1 DR. SPITALNIK: Good morning. Welcome to
2 the July 20, 2017, meeting of the New Jersey Medical
3 Assistance Advisory Council (MAAC). I'm Deborah
4 Spitalnik, the Chair of the Council. It's my pleasure
5 to welcome you.

6 The notification for this meeting was filed
7 pursuant to New Jersey's Open Public Meetings Act, with
8 adequate notice of the schedule for quarterly meetings.

9 It's my responsibility, as we are guests in
10 this auditorium, to remind people that in the unlikely
11 event of an emergency evacuation, quickly leave the
12 building by the nearest exit. Go to the Lamppost in
13 the parking lot, No. 9, and we will check off your
14 names from the attendance sheet; which is a good
15 opportunity to remind people to sign-in on the
16 attendance sheet. You can do that as you're leaving,
17 but it helps us keep a record.

18 Let me review our procedures. We will start
19 with introductions. I will ask the members of the MAAC
20 to introduce themselves. I'll then ask the members of
21 the public to introduce themselves and their
22 affiliation. That's not a point of time for public
23 comment.

24 We have prided ourselves as a Council on our
25 ability to have dialog with the public, butt in order

1 to accommodate that, our rules are that the MAAC
2 members get to make comments and ask questions first.
3 We will then open the floor to questions from the
4 public related to the topic. We reserve the right to
5 limit the time of that and also, if necessary, to have
6 to resort to a particular public comment period.

7 Our comments need to be confined to the
8 agenda. And, again, I want to reiterate the role of
9 the MAAC is to advise the Medicaid Program and the
10 Department of Human Services about the Medicaid
11 Program.

12 So with that, again, let me turn to my
13 colleagues up here, ask them to introduce themselves.
14 We'll then go to the public. I'll ask you to speak
15 loudly.

16 And our thanks to Lisa Bradley, our
17 recorder. So when you do make comments, please
18 identify yourself by name if you're a member of the
19 public.

20 I know that's probably more rules than a
21 sports game, but we'll start with Dr. Whitman.
22 (Members of MAAC introduce themselves.)
23 (Members of the public introduce themselves.)

24 DR. SPITALNIK: Thank you all for coming.
25 We very much appreciate your being here.

1 Our first agenda item is to turn to the
2 April 13 summary. And I turn to the MAAC for
3 additions, corrections and/or a motion to approve.
4 Beverly.

5 MS. ROBERTS: Just one very small correction
6 on page 21 of thee summary, there was a comment from
7 Mr. Spielberg. The word that's typed here is
8 "Presentation and your commitment to helping Medicare."
9 The word should be "Medicaid."

10 DR. SPITALNIK: Thank you. That correction
11 is noted.

12 Any others?

13 And Beverly, for your careful reading of it.

14 Do I have a motion to approve the summary?
15 Motion, Roberts; second Whitman.

16 All those in favor?

17 MAAC MEMBERS: Aye.

18 DR. SPITALNIK: The summary of April 13th is
19 accepted, with thanks to Lisa Bradley and Phyllis
20 Melendez.

21 We now turn to informational updates. And
22 our first item is the transition of Mental Health
23 Services to Fee-for-Service. And I want to welcome
24 Roxanne Kennedy who is the Director of the Behavior
25 Health Management for the New Jersey Department of

1 Human Services.

2 Welcome, Roxanne. Thank you for being with
3 us.

4 MS. KENNEDY: Good morning, everyone. I'm
5 usually last on the agenda, but I got to be first today
6 so I'm very excited. Everybody is awake and not tired.

7 I'm talking about the transition of Mental
8 Health Services to Fee-for-Service. The impact of this
9 is the state dollar and transition is state dollar for
10 cost base contracts to Fee-for-Service system, much
11 like Medicaid pays for services, and helping our
12 providers have a system in which they can do that.

13 (Presentation by Ms. Kennedy)

14 (Slide presentations conducted at Medical
15 Assistance Advisory Council meetings are
16 available for viewing at <http://www.state.nj.us/humanservices/dmahs/boards/maac/>)

17 DR. SPITALNIK: Thank you so much.

18 Are there questions from the MAAC for
19 Roxanne?

20 Questions from the public?

21 Thank you so much.

22 We'll now turn to Elizabeth Shea, Assistant
23 Commissioner of the Division of Developmental
24 Disabilities (DDD), the Department of Human Services,
25

1 for an update from the Division of Developmental
2 Disabilities.

3 Welcome, Liz.

4 MS. SHEA: Thank you.

5 Hi, everyone. So, I think I come to most of
6 these meetings; there are so many of you that I know at
7 this point in time. I'm going to give an update. I'm
8 going to spend most of the time on where we are in
9 Fee-for-Service (FFS) because I think that's primarily
10 what people are interested in. But, I think because I
11 haven't done this part in a while, I'm just going to
12 give a little bit of an overview of the some of the
13 reform.

14 (Presentation by Ms. Shea)

15 (Slide presentations conducted at Medical

16 Assistance Advisory Council meetings are
17 available for viewing at [http://www.state.nj.us](http://www.state.nj.us/humanservices/dmahs/boards/maac/)
18 [/humanservices/dmahs/boards/maac/](http://www.state.nj.us/humanservices/dmahs/boards/maac/))

19 DR. SPITALNIK: I want to start off with
20 just one informal question.

21 MS. SHEA: Sure.

22 DR. SPITALNIK: When you projected full
23 enrollment in the Supports Program in 2019,
24 approximately how many individuals do you project?

25 MS. SHEA: 9,000. And that's a good

1 question because, if you were to look right now at
2 DDD's numbers, just by the numbers, we have about
3 26,000 people in our system, and we have 12,000 in our
4 Community Care Waiver (CCP). But, if you subtract
5 that, you're not going to get 9. There's going to be
6 more than 9. There are a number of people in our
7 system that remain DDD eligible or become eligible.

8 It's always been a big group like this who never really
9 ask for a service. They become DDD eligible, and for
10 whatever reason they're not coming to the state for any
11 services. So until someone presents for something, we
12 wouldn't enroll them. So there will always be some
13 group that sits out there. If they present, then
14 they'll get enrolled in the Supports Program. The idea
15 is that once we get full enrollment, anybody new that
16 newly presents to our system gets enrolled directly
17 onto the Supports Program.

18 DR. SPITALNIK: And if they were presenting
19 to the system because their parents had died or were no
20 longer able to provide care, would they go to the
21 Supports Program or the CCW?

22 MS. SHEA: Fabulous question.

23 So as of today, if somebody presented new
24 today -- and let's say we'd already enrolled everybody
25 onto the Supports Program -- because of our regulatory

1 process, they would have to be declared an emergency
2 before I could enroll them on CCW. But as long as they
3 met those criteria, then they would be enrolled.

4 My hope, and I think the reform effort, the
5 movement forward, is that we won't have -- the waiting
6 list would get eliminated as we sort of move through
7 the rest of this. And, at that point in time, we'll be
8 able to literally, as people enter, sort of funnel them
9 right away to the appropriate services.

10 Right now, I have a waiting list for the
11 CCW. So without declaring someone an emergency, I have
12 no legal authority to put them right on. But, we do
13 that all the time.

