Other Mandatory Equipment (Not part of Kit #1A)

This equipment can be purchased locally.

55 gallon glass tank
 Metal tank stand
 Tank hood with lights that fits the tank ordered

Equipment Replaced Yearly (through the school's budget)

This equipment can be purchased locally or through That Pet Place.

Filter pads and charcoal that match the filter - these get gummed up and need replacing to be effective.
 Airstone - these degrade over the year and will not produce enough oxygen
 Freshwater Master Test Kit - these will be used up by the end of the year and you need to test the water weekly, plus the chemicals have an expiration date.
 GH & KH Hardness Test Kit for Freshwater - these will be used up by the end of the year and you need to test the water weekly.
 Microbe Lift Special Blend - 16 oz - this will be used up by the end of the year and you need it for a healthy tank environment.
 Nite Out II - 16 oz - this will be used up by the end of the year and you need it to help with the nitrogen cycle.
 NovAqua plus Water Conditioner - 16 oz - this will be used up by the end of the year and you need it for a healthy environment.

Optional Equipment To Assist The Program

This equipment can be purchased locally or through That Pet Place.

Eye droppers (multiples) for daily removal of non-viable eggs by students.
 Sheets of styrofoam to cover the tank on all sides except the front. This keeps the tank cool and protects the fish when they cannot be exposed to UV light.
 Two 5-gallon buckets to age water before putting it in the tank. Buckets will also double as your fish transportation to the release site.
 Battery operated aerator to give the trout oxygen during transportation or in emergencies (available at local sporting goods stores or online)
 Long handled scrub brush to loosen grime and growth in the tank during cleaning.
 Clean ice packs to use in transportation and during emergencies.
