SIXTH AGGREGATE REPORT OF THE NEW JERSEY STATE POLICE OFFICE OF LAW ENFORCEMENT PROFESSIONAL STANDARDS JANUARY 1, 2010 TO DECEMBER 31, 2010

Introduction

Pursuant to the Law Enforcement Professional Standards Act of 2009 (N.J.S.A. 52:17B-222, et. seq.) (the Act), the Office of Law Enforcement Professional Standards (OLEPS) is required to publish biannual reports containing aggregate statistics on the New Jersey State Police (State Police). The reports must contain data on the race and ethnicity of all civilians involved in traffic enforcement activities, criminal arrests, contraband seized, wanted persons, misconduct investigations, and the number and type of criminal charges filed. These reports were previously published by the Independent Monitors until the creation of OLEPS following the Act. For a more detailed history of the Act, see OLEPS website www.nj.gov/oag/oleps.

This report is the Sixth Public Report of Aggregate Data of Traffic Enforcement Activities¹, covering the reporting period of July 1 through December 31, 2011. This report presents data on motor vehicle stops, criminal arrests, and internal misconduct investigations as previous reports have done. However, this report also includes data regarding criminal charges filed, wanted persons, and contraband seized. The sixth release of OLEPS Aggregate Data is the fifth OLEPS report to contain data for a six-month reporting period.

The first part of the report presents information on the data analyzed for the report. This part includes data source information and definitions of any categorizations used. The Results section of the report provides a brief discussion of trends and patterns noted at the aggregate (Division-wide) level. Appendix One provides the same tables for each Troop and station (Exhibits A through F). Exhibit G in presents information on misconduct investigations, which is not discussed in this report as it will be covered in a separate report. Appendix Two lists all previously published Aggregate Reports, their date of publication, and the reporting period covered.

¹ Appendix Two lists all previously published reports of aggregate data, their publication dates and the periods for which they provide information.

DATA

The data utilized in this report were obtained from the New Jersey State Police (State Police) Information Technology Bureau. The State Police maintains several databases containing information on motor vehicle stops including demographic information on drivers, passengers, and all actions or enforcements that occurred during the stop. For this report, OLEPS requested data on all motor vehicle stops conducted between July 1, 2011 and December 31, 2011.

Stops

Stop information supplied by the State Police was obtained through the Computer Aided Dispatch (CAD) system. A stop is defined as any interaction between a trooper and a motorist. Stops are classified based on the reason for the stop in three broad categories:

- **Moving:** Stops initiated for reasons pertaining to the movement of a vehicle, such as rate of speed or unsafe lane change.
- **Non-Moving:** Stops initiated for reasons pertaining to the non-movement of the vehicle, such as use of seatbelts or maintenance of lamps.
- **Other:** Stops initiated for reasons other than moving or non-moving, such as BOLO or directed stops. This category also includes procedures not initiated by a trooper, such as motorist aid, accident incidents, and mobile data terminal hits (warrants on vehicle owner, unregistered/uninsured vehicles).

Law Enforcement Procedures (Post-Stop Interaction)

Data on Law Enforcement Procedures (Post-Stop Interaction) provided by the State Police were obtained through Motor Vehicle Stop Reports (MVSR), maintained in the Records Management System (RMS). State Police procedures require troopers to complete these reports whenever a law enforcement procedure occurs during a motor vehicle stop. These data do not represent the total number of post-stop interactions for this period. Rather, these data represent the total number of stops where a post-stop interaction occurred. Each stop may have more than one post-stop interaction. Law Enforcement Procedures are categorized as:

- **Occupant Exit Vehicle:** The number of motor vehicle stops where an occupant was requested to exit the vehicle.
- **Occupant Protective Frisk (Pat-Down):** The number of motor vehicle stops where an occupant was subjected to a protective "pat-down" or "frisk" of their person for weapons.
- **Occupant Searched:** The number of motor vehicle stops where an occupant was subjected to a search of their person for evidence of a crime or incidental to their arrest.

