

2014-15 NJ Beaver and Otter Trapping Season Information

Note: Important Changes Indicated in **RED**

Deadlines and Dates to Remember

Beaver and Otter Deadlines

Application Period: October 1-31

Award Notification: November 10

Claim Permit by: COB December 1

Beaver and Otter Trapping Season Dates

Dec. 26 – Feb. 9 (Jan. 1 – Feb. 9 on some WMA)*

Mandatory Pelt Registration: February 21, 2015

NJ Fur Auction: March 21-22, 2015

***Please Note: In the event of a trapping season extension, all permit holders will be notified via Email, telephone or first-class mail (in that order).**

Please remember:

- **Successful applicants must claim their permit between November 10 and prior to 11:59 PM on Monday, December 1. Unclaimed permits will be posted on the website by late afternoon Wednesday December 3.**
- **Unclaimed permits will be returned to the quota and made available for over-the-counter sale at participating license agents or online beginning at 10 AM on **THURSDAY, Dec. 4.****

This Supplement includes:

- 2014-15 Beaver/Otter season permit quota and application information.
- Beaver and Otter Regulations, Management Zone map, permit quota by Beaver and Otter Management Zone, and Zone boundary descriptions.
- Other items of interest to beaver and otter trappers.

2014-15 Beaver and Otter Permit Application Information

Applying for a Beaver and/or Otter Permit –

Apply in person by visiting any participating license agent, or go online at <http://www.nj.wildlifelicense.com> to log in to the Division’s license sales website. You will be prompted to enter the necessary information. The website accepts most major credit cards and electronic checks as payment, using proven security technologies to ensure that your transaction is secure.

A non-refundable \$2.00 application fee will be charged for each permit you apply for. You must pay the remainder of the fee (\$15.00 for beaver and \$2.00 for otter) when claiming your permit(s). Unsuccessful applicants no longer need to wait for a refund since the only payment made was the non-refundable \$2.00 application fee. If paying via the Internet, applicants will receive their permits by mail (additional shipping charges apply).

Permits awarded via the lottery system may be claimed at participating license agents. Leftover and unclaimed permits returned to the quota will be made available for over-the-counter sale at license agents or online beginning **THURSDAY, December 4.**

2014-15 Beaver and Otter Trapping Permit Quotas & Lottery

Use the following table to calculate your odds of winning a beaver or otter permit. Compare the 2014-15 permit quotas with the number of 2013-14 first choice permit requests for your Zone of choice. Permit quotas have not changed this year, and there will be 200 beaver and 115 otter permits available this season for all 30 zones.

Note: The number of trappers pursuing beaver and otter increases yearly (during 2012-13, 362 trappers applied for a beaver permit and 298 applied for an otter permit).

Beaver and Otter Trapping Regulations:

Beaver may be taken only by properly licensed trappers in possession of a Special Beaver Trapping Permit valid for an entire management zone, or a Beaver Damage Control Permit valid as designated on the permit. River otter may only be taken by properly licensed trappers in possession of a Special River Otter Trapping Permit valid for an entire management zone. Application can be made from October 1-31 at license agents or via Fish and Wildlife's Internet license sales site <http://www.nj.wildlifelicense.com>; applicants must have a current and valid trapping license to apply. Applicants may apply for only one beaver trapping permit and/or one otter trapping permit. If the number of applications exceeds the permit quota, a random lottery drawing will be held to determine permit holders. Successful beaver permit applicants will be given first opportunity for otter permits in their respective zone.

The Director may issue Beaver Damage Control Permits (DCP) for the control of nuisance beaver at a specific location. Beaver taken on a DCP during the open trapping season may be possessed or sold by trappers provided they are properly checked in and tagged by the Division. ***To receive a Beaver DCP issued during the open season, one must first have applied for a Special Beaver Trapping Permit for the current season.*** Licensed trappers will be offered the opportunity to trap on a DCP by lottery, with preference given to trappers who applied for but did not receive a zone-wide Special Beaver Trapping Permit. Beaver taken outside the open trapping season may not be possessed or sold and must be disposed of as prescribed by the DCP.

Zone maps, boundary descriptions and permit quotas are available on pages 6 thru 9 of this supplement.

Other beaver/otter rules and regulations:

- Holders of a beaver trapping zone permit may use a maximum of five traps daily in each management zone for which they possess a permit.
- Trappers may possess *multiple* Special Beaver Trapping Permits.
- Holders of a river otter trapping permit may use a maximum of three traps daily.
- **Trappers may possess only one Special River Otter Trapping Permit per season.**
- All beaver and otter trap tags must be clearly visible above the water or ice.
- A Fish and Wildlife-issued Beaver Transportation Tag or Otter Transportation Tag must be affixed to the beaver or otter carcass **immediately upon taking possession of the animal.**
- All otters harvested incidentally by beaver trappers (i.e., trappers possessing a beaver permit but not an otter permit) must be fully surrendered to the Division of Fish and Wildlife. The entire carcass, including the pelt, must be surrendered.
- All successful trappers (or their agents) must present their beaver and/or otter pelts at a designated check station for examination where pelt tags will be affixed.
- **All otter carcasses must be surrendered when pelts are registered, as required by the Game Code. Failure to submit your carcass will result in the issuance of a citation by the Bureau of Law Enforcement.**

Mandatory Check-In:

Trappers are requested to properly flesh and stretch all pelts for examination. Additional information on check stations will be provided to all permit holders.

Fish and Wildlife will staff check-in stations at the Assunpink, Clinton, Flatbrook, Tuckahoe and Winslow WMAs and the Newfoundland Fire Company on Saturday, **Feb. 21, 2015 from 9am-Noon.**

Successful trappers who cannot attend the scheduled dates should contact either Joseph Garris at (908) 735-7040 or Andrew Burnett at (609) 748-2058 *prior to February 14* to make alternate arrangements. Permit holders will be notified via email, telephone or US mail in the event the beaver and otter trapping season is extended for any reason, and notified of any change in the pelt registration date.

