other solid waste, remediation wastes are subject to RCRA Subtitle C only if they are listed or identified hazardous waste. Environmental media are subject to RCRA Subtitle C only if they contain listed hazardous waste, or exhibit a characteristic of hazardous waste. These distinctions are discussed more completely below.

The information in this memo is divided into three categories: information on regulations and policies that apply to all remediation waste; information on regulations and policies that apply only to contaminated media; and, information on regulations and policies that apply only to contaminated debris. Most of the references cited in this memo are available over the Internet. The Federal Register notices published after 1994 are available at www.access.gpo.gov/nara; the guidance memos and other EPA documents are available at www.epa.gov/correctiveaction. Federal Register notices and other documents are also available through the RCRA/CERCLA hotline: in Washington D.C., call (703) 412-9810; outside Washington D.C., call (800) 424-9346; and hearing impaired call (800) 553-7672. The hotline's hours are Monday - Friday, excluding.....

166 Answers Found

Summary	
1	A facility treats groundwater contaminated with a listed hazardous waste by filtering the water through a carbon filter. When the carbon filter is removed does the derived-from rule or contained-in policy apply to the filter?
2	How did EPA assess the level of protection that the Hazardous Waste Combustion Emission Standards Rule will provide?
3	If you rinse a 'RCRA empty' rail car that formerly contained a U-listed material, and the rinse water was tested and found to be hazardous, is it a hazardous waste or was the rinse water derived from non-hazardous residue?
4	Are residues from treatment of listed wastes that result in new treatability groups considered a new point of generation?
5	What dyes and pigments production wastes is EPA listing (or not listing) as hazardous wastes in the final rule , and how does this compare to what was included in the proposed rule ?
6	If a facility generated F003 waste prior to HWIR Waste Rule and then generated additional non-ignitable F003 waste after the promulgation of the rule and mixed the two, does F003 apply if non-ignitable?
7	How does the final rule compare to the 1999 HWIR proposal?
8	What did EPA finalize under the 2001 Hazardous Waste Identification Rule (HWIR)?
9	What are the opportunities for public involvement under the Phase 1 HWC NESHAP rule ? How has public involvement changed because of the rule ?
10	What will facilities have to do to comply with the Hazardous Waste Combustion Emission Standards Rule , and when will they have to do it?

The New Jersey Department of Environmental Protection (NJDEP) is increasing its commitment to providing compliance assistance for businesses. As a result, the Department has initiated several voluntary programs to disseminate information on applicable regulations and to provide technical support to help facilities comply with them. NJDEP hopes that these programs will help prevent violations and improve compliance, which will lead to greater protection of human health and the environment. Many of the programs strive to facilitate cross-media awareness, encourage innovative approaches to compliance, and provide exemptions from penalties for violations detected during program-sponsored site visits. Several of these programs are especially designed to address the needs of small businesses. These programs are summarized below. We invite you to take advantage of the many services offered to make environmental compliance easier for your business.

Hazardous Waste Generators - Requirements of N.J.A.C. 7:26G-6 et seq. Inspection Checklists

- ### Conditionally Exempt Small Quantity Generator (CESQG)
- generates less than 220 lbs. (100 kg) of hazardous waste and/or less than 2.2 lbs. (1 kg) of acute hazardous waste
 - accumulates less than 2200 lbs. (1000 kg) (of hazardous waste and/or less than 2.2 lbs. (1 kg) of acute hazardous waste onsite
 - may accumulate while under the specified limit for an unlimited time

The inspection checklists listed below are actual DEP inspector checklists. A DEP inspector will use them when evaluating a CESQG for compliance with N.J.A.C. 7:26G-6 et seq.

Small Quantity Generator (SQG)

- generates more than 220 lbs. (100 kg) of hazardous waste but less than 2200 lbs. (1000 kg) and/or less than 2.2 lbs. (1.0 kg) of acute hazardous waste
- accumulates less than 13,200 lbs. (6000 kg) of hazardous waste and/or less than 2.2 lbs. of acute hazardous waste onsite
- may accumulate up to the limited quantity for 180 days (270) days if receiving facility is >200 miles away

The checklists listed below are actual DEP inspector checklists. A DEP inspector will use them when evaluating a SQG for compliance with N.J.A.C. 7:26G-6 et seq.