- **Force Deadly:** The number of motor vehicle stops where an occupant was subjected to deadly force.
- **Force Physical:** The number of motor vehicle stops where an occupant was subjected to physical force.
- **Force Mechanical:** The number of motor vehicle stops where an occupant was subjected to mechanical force, such as a baton.
- **Force Chemical:** The number of motor vehicle stops where an occupant was subjected to chemical force, such as pepper spray.
- **Consent to Search Vehicle Requested:** The number of motor vehicle stops where consent to search the vehicle was requested.
- **Consent to Search Vehicle Conducted:** The number of motor vehicle stops where a consent search was conducted.
- **Probable Cause Search of Vehicle Conducted:** The number of motor vehicle searches/seizures supported by probable cause.
- **Drug Dog Employed:** The number of motor vehicle stops during which a drug-detecting canine was summoned to the motor vehicle.

Dispositions (Summons/Warnings)

Data on dispositions disseminated during motor vehicle stops were obtained by the State Police via the CAD system. The information reflects whether any summonses or warnings were issued in a stop, but not the total number of summonses or warnings issued. Therefore, the numbers represent the number of stops which received any of the categories of summonses or warnings. The categorizations of dispositions are:

- **Summons moving:** The number of motor vehicle stops that were issued a summons for a moving violation.
- **Summons non-moving:** The number of motor vehicle stops that were issued a summons for a non-moving violation.
- **Warnings moving:** The number of motor vehicle stops that were issued a warning for a moving violation.
- **Warnings non-moving:** The number of motor vehicle stops that were issued a warning for a non-moving violation.
- **Summons moving and warnings moving:** The number of motor vehicle stops that were issued a summons and a warning for a moving violation.

- **Summons non-moving and warnings non-moving:** The number of motor vehicle stops that were issued a summons and a warning for a non-moving violation.
- **Summons and/or warnings/moving and/or non-moving:** A combination of all the above moving and non-moving violations.
- **Other:** The number of motor vehicle stops that did not result in a summons or warnings.

Criminal Arrests

Criminal arrest data are classified using the Uniform Crime Report's (UCR) methodology. The State Police compile arrest data from arrest reports filed by troopers. As with all other categories of activity, arrests are presented by race/ethnicity of the driver (not necessarily the individual who was arrested). Arrests reflect all arrests made during motor vehicle stops, regardless of the reason for the stop. Arrests were classified as follows:

- **Patrol Related Arrests:** The detainment of a person(s) into legal custody during a motor vehicle stop. For this report, patrol related arrests reflect the sum of Drugs, Weapons and Other arrests.
- **Drugs:** The number of arrests of motor vehicle occupant(s) carrying drugs.
- **Weapons:** The number of arrests of motor vehicle occupant(s) carrying weapons.
- **DUI:** The number of arrests of motor vehicle operators driving under the influence of alcohol.
- **Other:** The number of arrests of motor vehicle occupant(s) for reasons other than the above mentioned.

Criminal Charges

The following data have been added to the Sixth OLEPS Aggregate Data of Traffic Enforcement Activities. Pursuant to N.J.S.A. 52:17B-235, OLEPS is mandated to provide data regarding criminal charges, wanted persons, and contraband seized.

The State Police store information on Criminal Charges in the CAD system. Criminal Charges reflect the statute specific charges filed for arrests made during motor vehicle stops. Since each charge is specific to the circumstances of the crime, there are a large number of different statutes for this reporting period. To make the data more manageable, charges were classified by chapter titles from the New Jersey Criminal Code. The charges fell into the following categories:

- **Controlled Dangerous Substances:** The number of motor vehicle occupants that had a criminal charge(s) based on any drug or substance that metabolizes when ingested or otherwise becomes a controlled substance in the human body.