14 DR. SPITALNIK: Thank you.

15 Sherl.

16 MS. BRAND: Just a quick question on the New
17 Jersey Comprehensive Assessment Tool (NJ CAT). So
18 you've got the notification letters that went out. The
19 deadline is July 31, 2017 which is right around the
20 corner. Any sense of the percentage that have not been
21 completed? And is there a plan to do any additional
22 outreach for that void?

23 MS. SHEA: Since this letter went out,
24 21,000 have completed them, which is good. We're
25 pretty close to what we think is the number of people

1 receiving services today. I don't expect people that
2 not getting services are going bother with it. So I
3 think we're already close.

4 In terms of the ones that we need, we are
5 not certain; but, we can get information back to you.
6 But the follow-up is weekly. We have a weekly check-in
7 meeting around where are we on the NJ CAT. We have
8 staff whose job it is to continue to make the calls,
9 work with case management, and work with supports
10 coordination. There's a lot of work into that, for
11 sure.

12 DR. SPITALNIK: Beverly.

13 MS. ROBERTS: Thank you. It was an
14 excellent presentation.

15 A couple of questions: Private Duty Nursing
16 (PDN) plus Supports is wonderful. We greatly
17 appreciate it. Every once in a while I talk to a
18 family, and the child is on the CCW. And they would
19 like to have CCW plus PDN. As of this moment, they
20 can't. Do you see a time after the CCW has been
21 incorporated into the 1115, -- just for a small number,
22 but everybody that we can help, we want to help -- that
23 we will be able to have CCW plus PDN?

24 MS. SHEA: So, I think the experience we
25 have in Fee-for-Service and the data of what happens

1 will really bear that out. If we need it, yes, I think
 2 we have a great model for it now. So, I don't think it
 3 would be that hard to design. I think the way our
 4 current system is structured is that individuals who
 5 would need that level of nursing would already get the
 6 acuity factor in our rate process. When they got
 7 tiered, they would get the higher tier based on the
 8 need for that nursing. So, that largely should cover
 9 that already. And, they can take that budget whether
 10 they're going to a provider, or they're in the home,
 11 and utilize it. So again, my hope is, that would get
 12 covered for the vast majority of people, but if we
 13 need, if there's still a gap, we absolutely will do
 14 that. That makes complete sense. And there may be; we
 15 don't know yet until we start to actually transition
 16 people.

17 In our old system, because we don't have
 18 those level budgets particularly for in-home people, we
 19 have a disparate situation, right? We have out-of-home
 20 services get reimbursed at a higher level and people
 21 that are receiving them in the home get an in-home
 22 budget that's lower so people can't purchase the same
 23 stuff. I think over time we'll know.

24 MS. ROBERTS: Because what's happening right
 25 now is that if somebody finishes school -- and they've

1 had private duty nursing when they're in school. Now
 2 they're 21; and they want to come to DDD. If today
 3 they are CCW people, what they're being told is, "Well,
 4 you have to dis-enroll from the CCW, go onto Supports
 5 if you're going to have your PDN."

6 And so for parents, that's --

7 MS. SHEA: Again, I think we're going to
 8 have to see how it plays out. I know a couple of those
 9 instances. And a couple of those instances are, again,
 10 for today for what the person needs, they can get all
 11 their needs met in that way so it's okay. Other people
 12 choose Managed Long term Services and Supports (MLTSS).
 13 Again, I think we just need to start doing it a little
 14 bit and see. But if there's a gap, we will fill it in.
 15 That's our job.

16 MS. ROBERTS: And my second question has to
 17 do with Medicaid eligibility on one of the last slides,
 18 what families need to do. So I don't think it's going
 19 to be as much of an issue getting Medicaid eligibility
 20 initially. You need to have that or you're going to be
 21 a non-Disabled Adult Child (non-DAC). But, then there
 22 is some people who lose it down the road afterward for
 23 a variety of reasons. And I'm concerned as to whether
 24 Support coordinators are going to be really on top of
 25 it, because parents won't necessarily know exactly

1 what's happening and why. And we don't want a gap. We
 2 certainly don't want a gap. But that's a concern that
 3 I have.

4 MS. SHEA: On that, we have a couple of
 5 things already built into our electronic system to
 6 account for that. We have flags that get sent to
 7 Support coordinators on a monthly basis. So there are
 8 things already built in, but we're talking all the time
 9 about ways we can kind of beef that up. Again, I share
 10 that's a concern. I think it's going to be an on-going
 11 issue for our provider community. It's sort of like
 12 all-hands-on-deck, right?

13 We all have to be cognizant of making sure
 14 that that continues to happen, but we do have some
 15 stuff already built in. I'd be happy to talk to you
 16 later about what we have already, and if you have any
 17 ideas.

18 MS. ROBERTS: Thanks.

19 DR. SPITALNIK: Any other questions from the
 20 MAAC?

21 Any questions from the members of the
 22 public?

23 Kevin.

24 MR. CASEY: Kevin Casey, New Jersey Council
 25 on Developmental Disabilities.

1 A couple of things, Liz. The ability to
 2 bring all kids out of special education into the
 3 Supports Program is an achievement that you ought to be
 4 very, very pleased with. And there are only 49 other
 5 states that probably need to do something similar. I
 6 think that's a very good start to that.

7 A little bit of a concern I have is that --
 8 and this is a little bit related to what Beverly was
 9 saying. You're going to have a group of folks within
 10 that Supports Program that can't get their needs met
 11 within the Supports Program. And the question is, are
 12 we going to create a waiting list for them to get into
 13 other programs? Are we going to have a planning
 14 process in place if that were to occur over time? Any
 15 thoughts on that?

16 MS. SHEA: If over time we find that between
 17 our two waiver programs we're not meeting needs. And,
 18 we would need another waiver program, then that would
 19 be something, I guess, we would look at then. Sort of
 20 in the meantime, I think certainly the vision is that
 21 people can have their needs met by one of the two. And
 22 if you can't today have your needs met on the Supports
 23 Program, we have processes to get you to CCW today.
 24 You just have to meet that emergency determination.

25 Like anything else, it comes down to the

1 definition of "you can't get your needs met." If it's,
 2 "I would like more of this at this a moment in time,"
 3 but we don't determine it's urgent enough, then you get
 4 on the waiting list. The good news is our waiting list
 5 was 8, 9,000 people not long ago, and we're down --I
 6 mean, we're moving people so rapidly off that at this
 7 point in time that I think even if someone got on the
 8 waiting list today, and they just waited, they may
 9 never become an emergency because the amount of time
 10 they'd have to wait before they could look at CCW
 11 enrollment would be different. However, I think a
 12 bigger part of that is maybe not as popular of an
 13 answer but is true, is that there are people that don't
 14 meet the criteria, don't meet the level of care. Under
 15 the Community Care Waiver, you have to meet an
 16 institutional level of care. So if somebody comes up
 17 and they want or feel like they need additional service
 18 and they don't meet that level of care, then it becomes
 19 a matter of, "Well, what?" And that's why I had that
 20 slide in there about the other service delivery systems
 21 which, again, I know isn't a popular thing to say.
 22 People like to be able to say, "I just want to be under
 23 DDD and have it managed there," but we have to get to a
 24 place that people are accessing the supports and
 25 services that you can access, like any other population

1 in other areas of the state. So I think we have done a
 2 better job, especially training our support
 3 coordination agencies about helping people to access
 4 those things. So, I think those are the two answers to
 5 that.
 6 MR. CASEY: Then there are the fiscal
 7 intermediaries, we've gotten some calls, as I'm sure
 8 you have, expressing concerns about confusion in that.
 9 It's hard for us to tell exactly how widespread the
 10 concerns are because, obviously, people who are happy
 11 don't call. Do you have any feel for that in terms how
 12 widespread is the confusion? Are there a lot of
 13 families who are upset and confused? Is it a
 14 predominant thing?
 15 MS. SHEA: It's a good question. I would
 16 start by saying that the number of people that it
 17 impacts -- and that's not to minimize the issue -- but
 18 the number of people that it impacts on the scale of
 19 who DDD serves is a very small universe to start. So,
 20 we'll start there. There's a smaller universe there.
 21 Within that universe, my impression is that the
 22 confusion was the whole universe and probably even
 23 beyond them. So the confusion, I think, was wide. We
 24 definitely had customer service-related issues. We had
 25 people calling and having to call multiple times.