Small Quantity Generator Requirements Short Version	
	Requirement & Regulatory Citation
*GENERATOR REQUIREMENTS	
	Did the generator determine if its solid waste is hazardous?. [40 CFR 262.11]
	Did the generator obtain an EPA ID number?. [40 CFR 262.12(a)]
	Does the generator offer hazardous waste to a transporter or TSD that has an EPA ID number and/or is properly licensed and registered with the Department?. [40 CFR 262.12(c)]
*THE MANIFEST	
	Did the generator prepare a manifest before transporting or offering for transport hazardous waste off-site?. [40 CFR 262.20(a)]

Compliance Assistance Resources

[compliance & enforcement home](#) | [njdep home](#)

The New Jersey Department of Environmental Protection (NJDEP) is increasing its commitment to providing compliance assistance for businesses. As a result, the Department has initiated several voluntary programs to disseminate information on applicable regulations and to provide technical support to help facilities comply with them. NJDEP hopes that these programs will help prevent violations and improve compliance, which will lead to greater protection of human health and the environment. Many of the programs strive to facilitate cross-media awareness, encourage innovative approaches to compliance, and provide exemptions from penalties for violations detected during program-sponsored site visits. Several of these programs are especially designed to address the needs of small businesses. These programs are summarized below. We invite you to take advantage of the many services offered to make environmental compliance easier for your business.

Self Disclosure Information**Reports & Data Online****Request Information****CEHAN Portal****County Initiatives****Contact Info****Compliance Assistance Resources****Hazardous Waste - Requirements of N.J.A.C. 7:26G-1 et seq. Summary**

New Jersey's hazardous waste regulations are found at N.J.A.C. 7:26G-1 et seq., adopted October 21, 1996 and announced at 28 NJR 4606. By this adoption, the Department "incorporated by reference" (with limited exception) the July 1, 1993 version of the Federal hazardous waste regulations at 40 CFR Parts 124, 260-266, 268 and 270 mandated by the Resource and Recovery Act of 1976 (RCRA) and amended by the 1984 Hazardous and Solid Waste Amendments (HSWA). Effective January 19, 1999 the Department amended the regulations to allow for prospective incorporation by reference, which means that all provisions of 40 CFR Parts 124, 260-266, 268 and 270 incorporated by reference are continually automatically updated in order to maintain consistency with the most current Federal rules.

The requirements for hazardous waste generators are specifically found at N.J.A.C. 7:26G-6 et seq., which references 40 CFR Part 262 of the Federal regulations (with some exceptions and/or changes).

To obtain a copy of the Hazardous Waste Regulations from West Publishing, call (800) 588-6601.

Compliance Assistance Resources

Hazardous Waste Generators - Requirements of N.J.A.C. 7:26G-6 et seq. Which Hazardous Waste Generator requirements apply to you?

The Hazardous Waste Generator requirements as set forth in N.J.A.C. 7:26G-6 et seq., regulate how hazardous waste is handled, stored and transported. The definition and requirements for Small Quantity Generators (SQG), Large Quantity Generators (LQG) and Conditionally Exempt Small Quantity Generators (CESQG) are based upon three factors:

- (1) how much hazardous waste is generated monthly
- (2) how much hazardous waste is accumulated before disposal
- (3) how long hazardous waste is allowed to accumulate before disposal

