TROUT WATERS THAT WILL NOT BE STOCKED WITH TROUT IN 2014

In order to protect existing trout populations present, or connected to, the following waters **will not be** stocked with trout in Spring 2014. Anglers should be aware that although not stocked **the pre-season fishing closure from March 17, 2014 to April 5 at 8 a.m. still applies to these waters** with the exception of Trophy Trout lakes where trout may be harvested year round. For Holdover Trout Lakes listed below anglers may fish during the pre-season but all trout must be released immediately.

Anglers are reminded that many of these waters support year round trout fisheries and still provide anglers trout fishing opportunities. Anglers are encouraged to practice catch and release on small trout production streams designated below. Stocking is anticipated to resume in 2015.

Information is accurate as of March 27, 2014.

Trophy Trout Lakes

Merrill Creek Reservoir
Round Valley Reservoir

Holdover Trout Lakes

Clinton Reservoir
Lake Aeroflex
Lake Wawayanda
Sheppard Lake
White Lake

Trout Production Streams

Beaver Brook (Hunterdon)