Trapping on State Wildlife Management Areas

The following Wildlife Management Areas (WMAs) are closed to trapping until Jan. 1: Assunpink, Berkshire Valley, Bevans (Millville), Black River, Clinton, Colliers Mills, Flatbrook-Roy, Glassboro, Greenwood (incl. Howardsville), Heislerville, MacNamara (Tuckahoe), Mad Horse, Manahawkin, Manasquan River, Medford, Nantuxent, Peaslee, Pequest, Port Republic, Stafford Forge, Walpack, Winslow and Whittingham. **National Park Service regulations prohibit trapping at all times on the Delaware Water Gap Nat'l Recreation Area.**

General Trapping Regulations:

- **It is illegal to possess or use steel-jawed leghold traps anywhere in New Jersey.**
- A trapping license is required and a Trapper Education course must be passed.
- All traps set or used must bear a legible tag of durable material with the name and address of the person setting, using and maintaining the traps.
- Your **CID** or a Division issued trap identification number may be used in lieu of a name/address tag.
- No traps or trap stakes are to be set prior to 6:00 AM on any respective opening day.
- All traps must be checked and tended at least once every 24 hours, preferably in the morning.
- No person shall steal or attempt to take traps of another, or remove a trapped animal without permission of the trap owner.
- No trap shall be permitted to remain set on any property at the close of the trapping season.
- Licensed trappers at least 18 years of age and in possession of a valid rifle permit may carry a .22 caliber rifle and use only .22 caliber short rimfire cartridges to kill legally trapped animals other than muskrat. Firearms may not be loaded with more than three rounds.

Snares:

- No person shall set, use or maintain any type of snare unless they have first passed a Fish and Wildlife-approved trapper education course and carry on their person appropriate certification thereof.
- All natural baits consisting of fish, bird or mammal carcasses or flesh used in trapping with body gripping restraining snares must be covered or concealed from view except when placed at least 30 feet from any trap set.

Restraining snares set for mink, muskrat and nutria are subject to the following requirements:

- All such traps must be constructed of aircraft cable or crucible wire measuring 1/32, 3/64 or 1/16 inches in diameter, equipped with a swivel and set within 50 feet of the mean high water line;
- All such traps must be equipped with a stop to prevent the average loop diameter from exceeding 4 inches; and, all such traps must be set so that the distance between the ground/walking surface to the top of the loop does not exceed 7 inches.

Restraining snares set for coyote, fox, opossum, raccoon, skunk and weasel shall be subject to the following requirements:

- All such traps must be constructed of aircraft cable or crucible wire measuring from 5/64 to **3/16** inches in diameter and be equipped with a swivel;
- All such traps must be equipped with a deer stop located no less than 6 inches from the beginning of the cable and a loop stop to prevent the average loop diameter from exceeding 12 inches; and,
- All such traps must be set so that the distance between the ground / walking surface to the top of the loop does not exceed 24 inches.

The above requirements for cable diameters, loop stops and loop sizes do not apply to restraining snares that are completely submerged underwater at all times (e.g., when set for beaver or river otter).

Body Gripping Traps:

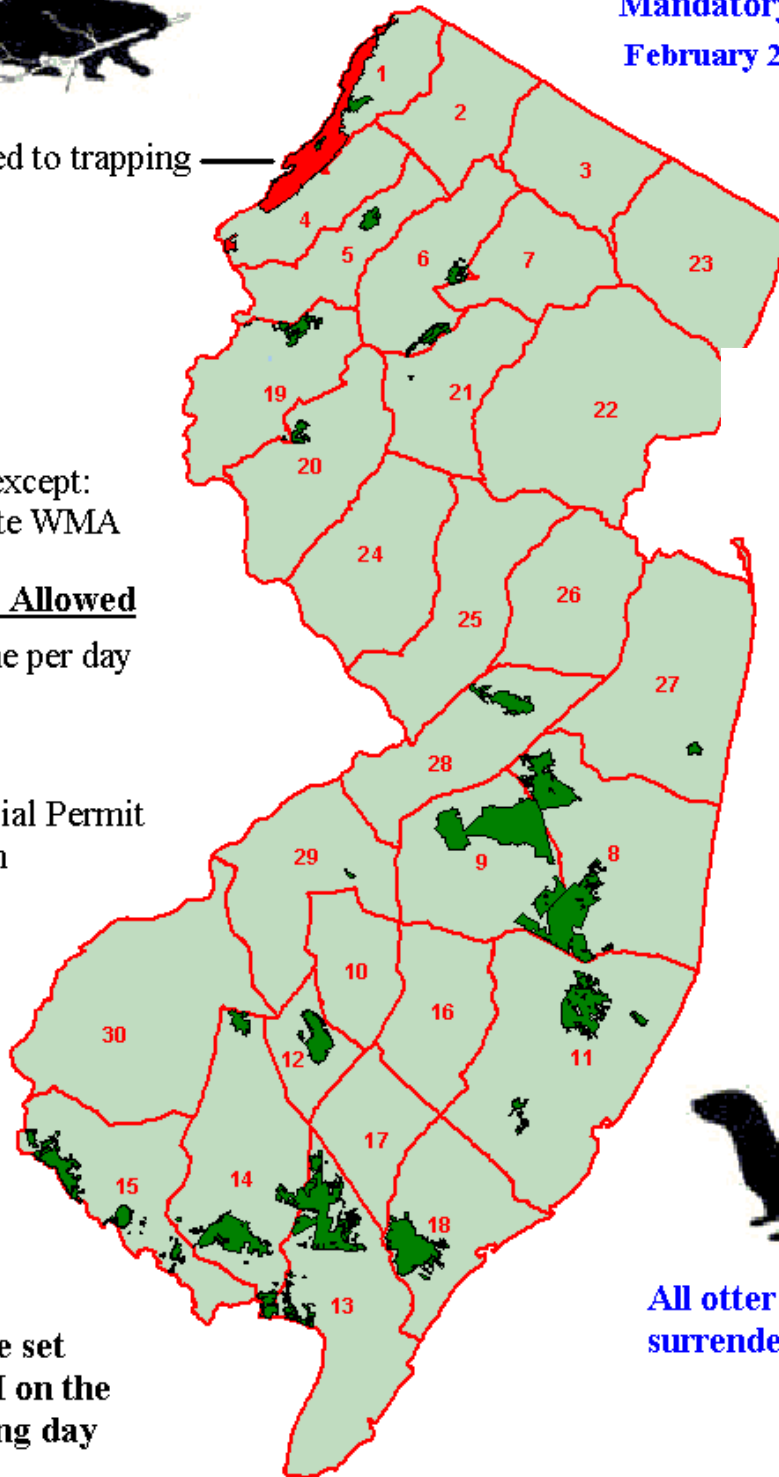

- No killer-type trap shall be used in non-tidal waters unless it is completely submerged underwater when the water is at the normal level. In tidal water, such traps must be completely covered at normal high tide.
- It is illegal to use, set or possess a killer-type trap having a jaw spread greater than 6 inches without possessing a permit for beaver or river otter. A killer-type trap with a jaw spread not exceeding 10 inches may be used for beaver or river otter. Jaw spread shall be measured between the inner edges of the jaws across the trigger of a set trap.
- Beaver and otter trap tags must be placed above the water line and clearly exposed to view.

Special Permit Beaver & River Otter Trapping

DWGNRA closed to trapping —

Mandatory Pelt Registration
February 21, 2015 9am-noon

Zone Boundary

All otter carcasses must be
surrendered to NJDFW

Season Dates:

Dec. 26 - Feb. 9, except:
Jan. 1 - Feb. 9 State WMA

Number of Traps Allowed

Beaver - 5 per zone per day
Otter - 3 per day

Bag Limits:

8 Beaver per Special Permit
1 Otter per Season

Traps may not be set
prior to 6:00 AM on the
respective opening day

New Jersey Beaver and Otter Management Zone Boundary Descriptions

Zone 1: That portion of Sussex County lying within a continuous line beginning at the intersection of the New York-New Jersey state line with Rt. 519; then south on Rt. 519 to its intersection with Rt. 23; then south on Rt. 23 to its intersection with Rt. 519 at Colesville; then south on Rt. 519 to its intersection with County Rt. 636 above Branchville, then west on Rt. 636 to its intersection with Rt. 206; then south on Rt. 206 to Rt. 521, then southwest on Rt. 521 to its intersection with County Rt. 617; then south on Rt. 617 to its intersection with Rt. 624 near Fairview Lake, then northwest on Rt. 624 to its intersection Big Flatbrook River; then southwest along the southern bank of the Big Flatbrook River to its confluence with the Delaware River, then north along the Delaware River to the New York-New Jersey state line; then south along the New York-New Jersey state line to Rt. 519, the point of beginning.

Zone 2: That portion of Sussex County lying within a continuous line beginning at the Intersection of the New York-New Jersey state line with Rt. 519, then south on Rt. 519 to its intersection with Rt. 3; then south on Rt. 23 to its intersection with Rt. 519 at Colesville; then south on Rt. 519 to its intersection with County Rt. 636 above Branchville; then west on County Rt. 636 to its intersection with Rt. 206; then southeast on Rt. 206 to its intersection with Rt. 15 at Ross Corner; then south on Rt. 15 to its intersection with Rt. 517 at Sparta; then north on Rt. 517 to its intersection with Rt. 23, then east on Rt. 23 to its intersection with Rt. 515 at Stockholm; then north on Rt. 515 to its intersection with Rt. 94 at Vernon; then north on Rt. 94 to the state line, then west along the state line to its intersection with Rt. 519, the point of beginning.

Zone 3: That portion of Sussex, Passaic, Morris and Bergen counties lying within a continuous line beginning at the intersection of the state line and Rt. 94; then south on Rt. 94 to its intersection with Rt. 515 at Vernon; then south on Rt. 515 to its intersection with Rt. 23 at Stockholm then east on Rt. 23 to its intersection with Rt. 202 near Wayne; then north on Rt. 202 to the state line at Suffern; then west along the state line to its intersection with Rt. 94, the point of beginning.

Zone 4: That portion of Sussex and Warren counties lying within a continuous line beginning at the confluence of the Delaware and Big Flatbrook River; then northeast along the southern bank of Big Flatbrook River to its intersection with Rt. 624; then south on Rt. 624 to its intersection with Rt. 617, then north on Rt. 617 to its intersection with Rt. 521 then northeast on Rt. 521 to its intersection with Rt. 206, then south on Rt. 206 to its intersection with Rt. 94 at Newton; then south on Rt. 94 to its intersection with Rt. 608 at Marksboro, then south on Rt. 608 to its intersection with Rt. 521; then south on Rt. 521 to its intersection with Rt. 80 near Hope; then west on Rt. 80 to its intersection with 94 at Columbia; then south on Rt. 94 to its intersection with the Delaware River; then north and northeast along the Delaware River to its confluence with the Big Flatbrook River, the point of beginning.