1 There were some bumps.
 2 But in terms of it actually impacting
 3 people, my sense is it's a very small number of people
 4 that are impacted other than being really irritated and
 5 confused. And, to be clear, I'm not minimizing that
 6 either. But the impact, I think, is very little. And
 7 I think we've managed at this point. But we're still
 8 working through it today. As of yesterday I still had
 9 someone I was working with on something. So it's not
 10 done yet, but we're close, very close.
 11 DR. SPITALNIK: Thank you.
 12 Other questions from the public?
 13 MS. ORLOWSKI: Gwen Orłowski,
 14 Legal Services.
 15 First of all, thank you all for the
 16 excellent presentation. I just have to say on small
 17 personal note, I remember going to the public advocate
 18 nearly a decade ago on that waiting list issue, and you
 19 should really be very proud.
 20 MS. SHEA: Thanks, Gwen. It's good to see
 21 you.
 22 MS. ORLOWSKI: Good to see you, too.
 23 So I have a question that goes back to the
 24 housing voucher. I have a couple of questions, so I'll
 25 give them and then let you answer them.

1 The first question I have is whether or not
 2 that same system is going to work for people who are in
 3 the Traumatic Brain Injury (TBI)community residential
 4 services programs.
 5 MS. SHEA: Can I answer that first? And
 6 then you'll have your others. Is that okay?
 7 If someone who -- I don't know the answer to
 8 what's happening by anything not funded by DDD. So
 9 people in MLTSS, I don't know. There are certainly
 10 many people with TBI who are getting services funded
 11 through DDD. I just met with a provider yesterday that
 12 does some of these homes. And if they're enrolled in
 13 the Community Care Waiver and they happen to have a
 14 traumatic brain injury and are funded by it, then
 15 certainly, they would get a housing voucher that way.
 16 But if it's outside of our funding, that's different.
 17 If it's sort of in the MLTSS world, there are others
 18 that would have to answer that.
 19 MS. ORLOWSKI: I don't know who from MLTSS
 20 that's present. Maybe they can touch on that, if that
 21 is happening there as well.
 22 DR. SPITALNIK: That's later in the agenda.
 23 So we can hold that question. Thank you.
 24 MS. ORLOWSKI: And then following-up, I had
 25 written down a question about the Home and Community

1 Based Settings Rule and implementation of that but then
 2 you addressed that. I have a couple follow-up
 3 questions. Do know that the Centers for Medicare and
 4 Medicaid Services (CMS) delayed the transitions that
 5 were supposed to be complete, I think, in 2019. And
 6 I'm wondering how that plays in with New Jersey's
 7 timeframe for these residency agreements. And then as
 8 part of those residency agreements and having
 9 protections under the landlord tenant laws in New
 10 Jersey, what is going to be the mechanisms for people
 11 to do that? Landlord tenant court? I assume not. Or
 12 something else to enforce those rights.

13 MS. SHEA: That's a lot. I'll do my best.

14 I think part of the larger question of
 15 what's going on in New Jersey related to the Home and
 16 Community Based Settings Rule and our Statewide
 17 Transition Plan, this is what I'll say.

18 So when the Home and Community Settings Rule
 19 came out, we, like every other state, struggled with
 20 what does it mean? We didn't get a lot of guidance
 21 early. I think it just took some time. By the time we
 22 got guidance, we were, again, like many other states,
 23 heading in different directions around it. We put out
 24 a draft plan. We received an enormous amount of
 25 feedback, really almost exclusively on the

1 Developmental Disability (DD) side from the DD
 2 providers around it. We made some adjustments. We put
 3 out a new plan and made some adjustments again. We had
 4 public hearings last summer. There's been a lot of
 5 discussion around it. Then it was submitted to CMS.
 6 And we're still waiting on that.

7 In terms of how things will adjust, I'll
 8 just say that -- it's really a statewide plan, so I can
 9 only speak from the DDD side of things. But I think
 10 that at this point in time there was so much discussion
 11 or upheaval related to what was that Settings Rule
 12 going to mean to people with developmental
 13 disabilities, nationally. Then, everyone kind of
 14 settled into something. And then, a new Administration
 15 came, and now what does this mean? So, I think I would
 16 say from where we sit at DDD -- again, I can't speak
 17 for the whole state -- but from where we sit, we're not
 18 looking to make a lot of policy changes until we have a
 19 better sense of where things are headed because we
 20 can't keep diverting people into different directions
 21 and say, "This is an okay place to live. Oops, sorry,
 22 now you have to be here. Oops, sorry, now it has to
 23 look like this."

24 So, we're trying to be a little bit careful.

25 It's a little bit of a waiting game I think at this

1 point in time to see how things pan out nationally
 2 around the issue.

3 Obviously, the basic tenets of the Home and
 4 Community Based Settings Rule -- I don't think anybody
 5 doesn't agree with. But this one where it really comes
 6 down to the devil's in the details of how you implement
 7 it. And I learned firsthand that there's a lot that
 8 you have to think about when you go through that. So,
 9 again, we're a little bit on hold, I think, about doing
 10 a lot of implementation, except for when it comes to
 11 the residency agreements piece. That's essentially the
 12 settings part. When it comes to people signing leases
 13 or residency agreements, because we're making this
 14 shift right now, this is the time. People are
 15 beginning to get housing vouchers, so if we don't do
 16 this now and then a year from now say, okay, everyone
 17 we just did another shift, now we want to go back and
 18 now make you sign leases. So we're just doing it at
 19 the same time.

20 The mechanism for how they're going to get
 21 enforced really is an interesting, I think, open-ended
 22 sort of legal question. And there are some national
 23 organizations that have been looking at it. But, you
 24 know, I don't know that that's a decided area yet. We
 25 can talk a little bit more after this meeting, if you

1 would like.

2 Maribeth.

3 MS. ROBENOLT: Maribeth Robenolt, Office
 4 MLTSS Quality Monitoring, Division of Medical
 5 Assistance and Health Services (DMAHS), Just to make a
 6 distinction with Gwen's question.

7 MS. SHEA: Yes, go ahead.

8 MS. ROBENOLT: The individuals who were DD
 9 residing in group homes are still responsible for their
 10 contribution to care. A housing voucher is above and
 11 beyond that and addresses the previous contractual
 12 arrangement.

13 MS. SHEA: I don't know if you all could
 14 hear that. And I actually left this out earlier, so I
 15 will say this because it's important.