(1) How much hazardous waste do you generate monthly?	(2) How much hazardous waste do you accumulate before disposal?	(3) How long do you accumulate hazardous waste before disposal?	Generator Category
<i>if you</i> generate ≤ 220 lbs of hazardous waste &/or ≤ 2.2 lbs acute hazardous waste*	<i>and if you</i> accumulate < 2200 lbs of hazardous waste onsite	You may accumulate hazardous waste for an unlimited time	Then you are a Conditionally Exempt Small Quantity Generator (CESQG) (inspection checklists)
<i>if you</i> generate > 220 lbs but less than 2200 lbs of hazardous waste &	<i>and if you</i> accumulate ≤ 13,200 lbs of hazardous waste & ≤ 2.2 lbs of acute hazardous waste* onsite	<i>and do not</i> accumulate this waste for more than 180 days, 270 days if the receiving facility is >	Then you are a Small Quantity Generator (SQG) (inspection checklists)

Hazardous Waste Generators - Requirements of N.J.A.C. 7:26G-1 et seq. Additional Resources

[New Jersey Hazardous Waste Numbers and Handling Codes](#)
 A hazardous waste is identified as a "F", "K", "P" or "U" listed waste. A solid waste becomes a "hazardous waste" when it exhibits any of the characteristics that are specified in the Federal Regulations on Listing of Hazardous Waste (40 CFR Part 261). The general characteristics of hazardous waste include, but are not limited to, the following a) characteristics of ignitability; b) characteristics of corrosivity; c) characteristics of reactivity; d) toxicity characteristics.

[New Jersey Solid and Hazardous Waste Transporters Quick Access Guide Book](#) (pdf format)
 Published by the Bureau of Hazardous Waste Regulation in March, 2003, this guide book is an invaluable resource of information if you have anything to do with transporting solid or hazardous waste in the State of New Jersey.

dep Data Miner

Within DEP Data Miner, you will find a variety of reports that will provide you with up to the minute results. In order to provide flexibility, many of these reports require the user to enter some criteria, which will result in a customized document.

The DEP is dedicated to making environmental information readily available to our constituents while maintaining user confidence in the data. The information provided within NJDEP Data Miner and the viewing experience will continue to expand and improve as we work towards providing our constituents with an informative and user-friendly interface.

The information contained in this system is derived from the databases of the various agencies and organizations. The information is provided as is and is not guaranteed to be accurate, complete, or up-to-date. The information is provided in a clear and understandable way and is not intended to be a substitute for professional advice or interpretation of the information presented by this system. Therefore, under no circumstances shall the State of New Jersey be liable for any actions taken or omissions made from reliance on any information contained herein from whatever source nor shall the State be liable for any other consequences from any such reliance.

Microsoft Internet Explorer window showing the OPRA website. The address bar contains a search URL for inspections completed at ODACO INC. The page title is "Inspections Completed At ODACO INC - Program Interest ID: 132312 Between 10/21/2003 and 10/21/2004 By The Solid Waste Program".

NOTE: The information contained in this report will be limited to the date each program began using the Department's integrated database, NEMIS. The programs began using the system for this information as follows: Air - 10/1999; Hazardous Waste - 1/2000; Water - 7/2000; TCEA - 12/2001; Land Use 12/2001; DPCC - 1/2002; Solid Waste - 1/2002; Right To Know - 3/2002 and Pesticides - 4/2002. For complete information prior to these dates, please submit an official OPRA request form to the Department. If printing this report, select landscape orientation. For a list of terms and definitions, click on the following link: <http://www.state.nj.us/dep/index/csr/consent.html>

Disclaimer: Only final inspection reports are listed in this report. Inspections for which a report has not been finalized by the Department will not appear in this report. Also, inspections which yield violations but where the inspected entity has not yet been notified of the violation are not listed in this report. For inspections indicating "Violations Found," this means that one or more alleged violations were observed during the inspection, based on facts and information known to the Department at the time of the inspection. Errors or omissions in the factual basis for any violation may result in a future change in classification as a violation when such information becomes known.

This example shows all inspections conducted at facility between 10/21/2003 and 10/21/2004. Note that inspection results identifies if violations were found.