- **Drug Paraphernalia:** The number of motor vehicle occupants that had a criminal charge(s) due to the use, possession, or distribution of any drug paraphernalia. Drug Paraphernalia may include all equipment, products and materials of any kind, which are used or intended for use in planting, growing, harvesting, or otherwise introducing into the human body a controlled dangerous substance.
- **Obstructing Governmental Operations; Escapes:** The number of motor vehicle stops where an occupant had a criminal charge(s) due to commission of offenses that purposely obstructed, impaired, or prevented the administration of law or other governmental functions, such as resisting arrest and falsifying documents like a license, registration, or license plates.
- **Other Charges:** The number of motor vehicle occupant(s) that had other criminal charges.²

Information on criminal charges is occupant specific rather than stop specific. This means that the data reported indicate the number of individuals who received each charge rather than the number of stops that resulted in criminal charges. Additionally, any individual may receive more than one criminal charge. Thus, the data on criminal charges are best understood as the total number of charges rather than individuals or stops with charges.

Wanted Persons

The State Police obtained data on wanted persons from the CAD system. These data have been added to this report, pursuant to N.J.S.A. 52:17B-235. Wanted persons data reflect the number of wanted persons taken into custody during the course of a motor vehicle stop. The State Police provided the charge code for each wanted person. OLEPS presents these data using the appropriate name for each charge code, rather than the code itself. All charges for wanted persons were in one of the following categories:

- **Contempt:** The number of motor vehicle occupants that purposely or knowingly disobey a judicial order or protective order; or hinder, obstruct or impede the effectuation of a judicial order.
- **Bail Jumping; Default in Required Appearance:** The number of motor vehicle occupants that have been issued a summons, and who have failed to appear before the courts.
- **Fugitives from Justice found in state:** The number of motor vehicle occupants who are fugitives found in this state, arrested, and delivered to the demanding state; also, the number of persons charged with murder in a demanding state and imprisoned in this state for a term less than life.

Contraband Seized

The State Police retrieved data on contraband seizures from the CAD system. These data have been added to this report, pursuant to N.J.S.A. 52:17B-235. Contraband seizures reflect the number of

² A complete listing of "Other Charges" can be found on OLEPS website: www.nj.gov/oag/olep.

motor vehicle stops where controlled dangerous substances, illegal weapons, items reasonably suspected to be weapons, smuggled goods or any goods that are unlawful to possess, sell, otherwise distribute, or transport were removed from a vehicle.

Misconduct Investigations

The Internal Misconduct Investigation Summary (Exhibit G)³ is presented on statewide basis from the Office of Professional Standards (OPS) as required by N.J.S.A. 52:17B-235. The data represent misconduct investigations initiated on or after January 1, 2011; they do not reflect the progress of investigations previously initiated. Because each misconduct case may involve several allegations, allegations are classified into broader categories. For example, an allegation of a trooper using improper language might be classified under attitude and demeanor. Additionally, because each case may have multiple allegations, only the categorization for the most serious (as determined by OPS) allegation in a case is used here. Thus, the data represent misconduct cases, but not all allegations associated with them.

Misconduct investigations are categorized based on the disposition determined by OPS investigation. The dispositions including the following:

- **Substantiated:** A preponderance of the evidence shows that a member violated State Police rules, regulations, protocols, standing operating procedures, directives, or training.
- **Unfounded:** A preponderance of the evidence shows that the alleged misconduct did not occur.
- **Exonerated:** A preponderance of the evidence shows that the alleged misconduct did occur, but did not violate State Police rules, regulations, protocols, standing operating procedures, directives, or training.
- **Insufficient Evidence:** Based upon a preponderance of the evidence standard, there is insufficient evidence to determine whether the alleged misconduct occurred.
- **Administratively Closed:** When the Office of Professional Standards' review of the reported incident reveals that a trooper has not violated any of the Division's rules and regulations, standing operating procedures, or applicable federal or state laws, the incident may be classified as an administrative matter.

The data in Exhibit G will not be discussed in this report as the New Jersey State Police present this information in an Annual Report by The Office of Professional Standards (<http://www.state.nj.us/njsp/about/ops.html#iaib>).

³ Formerly, Exhibit H in previous Aggregate Reports.