Zone 5: That portion of Sussex and Warren counties lying within a continuous line beginning at the intersection of the Delaware River and Rt. 94 at Columbia; then north on Rt. 94 to its intersection with Rt. 80; then east on Rt. 80 to its intersection with Rt. 521 near Hope; then north on Rt. 521 to its intersection with Rt. 608, then northeast on Rt. 608 to its intersection with Rt. 94 at Marksboro; then north and east on Rt. 94 to its intersection with Rt. 206 at Newton, then north on Rt. 206 to its intersection with Rt. 15 at Ross Corner, then south on Rt. 15 to its intersection with Rt. 517 at Sparta; then southwest on Rt. 517 to its intersection with Rt. 46 at Hackettstown, then west on Rt. 46 to its intersection with Water Street in Belvidere; then south along Water Street to its intersection with the Delaware River; then north on the Delaware River to its intersection with Rt. 94, the point of beginning.

Zone 6: That portion of Warren, Morris, Sussex and Passaic counties lying within a continuous line beginning at the intersection of Rt. 46 and Rt. 517 in Hackettstown, then north on Rt. 517 to its intersection with Rt. 23 at Franklin, then south on Rt. 23 to its intersection with Rt. 699 (Berkshire Valley Rd.) at Oak Ridge, then south on Rt. 699 to its intersection with Rt. 15, then south on Rt. 15 to its intersection with Rt. 80, then west on Rt. 80 to its intersection with Rt. 10 near Ledgewood, then east on Rt. 10 to its intersection with Rt. 513; then west on Rt. 513 to its intersection with Rt. 517 at Long Valley, then north on Rt. 517 to its intersection with Rt. 182; then north on Rt. 182 to its intersection with Rt. 46, then northwest on Rt. 46 to its intersection with Rt. 517 at Hackettstown, the point of beginning.

Zone 7: That portion of Morris, Passaic and Essex counties lying within a continuous line beginning at the intersection of Rt. 699 (Berkshire Valley Rd.) and Rt. 23 at Oak Ridge, then southeast on Rt. 23 to its intersection with Rt. 80 near Singac; then west on Rt. 80 to its intersection with Rt. 287, then south on Rt. 287 to its intersection with Rt. 10 near Whippany, then west on Rt. 10 to its intersection with Rt. 80 at Ledgewood, then east on Rt. 80 to its intersection with Rt. 15, then north on Rt. 15 to its intersection with Rt. 699 at Mt. Hope; then north on Rt. 699 to its intersection with Rt. 23 at Oak Ridge, the point of beginning.

Zone 8: That portion of Ocean County lying within a continuous line beginning at the intersection of Rt. 537 and Rt. 539 at Hornerstown, then south on Rt. 539 to its intersection with Rt. 72 near Howardsville, then east on Rt. 72 to its intersection with Rt. 532, then east on Rt. 532 to its termination at Barnegat Bay; then continuing eastward across Barnegat Bay and through Barnegat Inlet to the Atlantic Ocean, then north along the Atlantic Ocean to its intersection with Rt. 528 at Mantoloking, then west along Rt. 528 (527/528) to its intersection with Rt. 195 near Jackson Mills, then west along Rt. 195 to its intersection with Rt. 537 near Holmeson; then southwest along Rt. 537 to its intersection with Rt. 539 at Hornerstown, the point of beginning.

Zone 9: That portion of Ocean and Burlington counties lying within a continuous line beginning at the intersection of Rt. 537 and Rt. 539 at Hornerstown, then south on Rt. 539 to its intersection with Rt. 72 near Howardsville, then northwest on Rt. 72 to its intersection with Rt. 532, then west on Rt. 532 to its intersection with Rt. 206 near Tabernacle, then north on Rt. 206 to its intersection with Rt. 537 at Chambers Corner; then east on Rt. 537 to its intersection with Rt. 539 at Hornerstown, the point of beginning.

New Jersey Beaver and Otter Management Zone Boundary Descriptions

Zone 10: That portion of Burlington, Camden and Atlantic counties lying within a continuous line beginning at the intersection of Rt. 73 and Rt. 561 near Blue Anchor, then north on Rt. 73 to its intersection with Rt. 70 at Marlton; then east on Rt. 70 to its intersection with Rt. 541 at Medford, then southeast on Rt. 541 to its intersection with Rt. 532 at Medford Lakes, then east on Rt. 532 to its intersection with Rt. 206, then south on Rt. 206 to its intersection with Rt. 54; then southwest on Rt. 54 to its intersection with Rt. 561 near Hammonton; then northwest on Rt. 561 to its intersection with Rt. 73 near Blue Anchor, the point of beginning.

Zone 11: That portion of Ocean, Burlington and Atlantic counties lying within a continuous line beginning at the intersection of Rt. 563 and Rt. 532 at Chatsworth; then east on Rt. 532 to its intersection with Rt. 72; then southeast on Rt. 72 to its intersection with Rt. 532 near Howardsville, then east on Rt. 532 to its termination at Barnegat Bay; then continuing eastward across Barnegat Bay and through Barnegat Inlet to the Atlantic Ocean, then south along the Atlantic Ocean to the Absecon Lighthouse in Atlantic City; then northwest on Rt. 30 to its intersection with Rt. 563 in Egg Harbor, then north on Rt. 563 to its intersection with Rt. 532 at Chatsworth, the point of beginning.

Zone 12: That portion of Atlantic, Gloucester and Camden counties lying in a continuous line beginning at the intersection of Rt. 322 and Spur 536 Williamstown; then northeast on Spur 536 to its intersection with Rt. 73 near Tansboro, then south on Rt. 73 to its intersection with Rt. 561 at Blue Anchor; then southeast on Rt. 561 to its intersection with Rt. 54 near Hammonton, then southwest on Rt. 54 to its intersection with Rt. 557 at Buena; then northeast on Rt. 557 to its intersection with Rt. 322/536 near Williamstown; then east on Rt. 322/536 to its intersection with Spur 536 Williamstown, the point of beginning.