16 So the way that the system works today is
 17 that if you're residentially placed and receiving DDD
 18 services, you have to pay 75 percent of your income
 19 back to the state for what's called contribution to
 20 care. As we shift into Fee-for-Service, like I said,
 21 people will have access to a housing voucher. However,
 22 the contribution to care, the way it was before, goes
 23 away. What instead happens is they pay 30 percent of
 24 their income towards their housing voucher and then the
 25 rest gets handled by the Supportive Housing Connection,

1 but then they're retaining 70 percent of their income
 2 and that's an individual arrangement that providers are
 3 setting up with their families around what percentage
 4 or flat fee, whatever that's going to be, has to get
 5 collected then to handle some of those other costs that
 6 were previously getting offset that aren't anymore,
 7 such as utilities and food and it really varies based
 8 on the provider.

9 DR. SPITALNIK: Liz, can we clarify? When
 10 you say income, is it Social Security Income (SSI)?

11 MS. SHEA: All income. All income together,
 12 so SSI plus whatever people have when people are
 13 working, et cetera. And with that, people get very
 14 concerned. "What if I have zero? What do I do?"
 15 Well, 30 percent of 0 is 0. So, that's fine. Then the
 16 Supportive Housing Connection fills in the rest. It
 17 still gets handled.

18 DR. SPITALNIK: Thank you.

19 Other questions?

20 Yes?

21 MS. SAIDEL: Sue Saidel, Disability Rights
 22 of New Jersey.

23 We've had some folks who have had NJ CAT
 24 finished and they either leave the state or they
 25 disagree with it and they're being told that you can't

1 be re-assessed for a year. While we appreciate trying
 2 to get all the people who haven't had their assessment
 3 have that done and gone, that seems to be a problem.
 4 Is that --

5 MS. SHEA: No, I think the misunderstanding
 6 is this. People are who enrolled in Fee-for-Service
 7 already, meaning they're already enrolled in The
 8 Supports Program, or they're maybe on CCW side and are
 9 getting enrolled right now. If you're getting services
 10 that are paid for based on your NJ CAT score, you have
 11 to be able to get re-assessed immediately. And we have
 12 a process for that that's laid out in our manuals.

13 The people that we're putting on hold are
 14 the people that aren't using it yet because we still
 15 have so much work that we're doing with the others. So
 16 if the idea is you're not going to get enrolled in
 17 Fee-for-Service until November and you have an issue
 18 with your NJ CAT score, we might say to you, "We can't
 19 re-do your NJ CAT until closer to your enrollment
 20 because we've got so many others," but it doesn't
 21 impact anyone's actual service, right, because it has
 22 to get done before that change. I think some people
 23 are worried about it so they want their re-assessment
 24 now. We just literally don't have the capacity
 25 internally to do a re-assessment for everybody right

1 now that wants one. So we're doing them as they need
 2 to be done. But, again, if it doesn't impact your
 3 service system, we will do the re-assessment before it
 4 certainly would have any impact in one way or the
 5 other.

6 DR. SPITALNIK: Thank you.

7 MS. ROBERTS: I just want to clarify what I
 8 just heard. Thank you very much, because I did not
 9 know this. So if somebody is already getting service
 10 and they feel that they need to have a re-assessment on
 11 the NJ CAT, what do they do in order to have that done
 12 immediately.

13 MS. SHEA: If they're already in a service
 14 and they're enrolled in Fee-for-Service, meaning it has
 15 some impact so, someone that is in a group home today
 16 who have their NJ CAT done and they come out and they
 17 think their NJ CAT is wrong, for whatever reason, but
 18 they're not converting to Fee-for-Service, meaning
 19 their assessment won't impact anything about them,
 20 right, until December, closer to that time they will be
 21 allowed to go through the re-assessment process. If
 22 someone today is in The Supports Program, it's
 23 impacting them today. If their tier is wrong, their
 24 budget is impacted by that, or once they get enrolled
 25 in the CCW. If you're already in that zone, there is a

1 process in both of our manuals, The Supports Program
 2 manual and the CCW manual that tells you exactly how to
 3 do that re-assessment.

4 MS. ROBERTS: Thank you.

5 DR. SPITALNIK: Well, thank you so much for
 6 the excellent presentation. We'll try to think of
 7 questions for next time. Thanks.

8 We now turn to an update or NJ FamilyCare
 9 with Meghan Davey, the Director of the Division of
 10 Medical Assistance Health Services.

11 MS. DAVEY: We'll provide our general update
 12 for you.

13 (Presentation by Ms. Davey)

14 (Slide presentations conducted at Medical
 15 Assistance Advisory Council meetings are
 16 available for viewing at <http://www.state.nj.us/humanservices/dmahs/boards/maac/>)

17 DR. SPITALNIK: Thank you so much.

18 Other questions or comments?

19 Beverly.

20 MS. ROBERTS: Thanks for update. I'm a bit
 21 surprised about the LogistiCare contract award. I'm
 22 guessing some other people here are as well. There
 23 have been a lot of concerns in the past. Is there
 24 anything that you can say about improvements that
 25

1 LogistiCare has said they will make?

2 MS. DAVEY: Well, if you look at the Request
3 for Proposal (RFP), we put a lot of requirements in RFP
4 to make sure that we were addressing the concerns over
5 the last many years of work with the transportation
6 broker. So, we can outline those for you, including
7 requiring the Global Positioning System (GPS) in all
8 vehicles so that they'll have that real-time data to
9 know a driver was there on time or not, and the
10 timeframes surrounding the transport. There are many
11 improvements the RFP that will have to be in place
12 under the new contract.

13 MS. ROBERTS: Perhaps maybe for the next
14 meeting there could be very specifically what they are
15 being held to and what the public can do to complain if
16 need be.

17 MS. DAVEY: Okay. That sounds good.

18 DR. SPITALNIK: Any other questions from the
19 MAAC about NJ FamilyCare?

20 Any question from the public about Meghan's
21 presentation?

22 Seeing none, thank you so much.

23 We'll turn to Carol Grant, the Deputy
24 Director of the Division of Medical Systems and Health
25 Services for an update on Managed Care.

1 Carol, welcome.

2 MS. GRANT: I thought maybe we would start
3 with some updates on grievance and appeals and fair
4 hearings numbers. I will discuss the core portion of
5 Medicaid and Maribeth will do the MLTSS portion.

6 (Presentation by Ms. Grant and Ms. Robenolt)
7 Any questions?

8 DR. SPITALNIK: Beverly.

9 MS. ROBERTS: So you had the appeals
10 numbers. Did those go to a fair hearing? Do you have
11 any hearing data?

12 MS. GRANT: We do not have the ability to
13 cross-walk and track one case from complaints,
14 grievances, and appeals all the way through to the
15 Office of Administrative Law's fair hearing process. I
16 think we've discussed that in past meetings. I've
17 provided the kinds of cases that went to fair hearing,
18 but I'm not sure that you can track going from a
19 specific case to a fair hearing.

