### Message from the Governor

Thank you for your support and commitment to higher education and the work of the New Jersey Educational Facilities Authority.

The citizens of our State depend upon our public and private colleges and universities, our county colleges, and our specialized post-graduate schools to train and prepare each new generation of New Jerseyans with the necessary tools to compete and succeed in the new economy.

Since its inception 36 years ago, the New Jersey Educational Facilities Authority has played an essential role in our State's commitment to higher education, providing significant financing assistance to both public and private colleges and universities. The Authority continued this success in 2003, completing 18 bond transactions that provide an investment of nearly \$641 million in our higher education system. The NJEFA also provided increased technical assistance for our institutions, sponsored continuing education opportunities, and pursued expanded and improved financial services to benefit New Jersey's higher education community.

As Governor, I congratulate NJEFA's Chair Vivian Altman and Executive Director Roger Anderson for their outstanding leadership and direction. I also commend New Jersey's institutions of higher education for their sound fiscal management, their commitment to excellence, and their foresight to take the actions needed to ensure that New Jersey has a world-class system of higher education.

New Jersey is a state rich in ethnic diversity and heritage. Our higher education system embraces our diversity and offers opportunity for virtually every facet of our citizenry. New Jersey's institutions of higher learning have great historic breadth. Many have a major urban presence that contributes to the vitality of our cities. There are others whose hallmarks are the closeknit accessibility and sense of community of small schools, and several offer the expansive educational opportunities of great universities.

Collectively, our colleges and universities represent a cross -generational investment – one that returns dividends through a talented, experienced workforce that improves the quality of life of the people of New Jersey, keeps our State at the forefront of scientific research and advancement, and promotes and preserves history, culture and community.

With the support of the NJEFA, public and private colleges and universities across the State are investing in buildings that will accommodate growth in student populations and support state-of-the-art science, research and laboratory facilities that will help New Jersey maintain our leadership in research and development.

We have an historic commitment to higher education in New Jersey that precedes the founding of our nation and continues today stronger than ever. The State of New Jersey sustains this commitment in many ways. One of the foremost ways is the work of the New Jersey Educational Facilities Authority. That is why I am pleased to accept the NJEFA's 2003 Annual Report.

Gov. James E. McGreevey

### To the Governor & Members of the Legislature,

For 36 years, the mission of the New Jersey Educational Facilities Authority has been to provide low-cost financing of campus facilities at New Jersey's public and private colleges and universities through the tax-exempt capital markets.

All of the Authority's activities are aimed at helping our clients provide world-class higher education. We are pleased to present the Annual Report of the NJEFA for 2003. The following pages provide detail on the year's activities and describe our many efforts to contribute to the expansion and improvement of college and university facilities throughout New Jersey.

First, during 2003 we completed 18 bond transactions totaling nearly \$641 million. Sixteen of these issues provided financing for 11 of New Jersey's colleges and universities. The other two transactions were financings under state-supported programs, the Dormitory Safety Trust Fund Program and the Equipment Leasing Fund Program. These programs provided funds to a combined total of 22 institutions.

Our clients used this capital to invest in technology infrastructures and new academic buildings. They also built and improved laboratories, libraries, dormitories, student activity centers, and recreational and parking facilities, all of which are necessary for them to provide the physical platform from which they deliver superior higher education. These facilities will help assure that our colleges and universities remain competitive. They are also essential to the State's efforts to accommodate rapidly growing student populations and to transform campuses so that our institutions are able to provide state-of-the-art learning experiences reflective of a changing and technology driven world.

Second, when the financial markets presented opportunities in 2003, NJEFA aggressively pursued bond refinancings and other restructuring activities to take advantage of lower interest rates. These activities saved participating institutions hundreds of thousands and, in some cases, millions of dollars in interest costs.

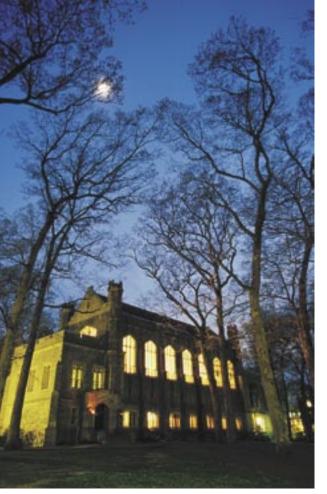

Third, we made improvements in operational efficiencies and

implemented new initiatives aimed at transforming the Authority into a more valuable resource for its clients and colleagues, and to its investors. Chief among these new initiatives were on-site NJEFA Board meetings at campuses around the State, sponsorship of continuing education opportunities in the field of higher education public finance and the introduction of an investor relations program. These efforts enhance the primary financing mission of the Authority. They have also broadened our perspective, and we believe they have fostered an increased level of confidence in the financial services we provide.

None of the Authority's successes during 2003, however, would have been possible without the efforts of our dedicated, highly skilled staff. To our talented and resourceful staff, which continually strives to improve service to our clients and to the public, we owe a debt of gratitude and admiration for always surpassing our expectations and setting a nation-wide standard for accomplishment.

NJEFA has a long and proud history of contribution to higher education in our State. In all its 36 years, the Authority has never experienced a default, and has always strived to improve its financial services and to help its clients understand and navigate the complex and rapidly changing capital markets. The pages of this report will not only highlight the year's accomplishments, but will also provide some insight into the national treasures that are New Jersey's college and university campuses and NJEFA's role in their preservation and advancement.

> Vivian Altman, Chair Roger Anderson, Executive Director

# New Jersey Educational Facilities Authority: Meeting the Challenge

New Jersey is second in the nation in the percentage of its high school students who pursue higher education. This fact confirms something important that we know anecdotally and from public opinion surveys about New Jerseyans.

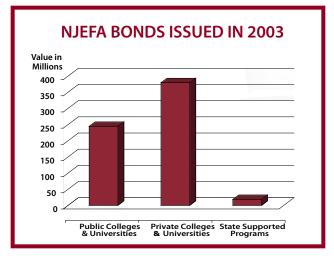

We regard higher education as vitally important to the quality of life of our citizenry and to the continued economic health and prosperity of our State. We also place a high value on making sure that college, university, graduate and graduate professional education remains affordable and accessible to as many people as possible.

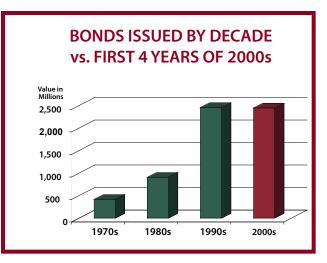

Our State established the New Jersey Educational Facilities Authority (NJEFA) to assist New Jersey's public and private institutions of higher learning make investments in campus facilities and equipment on the soundest financial basis and at the lowest cost of capital. The more costs can be contained, the more affordable, available and accessible higher education can be for all.