Zone 13: That portion of Cape May, Atlantic and Cumberland counties lying within a continuous line beginning at the intersection of Rt. 557 and County Rt. 671 at Buena; then southeast on Rt. 557 to its intersection with Rt. 50 near Buck Hill; then south on Rt. 50 to its intersection with Rt. 9 at Seaville, and south on Rt. 9 to its intersection with Sea Isle Boulevard (Rt. 625) at Ocean View; then east on Sea Isle Boulevard to the Atlantic Ocean; then south along the Atlantic Ocean; then north along the Delaware Bay to its intersection with East Point Rd. in Heislerville Management Area; then north on East Point Rd. to its intersection with Rt. 616 (Dorchester-Heislerville Rd.); then north on Rt. 616 to its intersection with Rt. 740, then northeast on Rt. 740 to its intersection with Rt. 47; then north on Rt. 47 to its intersection with Rt. 646 (Cumberland-Port Elizabeth Rd.) near Port Elizabeth; then north on Rt. 646 to its intersection with Rt. 49 near Cumberland; then west on Rt. 49 to its intersection with Rt. 671 (Union Rd.) then north on Rt. 671 to its intersection with Rt. 557 near Buena, the point of beginning.

Zone 14: That portion of Cumberland, Salem, Gloucester and Atlantic counties lying within a continuous line beginning at the intersection of Delaware Bay and the west bank of the Maurice River; then north along the west bank of the Maurice River to Rt. 631, then north along Rt. 631 to its intersection with Rt. 553; then north along Rt. 553 to its intersection with Rt. 536/322 at Glassboro, then east along Rt. 322/536 to its intersection with Rt. 555 near Williamstown; then south along Rt. 555/557 to its intersection with Rt. 671 (Union Rd.) near Buena, then south on Rt. 671 to its intersection with Rt. 49 at Cumberland, then east on Rt. 49 to its intersection with Rt. 646 (Cumberland-Port Elizabeth Rd.), then south on Rt. 646 to its intersection with Rt. 47 at Port Elizabeth; then south on Rt. 47 to its intersection with Rt. 740; then southwest on Rt. 740 to Rt. 616 (Dorchester-Heislerville Rd.), then south on Rt. 616 to East Point Rd. in Heislerville Management Area; then south on East Point Rd. to the Delaware Bay, then west along the Delaware Bay to its intersection with the west bank of the Maurice River, the point of beginning.

Zone 15: That portion of Salem and Cumberland counties lying within a continuous line beginning at the intersection of the Delaware River at Rt. 625 at Oakwood Beach, then east on Rt. 625 to its intersection with Rt. 49 at Salem, then southeast on Rt. 49 to its intersection with Pecks Corner-Cohansey Road, then east on Pecks Corner-Cohansey Road to its intersection with Rt. 540, then east on Rt. 540 to its intersection with Rt. 553, at Centerton, then south on Rt. 553 to its intersection with Rt. 631 near Port Norris, then south on Rt. 631 to the Delaware Bay, then northwest along the Delaware Bay and Delaware River to its intersection with Rt. 625 at Oakwood Beach, the point of beginning.

Zone 16: That portion of Burlington and Atlantic counties lying within a continuous line beginning at the intersection of Rt. 206 and Rt. 532 near Tabernacle, then southeast on Rt. 532 to its intersection with Rt. 563 at Chatsworth, then south on Rt. 563 to its intersection with Rt. 30 at Egg Harbor, then northwest on Rt. 30 to its intersection with Rt. 206, then north on Rt. 206 to its intersection with Rt. 532 near Tabernacle, the point of beginning.

Zone 17: That portion of Atlantic County lying within a continuous line beginning at the intersection of Rt. 557 and Rt. 54 at Buena, then northeast on Rt. 54 to its intersection with Rt. 30 at Hammonton, then southeast along Rt. 30 to its intersection with Rt. 50 at Egg Harbor, then southeast along Rt. 50 to its intersection with Rt. 557 near Buck Hill; then northwest on Rt. 557 to its intersection with Rt. 54 at Buena, the point of beginning.

Zone 18: That portion of Atlantic and Cape May counties lying within a continuous line beginning at the intersection of Rt. 50 and Rt. 557 near Buck Hill, then northeast along Rt. 50 to its intersection with Rt. 30/563 at Egg Harbor, then southeast on Rt. 30/563 to the Absecon Lighthouse in Atlantic City; then south along the Atlantic Ocean to Sea Isle Boulevard Rt. 625) in Sea Isle, then west on Sea Isle Boulevard to its intersection with Rt. 9, then north on Rt. 9 to its intersection with Rt. 50 at Seaville, then northwest on Rt. 50 to its intersection with Rt. 557 near Buck Hill, the point of beginning.

New Jersey Beaver and Otter Management Zone Boundary Descriptions

Zone 19: That portion of Warren, Morris and Hunterdon counties lying within a continuous line beginning at the intersection of Water Street and the Delaware River; then north on Water Street to its intersection with Route 46 and continuing east on Route 46 to its intersection with Route 182 at Hackettstown; then south on Route 182 to its intersection with Route 517; then south along Route 517 (517/24) to Schooleys Mountain; then south on Pleasant Grove Road to Pleasant Grove; then southeast on Califon Road to its intersection with Sliker Road; then southeast on Sliker Road to its intersection with East Hill Road; then south on East Hill Road to its intersection with Route 628 at Woodglen; then southwest on Route 628 to its intersection with Route 645 at Glen Gardner; then northwest on Route 645 to its intersection with Route 635 at Hampton, then south on Route 635 (Charlestown Road) to its intersection with Route 78/22; then west on Route 78/22 to its intersection with Route 614 near Perryville; then southwest on Route 614 to its intersection with Route 519 at Spring Mills; then south on Route 519 to the Delaware River at Milford; then northward along the Delaware River to its intersection with Water Street in Belvidere, the point of beginning.