RESULTS

Data on stops, law enforcement procedures, dispositions, criminal arrests, criminal charges, wanted persons, and contraband seized for the entire Division of State Police are discussed in the sections that follow. Appendix One contains the same data for each troop⁴ and station within the Division of State Police. For all tables the racial/ethnic categories are: White, Black, Hispanic, Asian Indian, Other Asian, American Indian, and Other.

Stops

From July 1, 2011 to December 31, 2011, the State Police made 196,348 motor vehicle stops. Compared to the previous reporting period, this number represents a 20% decrease in the total number of stops. In the Fifth Aggregate Report, the State Police made 247,408 motor vehicle stops. The decrease for the second half of the year is a pattern seen for several reporting periods. Generally, there are more stops made in the first six months of a year and much fewer made in the second six months.

Table One: Motor Vehicle Stop Reasons

July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian Indian	Other Asian	American Indian	Other ⁵
Total Stops	196,348	123,645	33,919	24,216	6,050	7,324	286	908
<i>% of Total</i>		63.3%	17.4%	12.4%	3.1%	3.7%	0.1%	0.5%
Moving	168,259	106,703	28,106	20,379	5,597	6,766	257	451
<i>% of Total</i>	85.9%	63.6%	16.7%	12.1%	3.3%	4.0%	0.2%	0.3%
Non-Moving	23,909	14,662	4,951	3,270	371	471	26	158
<i>% of Total</i>	12.2%	61.7%	20.8%	13.8%	1.6%	2.0%	0.1%	0.7%
Other	4,180	2,280	862	567	82	87	3	299
<i>% of Total</i>	2.0%	58.7%	22.2%	14.6%	2.1%	2.2%	0.1%	7.7%

As in all reporting periods thus far, the majority of stops conducted during this reporting period were based on moving violations. Though the actual numbers of these stops may be lower than in the

⁴ Effective as of January 1, 2011, Troop D and Troop E merged to form one troop, Troop D. However, for reporting purposes, OLEPS will continue to report these troops separately under new troop names. OLEPS will now refer to Troop D as "Troop D Turnpike" (Exhibit D) and Troop E will be referred to as "Troop D Parkway" (Exhibit E).

⁵ "Other" represents those individuals for whom the aforementioned categories were not appropriate or for whom a racial/ethnic categorization was missing. The tables in this report present "Other" as a racial/ethnic group only for those tables describing the entire Division of State Police. The troop and station tables in Appendix One do not contain information on drivers classified as "Other".

previous period, they actually represent a slight increase in the percentage of all stops. For the current period, 85.9% of all motor vehicle stops were based on moving violations compared to 83.9% in the previous period. Thus, while the NJSP stopped fewer drivers in this reporting period, they stopped a slightly higher proportion of drivers for moving violations than other periods.

In terms of racial/ethnic disparity, the numbers indicate that, as expected, the frequency of stops for White drivers is higher than the frequency for all other racial/ethnic groups. The overall proportion of White drivers stopped did not change substantially from the previous period (62.8% compared to 63.3% here). The percentage of each violation type that each racial/ethnic group comprises did not appear to change drastically for this reporting period either. The percentage of moving violations for which White, Black, or Hispanic drivers were stopped is very similar to the percentage from the previous reporting period.

Law Enforcement Procedures (Post-Stop Interaction)

In total, 8,148 motor vehicle stops resulted in some sort of Law Enforcement Procedure for this reporting period. Roughly 4.1% of all stops had at least one post-stop interaction compared to 4.8% in the previous reporting period. The decrease in stops with post-stop interactions is likely the result of decreases in the total number of stops.

As in the Fourth and Fifth OLEPS Aggregate Data Reports, the most common post-stop interaction was an occupant vehicle exit. Of the 8,148 stops with post-stop interactions, 94.7% resulted in a occupant vehicle exit. Of special interest to OLEPS and the State Police is the number of consent searches. For this period, 892 requests for consent to search a vehicle were made during motor vehicle stops. This is a decrease of about 44% from the previous reporting period (Fifth OLEPS Aggregate Data Report), which reported 1,585 requests for consent to search a vehicle. However, this decrease is likely explained by the fewer number of stops in this reporting period, rather than troopers requesting these searches less frequently.