Activity Number	Inspection Type	Start Date of Inspection	Finalized Date	Inspection Results	Inspection Details	Related Enf Actions	Related Violations
BCT 03003	*Brief Compliance Inspection	10/22/03	12/23/03	No Violations Found	Inspection Summary	Enforcement Actions	Violations
BCT 03006	*Brief Compliance Inspection	12/5/03	12/23/03	No Violations Found	Inspection Summary	Enforcement Actions	Violations
BCT 04001	*Brief Compliance Inspection	12/22/03	2/17/04	No Violations Found	Inspection Summary	Enforcement Actions	Violations

Disclaimer: Only final inspection reports are listed in this report. Inspections for which a report has not been finalized by the Department will not appear in this report. Also, inspections which yield violations but where the inspected entity has not yet been notified of the violation are not listed in this report. For inspections indicating Out of Compliance, this means that violations were observed during the inspection, based on facts and information known to the Department at the time of the inspection. Errors or omissions in the factual basis for any violation may result in a future change in classification as a violation when such information becomes known.

Here is the report for the inspection conducted between 8/13/04 and 9/3/04 (BCI 040005).

Activity Number: BCI 040005 Inspection Type: *Brief Compliance Inspection Program Interest ID: 132312
 Inspection Start Date: 08/13/04 End Date: 08/13/04 Lead Investigator: McPeak, Brandi
 Program Interest Name: ODACO INC
 Address: 234 BROADWAY ROAD Cranbury NJ 085120000 County: Middlesex
 Block: Lot:
 Comments:

As we approached the site we noticed piles of logs along the left side of the facility. If trees were planted as depicted on the site plan, we would not have seen the logs from the roadway. The logs, as we noticed upon entry, were in an area designated for final product. Following the site plan we moved around the site from left to right. There were no fire hydrants in place, as depicted on the site plan. There was also improper use of asphalt milling on the driveway. As we continue toward the back of the site there was a fire pond, but inadequate per the site plan. The fire breaks between the piles are missing. There is also no hose house, or pump house on site, as it says there should be on the site plan. The vertical markers need to be erected correctly, and were no horizontal markers noted anywhere on site. The site plan also depicts that there are two entrances into the site, the one on the right is for trucks with unprocessed material to drop off and the left for processed final product to leave. The right entrance is blocked off with a gate and looks to have not been used for some time. If the right entrance is not to be used, then permit/site plan modification needs to be submitted, and appropriate signage needs to be in place at the left entrance. The driveways onto and off the site are not paved. There is also a large pile of overs near the back right corner that needs to be removed ASAP. We did also notice a truck enter the site and dump a load, and there was no one inspecting the loads. There were no managers on site, only one machine operator who did not speak english was present. No records could not be reviewed. There was also no tub grinder on site. There will be violations issued, and the site will also be referred to the Fire Safety Department head of South Brunswick Twp.

Subject Item: PI 132312 -

Requirement Description	Compliance Status	Compliance Comments	Grace Days	Non Minor Reason	Requirement Source
The facility shall comply with the general operating requirements for all Recycling Centers as provided at N.J.A.C. 7:26A-41 [N.J.A.C. 7:26A-4]	Out of Compliance, Non-referred				CBG 040001

Subject Item: RCBG 308510 - Wood (non-chemically treated and painted), Brush, Stumps, and Tree Parts

Requirement Description	Compliance Status	Compliance Comments	Grace Days	Non Minor Reason	Requirement Source
Horizontal and vertical control points for the unprocessed and processed materials stockpile areas shall be set and maintained on-site. Horizontal limitation markers shall be set at the corners of the stockpile areas as depicted on the approved site plan. Vertical limitation markers shall be set at locations in close proximity of the stockpile areas and shall clearly establish elevation height of 20 feet above the existing grade for the unprocessed stockpile	Out of Compliance	Vertical markers are falling down, and not maintained. Horizontal markers are non-existent.			CBG 040001

The facility shall comply with the general operating requirements for all Recycling Centers as provided at N.J.A.C. 7:26A-4.1 [N.J.A.C. 7:26A-4]	Out of Compliance, Non-referred				CBG 040001