20 MS. ROBERTS: But the fair hearings that
21 Carol just gave us, 355, that number, and 227 were
22 withdrawn.

23 MS. ROBENOLT: The time period that Carol
24 gave was six months. January to June of 2017. The
25 period that I just reported on was July through

1 December of 2016. So it's not even the same period of
2 time.

3 MS. GRANT: I'm hoping as we put a new
4 Medicaid Management Information System (MMIS) in place,
5 and other kinds of things that we'll be able to do a
6 better job of following case all the way through the
7 internal and legal system, wherever it goes. And
8 frankly, right now we're going to move to a simplified
9 appeals process due to new federal rules where you've
10 got an internal level of appeal at the health plan,
11 maybe an independent utilization review, and then a
12 fair hearing. So, we're going to figure out how to
13 cross-walk the reporting of what we used to have where
14 we included complaints which will no longer exist as an
15 informal level of hearing to a more formal internal
16 hearing which has to be exhausted before the fair
17 hearing process can begin. I have a feeling the new
18 rules will enable a more simplified reporting mechanism
19 for DMAHS.

20 MS. ROBERTS: Again, going back to the 227
21 that were withdrawn, so more than half were withdrawn.
22 Do you we know anything about that, the withdrawn?

23 MS. GRANT: I think it's fairly routine.
24 Very often, what happens is somebody files, they may
25 submit, or their provider submits additional

1 information, and the case is decided and they no longer
2 feel as though they need a fair hearing. I don't think
3 that we would be able to speak to each one of these. I
4 don't have that information. But it is something that
5 as we've reviewed fair hearing data in past MAAC
6 meetings, we do see that very often people start a
7 process but then the issue gets resolved.

8 MS. ROBERTS: Anecdotally -- and other
9 people may have other anecdotal experience -- it's
10 withdrawn because whatever it was that was denied
11 previously, it's then allowed. And that accounts for
12 what's withdrawn. That's anecdotal experience.

13 MS. GRANT: I think anecdotally, I would
14 agree with you; that often is what happens. Or, keep
15 in mind, additional information is submitted, or simply
16 needs change which impacts a withdrawal as well.

17 MS. ROBENOLT: Or a negotiation takes place.

18 MS. GRANT: Certainly; and, that's not
19 something we would want to stop.

20 MS. ROBERTS: No. But I think it might be
21 good to know what happens to such a large number.

22 MS. DAVEY: Maybe we can look at a sample.

23 MS. GRANT: Yes, maybe we can drill-down on
24 some of them, at least.

25 MS. ROBERTS: Thank you.

1 MS. GRANT: I know one of the MAAC members
2 -- Mary Coogan, I think it was you -- asked questions
3 about the child core set quality measures. And I just
4 realized that I had gotten just a little more
5 information which I will share with you from the
6 podium.

7 Of the 26 child core set measures that CMS
8 has, annually Medicaid actually reports on 18 of those.
9 Two CMS via their Medicaid and CHIP Program (MACPro)
10 system, which is CMS reporting system, 16 of the 18 are
11 actually the Healthcare Effectiveness Data and
12 Information Set (HEDIS) metrics. So, we do track the
13 required HEDIS performance metrics routinely and it
14 shows up in our annual performance report that we
15 publish. They're still voluntarily, but we do report
16 on them and we do use them for quality purposes.
17 Anytime we have HEDIS metrics that falls below the
18 National Committee for Quality Assurance (NCQA) 50th
19 percentile as a benchmark, we require our health plans
20 to submit a work plan. And those submissions are due
21 on or before August 15th of each year. So we do use
22 them for quality purposes.

23 Thank you for the question.

24 DR. SPITALNIK: Is that something that we'd
25 want to put on the agenda to see what those measures

1 don't want to hold people up. We always take those
2 things into account. Our own research seems to
3 indicate that the letters definitely are issued on the
4 date they are dated. It doesn't mean it always
5 happens. We're taking this under consideration to see
6 how to address it. By providing more time, but you
7 don't want to let people wait too long such that it
8 infringes on the 120-day timeframe. I would say duly
9 noted on that issue we're trying to see what we can do.

10 MS. ROBERTS: I'm very concerned in
11 particular for continuation of benefits because
12 anecdotally what I hear about most often is either
13 Personal Care Assistant (PCA) or PDN and for the
14 continuation of those services if families don't even
15 quite know and if it gets mailed out on a Thursday or a
16 Friday and then a holiday -- I mean, all sorts of
17 things where they might get it at a point where they
18 have hardly any time.

19 I would also hope that the letters would be
20 very clear in bold print to continue benefits, bit
21 noticeable bold about the 10 days. Some people see a
22 letter and they don't quite know what it is and how to
23 understand it --

24 DR. SPITALNIK: Thank you. Other questions?
25 Gwen.

1 are?

2 MS. COOGAN: Yes.

3 DR. SPITALNIK: So, when we recap the agenda
4 at the end, we'll look towards those for October.

5 MS. GRANT: I'm just going to go through
6 some of the changes in the NJ FamilyCare utilization
7 appeal process.

8 (Presentation by Ms. Grant)

9 (Slide presentations conducted at Medical
10 Assistance Advisory Council meetings are
11 available for viewing at <http://www.state.nj.us/humanservices/dmahs/boards/maac/>)

13 DR. SPITALNIK: Carol, thank you.

14 Any comments?

15 Beverly.

16 MS. ROBERTS: Thanks very much, Carol.

17 So, some obvious concern about the 10-day
18 issue, which is not very much time. And if it's 10
19 days from the date of the letter, it's not uncommon for
20 somebody to receive a letter that's significantly after
21 the date that was on the letter. What can be done
22 about that?

23 MS. GRANT: The issue has been raised with
24 us. We're actually taking a look at it. Remember,
25 we're still dealing with 120-day time frame, so we

1 MS. ORLOWSKI: Thank you so much. We're one
2 of the agencies that have a lot of concerns, echoing
3 what Bev said about the 10 days, a couple things about
4 that. Number one, the federal law which is the general
5 fair hearing law also governs here, and that requires
6 10 days from the date on of mailing, not the date of
7 the letter. So knowing when a letter was mailed is of
8 utmost importance. In order to do that, you need a
9 postmark. I will tell you some of Managed Care
10 organizations use bulk mail and doesn't have a
11 postmark, so that's one of the things. I think under
12 federal law it does have to be 10 days from the date of
13 mailing, so that seems like an easy fix. Though I
14 would advocate for the 20 days. It's historic within
15 20 days for all the reasons that Bev was talking about.
16 Ten days for our clients is just not enough time with
17 the transit of mailing to get it and to be responsive.
18 So I think we're going to see a lot people being hurt
19 by this unless we go back to the 20 days.

20 I also want to point out that, if I
21 understand correctly, you need to do that also for the
22 appeal. What you have to do first and sometimes that's
23 very difficult. I know the letter for fair hearing is
24 now going to fax. Thumbs-up on that. But, for
25 example, with United Healthcare you have to mail

1 something to Utah to request it. So that can be very
2 difficult if people have to request this in writing.
3 And that timeframe just is not long enough.

4 Some of us would like an opportunity to talk
5 with you more about how to perfect what is an improved
6 letter, but see if we can make it a little bit better.

7 One of the things when I was at Legal
8 Services of New Jersey about six years, I met with
9 Nancy Day specifically on the issue of including a copy
10 of the assessments with all adverse actions related to
11 assessments. And there was an agreement back then from
12 the Division of Aging that that would be done. And
13 there's case law that supports it that that's what you
14 need to do to comply with due process. I don't see any
15 reason why the managed care companies can't include a
16 copy of that PCA assessment along with a notice that is
17 an adverse determination with respect to their PCA
18 services. And making people call for that is an undue
19 burden and I think unconstitutional.

