

Hammonton Public Schools

Excellence In Education

566 Old Forks Road
Hammonton NJ 08037

K – 12 District
3,483 Students

PROGRAM:

Located in the Blueberry Capital of the World, Hammonton Public School District serves the children of Hammonton, Waterford, and Folsom. Parents and community members are encouraged to be involved in many exciting initiatives. The Home School Association and Hammonton Educational Foundation provide a great deal of support.

The district’s many new initiatives include a new high school class in 3D animation, an expansion of the primary reading program – Phonics First, an expansion of an elementary supplemental math program - Touch Math , a middle school math cycle program that develops algebra and geometry skills, a partnership with Rowan University called the Rowan - Hammonton Math/Science Initiative, and a new Virtual High School which allows students to select from 130 electives in areas such as Basic Mandarin and Animation and Effects: Flash MX Basics.

Hammonton High School is offering a special program called “Technology Pathways to Success.” This is a very powerful and exciting program that enables students to select special courses that promote 21st century readiness skills. The areas of specialization include Digital an Architectural Design, Marketing, Art, Journalism, Multimedia, and 3D Animation.