The pattern of consent requests based on race and ethnicity appears to have changed slightly in this period. Overall, this reporting period indicates a higher percentage of all consent search requests were posed to White drivers (50.6%) than Black drivers (34.0%) and Hispanic drivers (12.4%). In the previous reporting period, consent searches of White drivers comprised less than 50% of all consent requests and consent searches of Black drivers made up about 40% of all consent requests. Stemming from these changes in the percentage of consent requests, the number of consent searches actually conducted also changed. Again, White drivers made up a higher percentage of consent searches conducted (49.6%) while Black drivers received a slightly lower number of searchers than the previous reporting period (34.7%).

The number of requests for consent to search a vehicle and the number of vehicle consent searches conducted continue to remain well above the numbers prior to the NJ Supreme Court's ruling, State v. Peña-Flores, 198 N.J. 6 (2009).⁶

⁶ State v. Peña-Flores, 198 N.J. 6 (2009), hereafter referred to as Peña-Flores, served to further define the exigent circumstances under which a search of a vehicle could be conducted without securing a search warrant under the automobile exception when there was probable cause to believe that a crime had been (or will be) committed.

Table Two: Motor Vehicle Stops with Post-Stop Interactions
July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian Indian	Other Asian	American Indian	Other

⁷ Total Stops with Post-Stop Interactions reflects the total number of stops in which a post-stop interaction occurred. Most stops have more than one post-stop interaction.

In Peña-Flores, the New Jersey Supreme Court outlined the circumstances in which law enforcement officers in New Jersey may conduct a search without a warrant under the automobile exception. This ruling dramatically reduced the number of probable cause searches/seizures.

There were 472 probable cause searches/seizures in this period, substantially fewer than the 3,306 probable cause searches/seizures reported in the Nineteenth Data Report (pre-Peña-Flores), and fewer than the 699 searches reported in the last report (Fifth OLEPS Aggregate Data Report). As observed overall for post-stop interactions, White drivers made up a higher number and percentage of probable cause searches/seizures conducted than the previous period. Here, White drivers were 56.4% of all probable cause searches/seizures, while they were only 53.1% in the last period. Black drivers were 30.9% of all probable cause searches/seizures in the first half of 2011, yet they are only 25.8% in the current period. These data suggest a potential trend whereby the portion of probable cause searches/seizures conducted in stops with White drivers is steadily increasing.

For all Law Enforcement Procedures, the data indicate that a slightly larger percentage of all enforcements involved White drivers than the previous reporting period. Black drivers then, made up a smaller percentage of enforcements in all categories with the exception of Drug Dog Deployments. No clearly discernable pattern emerged for Hispanic drivers; however, the data do indicate substantial decreases in Physical Force and Canine Deployments since the previous reporting period.

Dispositions

There were 50,396 summonses for moving violations and 20,533 summonses for non-moving violations issued during motor vehicle stops made during this reporting period. Compared to the previous reporting period, the racial/ethnic distribution of stops with dispositions indicates no drastic changes in the proportion of each disposition type. The overall pattern remains that between 55 and 67 percent of all disposition types involved White drivers. Black drivers on the other hand vary more, especially in the combination categories for summons and warnings. For moving violations, which resulted in either a summons or a warning, Black drivers had a very low percentage (13.4%) while they had a much higher percentage for non-moving violations with resulted in summonses or warnings. In the previous reporting period, a similar pattern was also observed.

The State Police have been making concerted efforts to reduce the number of motor vehicle stops where "no enforcements" were made. No enforcement stops are those where a motorist is pulled over and released without any documentation of an infraction. In Table Three, these stops would be classified as "other". However, the "other" category also includes motor vehicle accidents, motorist aids, and directed stops, stops that do not generally result in a summons or warning. In the current period there were 43,947 stops with a disposition of "other". Compared to the previous reporting period, where there were 60,010 stops with dispositions classified as "other", this is a decrease. Unfortunately, data limitations prevent OLEPS from separating these "other" stops based on whether they were trooper initiated, an accident, aid, or directed.

