PROGRAM:

This comprehensive junior-senior high school serves the communities of West Amwell, Lambertville and Stockton. Although the school is very small, the students are offered a wide variety of courses, some offered online, and some offered through the nearby Hunterdon County Polytech. A recent renovation added a new auditorium, a media center, computer lab, gymnasium, science lab and art room with a kiln. Most classrooms have LCD projection systems and InterWrite boards. The school offers unique projects such as the Curriculum for Agricultural Science Education (CASE), environmental science, and a drama program affiliated with the McCarter Theater in Princeton.