Zone 20: That portion of Morris and Hunterdon counties lying within a continuous line beginning at the intersection of Route 517 (517/124) and Pleasant Grove Road at Schooleys Mountain; then south on Pleasant Grove Road to Pleasant Grove; then southeast on Califon Road to its intersection with Sliker Road; then southeast on Sliker Road to its intersection with East Hill Road; then south on East Hill Road to its intersection with Route 628 at Woodglen; then southwest on Route 628 to its intersection with Route 645 at Glen Gardner; then northwest on Route 645 to its intersection with Route 635 at Hampton; then south on Route 635 (Charlestown Road) to its intersection with Route 78/22; then west on Route 78/22 to its intersection with Route 614 near Perryville; then southwest on Route 614 to its intersection with Route 519 at Spring Mills; then south on Route 519 to the Delaware River at Milford; then south on the Delaware River to the intersection of Route 29 and Route 523 at Stockton; then northeast on Route 523 to its intersection with Route 517 near Oldwick; then north on Route 517 to its intersection with Route 513 (513/24) at Long Valley; then northwest on Route 517 (517/124) to Schooleys Mountain, the point of beginning.

Zone 21: That portion of Hunterdon, Somerset and Morris counties lying within a continuous line beginning at the intersection of Route 517 and Route 513 at Long Valley; then north and east along Route 513 to its intersection with Route 10; then east along Route 10 to its intersection with Route 287 at Malapardis; then southwest along Route 287 to its intersection with Route 525 (Mt. Airy Road); then south along Route 525 to its intersection with Route 22 near Bound Brook; then west along Route 22 to its intersection with Route 523 at Whitehouse; then north along Route 523 to its intersection with Route 517 near Oldwick; then north along Route 517 to Long Valley, the point of beginning.

Zone 22: That portion of Somerset, Union, Essex, Hudson, Middlesex, Morris, Passaic and Bergen counties lying within a continuous line beginning at the intersection of the north shore of the Raritan River and the Garden State Parkway; then north on the Garden State Parkway to its intersection with Route 440; then west on Route 440 to Route 287; then west on Route 287 to its intersection with Route 22; then east on Route 22 to its intersection with Route 525 (Thompson Avenue) near Bound Brook; then north on Route 525 to its intersection with Route 287; then north on Route 287 to its intersection with Route 80; then east along Route 80 to Exit 53 and its intersection with Route 46; then east on Route 46 to its intersection with Route 3; then southeast on Route 3 to the Hudson River at the Lincoln Tunnel; then south along the New Jersey shore of the Hudson River to the Kill Van Kull; then west along the New Jersey shore of the Kill Van Kull to Newark Bay; then west following the New Jersey Boundary along Newark Bay; then south along the Arthur Kill following the New Jersey boundary to Raritan Bay; then west along the north shore of the Raritan River to the point of beginning at the Garden State Parkway.

Zone 23: That portion of Bergen, Passaic and Hudson counties lying within a continuous line beginning at the intersection of Route 202 and the New York/New Jersey border; then southwest on Route 202 to its intersection with Route 23; then south on Route 23 to its intersection with Route 46 at Route 80 Exit 53; then east on Route 46 to its intersection with Route 3; then southeast on Route 3 to the Hudson River at the Lincoln Tunnel; then north along the Hudson River to the New York/New Jersey border; then northwest along the New York/New Jersey border to Route 202, the point of beginning.

Zone 24: That portion of Hunterdon, Mercer and Somerset counties lying within a continuous line beginning at the Delaware River near the intersection of Route 29 and Route 523 at Stockton; then northeast on Route 523 to its intersection with Route 22; then east on Route 22 to its intersection with Route 206; then south on Route 206 to its intersection with Route 295 near Lawrenceville; then west on Route 295 to Route 95; then west on Route 95 to the Delaware River; then north along the Delaware River to Stockton, the point of beginning.

Zone 25: That portion of Somerset, Middlesex, Mercer and Burlington counties lying within a continuous line beginning at the Delaware River at the confluence of Black Creek at Bordentown; then eastward along Black Creek to the point at which Black Creek intersects Route 130; then northeast on Route 130 to its intersection with Route 1; then northeast on Route 1 to its intersection with Route 287; then west on Route 287 to its intersection with Route 22; then west on Route 22 to its intersection with Route 206; then south on Route 206 to its intersection with Route 295 near Lawrenceville; then west on Route 295 to Route 95, then west on Route 95 to the Delaware River, then south along the Delaware River to Bordentown, the point of beginning.

New Jersey Beaver and Otter Management Zone Boundary Descriptions

Zone 26: That portion of Mercer, Middlesex and Monmouth counties lying within a continuous line beginning at the intersection of the north shore of the Raritan River and the Garden State Parkway; then north on the Garden State Parkway to its intersection with Route 440; then west on Route 440 to Route 287; then west on Route 287 to its intersection with Route 1; then southwest on Route 1 to its intersection with Route 130; then south on Route 130 to its intersection with Route 33 at Hightstown; then east on Route 33 to its intersection with Route 537; then northeast on Route 537 to its intersection with Route 79 at Freehold; then north on Route 79 to its intersection with Lloyd Road at Morganville; then north on Lloyd Road to Broadway in Keyport; then north on Broadway to the Matawan Creek confluence with the Raritan Bay; then northwest along the New Jersey shoreline to the Raritan River intersection with the Garden State Parkway, the point of beginning.

Zone 27: That portion of Monmouth and Ocean counties lying within a continuous line beginning at the Atlantic Ocean at Route 528 at Mantoloking; then west on Route 528 (527/528) to its intersection with Route 195 near Jackson Mills; then west on Route 195 to its intersection with Route 537 near Holmeson; then northeast on Route 537 to its intersection with Route 79 at Freehold; then north on Route 79 to its intersection with Lloyd Road at Morganville; then north on Lloyd Road to Broadway in Keyport; then north on Broadway to the Matawan Creek confluence with the Raritan Bay; then southeast along the New Jersey coastline of the Atlantic Ocean at Raritan Bay; then south along the New Jersey coastline of the Atlantic Ocean to Mantoloking, the point of beginning.