NJEFA was created in 1968 to provide colleges and universities in New Jersey with low-cost financing for campus improvement and expansion through access to the tax-exempt capital markets. At the time of NJEFA's creation, the Legislature declared in the preamble of the enabling statute, "That a serious public emergency exists affecting and threatening the welfare ... and prosperity of the people of the State ... from the fact that financial resources are lacking with which to construct required dormitory and other educational facilities at public and private institutions of higher education." This declaration is as true now as it was in 1968 and with today's rapidly increasing student populations and insufficient facilities to meet the demands of such growth, the need for the Authority's resources is more crucial than ever before.

NJEFA is pleased to report that 2003, its 36th year of providing financial services, was marked by substantial achievement and progress on behalf of New Jersey's higher education community. NJEFA's accomplishments during 2003 were realized in three major areas: 1) continued investment in New Jersey's public and private colleges and universities; 2) advanced continuing education programs for NJEFA clients and colleagues, and 3) improved operational efficiencies and client services.

The first area encompasses activities of the Authority that fulfill its historic role as a financing agent for its client institutions. The second area - advanced continuing education - arose because the Authority recognized that, in order to fulfill its first goal of providing clients with the most advantageous financing available, it needed to help its clients understand the rapidly changing world of public finance and the global capital markets. The third area of activity – improved operational efficiencies and client services – represents NJEFA's ongoing commitment to pursue creativity and quality in the services it provides to the State's institutions and to the public and to continue to try to save its clients money even after a bond issue closes.

### **Continuing Investment: 2003 Investment in Higher Education**

Since its inception through 2003, NJEFA has completed 350 transactions for a total of more than \$6.5 billion in bonds issued. In 2003, the Authority issued \$641 million in bonds, representing nearly 10 percent of all financings accomplished by the NJEFA since 1968.

In 2003, the Authority issued \$641 million in bonds, representing nearly 10 percent of all financings accomplished by the NJEFA since 1968. The Authority completed 18 transactions in 2003. Included in these transactions was the completion of two state-backed financing programs that share resources across a large sector of the higher education community in New Jersey. Moreover, during 2003 the Authority maintained an extraordinary and enviable record among financial institutions and debt issuers: In 36 years, the NJEFA has never had a default.

Of the total \$641 million issued during the year, \$623 million came through stand-alone institutional transactions on behalf of 11 colleges and universities – 6 private and 5 public institutions. These transactions generated bond proceeds of \$373 million for new capital projects, facility renovations or deferred capital maintenance projects. Among major projects financed with NJEFA bonds in 2003 are:

- Four new students residences
- Two new student recreational facilities and five substantial renovation projects to student life facilities
- Seven new academic facilities
- Substantial renovation of seven other academic facilities

- One new performing arts center
- Two major parking facilities.

The transactions also included \$268 million in refunding bonds that helped six institutions achieve \$6.8 million in combined net present value savings. The year's transactions included final financings under two state-backed bond programs under which the State pays all or a portion of the debt service on the bonds. Under these programs, NJEFA issued the final \$5.4 million in bonds under the New Jersey Dormitory Safety Trust Fund Program, completing a \$90 million program adopted by the State in response to the tragic Seton Hall University dormitory fire in 1999. This program helped to pay for the installation of fire safety systems in all residence halls at New Jersey colleges, universities, secondary boarding schools and military academies. Similarly, the Authority issued its final \$12.6 million in Higher Education Equipment Leasing Fund bonds, a state-backed financial pool to help New Jersey institutions of higher education acquire and install computer and other high technology equipment and facilities.

A further examination of the numbers shows that of the total \$641 million in bonds issued by the Authority in 2003, \$257 million was issued on behalf of public institutions and \$384 million benefited private institutions. Addi-

tionally, \$465 million of this debt was issued at fixed rates, while \$176 million was issued in variable rate modes.

NJEFA bond issuance during 2003 was the second highest ever, following 2002 when a record \$902 million in transactions was completed. Since the beginning of 2001, the Authority has issued near-

ly \$2.1 billion in bonds - almost one-third of the total bonds it has ever issued. This activity reflects the overall capital facility needs at New Jersey's college and university campuses. A recent survey by the New Jersey Commission on Higher Education places just the long-term deferred maintenance needs at the State's colleges and

universities at \$450 million while it estimates the capital and equipment needs of the State's institutions at \$600 million. According to the Commission's survey, both needs fall within total academic and administra-

tive capital needs totaling almost \$6 billion through the end of the decade.

In 2003, NJEFA and its client institutions again continued to take advantage of the historically low interest rate environment in the capital markets. However, low interest rates alone did not produce the record

activity achieved in the three-year NJEFA bond issuance during period through 2003. Three other key factors driving new investment in higher education in New Jersey are (1) dramatically growing students populations that are projected to continue to increase through the current decade, (2) aging buildings and facilities that are at capacity and in significant

2003 was the second highest ever, following 2002 when a record \$902 million in transactions was completed. Since the beginning of 2001, the Authority has issued nearly \$2.1 billion in bonds . . .

> need of improvement and modernization, and (3) the need for facilities that reflect and accommodate new ways of teaching and learning in a technologically driven world.

# Advancing Knowledge: Continuing Education and Program Outreach for Clients

In 2003, NJEFA hosted the second in a series of continuing education programs for its higher education clients and public finance colleagues.

More than 100 people including over 60 representatives of its client institutions attended the daylong seminar entitled "Derivatives 301 – Front and Back Office Management". Derivatives are complex financial instruments that require understanding of their risks and benefits in order to make informed decisions about their use as financing tools.

In a joint conference welcome letter, NJEFA Chair Vivian Altman and Executive Director Roger L. Anderson noted, "Derivative products are among the fastest growing sectors of the financial markets today. While these products have attractive benefits, they also pose a number of risk management challenges – from transaction structuring to back office management." NJEFA planned its Derivatives Conference with the goal of helping its clients and colleagues begin the process of understanding the range of benefits and challenges of these sophisticated and complex products.

Topics addressed included an explanation of what derivatives are, risk management in the derivatives market, and legal and accounting issues associated with derivatives. Participants included financial industry experts, public finance attorneys, accountants, and representatives of New Jersey institutions that have experience in setting up back office accounting support required for successful post-closing management of derivative transactions.

The emphasis on continuing education in derivatives was reflected elsewhere during 2003 as NJEFA initiated numerous meetings with the staff and the Boards of Trustees of client institutions. The goal of these meetings is to establish ongoing dialogue with those responsible for institutional financial management about the risks and rewards of derivatives and other financing structures in order to contribute to informed decision making regarding financing capital facilities.