Table Three: Motor Vehicle Stop Dispositions
July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian Indian	Other Asian	American Indian	Other
Total Stops	195,440	123,645	33,919	24,216	6,050	7,324	286	908

<i>% of Total</i>	22.5%	66.9%	16.8%	11.3%	2.0%	2.8%	0.1%	0.9%

Criminal Arrests

The criminal arrests table presents information on the number of individuals who were arrested during a motor vehicle stop. The total numbers of criminal arrests indicates a dramatic decrease in the number of arrests made from July to December of 2011 compared to January to June 2011. The total number of arrests dropped from 11,561 to 4,714, representing a decrease of 59%. This decrease is likely due to the decrease in the number of overall stops made in this reporting period (see Stops section) and changes in data collection procedures⁸.

⁸ Due to changes at the State Police, the data for the 5th report listed the total number of arrests made, each stop can have more than one arrest. The data presented here indicate the total number of stops in which an arrest was made.

The most common arrests also changed for this reporting period. In previous reporting periods, patrol related arrests made up the largest percentage of total arrests but, this reporting period indicates that DUI's are the most common criminal arrest. DUI's accounted for 60.2% of all criminal arrests in this reporting period while they were less than 30% in the previous period. The increase in DUI arrests could be the product of increased DUI patrols. From time to time, the State Police may receive grants or may voluntarily choose to target drivers suspected of driving under the influence.

Table Four: Criminal Arrests
July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian	American Indian	Other ⁹

<i>% of Total</i>	43.5%	35.5%	19.4%	1.4%	0.0%	0.2%	
DUI	2,841	1,632	444	671	77	2	15
<i>% of Total</i>	60.2%	57.4%	15.6%	23.6%	2.7%	0.1%	0.5%

Patrol related arrests represent a sub total; they are all arrests classified as Drugs, Weapons, or Other charges. As noted above, the State Police made fewer patrol related arrests this reporting period. Only 39.7% of all arrests were Patrol related while in the previous reporting period over 70% of arrests fell into this category.

The racial and ethnic breakdown of arrests indicates that with the exception of those made for weapons, White motorists comprised the highest percentage of arrests in each category. Generally, White motorists make up roughly half of all arrests in each category. However, they only make up 31% of arrests for weapons. For this period, Black motorists were 59.1% of all arrests for weapons, a

⁹ The data for this table are compiled using the UCR's methodology. As such, "Other" as a racial/ethnic group, refers to drivers who identify as a group other than the aforementioned.

¹⁰ Total reflects the sum of Patrol Related Arrests and DUIs.

¹¹ Patrol Related Arrests reflects the sum of Drugs, Weapons, and Other arrests.

increase from last period's 43.9%. With the exception of weapons arrests, the percentage of Black motorists in each arrest category has decreased for this reporting period.

Criminal Charges

Because this is the first period for which criminal charges are reported, no comparisons can be made to previous periods. Table Five presents the racial/ethnic distribution of criminal charges filed in connection with a motor vehicle stop. For this period, charges related to Controlled Dangerous Substances made up about 28% of all charges, Drug Paraphernalia charges were 10%, and Obstructing Governmental Operations; Escapes comprised 55% of all charges. "Other" charges only made up about 8% of all charges filed.

Table Five: Criminal Charges

July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian Indian	Other Asian	American Indian
Total Charges	5,721	2,715	2,142	738	53	72	1
<i>% of Total</i>		47.5%	37.4%	12.9%	0.9%	1.3%	0.0%
Controlled Dangerous Substances	1,587	897	468	165	26	30	1
<i>% of Total</i>	28%	56.5%	29.5%	10.4%	1.6%	1.9%	0.1%
Drug Paraphernalia	547	399	86	43	9	10	0
<i>% of Total</i>	10%	72.9%	15.7%	7.9%	1.6%	1.8%	0.0%
Obstructing Governmental Operations; Escapes	3,140	1,208	1,423	469	13	27	0
<i>% of Total</i>	55%	38.5%	45.3%	14.9%	0.4%	0.9%	0.0%
Other Charges⁴	447	211	165	61	5	5	0
<i>% of Total</i>	8%	47.2%	36.9%	13.6%	1.1%	1.1%	0.0%