Zone 28: That portion of Mercer, Middlesex, Monmouth and Burlington counties lying within a continuous line beginning at the Delaware River at the confluence of Black Creek at Bordentown; then eastward along Black Creek to the point at which Black Creek intersects Route 130; then northeast on Route 130 to its intersection with Route 33 at Hightstown; then east on Route 33 to its intersection with Route 537; then south on Route 537 to its intersection with Route 206 at Chambers Corner; then south on Route 206 to its intersection with Route 530 (Pemberton Road); then northwest on Route 530 to its intersection with Route 541 at Mt. Holly; then north on Route 541 to the Delaware River at Burlington, then north on the Delaware River to Bordentown, the point of beginning.

Zone 29: That portion of Burlington, Camden and Gloucester counties lying within a continuous line beginning at the Delaware River at Route 541 in Burlington; then southward following the Delaware River to Route 30 at Camden; then east along Route 30 to its intersection with Route 130; then south along Route 130 to its intersection with Route 76; then south along Route 76 to its intersection with Route 42; then southeast along Route 42 to its intersection with Spur 536 (Williamstown-Mt. Freedom Road) at Williamstown; then northeast along Spur 536 to its intersection with Route 73 near Berlin; then north along Route 73 to its intersection with Route 70 at Marlton; then east on Route 70 to its intersection with Route 541 at Medford; then south east on Route 541 to its intersection with Route 532 at Medford Lakes; then east on Route 532 to its intersection with Route 206; then north on Route 206 to its intersection with Route 530 (Pemberton Road); then northwest along Route 530 to its intersection with Route 541 at Mt. Holly; then north along Route 541 to the Delaware River at Burlington, the point of beginning.

Zone 30: That portion of Camden, Cumberland, Gloucester and Salem counties lying within a continuous line beginning at the intersection of the Delaware River and US Route 30 at Camden; then east along Route 30 to its intersection with Route 130; then south along Route 130 to its intersection with I-76; then south along I-76 to its intersection with Route 42; then southeast along Rt. 42 to its intersection with CR 536 Spur near Williamstown; then south on CR 536 Spur to its intersection with Rt. 322; then west along Rt. 322 to its intersection with CR 553; then south along CR 553 to its intersection with CR 540; then west along CR 540 to its intersection with Pecks Corner-Cohansey Road; then west along Pecks Corner-Cohansey Road to its intersection with Rt. 49; then northwest along Rt. 49 to its intersection with CR 625 at Salem; then west along CR 625 to its intersection with the Delaware River at Oakwood Beach; then northward along the Delaware River to US Route 30 at Camden, the point of beginning.

Best Management Practices (BMP):

BMP are based on the most extensive study of animal traps ever conducted in the United States. Test traps were selected based on knowledge of commonly used traps, previous research findings and input from expert trappers. Statisticians from universities and federal and state agencies developed rigorous study designs. Experienced wildlife biologists and trappers developed study procedures, supervised or participated in field research and provided insight and expert technical advice on trapping methods to ensure the completion of each project. Data collection, including safety evaluations, was undertaken following widely accepted international standards for testing traps specified in the International Organization for Standardization (ISO) Documents 10990-4 and 10990-5. The following beaver and river otter BMP traps are legal for use in NJ (other traps with equivalent characteristics are also legal):

- Belisle Classic 330
- BMI 220 Magnum
- LDL C280
- Sauvageau 2001-7
- Belisle Super X 220
- BMI 280
- LDL C280 Magnum
- Sauvageau 2001-8
- Belisle Super X 280
- LDL 220
- Rudy 280
- Woodstream Oneida Victor 220
- BMI 220
- LDL C220 Magnum
- Rudy 330
- Woodstream Oneida Victor 280

How Large Will Your Beaver Pelt Be?

Beaver pelts should be boarded in an **OVAL** shape which conforms to the animal's natural shape. Other shapes can result in loss of natural contours causing lack of uniformity, possible size loss, or overstretching in the back area leading to reduced fur density, possible grade reduction and *less money for you, the beaver trapper!* Use the table below to estimate the properly stretched size of your freshly pelted beaver (all measurements are in inches).

Hanging Length	Stretched Length	Stretched Width	Final Measurement	Size
12	10	9	19	Small
13	11	9	20	
14	12	10	22	
15	13	11	24	
16	13	12	25	
17	14	13	27	
18	15	13	28	
19	16	14	30	
20	17	15	32	
21	18	16	34	
22	19	17	36	
23	20	17	37	
24	21	18	39	
25	22	19	41	
26	22	20	42	
27	23	21	44	
28	24	21	45	
29	25	22	47	
30	26	23	49	
31	27	24	52	
32	28	25	53	Medium

49	43	38	81	
50	44	39	83	

How to Avoid Capturing Otter if You Only Have a Beaver Permit

Because otter and beaver often use the same habitat, there may be times/places when trappers need to avoid capturing otter. While no method can completely eliminate accidental otter captures, there are methods that can help reduce the risk of accidental capture. The following ideas are offered as a guide to improving selectivity, recognizing that each may have advantages/disadvantages depending on the situation and location. There may be other methods equally (or more) useful and trappers are encouraged to use whatever method seems most effective for the given situation.

Moving the trigger to one side of a bodygrip trap increases the chance an otter can get through

A snare set with a loop of 9 to 10 inches will allow an otter to pass through, but will still catch beaver.

