Subject: Make Clean Energy a Priority for 2015

Jul 31, 2015

EMP comments EMP Comments

Dear EMP comments Comments,

The Energy Master Plan will help shape New Jersey's energy future in 2015 and beyond. As the president of the Board of Public Utilities you have the power to help make dirty energy a thing of the past. I urge you to make clean energy a priority for the 2015 EMP.

The BPU has the opportunity to ensure that all New Jersey residents have the benefit of clean, safe and affordable energy. Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

Sincerely,

Stephen Marshall

- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

New Jersey can and will be a leader in alternative energy innovation, technology and installation when investments are diverted from fossil fuel energy technologies. It is time to plan for the future, which will be a future wrought with natural disaster if alternative energy sources are not utilized. Growth in clean, alternative energy will mean more jobs for New Jersey too!!

Sincerely,

Lynn Schambach

Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

I am particularly interested, as a resident of Montclair, in seeing the coal-fired plant in Jersey City, shut down, but I would like to see coal, in general, phased out. The shift to clean energy should also include stopping the expansion of natural gas pipelines, and stopping the transport of crude oil into and out of NJ.

The time to push for clean energy is now.

Sincerely,

David Korfhage

Subject: Make Clean Energy a Priority for 2015

Jul 30, 2015

EMP comments EMP Comments

Dear EMP comments Comments,

The Energy Master Plan will help shape New Jersey's energy future in 2015 and beyond. As the president of the Board of Public Utilities you have the power to help make dirty energy a thing of the past. I urge you to make clean energy a priority for the 2015 EMP.

The BPU has the opportunity to ensure that all New Jersey residents have the benefit of clean, safe and affordable energy. Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

The Board of Public Utilities should establish the following goals for the 2015 EMP:

- 1.) Eliminate NJ's reliance on coal by retiring PSEG Hudson and Mercer
- 2.) Ensure New Jersey's compliance with the EPA Clean Power Plan
- 3.) Establish binding energy savings targets
- 4.) Stop the expansion of natural gas pipelines throughout the state
- 5.) Stop the transportation of crude oil into and out of New Jersey

Sincerely,

Marion Lindner

You let us down here in Tewksbury, those of us who have had the JCP&L Substation breathing down our necks and not be able to sell our homes even at a much reduced value and cause the stress of trying to get you to consider alternate sites that would have caused so much less impact and causing grave illness in our families so do the right thing here please. We only have one planet to live on and unless we start respecting our environment now we are going to all be in grave danger. We are polluting our neighborhoods our forests our waterways and our atmosphere with our arrogance. You have a responsibility to look to the future to plan our energy needs so do it wisely and not let the politics of the moment be your guiding light. We will all bear the brunt of your decisions so decide carefully and remember your health and welfare is in the balance too. Even if you move away from it it does come to you eventually. A quote from Jeremiah 2:7 "AND I BROUGHT YOU INTO A PLENTIFUL COUNTRY, TO EAT THE FRUIT THEREOF AND THE GOODNESS THEREOF; BUT WHEN YE ENTERED, YE DEFILED MY LAND AND MADE MINE HERITAGE AN ABOMINATION". Thank you Jeremiah.

Sincerely,

Mary Sayler-Kalb

Dirty fossil fuels are putting New Jerseyans at risk of disastrous explosions, dire health consequences and dangerous climate impacts. The EMP is your chance to set a safe, 21st century energy strategy New Jersey.

My son has asthma, as do millions of other children across this state and through out Hudson County. As a long time resident of Jersey City, I WANT you to shut down the coal-fired PSE&G Hudson plant.

As a taxpayer and a parent I WANT my state's Board of Public Utilities to end our reliance on coal, comply with the EPA Clean Power Plan, and establish binding energy savings targets. It's common sense to conserve energy and reduce carbon pollution. You can do so much for children across this state with a stroke of the pen.

Please don't cling to the fossil fuels of our past. Stop expanding Natural Gas pipelines and importing and exporting crude oil. They're all relics of the past and I would love my son to have a bright and clean future here in the Garden State.

Sincerely,

Christine Wiltanger