NJEFA also went to school in a literal sense to inform itself better about its clients. The NJEFA inaugurated an on-campus board meeting initiative by which the NJEFA's Board periodically holds its meetings on college campuses in order to give Board and staff an opportunity to learn about the campuses of the State's institutions and see firsthand the facilities financed by the Authority through the decades. It also gives the institutions an opportunity to showcase both their campuses and their long term needs for facility improvement and expansion.

The Board inaugurated its on-campus program with meetings at The College of New Jersey and Drew University. At The College of New Jersey (TCNJ), the Authority visited a school established nearly 150 years ago and first located in Trenton as the New Jersey State Normal

School serving as a training institute for teachers. It was the first such teachers' school in New Jersey and the ninth in the entire nation. In 1925, TCNJ became a teachers college with its first four-year baccalaureate degree program, precipitating relocation to a 210-acre tract in Ewing Township, site of its contemporary campus. Postgraduate studies began in 1947 and the Higher Education Act of 1966 made it possible for the school to diversify and expand degree programs well beyond the field of education. Today, TCNJ offers more than 50 liberal arts and professional programs in seven schools.

In 1958 the Legislature renamed the school Trenton State College, and in 1996 it took its current name. Today, TCNJ serves approximately 6,000 undergraduates including 5,600 fulltime students. It also serves 850 graduate students and has an estimated 325 full-time faculty members. The campus spreads across 289 acres in Ewing Township and includes 38 buildings.

Since 1969, NJEFA has completed 17 stand-alone bond issues for TCNJ totaling \$598.6 million in bonds sold, of which \$365 million funded new capital projects. The remaining \$234 million is the cumulative amount of five refundings that produced net present value savings of \$9.2 million. The College has also realized \$38 million in financing from six NJEFA bond issues under State-backed programs. Among TCNJ facilities financed through Au-

thority bonds are the Science Complex, parking decks, the Pennington Road Apartments, the Green Lane Playing fields, the Art Building, and the Brower Student Center Expansion and Event Center.

At Drew University, NJEFA Board and staff learned that the University was founded in 1867 and that, in 2003, its enrollment was 2,521, including 1,535 fulltime undergraduates, 284 fulltime graduate students and 195 students in its School of Theology. Today, students are taught by 147 full-time faculty, including its President, former New Jersey Governor Thomas H. Kean. NJEFA's Board and staff toured Drew's 200-acre campus in Madison on which the University owns and maintains 45 buildings.

Since 1980, NJEFA's financings for Drew have totaled \$113.7 million in direct transactions, including \$64.4 million for capital projects, and \$49.4 million in three refinancing transactions that provided \$1.5 million in net present value savings to the University. An additional \$13.3 million in bonds has been issued on behalf of Drew under State-supported programs. Drew University projects financed with NJEFA bonds include the Rose Memorial Library, the William E. and Carol A. Simon Fitness and Athletic Center, Riker and Rose Halls, the Hall of Science, and the Brothers College Clock Tower – a campus landmark.

# Improving Client Services: 2003 Improvements in Operational Efficiencies and Client Services

In the realm of improved operational efficiencies and client services, NJEFA implemented initiatives in 2003 which included escrow restructurings for two institutions, inauguration of a comprehensive investor relations program, automation of its bond fund accounting and investment management functions, and launching of the Authority's new web site.

The escrow restructurings, implemented on behalf of Rowan University and Princeton Theological Seminary, resulted in cash payments of nearly \$450,000 to Rowan and \$225,404 to the Seminary in recaptured negative arbitrage. The Rowan escrow restructuring is a good example of these transactions. In 2001, the University advance refunded two series of bonds it issued in 1993 and 1996. The proceeds of the refunding bonds were deposited into an escrow fund, which was invested in U.S. State and Local Government Series (SLGS) securities that would mature in amounts and on dates sufficient to redeem the old bonds on their redemption dates. Because of market conditions in 2001, the average interest rate on the SLGS was less than the maximum allowed by tax law, creating negative arbitrage. The NJEFA and its derivatives consultant were able to restructure the escrow fund to recoup the negative arbitrage. By identifying appropriate market opportunities, we were able to sell the original SLGS and re-subscribe for new SLGS with higher interest rates. Within two months, we were able to bring the interest rate on the escrow up to the allowable limit and recapture the negative arbitrage. Rowan gained nearly \$450,000 and

the restructuring raised the yield in the escrow nearly 25 basis points.

These escrow restructurings are just a few examples of the Authority's efforts during the year to provide value to its clients – even after transactions have closed. Others included aggressive monitoring of the market for refunding opportunities, review and modification of investment strategies for construction funds and reserve accounts leading to higher earnings for clients, and monitoring various available money market funds for greater investment yields.

In an effort to expand interest in NJEFA higher education bonds, the Authority also developed and introduced an Investors Relations Program in 2003. Though still in its formative stages, the key objective of this program is to increase awareness among potential investors of the Authority's presence in the capital markets and to expand competition for higher education bonds in New Jersey. As this program develops, NJEFA hopes to broaden its ability to serve as a valuable resource for the investor community so that New Jersey's colleges and universities benefit from an informed and competitive marketplace when it is their turn to access the capital markets.

As NJEFA sought throughout the year to improve client services and implement operational efficiencies, it also saw the successful completion of a five-year project to automate and integrate its unique bond fund accounting and investment management functions. From the outset,

the goal of this multi-phase project was to convert existing manual and antiquated processes into an automated and integrated system of accounting functions required for the Authority's extensive network of accounts. These accounts contain in excess of \$1 billion and comprise over 1,100 investment records held by trustees to benefit NJEFA's college and university borrowers and investors. Developed and im-

plemented entirely by the Authority's accounting staff, the project culminated in the implementation of an investment management and reporting module; creation of a bond fund general ledger accounting and reporting module; integration of the two modules and automation of the Authority's year-end closing process and annual opening

. . . the key objective of this program is to increase awareness among potential investors of the Authority's presence in the capital markets and to expand competition for higher education bonds in New Jersey

of the new year's books. What once entailed significant staff time and external accounting expenses now provides NJEFA with the tools and technology to complete its yearend auditing functions in record time with minimal errors and operational cost savings of over \$20,000 per year.

> Finally, during 2003 NJEFA launched its first-ever web site, www. njefa.com. Its new site provides easily accessible, useful and current information about the Authority. The site provides the Agency's annual reports, newsletters, audits and information on its current and future transactions. In furthering the Authority's goal of becoming a valuable source of information for its clients and investors, the site also

includes general information concerning outstanding debt related to NJEFA bonds for each of its client institutions, as well as direct links to college and university websites, links to financial printers for current Preliminary Official Statement postings and direct links to continuing disclosure repositories.