White motorists made up a higher percentage of drivers against whom criminal charges were filed. White drivers were involved in 47.5% of the 5,721 stops where charges were filed. Black drivers were only 37.4% and Hispanic drivers were 12.9% of all stops with charges filed. In the category of "Obstructing Governmental Operations; Escape" this pattern is reversed; Black drivers were 45.3% and White drivers only 38.5% of these charges. This category includes charges filed pertaining to resisting arrests and falsifying documents like a license, registration, or license plates.

Wanted Persons

Because this is the first period for which criminal charges are reported, no comparisons can be made to previous periods. Table Six presents the racial/ethnic distribution of wanted persons for this reporting period. There were a total of 2,789 wanted persons involved in motor vehicle stops. Accounting for 98.9% of all wanted persons, the most common reason cited was contempt. There were 2,757 charges for contempt in this reporting period while all other categories of wanted persons contained less than 30 motorists.

Table Six: Wanted Persons
July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian Indian	Other Asian	American Indian
Total Wanted Persons	2,789	1,089	1,249	418	13	20	0
<i>% of Total</i>		39.0%	44.8%	15.0%	0.5%	0.7%	-
Contempt	2,757	1,075	1,238	412	12	20	-
<i>% of Total</i>	98.9%	39.0%	44.9%	14.9%	0.4%	0.7%	-
Bail Jumping; Default in Required Appearance	4	1	1	2	0	0	-
<i>% of Total</i>	0.1%	25.0%	25.0%	50.0%	0.0%	0.0%	-
Fugitives from Justice found in this state	28	13	10	4	1	0	-
<i>% of Total</i>	1.0%	46.4%	35.7%	14.3%	3.6%	0.0%	-

For most other State Police enforcement activities discussed, White drivers had the highest numbers and percentages. However, the pattern for wanted persons is not the same. Only 39.0% of all wanted persons were White motorists, while 44.8% were Black motorists, and 15% were Hispanic motorists. The higher proportion of Black motorists who were wanted persons does not indicate racial bias by the State Police. Rather this is the result of enforcement borne out of low discretion, the presence of a warrant.

Contraband Seizures

Because this is the first period for which criminal charges are reported, no comparisons can be made to previous periods. Table Seven presents the racial/ethnic distribution of contraband seizures. Contraband was seized in 430 stops in this reporting period or 0.2% of all motor vehicle stops. Thus, it appears that seizure of contraband is a relatively rare event for the State Police. As White drivers are a larger percentage of the driving population, White drivers represent a larger proportion of contraband seizures than all other drivers. White drivers were involved in 52.6% of all contraband

seizures, Black drivers were involved in 30.9%, and Hispanic drivers were involved in 14.0% of all seizures.

Table Seven: Wanted Persons

July 1, 2011 - December 31, 2011

	Total	White	Black	Hispanic	Asian Indian	Other Asian	American Indian
Total Contraband Seized	430	226	133	60	3	8	0
<i>% of Total</i>		52.6%	30.9%	14.0%	0.7%	1.9%	-

SUMMARY

These data detail the volume of trooper stop related activity for the July 1, 2011 to December 31, 2011 reporting period. These data indicate a decrease in the number of stops reported and that White drivers continue to be involved in the majority of interactions between motorists and the State Police. The percentage of White drivers who were stopped, who were the recipients of law enforcement procedures, who received some sort of disposition, who were arrested, who had charges filed against them, and who had contraband seized is higher than the corresponding percentages of Black drivers, Hispanic drivers, and all other racial/ethnic categories. The only interaction in which Black drivers had a higher percentage than White drivers were those classified as wanted persons.

The above information refers only to aggregate data for the entire New Jersey State Police. Appendix One presents data for each troop and station.

