**Absent:**

Mr. Robert Melascaglia- Fort Monmouth  
Mr. Benjamin L. Daniel - NJ American Water  
Mr. Joseph Foster - Oceanport Resident.

**Approval of minutes:**

No minutes to approve

**Reports:**

Frank Cosentino updated the committee on the status of the plan.

Frank indicated that he needed input from the various utilities issues and constraints in the next few weeks.

Bob Grimm indicated that there will be significant detail added to the plan in the coming weeks.

Bob asked the members to provide their best estimate of the improvements required to develop as proposed.

Initial comments but not final from the members indicated that:

- The entire water system would need to be replaced
- The electric service probably does not meet current standards

The members indicated that they would need more detailed plans to provide accurate data. These details would need to include:

- Details of what current buildings would be kept and which one would be demolished.

The members also voiced concern as to the effort required to prepare their issues and constraints. They also inquired if their related firms would be reimbursed for their efforts.

Bob Grimm (STV) indicated that he would be in touch with those members who attended as well as those who could not attend. He will ask them to update their areas of concern with the current plans.