#### PRINCETON THEOLOGICAL SEMINARY 2002 Series G

NJEFA closed its first bond issue of 2003 in January on behalf of Princeton Theological Seminary in the amount of \$26,125,000 to provide funding for new capital projects and to advanced refund outstanding bonds from the Seminary's 1996 Series B issue. Among new capital projects included in this financing was the construction of a new 3-story parking garage (shown above) with an estimated 286 parking spaces to be located on the Seminary's main campus in Princeton. The issue also financed other miscellaneous construction, renovation, improvement, and equipment acquisition projects at various facilities throughout the Seminary's Princeton and West Windsor campuses.

This transaction advanced refunded \$16,210,000 from the Seminary's 1996 Series B Issue, which provided \$345,010 in net present value savings to the Seminary.

#### **CENTENARY COLLEGE 2003 Series A**

In January, NJEFA issued \$14,775,000 in par amount of bonds on behalf of Centenary College. Bond proceeds were used by the College to finance several new capital projects and to restructure approximately \$5.3 million in outstanding bonds under the College's 2000 Series F issue in order to relieve the College from certain onerous covenants. Among new capital projects financed through this issue was the construction of a new 42,500 square foot, 3-story residence hall on the College's main Hackettstown campus. The residence hall on the College's main Koo bathrooms, a kitchen/dining area, and a living room. Each apartment will be fully furnished and will have computer and cable access in the bedrooms and common areas.

Other projects financed through this transaction include site improvements for the new residence hall and construction of approximately 107 new parking spaces, sidewalks, landscaping and lighting installations. The transaction also helped to finance the purchase of laptop computers for the College.

RAMAPO COLLEGE Series 2003 F & G

In May, NJEFA closed two current refunding transactions on behalf of Ramapo College of New Jersey. The two refundings provided the College with combined net present value savings of \$781,757.

The Series 2003 F Bonds were issued in the amount of \$1,820,000 and provided for the current refunding of the College's outstanding Series 1993 D Bonds. The Series 1993 D Bonds had previously refunded the Series 1988 C Bonds, the proceeds of which were originally issued to finance a campus life facility at the College.

The Series 2003 G Bonds, issued in the amount of \$9,300,000, provided for the current refunding of the College's Series 1993 E Bonds. The Series 1993 E Bonds had previously refunded the Series 1988 B Bonds that originally helped the College to finance a dormitory facility.

#### NEW JERSEY CITY UNIVERSITY Series 2003 A & B

NJEFA closed two bond transactions in May on behalf of New Jersey City University to finance new capital projects and to provide for the current refunding of outstanding bonds under the University's Series 1993 H issue. The Series 2003 A bonds, in the amount of \$47,850,000, were issued to provide financing of several major projects including: construction of a new College of Arts and Sciences Tower, elevator replacement at Hepburn Hall, and renovation of an existing University building to provide classroom space for evening students as well as space to sub-lease to a new Academy Charter High School. New projects also included fire sprinkler installation in various buildings, renovations to the University's Information Technology Services Department, Science Hall Lab and Student Union Building, equipment purchase for the University's new Visual Arts Building (shown above) and expansion of an existing parking facility to add 100 new spaces.

The Series 2003 B issue was a taxable issue that financed the renovation of an existing facility to accommodate a newly established Business Incubator program.

The new College of Arts and Sciences Tower will address the growing needs of the School of Arts and Sciences with state-of-the-art technology in 14 classrooms and 10 computer labs. The six-story, 77,000 square foot structure will also house the offices of 9 academic departments and the offices of the College's Dean. Scheduled for completion by Spring of 2005, this project was designed by renowned architect Michael Graves.

#### MONTCLAIR STATE UNIVERSITY Series 2003 E

In May, NJEFA issued its Series 2003 E Bonds in the amount of \$23,425,000 on behalf of Montclair State University. The transaction provided financing for the construction and equipping of the University's new performing arts theater (shown above) to be known as Alexander Kasser Theater.

The Theater will be located at the south end of campus and once completed, will be a four-story, 55,000 square-foot structure that will accommodate seating for approximately 500 people and will host theatrical, musical, dance, and orchestral concerts and productions. Completion of this facility will help the University meet the demands of its growing performing arts programs.

#### DREW UNIVERSITY 2003 Series C

NJEFA issued \$20,855,000 in bonds during the month of May on behalf of Drew University. The University used the proceeds of this issue to finance a number of deferred maintenance projects at several of its existing campus buildings and facilities. Deferred maintenance projects included the replacement of antiquated power distribution equipment, and replacement of deteriorated mechanical, plumbing, electrical and building envelope components. Bond proceeds from this issue were also used to update University facilities for compliance with the American Disabilities Act.

#### PRINCETON UNIVERSITY 2003 Series D, E & F

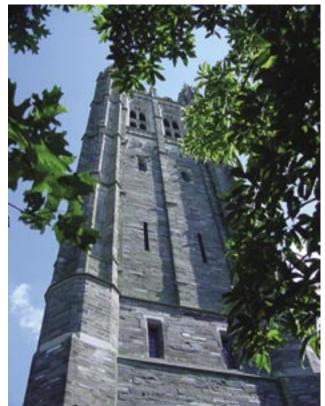

NJEFA completed 3 separate financings during 2003 for Princeton University. The combined total of these transactions was \$302,005,000 in par amount bonds which, were issued to help the University finance new capital projects and to refund a portion of outstanding debt.

The 2003 Series E Bonds were sold in the amount of \$112,510,000 to provide for the permanent financing of outstanding Princeton University Commercial Paper Notes Series 1997 A, 1999 A, 1999 B, 2001 A, 2002 A, and 2002 B.

The 2003 Series F Bonds were issued in the amount of \$75,000,000 to help the University finance or refinance major maintenance of various facilities; renovations of several buildings for extensive reconstruction; and purchase of capital equipment for academic departments and administrative and supporting units. Major maintenance projects include repair and replacement of utility systems, electricity and water and sewer systems. They also include energy conservation projects, plant preservation projects, repair and replacement of University roads and parking lots, code conformance projects and building improvement projects designed to adapt existing facilities for new uses.

Renovation projects financed through this issue largely include dormitories that comprise a multi-year program of extensive reconstruction to bring the buildings up to all current code requirements and functionality standards. The University expects to spend approximately \$49 million on such projects between February 2003 and July 2005.