The State adheres to the principles underlying the Consent Decree and commits substantial resources and effort by members of the Department of Law and Public Safety and the New Jersey State Police. The State remains committed to continuing the progress in producing these data in the spirit of the Consent Decree as codified now in N.J.S.A. 52:17B-235.

Sixth Public Report of Aggregate Data of Traffic Enforcement Activities Prepared by Office of Law Enforcement Professional Standards ("Sixth OLEPS Data Report")	March 2012	July 1, 2011-December 31, 2011

ENDNOTES

- Effective January 8, 2005, the Community Partnerships Troop (Troop CP) was created within the Field Operations Section. Data for the troop are displayed separately, as of the Eleventh Data Report (Exhibit F). However, no separate arrest data are available as all arrest reports are filed exclusively with the respective community jurisdictions. In previous reports, the data for the Initiative were included with those for "Other Units." Effective May 13, 2006, during the Fourteenth Data Report period, the Community Partnerships Troop was dissolved. The Operations South Unit became the Metro South Unit in Troop A and the Operations North Unit became the Metro North Unit in Troop B. The stop data are aggregated either in the Community Partnership Troop, or in Troops A and B, accordingly. In October 2005, Troop E Holmdel Station moved to a new station and is now known as "Sayreville/Holmdel" substation; the data reported are comparable to those previously published for Holmdel Station. On April 12, 2008, Allenwood Station was dissolved. Data presented in the Seventeenth Report for Allenwood Station reflected the reporting period through April 11, 2008.
- In the Sixteenth Data Report, the CAD data for two stations (Atlantic City Expressway and Atlantic City Airport) incorporated data from NJSP's new CAD system for the period from July 16, 2007, the new system's implementation date in those stations, through October 31, 2007, the end of the sixteenth reporting period. On January 23, 2008, the remaining stations in Troop A were brought on-line for the new CAD system, followed by all of Troop C on April 14, 2008. Troops D and E were brought online on May 15, 2008, after the beginning of the eighteenth reporting period. The new CAD was implemented in Troop B on June 18, 2008. The data presented in the Eighteenth Data Report were thus aggregated from both the old and new CAD systems. The data presented in the Nineteenth Data Report were the first to be reported only from the new CAD system.
- Prior to the Seventeenth Data Report, data reports routinely excluded about one percent of stops because the race or ethnicity of the driver was not available. In the Seventeenth and Eighteenth Data Reports, the high proportion of excluded stops because of incomplete race and ethnicity were attributable to stations acclimating to the new CAD system. With full implementation of the new CAD reflected in the Nineteenth Data Report, the percentage of excluded stops has returned to pre-Seventeenth Data Report levels. (Law enforcement procedure data are unaffected by the implementation of the new CAD system.)
- On January 1, 2008, NJSP implemented enhanced data entry for Motor Vehicle Stop Report data in its Record Management System. Data reported in the Seventeenth Data Report aggregate information entered in both the old and the new protocols. Beginning with the Eighteenth Data Report, all post-stop interaction data are reported from the new protocol.
- Effective as of January 1, 2011, NJSP merged Troop D and Troop E to form one troop, Troop D. However, for reporting purposes, beginning with OLEPS Aggregate Data Fifth Public Report, OLEPS will continue to report these troops separately under new troop names. OLEPS will refer to Troop D as "Troop D Turnpike" (Exhibit D) and Troop E will be referred to as "Troop D Parkway" (Exhibit E).
- In the Sixth OLEPS data report, OLEPS in conjunction with State Police have included additional information that is mandated by N.J.S.A. 52:17B-235. The additional data contains aggregate data on Criminal charges, Wanted Persons and Contraband Seizures for motor vehicle stops.
- Effective as of January 1, 2012, the Public Report of Aggregate Data will be referred to as "Pubic Report of Aggregate Data of Traffic Enforcement Activities."

- For the Sixth Public Report of Aggregate Data of Traffic Enforcement Activities, Appendix H - Misconduct Investigations will be presented as Appendix G.
