Subject: Make Clean Energy a Priority for 2015

Jul 30, 2015

EMP comments EMP Comments

Dear EMP comments Comments,

The Energy Master Plan will help shape New Jersey's energy future in 2015 and beyond. As the president of the Board of Public Utilities you have the power to help make dirty energy a thing of the past. I urge you to make clean energy a priority for the 2015 EMP.

The BPU has the opportunity to ensure that all New Jersey residents have the benefit of clean, safe and affordable energy. Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

Sincerely,

Donna Pfeffer

Galloway, NJ 08205-9790

Dear EMP comments Comments,

The Energy Master Plan will help shape New Jersey's energy future in 2015 and beyond. As the president of the Board of Public Utilities you have the power to help make dirty energy a thing of the past. I urge you to make clean energy a priority for the 2015 EMP.

The BPU has the opportunity to ensure that all New Jersey residents have the benefit of clean, safe and affordable energy. Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

Sincerely,

Francine Block

EMP comments EMP Comments

Dear EMP comments Comments,

The Energy Master Plan will help shape New Jersey's energy future in 2015 and beyond. As the president of the Board of Public Utilities you have the power to help make dirty energy a thing of the past. I urge you to make clean energy a priority for the 2015 EMP.

The BPU has the opportunity to ensure that all New Jersey residents have the benefit of clean, safe and affordable energy. Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer; if this is not feasible, the plants should be required to be retrofitted with the most effective technologies available to reduce pollution (air and water)
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan (at a minimum); work to apply even more stringent requirements for plants in or adjacent to low-income neighborhoods and neighborhoods predominantly occupied by people of color
- 3.) Establish binding energy savings targets, and require energy-intensive industries within the state to either file energy-reduction plans with the state or pay a surcharge for energy used above a target; said surcharges to be earmarked for energy saving measures for low-income households and the clean-up of pollution due to energy production
- 4.) Stop the expansion of natural gas pipelines throughout the state; if the expansion cannot be halted, then owners and operators of natural gas pipelines should be required to perform annual testing of pipeline integrity, and to carry insurance on the full costs of damages, cleanup and remediation for a worst-case pipeline breach in the highest cost-of-cleanup location. Steps should be taken to insure that liability cannot be avoided by transferring ownership to foreign companies or to limited liability subsidiaries/partnerships with no other or minimal assets.
- 5.) Stop the transportation of crude oil into and out of New Jersey; if this transportation cannot be stopped, then companies that own the oil during transport should be required to carry insurance on the full costs of damages, cleanup and remediation for a worst-case spill in the highest cost-of-cleanup location, and transportation companies should be required to carry similar insurance. Steps should be taken to insure that liability cannot be avoided by transferring ownership to foreign companies or to limited liability subsidiaries/partnerships with no other or minimal assets.

Sincerely,

Michelle Matel

The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

Sincerely,

Donna Nina

Dear EMP comments Comments,

The Energy Master Plan will help shape New Jersey's energy future in 2015 and beyond. As the president of the Board of Public Utilities you have the power to help make dirty energy a thing of the past. I urge you to make clean energy a priority for the 2015 EMP.

The BPU has the opportunity to ensure that all New Jersey residents have the benefit of clean, safe and affordable energy. Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

Sincerely,

Christopher Lepple

The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop or drastically reduce the expansion of natural gas pipelines throughout the state (other than the smaller delivery pipelines used to get natural gas directly to current customers or those who are switching from petroleum or coal-based energy sources).
- 5.) Stop or drastically reduce the transportation of crude oil into and out of New Jersey over the next five to ten years
- 6.) Develop a schedule to switch the New Jersey energy grid entirely over to renewable energy sources such as solar, wind, geothermal, and hydroelectric power over the next ten to twenty years (if not sooner).

Sincerely,

Anuj Mankad