Lastly, the 2003 Series D Bonds, were issued in the amount of \$114,495,000 and provided for various advance refundings which included outstanding debt under the following issues: 1994 Series A, 1995 Series C, 1996 Series C, 1997 Series E, 1998 Series F, 1999 Series B, 2000 Series E, and 2000 Series H. This transaction provided the University with net present value savings of \$5,434,716.

<sup>9</sup>rinceton University: Holder Hall

#### GEORGIAN COURT UNIVERSITY 2003 Series Project C

In August, NJEFA issued \$15,215,000 in bonds on behalf of Georgian Court University to help finance among other projects, the construction of a new residence complex. Construction of this residence complex marks the beginning of a renaissance of improvements on campus to meet future needs and expansion, and includes a 36,000 square foot facility for approximately 80 students and a separate residence hall for visiting faculty and staff. The buildings (shown in rendering below) are designed to complement the existing Georgian style architecture of the campus and will accommodate the University's growing student resident population as well as space for upperclass students in the women's day division.

NJEFA's 2003 Series C Bonds also helped to finance a portion of the renovation of the University's arts and sciences building including construction of a new science wing, and renovation of a student lounge within the University's library. Both the library and the student lounge are campus amenities that were originally financed through Authority bonds issued in 1991.

#### ROWAN UNIVERSITY Series 2003 I, J, & K

The NJEFA sold three series of bonds on behalf of Rowan University in 2003 with a combined total par amount of \$84,165,000 to finance new capital projects and to provide a refunding on a portion of the University's outstanding debt.

The Series 2003 I and Series K Bonds were issued in the amount of \$64,910,000 and \$14,700,000 respectively, and helped the University to finance several projects including the acquisition of 160 acres of land for future educational facilities; a new Administrative Computer System; and several renovation and new construction projects. Among the renovation projects is the conversion of its existing 21,500 sq. ft. Triad Building (shown above) from institutional office space into University student housing, and conversion of the 30,000 sq. ft. vacant Academy Street Elementary School into flexible institutional office space. NJEFA bonds also helped to finance construction of a new 134,000 sq. ft. education building to house the University's College of Education, and construction of new, student apartment housing to accommodate approximately 460 students.

The Series 2003 J Bonds were sold in the amount of \$4,555,000 as a fixed-rate current refunding of the Authority's outstanding Series 1993 B and Series 1993 C Bonds issued on behalf of Rowan University. This financing provided the University with net present value savings of \$216,915.

#### KEAN UNIVERSITY Series 2003 D

NJEFA completed a \$75,000,000 bond financing in September on behalf of Kean University. The issue helped the University to finance several large capital projects including construction of a new Wellness and Fitness Center, renovation of D'Angola Gymnasium and Kean Hall, and demolition and reconstruction of a new academic building.

Once completed, the Wellness and Fitness Center will be a 3-level, 90,000 square foot facility that will feature among its amenities a 3,000 seat spectator basketball and sporting arena. It will include 3 multi-purpose basketball courts, a 3,000-square foot fitness facility, a three-lane jogging track, a specially designed climbing wall, Athletic Department offices and ancillary facilities including an athletic computer lab, box office, press box and film deck.

The D'Angola Gymnasium (shown above left) renovation project includes a new mezzanine level for faculty offices and ground level space for physical education programs. In total, the gym will house over eight classrooms and five laboratories for the physical education and recreation department. It will also include several fitness centers, dance studios, locker rooms, activity areas, a weight room, laundry facilities, and athletic training and rehabilitation centers.

The Kean Hall renovation project (shown at right) will provide needed conference and meeting space and once complete will accommodate the Admissions Office and One Stop Service Center. Renovations to the South Wing will provide space to house the President's office and Administration staff.

The new 112,000 square foot academic building (shown above right) financed through this issue will have 60 classrooms and 9 computer labs and stateof-the-art technology will be installed in the art lecture hall with seating capacity for 100 students. The new building will also provide space for a learning assistance center, academic and administrative offices, the radio station and communication department studio-lab.

#### DORMITORY SAFETY TRUST FUND Series 2003 A

In October, NJEFA closed \$5,440,000 in its final issue of bonds under the state-backed Dormitory Safety Trust Fund Bond Program. Funding from this issue provided low or zero interest loans for installation of fire suppression systems to the following 12 institutions: Bloomfield College (\$174,451); Caldwell College (\$209,045); Centenary College (\$350,000); Fairleigh Dickinson University (\$591,658); Georgian Court University (\$178,198.33); Monmouth University (\$873,700); Rider University (\$1,525,353); Steven's Institute of Technology (\$243,500); The College of New Jersey (\$436,818); Rabbinical College of America (\$689,616); Talmudical Academy (\$98,000); and Yeshiva Gedolah of Bayonne (\$70,000).

Enacted in 2000, the Dormitory Safety Trust Fund Act was created in response to a tragic dormitory fire at Seton Hall University. NJEFA was given authorization to administer up to \$90 million in state-supported bond financing to provide zero and low interest loans to institutions for installation of fire suppression systems in all student residence buildings at public and private colleges and universities in New Jersey as well as secondary, boarding, and military schools. In August 2001, NJEFA sold \$73.8 million in bonds that provided loans to 27 institutions.

Under this partial grant program the State pays all or a portion of the interest on the bonds.

#### HIGHER EDUCATION EQUIPMENT LEASING FUND Series 2003 A

In May, the Authority issued \$12,620,000 in its final traunch of bonds under the State-supported Higher Education Equipment Leasing Fund Program (HEELF). Funding from this issue provided partial grants to the following 11 institutions: Kean University (\$161,608); Ramapo College of New Jersey (\$1,869,000); Rowan University (\$3,213,000); Richard Stockton College (\$797,800); The College of New Jersey (\$3,108,000); Brookdale County College (\$823,204); Camden County College (\$894,474); Gloucester County College (\$1,073,668); Warren County College (\$448,668); Fairleigh Dickinson University (\$167,501); and Stevens Institute of Technology (\$66,070).

Enacted in 1993, the HEELF program authorized the Authority to issue up to \$100 million in state-supported bonds to finance the purchase of technical, engineering, scientific, computer, communications, and instructional equipment to be leased to participating institutions.

In 1994, NJEFA sold \$100 million in bonds under the initial statutory authorization. These bonds were fully retired on September 1, 2000 and shortly thereafter Governor Whitman approved a full reauthorization of HEELF. In October of 2001, the Authority issued another \$87,385,000 in bonds to benefit 41 institutions.

Under this partial grant program, the State pays 75% of the annual debt service on the bonds while participating institutions pay the remaining 25% of debt service.

### **About the New Jersey Educational Facilities Authority**

The New Jersey Educational Facilities Authority was established in 1968 to provide assistance to the public and private colleges and universities of New Jersey by giving them access to tax-exempt financing through the facility of a public financial agency.