20 MS. GRANT: I just want to point out that
21 the contract does require that members get a copy of
22 that assessment at the time that it's done, or it must
23 be mailed.

24 MS. ORLOWSKI: That's not happening.

25 MS. GRANT: That's something that we

1 definitely need to know about if that's not happening
2 because that's really very important. We would like to
3 see examples, but I'm making a note of it because we're
4 taking everything under consideration. This is a new
5 process.

6 MS. ORLOWSKI: I understand that. I have
7 one other point that I raised before and I think it's
8 critically important in the MLTSS context. People
9 frequently know about what services they're going to
10 get through the plan of care process, right, when they
11 sit down and a plan of care is developed and they're
12 signing off on it. They do not understand that that
13 plan of care includes individual services that they
14 actually have fair hearing rights. You go to a plan of
15 care meeting and you say, "I want 30 hours a week.
16 That's what I think my needs are from PCA and there's a
17 determination that the plan of care is 20." People
18 feel obligated to sign that plan in order to get the
19 services moving. They don't understand that that under
20 the federal law is an adverse determination. They've
21 made a request for more than the services that are
22 included in the plan. I think every plan of care needs
23 to have a notice of adverse determination that spells
24 out people's rights to have a fair hearing. And so I
25 would recommend that because otherwise they don't know

1 that they have that opportunity.

2 MS. ROBENOLT: Gwen, just on that last
3 point. That's something that you've raised previously
4 here at the meetings and that's something we have taken
5 back and are looking to incorporate some language
6 similar to that.

7 MS. ORLOWSKI: Thank you.

8 MS. COOGAN: Something Gwen just said. Did
9 you say the letters go out bulk mail?

10 MS. ORLOWSKI: I just look at a series of
11 them from a client. I'm calling it bulk mail. I'm not
12 a post office --

13 MS. COOGAN: The only reason I'm asking --
14 and maybe somebody could clarify, because my
15 understanding with bulk mail, it doesn't necessarily go
16 out the same as --

17 MS. ORLOWSKI: It may not be bulk. It's a
18 mail that doesn't have a postmark on it. I mean, I'm
19 happy to look at what the envelope -- I have several of
20 them in my office right now.

21 DR. SPITALNIK: So the issue is that there's
22 not a date that it was mailed that's apparent.

23 MS. COOGAN: And bulk mail is different than
24 first class mail.

25 MS. DAVEY: And that was one of those issues

1 where we ask you to please send examples of that
2 because we really need to see that in order to address
3 it, and the different health plans that it's happening
4 with.

5 MS. GRANT: I think we're all going to have
6 to walk hand-in-hand and make sure that this actually
7 works for people. Right now, you know, it's a process
8 in place. We don't want to mess around with not
9 meeting the kind of requirements we have to, but these
10 are the kinds of ideas I think we really need to hear,
11 I appreciate it.

12 DR. SPITALNIK: Kevin.

13 MR. CASEY: Kevin Casey, New Jersey Council
14 on Developmental Disabilities.

15 I want to, again, express a concern about
16 the complication of this process. And may need to be
17 as complicated as it is; I'm not saying it doesn't.
18 The complication of this process and the ability of
19 individuals and families to kind of understand the
20 process and get through it. I would speculate, by the
21 way, and I admit this speculation and anecdotal, it's
22 my experience that a fair number of folks out there
23 aren't really even aware that they have a right to
24 appeal. I know that the letter that sends a denial out
25 includes information on that.

1 MS. GRANT: It does.

2 MR. CASEY: Whether they're focusing on that
3 or not at the time they get a denial is open to some
4 questions. So I would again urge some level of
5 educational process that gives individuals and families
6 a simple flow chart, if you will, of if you're going to
7 file an appeal, you need to do this first and this
8 second and this third, and that kind of thing. It
9 would really be helpful. And I'll again offer that the
10 New Jersey Council on Developmental Disabilities (NJ
11 CDD)(Council) is willing to work with you on that and
12 put some resources into that.

13 MS. GRANT: We have had talked about this --
14 some of the plans already do an additional insert to
15 the notice. The thing is we would like to standardize
16 that and make it simple and clear.

17 We do have the member handbooks. We have a
18 "Making Medicaid Managed Care Work For You" that the
19 Boggs Center led. Maybe we need to take a look at
20 what's in there and maybe build off that. I think we
21 would take advantage of your Council to do that because
22 we expect the plans are supposed to help the member
23 through the process. We have quality offices that help
24 the member. But the most critical thing is to make
25 sure people know their rights and their

1 responsibilities, but certainly their rights. So we'd
2 be happy to work with you.

3 DR. SPITALNIK: We're beginning the process
4 of doing more consumer education about Medicaid, so
5 we'll commit to doing this with you for review. And
6 review with the plans as well, and then disseminate it.

7 MR. CASEY: Just a detail question. I was
8 hoping Liz would be here when I asked this. But is
9 there a separate appeal process for the DD waivers than
10 for other Medicaid programs?

11 MS. ROBENOLT: The appeal process that we're
12 discussing here is related managed care and the Managed
13 Care Organizations (MCOs). For anything else that's a
14 Medicaid-covered service, I know formally a fair
15 hearing is the one way to handle it.

16 MS. GRANT: You probably need to address it
17 with Liz.

18 MR. CASEY: Obviously. I guess I would ask
19 if we could have a presentation on that at some point.

20 DR. SPITALNIK: I'll make a note.

21 MS. ROBERTS: Carol, just one more very
22 quick question.

23 On the external appeal, it used to be that
24 if it was PCA issue that could not go to an external
25 appeal. Is that still the same?

1 MS. GRANT: It is. And we are having some
2 conversations with Meghan's agreement with the
3 Department of Banking and Insurance (DOBI) about
4 whether we should continue that. I actually have the
5 list of things that actually are not reviewable by the
6 Independent Utilization Review Organization (IURO)
7 because it's a medical necessity review, a peer review.
8 And I think the IURO did not feel it was appropriate
9 for them to address non-utilization-related concerns.
10 However, PCA does require a written order and it must
11 be done by a nurse. So it's something that we're
12 having some discussion about. In general, the kinds of
13 things aren't reviewable are adult day care, assisted
14 living programs and services, caregiver participant
15 training, chore services, community transition
16 services, home-based supportive care, PCA, respite,
17 daily and hourly, social day, and structured day, but
18 we are looking at that, Bev.

19 MS. ROBERTS: Okay. That would great to get
20 an update if it turns out that that would be allowable
21 because I hear a lot about that particular issue with
22 denials.

23 DR. SPITALNIK: Anyone else?

24 MS. JEFFERS: Hi. Raquel Jeffers, The
25 Nicholson Foundation.

1 So I notice in your presentation about the
2 appeals process there wasn't a single appeal for
3 substance abuse or for mental health services. And yet
4 we know this is an issue in the community, denied
5 services based on medical necessity or other reasons.
6 Obviously, the substance abuse and mental health
7 services are kind of new or some of them are new to the
8 Medicaid umbrella. But I think the point about
9 educating the community, particularly as we bring new
10 services under -- I guess none of them carved in.

11 MS. GRANT: Some of them are.

12 MS. JEFFERS: As that happens, it's just
13 something to be mindful of. I was really surprised to
14 see not a single one of the fair hearing requests are
15 for substance abuse or mental health services.