When there is a need to avoid otter while beaver trapping, consider the following ideas:

- Stay alert for the presence of otter sign on your trap line.
- Be cautious about using trap sets at high probability otter travel-ways, particularly dam crossings, inlets and outlets to ponds/lakes, narrow streams and ditches that connect to other water bodies, crossover trails along shorelines, dikes and culverts and the entrances to inactive beaver bank dens or lodges.
- Use baited beaver sets where possible. Avoid using beaver lures that may also attract otters to the set.
- Consider using a “side-parallel” position (see image, above) for the trigger wires on beaver bodygrip traps. Also consider the use of tension-adjustable triggers, using two “side-parallel” triggers (one on each side), and two-way triggers only (those that don’t spring when pushed sideways).
- Offset the trigger to one side on a bodygrip trap and place a stick in the mud directly in front of the trigger (make sure the stick is outside the closing radius of the trap). Otters will typically swim around the stick and avoid the trigger.
- When using cable devices, use a 9-10 inch loop. Make sure your snares have “stops” to prevent the loop from closing tighter than a four-inch diameter. Place the bottom of the loop close to the ground. Also consider positioning the lock farther back from top-center to decrease the sensitivity of the device. Do not “load” snares; this will further reduce sensitivity.
- Gang-set active beaver areas (set an equal number of traps for the anticipated number of beavers). Catch beaver as fast as possible, and pull traps. Avoid leaving traps set for extended periods trying to catch the last beaver.
- When trapping under ice, make baited sets between active lodges/dens and food caches/piles.
- For more information on otter avoidance and proper trigger configurations to use for bodygrip traps to capture beaver, see the Trapper Education Student Manual: A Guide for Trappers in the United States published by the Association of Fish and Wildlife Agencies at http://www.fishwildlife.org/files/Trapping_Student_Manual_2005.pdf
- Always check New Jersey’s trapping regulations for guidance, specific restrictions or prohibitions related to otter trapping.

Setting bodygrip traps deep under water may allow an otter to go over the top of the trap, while most beaver will dive to the bottom and be caught.

2013-14 Harvests

One hundred five (105) trappers were successful in capturing at least one beaver (52.5% success rate) and harvested a total 544 beavers (5.2 beavers/successful trapper). Fifty (50) beavers were harvested on 19 damage permits issued bringing the total beaver harvest to 594. Forty-three (43) otter trappers were successful in capturing their season limit (37.4% success rate). The otter quota was increased from 106 in 2013 to 115 in 2014 (n = 9 or 8.5%) and allocated to effect 5-10% otter harvest mortality in each of 30 management zones based on historical success rates in respective zones (statewide goal was 5% or 47 otter). Zones 21-25, 28 and 29 had their first trapping seasons. The 2014 reported harvest was 43 otters (9% below goal).

Zone	Beaver Permits Issued	Number Successful Trappers	Regular Beaver Harvest	Damage Harvest	Otter Permits Issued	Harvest	Projected Harvest
1	8	3	17	0	2	1	1
2	17	11	48	0	3	1	1
3	9	6	30	0	2	2	1
4	7	4	22	0	2	1	1

Proposed Game Code Changes **NEW**

The New Jersey Fish and Game Council has proposed two changes pertaining to beaver and river otter. Currently, trapping is restricted until January 1 on those Wildlife Management Areas where pheasants and quail are released. Council has proposed opening these WMA to semi-aquatic trapping consistent with the statewide seasons (i.e., mink / muskrat / nutria will begin November 15 in the north and December 1 in the south; and, beaver / otter will begin December 26 statewide). Trapping for these species will not result in conflicts with upland game hunters because of their semi-aquatic nature and trapping regulations that require all traps to be submerged (body gripping killer-type) or the small 4" loop diameter (cable restraints) set within 50' of mean high water.

The other proposal is to clarify an error of omission in the existing code regarding beaver damage permits. The Code currently stipulates that before receiving a damage permit during the open trapping season, the applicant must first have applied for a regular trapping permit. Landowners must apply for damage permits, but very few landowners are themselves trappers and therefore are precluded from obtaining a regular beaver trapping permit. The proposal is to amend language to stipulate that the landowners trapping agent must first apply for a regular beaver trapping permit before they can obtain a damage permit.

Proposed Legislation - Update

Bills to eliminate the restriction on the number of beaver permits the Division may issue in a calendar year were introduced in the spring of 2014. On May 20, 2014 the Assembly overwhelmingly passed A3944 which was subsequently referred to the Senate Environment and Energy Committee. The Senate introduced S2665 on April 15 and it was referred to this same Committee where it remained and never brought to the floor for a vote before the new legislature took office in January. *So, what does this mean to you, the beaver trapper?*

It means back to square one with a re-introduction of the bill. On February 6, 2015 District 3 Assemblywoman Celeste M. Riley signed on as the primary sponsor of A2410, a bill to remove the current restriction on the number of beaver permits and vest full management authority with the NJ Fish and Game Council. The bill was referred to the Assembly Agriculture and Natural Resource Committee where it has remained. There is no companion Senate bill as of August 7, 2015.

The Division of Fish and Wildlife is taking a proactive stance in the event the Fish and Game Council is vested with management authority. Last year we attempted to contact all beaver permit applicants in an effort to get a rough estimate on the number of beaver colonies in each zone, as the prevailing strategy is to issue one trapping permit for every three (3) active colonies per zone. Unfortunately, nearly 75% of applicants contacted failed to respond to our informational request. Thanks to all of you that did respond! *So, again, what does this mean to you, the beaver trapper?*

In short, it means the Division (like the legislative action) is back to square one. This year, the Division has been working to develop a GIS-based sampling scheme to take the place of the more labor intensive field census conducted in past years. The Division intends to test the model this fall in three zones (one each in the northern, central and southern regions). This will provide sufficient time to analyze the results and modify procedures (if necessary) before conducting a statewide survey in 2015. Once collected, this information will be used to estimate beaver populations in each zone so that permit quotas and bag limits can be properly determined that will ensure a healthy beaver population for years to come.

As the Fish and Game Council has already proposed changes for the next two years, permit quotas are not expected to change until the 2017-18 season at the earliest.