Oversight and direction of NJEFA is entrusted to a sevenmember Board of Directors composed of five public, unsalaried members appointed by the Governor with confirmation by the New Jersey Senate to five-year terms. The State Treasurer and the Chair of the Commission on Higher Education serve ex-officio.

The mandate of NJEFA is to issue tax-exempt debt on behalf of qualified institutions of higher education to facilitate their capital finance and development needs. The bonds and other financial instruments of the Authority are limited obligations, secured and repaid by the institution for whom it provides financing.

NJEFA's bonds and other obligations have no guarantee of repayment by the State of New Jersey unless authorized by statute. Exceptions occur only when the State assumes a repayment obligation and identifies a repayment source. The latter is the case in the State's commitment to pay debt service on bonds issued under programs like the Public Library Project Grant Program or the Higher Education Capital Improvement Fund.

Institutions of higher education can utilize NJEFA financing for a variety of projects including construction, renovation, improvement and expansion of academic buildings such as classroom facilities, laboratories, and other research facilities.

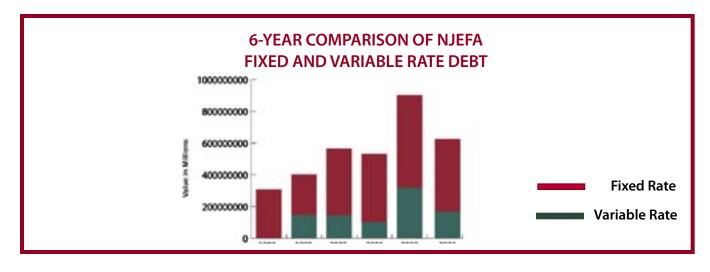

Also eligible are auxiliary service facilities like dining halls

and utility plants and related utilities projects, libraries, dormitories, athletic facilities, parking facilities, student union facilities, administration buildings, and campus health care facilities. Authority financing can be utilized as well for the acquisition of capital equipment including high technology equipment. The law precludes the use of NJEFA financing for any facility used by a college or university for sectarian instruction or as a place of religious worship.

Eligible institutions, including accredited two- and fouryear colleges and universities, identify their facility capital and construction requirements and then work with NJEFA to develop financing that will meet the fiscal needs of their projects.

Working with the institution, NJEFA will bring its bond issue to market, capitalizing on the lower interest rates the Authority can obtain as a public fiduciary. Colleges and universities also achieve economies of scale by utilizing NJEFA to raise funds. For example, NJEFA can package a series of projects in a single financing to obtain lower interest rates. This type of "pooled financing" structure saves administrative fees and costs of issuance that would be borne separately by the colleges and universities.

The Authority has never experienced a default. As a result, its reputation for fiscal responsibility and integrity is impeccable, resulting in the practical benefit of lower interest rates for borrowing institutions of higher education.

### NJEFA Financial Management

NJEFA seeks to structure the most attractive financing packages available for the colleges and universities it serves.

The following describes types of financing utilized.

- "Bond anticipation notes", are interim, short-term obligations used to provide funds for construction, which can be replaced promptly with more favorable, lower-cost, long-term instruments.
- "Fixed rate long-term bonds" are structured to provide the most attractive debt service payment schedule.
- "Variable rate bonds" are issues in which the interest rate varies, sometimes according to a preset formula, and can be adjusted periodically. On this type of financing, the rates are generally lower than fixed rates.
- "Refundings" are bonds which are sold and then held in reserve, or used immediately to repay existing prior debt in order to take advantage of more favorable interest rates or to remove or amend certain restrictions or covenants which may have been placed on an earlier debt issue.

NJEFA uses its knowledge and experience of the financial markets, its products, and the institution's projects to add features to its bond sales to enhance their attractiveness to investors; to achieve higher ratings from bond rating agencies; or to produce lower interest rates on particular issues for particular institutions of higher education.

NJEFA generally structures its bond sales so that there is

a Debt Service Reserve Fund specific to each individual bond issuance. These Funds are separate accounts established to provide a source to pay debt service on the Authority's obligations in the event of financial difficulty of the borrowing institution. For any issue, NJEFA may require that reserves be placed in such a fund. NJEFA's Debt Service Reserve Funds contain amounts approximately equal to the maximum interest and principal payment coming due in any single year for each issuance with such a requirement. NJEFA has never had to draw down on the assets of any reserve funds to meet interest or principal payments.

Similarly, NJEFA maintains Renewal and Replacement Accounts specific to certain bond sales, into which clients pay approximately 10 percent of the cost of their projects in semiannual payments as a protection against wear and tear of the improvements financed through the Authority. Institutions are permitted to apply to the Authority to use these funds to defray the cost of replacing major project components. As of December 31, 2003, NJEFA's Renewal and Replacement Accounts held approximately \$26,082,244.

As a protection for the Authority, its bondholders, and its client institutions of higher education, NJEFA performs certain annual procedures. These protections are intended to comply with bond covenants and the formal resolutions adopted by the Board of Directors upon the issuance of debt.

### **Report of Independent Auditors**

To the Members of the New Jersey Educational Facilities Authority

We have audited the accompanying balance sheets of the New Jersey Educational Facilities Authority, a component unit of the State of New Jersey, as of December 31, 2003 and 2002, and the related statements of revenues, expenses and changes in fund net assets, and cash flows for the years then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the New Jersey Educational Facilities Authority as of December 31, 2003 and 2002, and the changes in its financial position and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States.

The management's discussion and analysis is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding methods of measurement and presentation of this required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental financial information is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

# **Management's Discussion and Analysis**

Year ended December 31, 2003

#### Introduction

This section of the New Jersey Educational Facilities Authority's (the "Authority's") annual financial report presents management's discussion and analysis of the Authority's financial performance during the fiscal year ended December 31, 2003. It should be read in conjunction with the Authority's financial statements and accompanying notes.

#### **Overview of the Financial Statements**

The Authority is supported entirely by fees charged for the services it provides. Accordingly, the Authority is considered an Enterprise Fund and utilizes the accrual basis of accounting. The Basic Financial Statements for an Enterprise Fund include: Balance Sheets; Statements of Revenues, Expenses and Changes in Fund Net Assets; and Statements of Cash Flows. These statements provide, respectively, a view of the Authority's financial position as of the end of the year, a description of the financial activity during the year, and a description of the cash activity during the year.

#### Reimbursement to State of New Jersey

In 2002, the Authority paid \$5,000,000 to the State of New Jersey as reimbursement for a portion of the State's support of several programs benefiting New Jersey's institutions of higher education.