16 MS. KENNEDY: I think only thing that's
17 managed is MLTSS.

18 MS. JEFFERS: Right, but even your own -- I
19 mean even if there's a Medicaid appeal.

20 MS. GRANT: I mean, maybe this is a similar
21 to the DD one, you know, are there options within the
22 DMAHS for appeals, this is through managed care. If
23 it's carved-in service, it would be the same process
24 that we're talking about here. Again, it's a matter of
25 education and making sure people understand their

1 rights as more and more services get "Medicaid-ized" --
2 that's my term.

3 Anything else?

4 If not, really good questions and good
5 dialog. Thank you.

6 DR. SPITALNIK: Carol, thank you so much.

7 We now turn to an update on Managed
8 Long-Term Services and Supports and welcome Laura
9 Otterbourg, the Director of the Division of Aging
10 Services. Laura, welcome.

11 MS. OTTERBOURG: I have two parts to my
12 presentation. The first one is the slides that you
13 always see updated, what we call the dashboard
14 indicator on MLTSS. So I'll go through these. And
15 then I have another portion of this presentation on an
16 initiative that's under way.

17 (Presentation by Ms. Otterbourg)

18 (Slide presentations conducted at Medical
19 Assistance Advisory Council meetings are
20 available for viewing at [http://www.state.nj.us](http://www.state.nj.us/humanservices/dmahs/boards/maac/)
21 [/humanservices/dmahs/boards/maac/](http://www.state.nj.us/humanservices/dmahs/boards/maac/))

22 DR. SPITALNIK: Questions from the MAAC
23 around the data that Laura just presented?

24 Questions from the public.

25 MS. JEFFERS: Hi this is Raquel from The

1 Nicholson Foundation.

2 Was I correct reading this line that the
3 actual nursing facilities spend has gone up in 2016
4 than in 2015?

5 MS. OTTERBOURG: Well, it probably remained
6 around the same, but you have the nursing home spend
7 for MLTSS which has increased because as the program
8 matures, more and more -- now, anybody who enters a
9 nursing home is under MLTSS, so that's why the nursing
10 home spend has increased under MLTSS. It's a shift.
11 We're not talking about overall Medicaid dollars.
12 We're talking about nursing home dollars under MLTSS,
13 which is natural.

14 DR. SPITALNIK: Thank you for that question.
15 Phil.

16 MR. LUBITZ: Phil Lubitz from National
17 Alliance on Mental Illness (NAMI).

18 I just wanted to say I appreciate you taking
19 a little bit of a deeper dive into the behavioral
20 health aspects. The availability of the slides? It
21 was kind of quick to really digest the slides.

22 MS. OTTERBOURG: I think you all get them,
23 don't you?

24 DR. SPITALNIK: Yes the slides are posted on
25 the DMAHS website under the MAAC at:

1 <http://www.state.nj.us/humanservices/dmahs/boards/maac/>.
2 So the presentations are posted after the meeting. And
3 they're not posted in advance to give people the most
4 recent data, data is really to the 11th hour.

5 MS. OTTERBOURG: Actually, I can attest to
6 that because until this week, I had last month's data,
7 so this was really the most recent data that Medicaid
8 has.

9 DR. SPITALNIK: But all presentations that
10 are delivered at the MAAC are on the website.

11 Other questions?

12 So, Laura thank for this data. And let's go
13 on to your next topic on the Nursing Facility Quality
14 Improvement Initiative.

15 (Presentation by Ms. Otterbourg)

16 (Slide presentations conducted at Medical
17 Assistance Advisory Council meetings are
18 available for viewing at [http://www.state.nj.us](http://www.state.nj.us/humanservices/dmahs/boards/maac/)
19 [/humanservices/dmahs/boards/maac/](http://www.state.nj.us/humanservices/dmahs/boards/maac/))

20 DR. SPITALNIK: Thank you so much.
21 Sherl.

22 MS. BRAND: Thanks, Laura. That was a great
23 update. I know you said there was a Workgroup. I'm
24 assuming that that involved representatives from the
25 nursing home industry, as well?

1 MS. OTTERBOURG: Correct. I can just
2 expound on that. Under the launch of MLTSS there was a
3 whole Quality Workgroup. Some people are no longer in
4 the same positions some people have moved on. So that
5 was a base, but then we asked other people to join on.
6 For example, we reached out to the Ombudsman for the
7 Institutionalized Elderly and we have some consumer
8 advocates participating in this Workgroup and they've
9 provided a lot of feedback, especially around the
10 importance of the resident satisfaction tool. We have
11 a lot of individual nursing homes through the
12 associations. People have given us some people who are
13 really experts in the minimum dataset, which is
14 important for this. The New Jersey Department of
15 Health (DOH) has been participating because they're
16 experts also in the minimum dataset. And they'll have
17 other roles in terms of the nursing side of this.

18 MS. BRAND: That's great. And thank you for
19 that additional information.

20 So once it is ready to go, in January 2019,
21 do you envision that this is something that would then
22 -- you referenced public knowledge. So is that
23 something that would be posted on the state website?

24 MS. OTTERBOURG: What we anticipate, first
25 of all, I mean, it's multifold, but one thing we'll be

1 working very closely with the nursing trade
 2 associations because it's going to involve a lot of
 3 training of the nursing home industry. But we'll be
 4 working with AARP on webinars and seminars and also the
 5 Ombudsman for the Institutionalized Elderly because
 6 they have a whole network of consumer volunteer
 7 advocates that go out to the nursing homes, so they'll
 8 be an important link to the public as well.
 9 Momentarily, we need to get the website up as we start
 10 rolling this out. As more information is developed,
 11 more information will go to the website. But there
 12 will definitely be a place on the website as we roll
 13 this out.

14 MS. BRAND: And now my last question is when
 15 you say annual designation -- and maybe I missed this
 16 in your presentation -- what is the designation?

17 MS. OTTERBOURG: That they're any willing
 18 qualified provider designation.

19 MS. BRAND: So it's an either they are or
 20 are not?

21 MS. OTTERBOURG: Exactly.

22 MS. BRAND: Thank you.

23 DR. SPITALNIK: I have a question. I
 24 realize that you're drawing on the flu immunization
 25 because it's Minimum Data Set (MDS). Is there any

1 thought about including pneumonia, immunizations
 2 against pneumonia as one the measures? Because that's
 3 such a risk factor in the elderly.

4 MS. OTTERBOURG: I'm not the MDS expert, but
 5 I think we can -- this is an original starting point
 6 and other measures can be substituted and added at
 7 other times. This was a doable, workable start to the
 8 project.

9 I don't know if anything has anything else
 10 to add.

11 There were other measures, too, but these
 12 were the ones that we had originally started out with
 13 as a Workgroup perhaps because it hits the largest
 14 group.

15 DR. SPITALNIK: And also the MDS is, in a
 16 sense, standardized so you can benchmark across states.
 17 But thank you for that.

18 Yes?

19 MS. EHRENKRANTZ: Kay Ehrenkrantz, Deputy
 20 Director of the Medicaid Fraud Division.

21 In your envisioning, who will answer these
 22 questions? Who would be the people for the nursing
 23 home or for the individual?

