

# **Mosquito-borne Virus Test Results**

**For the week ending July 16, 2010**

**New In This Update: New West Nile virus (WNV) mosquito pools and birds, and Eastern equine encephalitis (EEE) positive mosquito pools have been identified in New Jersey. See "Avian Testing" and "Mosquito Testing" below for more information.**

## **Human Testing**

The New Jersey Department of Health and Senior Services (NJDHSS) Public Health and Environmental Laboratories (PHEL) tests blood and other clinical samples from people suspected of having West Nile virus (WNV), Eastern equine encephalitis (EEE) and St. Louis encephalitis (SLE) infection.

- To date, there are no human cases of WNV, EEE or SLE reported.

## **Avian Testing**

The New Jersey Department of Health and Senior Services (NJDHSS) Public Health and Environmental Laboratories (PHEL) tests select bird species for WNV infection.

- To date, 38 birds were tested for WNV.
- Of those tested, 2 birds from Ocean County have been confirmed positive for WNV.

## **Mosquito Testing**

The New Jersey Department of Health and Senior Services (NJDHSS) Public Health and Environmental Laboratories (PHEL) and the Cape May Department of Mosquito Control Bio-safety Level 3 (CMBSL3) Laboratory test mosquitoes for the following viruses:

### **West Nile virus (WNV):**

- To date, 1,658 mosquito pools have been tested for WNV by the NJDHSS PHEL and CMBSL3 Laboratory.
- A total of 40 WNV positive mosquito pools were detected in the following counties: Atlantic (3), Bergen (4), Burlington (3), Camden (3), Gloucester (8), Hudson (6), Hunterdon (1), Middlesex (7), Ocean (1) and Passaic (4).

### **Eastern equine encephalitis virus (EEE):**

- To date, 383 mosquito pools have been tested for EEE by the NJDHSS PHEL and CMBSL3 Laboratory.
- A total of 2 EEE positive mosquito pools were detected in the following counties: Cape May (2).

### **St. Louis encephalitis virus (SLE):**

- To date, 99 mosquito pools have been tested for SLE by the NJDHSS PHEL and CMBSL3 Laboratory.
- No SLE positive mosquito pools have been identified.

**La Crosse encephalitis virus (LAC):**

- To date, 17 mosquito pools have been tested for LAC by the NJDHSS PHEL and CMBSL3 Laboratory.
- No LAC positive mosquito pools have been identified.

**Horse Testing**

Equine testing for WNV and EEE is conducted at the New Jersey Department of Agriculture's animal health laboratory. Positive results are sent to the National Veterinary Services Lab in Ames, Iowa for confirmation.

- To date, there are no equine cases of WNV or EEE reported.
- For more information on equine testing, visit the Department of Agriculture website at [www.state.nj.us/agriculture](http://www.state.nj.us/agriculture).