Consequently, the Authority's change in net assets for 2002 was a negative \$3,100,723. The change in net assets excluding that reimbursement would have been a positive \$1,899,277.

### Management's Discussion and Analysis (continued) Year ended December 31, 2003

### **Condensed Financial Information**

The following table represents the changes in net assets between December 31, 2003 and December 31, 2002:

	2003	2002	\$ INCREASE/ (DECREASE)	% INCREASE/ (DECREASE)
Current assets	\$7,118,561	\$6,170,042	\$ 948,519	15.4%
Noncurrent assets	280,285	175,491	104,794	59.7
Total assets	7,398,846	6,345,533	1,053,313	16.6

Net assets end of year	\$6,467,574	\$ 5,593,008	\$ 874,566	15.6 %

## 2003 FINANCIAL STATEMENTS AND SUPPLEMENTAL FINANCIAL INFORMATION

### Management's Discussion and Analysis (continued) Year ended December 31, 2003

### Analysis of Overall Financial Position and Results of Operations

The Authority's solid financial position and strong operating results were continued.

### **Financial Highlights**

- Net assets represent three times annual operating expenses.
- Cash and investments constitute 105% of net assets.
- Operating income was 28% of operating revenue.

During 2002 and 2003, demand for the Authority's services remained strong and its financing activity continued at record levels. Against the backdrop of rising enrollments and increasing need for spaces in New Jersey's colleges and universities, the State's public and private institutions have continued to invest in the upgrading of their capital facilities, technology infrastructures and capital equipment. Low interest rates in the capital markets have fostered an economically advantageous environment for new borrowing capital, as well as opportunities for refinancing higher-cost outstanding debt. The Authority also continued to finance State-supported programs, for multiple borrowers, as authorized by the New Jersey Legislature and Governor.

The Authority's operating revenues in 2003 were lower than those in 2002, principally due to the fact that certain financings planned for 2003 were delayed into 2004. The Authority's expenses in 2003 were higher than those in 2002 for two main reasons: First, in order to meet the significantly increased level of demand for its services evident in both 2002 and 2003, the Authority hired additional staff and moved its operations to expanded facilities. Second, the Authority provided developmental financial support for several programs to benefit its clients. As a result, the Authority's operating margin (operating income as a percentage of operating revenue) decreased from 55% in 2002 to 28% in 2003.

The Authority currently has outstanding 148 issues of non-recourse conduit bond and note issues with a par value of \$3.7 billion. Administrative fees are collected to provide funds to ensure that the Authority's operating expenses will be met, and that sufficient reserves will be available in the event of potential financial difficulty related to the Authority's financings or operations. Net assets represent the maximum amount of available reserves, which equaled \$6.5 million as of December 31, 2003.

### **Contacting the Authority's Financial Management**

If you have questions about this report or need additional financial information, contact the Office of the Controller, New Jersey Educational Facilities Authority, 103 College Road East, Princeton, NJ 08540-6602.

### **Notes to Financial Statements**

### 1. Organization and Function of the Authority

The New Jersey Educational Facilities Authority (the "Authority"), a component unit of the State of New Jersey, was created under the provisions of Chapter 106 of New Jersey Public Laws of 1966 as a public body corporate and politic. The powers of the Authority permit the sale of notes, bonds and other obligations to support the construction, acquisition and equipping of educational facilities for public and private institutions of higher education in the State of New Jersey. The Authority is also authorized, pursuant to statutory amendments, to issue State supported bonds to fund matching grants to qualified public libraries for capital improvements. The obligations issued by the Authority are not guaranteed by, nor do they constitute a debt or obligation of, the State of New Jersey.

The Authority is exempt from both federal and state taxes.

### 2. Significant Accounting Policies

The accounts are maintained on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States.

In its accounting and financial reporting, the Authority follows the pronouncements of the Governmental Accounting Standards Board (GASB). In addition, the Authority follows the pronouncements of only applicable Financial Accounting Standards Board (FASB) Statements and Interpretations, issued on or before November 30, 1989, unless they conflict with or contradict GASB pronouncements.

### Administrative Fees

The Authority charges administrative fees to its constituent institutions for which bond and note sales have been completed. Such fees are considered operating revenue and are charged for services related to the structuring and administration of Authority financings, investment management of bond proceeds, monitoring of financial performance and other project costs and services. The fees are used to provide sufficient funds to ensure that the Authority's operating expenses will be met, and that sufficient reserves will be available to provide for the Authority's needs.

### Depreciation

Furniture and equipment are carried at cost and depreciated over their useful lives using the straight-line method.

### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

### 3. Designated Net Assets

On May 18, 1999, the Members of the Authority passed a resolution to designate \$2,000,000 from the Authority's operating fund balance as a reserve to facilitate the normal operations of the Authority and for counsel and consultants, if needed, in the event of difficulties experienced by the Authority or its client colleges.

### 4. Cash and Investments

At year-end, the Authority's bank balance was \$151,595 of which \$100,000 was covered by FDIC insurance and held in the Authority's name by a New Jersey banking institution. The remainder was uncollateralized.

### Notes to Financial Statements (continued)

### 4. Cash and Investments (continued)

The types of securities which are permitted investments for Authority funds are established by New Jersey Statutes. All funds of the Authority may be invested in obligations of, or guaranteed by, the United States Government. In addition, certain funds of the Authority may be invested in: obligations of agencies of the U.S. government; obligations of, or guaranteed by, the State of New Jersey; collateralized certificates of deposit and repurchase agreements; commercial paper; and other securities which shall be authorized for the investment of funds in the custody of the Treasurer of the State of New Jersey. Governmental Accounting Standards Board (GASB) Statement No. 3 requires disclosure of the level of investment risk assumed by the Authority as of December 31, 2003 and 2002. Category 1 includes investments that are insured or registered, or held by the Authority or its agent in its name.

Investments of the Authority comprise the following:

	2003	2002
Investments:		
U.S. Treasury and agency obligations (category 1)	\$6,466,700	\$4,750,144
Money Market Mutual Fund (noncategorized)	206,596	498,523
Total investments	\$6,673,296	\$5,248,667

In 2003 and 2002, the Authority has \$206,596 and \$498,523, respectively, invested in a money market mutual fund, which invests in short-term and other obligations of the U.S. Treasury. Such investments are listed as noncategorized above, because they are not evidenced by securities that exist in physical or book entry form. U.S. Treasury and agency obligations are considered category 1 for GASB purposes. All investments are carried at fair value.