24 MS. DAVEY: For the resident survey?

25 MS. EHRENKRANTZ: Yes.

1 MS. DAVEY: It could be the member or the
 2 family.

3 MS. EHRENKRANTZ: Who is the source of the
 4 data?

5 MS. DAVEY: Person, the guardian, a family
 6 member.

7 MS. EHRENKRANTZ: I just want to raise a
 8 possible integrity issue of if an individual is
 9 incompetent to answer, who will speak on behalf of that
 10 individual? And may there be pressure on residents by
 11 the facilities to make representations that are
 12 flattering for the institution?

13 MS. DAVEY: It goes to their authorized
 14 representative (authorized reps).

15 MS. EHRENKRANTZ: There are issues involved
 16 with who are these designated authorized reps?

17 MS. DAVEY: My understanding is that these
 18 satisfaction tools are used globally throughout,
 19 nursing home satisfaction tools, so they usually go to
 20 the authorized rep of the member.

21 MS. EHRENKRANTZ: I just want to raise the
 22 issue for you when you're doing your assessment to be
 23 mindful of who has control of that data.

24 MS. LIEBMAN: Evelyn Liebman, AARP.

25 So, a lot of these questions were considered

1 by the Workgroup, and I think one of the reasons that
 2 the Workgroup along with DMAHS chose Dr. Castle is
 3 because of his national experience with working
 4 literally with nursing home residents and their
 5 caregivers and dealing with issues like that where to
 6 mail the surveys, exit surveys that are found to be
 7 most effective. Those were issues that were considered
 8 and propped up the decision.

9 MS. OTTERBOURG: I mean, he's really -- he's
 10 national leader, renown really for his work in this
 11 field, so I just echo what you said.

12 MS. LIEBMAN: I just want to make another
 13 comment. DMAHS, the Division of Aging Services (DoAS),
 14 the Department of Human Services, and DOH are all
 15 stakeholders on this, it really is a big step forward
 16 in terms of the evolution of MLTSS. These folks were
 17 called. One of the theories, if you will, behind MLTSS
 18 is that there would be an opportunity for MCOs to use
 19 quality and cost in developing their networks. And so
 20 this begins to move us in that direction. And once the
 21 designations are in place, it will allow MCOs to not
 22 contract, if you will, with those who do not get an Any
 23 Willing Qualified Provider (AWQP) designation. But I
 24 think that for those or the Workgroup, we were also
 25 very careful in terms of looking at the data that

1 exists now to ensure that we also have some minimal
 2 level of network adequacy over this period of time and
 3 give facilities an opportunity to correct whatever
 4 deficiencies that may be out there. We didn't want to
 5 leave any county without an AWQP designated facility.
 6 Obviously, we'd like more than one or two. But also, I
 7 think it's so important that the information is going
 8 to be publicly available. It will be transparent on
 9 the website. And, residents and their families will be
 10 able to access the information and make a choice
 11 themselves as to whether or not they want to stay in a
 12 particular facility.

13 DR. SPITALNIK: I just would like to thank
 14 Evelyn for that and also really to sort of trace the
 15 history of the intensive work that was done on quality
 16 measures with the first comprehensive waiver. So, it's
 17 very gratifying to see that this is going to have real
 18 impact on people's lives.

19 Wayne.

20 MR. VIVIAN: I think that it's really
 21 important you're doing this; it's really great.

22 Eventually will this be the standard,
 23 licensing standard that every nursing provider and
 24 nursing home provider must achieve this credential or
 25 this level of guarantee of service? Because I could

1 see this starting out here, but then eventually that
 2 this is a requirement that you have to have this, that
 3 they all should have this.

4 MS. OTTERBOURG: It's a requirement for
 5 nursing homes that are participating in MLTSS. So, it
 6 will be a requirement. I mean, Nursing Home Compare,
 7 is what you can see, for example, how XYZ Nursing Home
 8 is doing. This AWQP designation is looking at measures
 9 that we've chosen specifically with regards to the
 10 MLTSS program. So, if you're a private pay nursing
 11 home resident in New Jersey, you could see how the
 12 nursing home that you're staying in is fairing, no
 13 matter how it ranks.

14 Part of the work around this, there are --
 15 and I'm not going to get into the details of all this,
 16 but just to give you an idea, let's say you're in a
 17 nursing home and your spouse then needs to go into a
 18 nursing home. And the nursing home that you're in is
 19 all of a sudden not meeting AWQP designation status.
 20 But that might be an exception that we would grant
 21 because the spouse wants to join the wife in the
 22 nursing home that doesn't meet the designation. So
 23 there are going to be exceptions, but that's the basic
 24 idea.

25 MR. VIVIAN: Very good.

1 DR. SPITALNIK: But beyond that, and this
 2 is, I think, a broad community advocacy issue. Does
 3 this also initiate a dialog with the Department of
 4 Health in their role in licensing nursing homes to
 5 incorporate this standard?

6 MS. OTTERBOURG: Well, we work with them on
 7 a lot of these advocacy issues. You're absolutely
 8 right. And that's why they've been a partner from the
 9 beginning with this initiative.

10 DR. SPITALNIK: Thank you.
 11 Phil.

12 MR. LUBITZ: I just want to comment. DOH
 13 publishes inspection reports on their nursing homes.

14 DR. SPITALNIK: Thank you.
 15 Other comments?

16 Laura, thank you so much. And it's so
 17 exciting to hear.

18 So this is the point in the agenda where
 19 finish the formal presentations and we do some
 20 stocktaking to look at what we anticipate or we'd like
 21 to see on the agenda for our next meeting, which is
 22 here and is on Thursday, October 19, 2017.

23 Certainly, an update on the national
 24 situation with Medicaid. The other items that I have
 25 are a presentation on the Comprehensive Medicaid Waiver

1 renewal (CMW Renewal) approval.

2 There were concerns raised about
 3 LogistiCare, so we'd like a presentation on the
 4 requirements in the RFP that resulted in the award of
 5 the contract.

6 We also discussed a presentation on the
 7 child quality measures. The issue was raised, as it
 8 has been in the past, what are the DDD appeal processes
 9 for services funded under Medicaid. And for our 2019
 10 meeting, the first annual report that Laura just gave.

11 Are there any other agenda items from the
 12 MAAC?

13 Beverly.

14 MS. ROBERTS: I'd like to see if we can have
 15 an update on the DDD dual diagnosis project, what's
 16 happening with that.

17 DR. SPITALNIK: Okay. Thank you. We will
 18 add that.

19 Other items?

20 MS. ORLOWSKI: Real quick. On CMW Renewal
 21 presentation, if there could also be a part of that
 22 addresses the short-term nursing facility stay
 23 provision of the waiver and how to access it. I don't
 24 think that's changing, but it's something in the
 25 current waiver that's really difficult to find for

1 clients.

2 DR. SPITALNIK: Thank you so much for that.

3 I would ask that, if you haven't already, to
4 sign in. The presentations that were presented today,
5 those slide decks are posted on the DMAHS website at:
6 <http://www.state.nj.us/humanservices/dmahs/boards/maac/>.

7 Give us one day at least to post them.

8 And, then I am seeking a motion to adjourn.

9 Mary Coogan.

10 Second, Sherl Brand.

11 We are adjourned. Best wishes for a good,
12 safe, and healthy summer. And we'll see you October.

13 And, thank you so much to DMAHS and to all the
14 presenters.

15 (Meeting concluded at 12:37 p.m.)