For the years ended December 31, 2003 and 2002, investment income comprises the following:

	2003	2002
Interest earnings Net decrease in fair value of investments	\$121,659 (63,250)	\$258,485 (91,159)
	\$ 58,409	\$167,326

### 5. Pension Plan

The Authority's employees participate in the Public Employees Retirement System of New Jersey (PERS), a cost sharing multiple-employer defined benefit plan. The Authority's contribution is based upon an actuarial computation performed by the PERS. The Authority's required contribution and pension expense for each of the years ended December 31, 2003, 2002 and 2001 was \$-0-. Employees of the Authority also contribute a percentage of their wages to the pension system; the percentage range of contributions, as determined by PERS is 3% in 2003, 2002 and 2001.

In addition to the pension benefits noted above, as permitted by Chapter 88, P.L. 1974 as amended by Chapter 436, P.L. 1981, the Authority has agreed to pay the health insurance premiums for eligible pensioners and their dependents. These postretirement benefits are available to all employees who retire from the Authority with at least twenty-five years of service credit in the PERS. Postretirement benefits are accrued based on actuarial calculations that utilize the projected unit credit cost method and a discount rate of 6.5%. At December 31, 2003 and 2002, the Authority has accrued \$570,000 and \$530,000, respectively. At December 31, 2003, the Plan had 15 participants of which 13 were active employees and 2 were retirees. Of the Plan participants 2 retirees and 1 active employee were eligible to receive benefits under the agreement.

### Notes to Financial Statements (continued)

### 6. Conduit Debt

Due to the fact that the bonds and notes issued by the Authority are nonrecourse conduit debt obligations of the Authority, the Authority has, in effect, none of the risks and rewards of the related financing. Accordingly, with the exception of certain fees generated as a result of the financing transaction, the financing transaction is given no accounting recognition in the accompanying financial statements. At December 31, 2003, the amount of conduit debt outstanding totaled \$3,701,671,062.

### 7. Commitments and Contingencies

The Authority has an operating lease commitment for its offices at an annual rental of approximately \$258,000 through November 16, 2010.

The Authority, in the normal course of business, is involved in various legal matters. Under the terms of the agreements between the Authority and the public and private institutions, any costs associated with litigation are the obligation of the institution. It is the opinion of the Authority after consultation with legal counsel that its financial position will not be adversely affected by the ultimate outcome of any existing legal proceedings.

#### 8. State of New Jersey Reimbursement

At its regular meeting of March 27, 2002, the Authority Board passed a resolution authorizing the use of \$5 million of its reserves to provide reimbursement to the State of New Jersey for a portion of the debt service paid in support of several programs benefiting the State's institutions of higher education. This amount was paid on May 20, 2002.

The accompanying notes to supplemental financial statements are an integral part of this statement.

### **Notes to Supplemental Financial Statements**

#### 1. Introduction

Under the terms of the Authority's enabling legislation, the Authority has the power to issue bonds on behalf of public and private institutions of higher education in the State of New Jersey. The obligations issued by the Authority are conduit debt and are not guaranteed by, nor do they constitute a debt or obligation of, the State of New Jersey.

Because the bonds and notes issued by the Authority are nonrecourse conduit debt obligations of the Authority, the Authority has, in effect, none of the risks and rewards of the related financing. The supplemental financial statements presented herein include information pertaining to funds held by Trustees of the various bond and note issuances of the Authority.

#### 2. Significant Accounting Policies

The Trustee Held Funds as presented is an agency fund and as such is custodial in nature and does not present results of operations and utilizes the accrual basis of accounting.

### 3. Funds Held in Trust

Funds held in trust include amounts in the construction, debt service and debt service reserve funds and the renewal and replacement accounts established for each bond issue. Balances maintained in the construction funds represent unexpended proceeds allocated for specific projects; the debt service fund, debt service reserve fund, and renewal and replacement account balances represent amounts reserved for payment of debt service and the renewal and replacement of major components of projects as required by the provisions of the various series resolutions. The following is a schedule of the aggregate funds held in trust as of December 31, 2003 and 2002:

2003	2002
\$761,614,566	\$ 898,762,956
24,592,801	40,801,759
115,873,654	106,535,638
26,082,244	27,460,075
\$928,163,265	\$1,073,560,428
	\$761,614,566 24,592,801 115,873,654 26,082,244

### 4. Cash and Investments

Investments permitted in the Trustee Held Funds are authorized by the respective Bond Resolutions. All funds held by the trustees may be invested in obligations of, or guaranteed by, the United States Government. In addition, certain funds may be invested in: obligations of agencies of the U.S. government; obligations of, or guaranteed by, the State of New Jersey; collateralized certificates of deposit and repurchase agreements; commercial paper; and other securities which shall be authorized for the investment of funds in the custody of the Treasurer of the State of New Jersey. Governmental Accounting Standards Board (GASB) Statement No. 3 requires disclosure of the level of investment risk assumed by the Authority as of December 31, 2003. Category 1 includes investments that are insured or registered, or held by the Authority or its agent in its name. The credit risk for all categorized investments held by the Authority are considered category 1 by GASB standards.

### 4. Cash and Investments (continued)

Investments held by trustees are carried at fair value and comprise the following:

	2003	2002
Investments:		
Collateralized investment agreements	\$ 1,705,000	\$ 28,159,968
U.S. Treasury and agency obligations	1,043,183,988*	1,166,134,961*
Total investments	\$1,044,888,988	\$1,194,294,929

\* Includes \$880,724,190 and \$983,094,886 of investments in pooled U.S. Treasury funds at December 31, 2003 and 2002, respectively, which are uncategorized.

#### 5. Loans and Leases Receivable

Since its inception, the Authority has issued obligations of \$6,703,335,749 and \$5,925,540,749 as of December 31, 2003 and 2002, respectively, for the benefit of various public and private institutions of higher education. The obligations are secured by loans, mortgages, leases and other agreements, the terms of which generally correspond to the amortization of the related bond issues.

The loans and mortgages are secured by revenue produced by the facilities and by other legally available funds of the institutions. The Authority is the owner of those projects under lease agreements. It is the intention of the Authority to transfer title in the projects at the expiration of the leases. Accordingly, the leases are being accounted for as financing transactions.

Restricted fund receivables comprise the following:

	December 31	
	2003	2002
Loans:		
Drew University	\$ 2,162,500	\$ 3,545,000
Institute for Advanced Study	49,140,000	50,585,000

2006	155,660,235
2007	161,929,177
2008	153,244,002
Thereafter	2,939,371,337
	\$3,701,671,062

### 7. Refunded Bond Issues

When conditions have warranted, the Authority has sold various issues of bonds to provide for the refunding of previously issued obligations.

The proceeds received from the sales of the bond issues were used to refund currently the outstanding bond issues or to deposit in an irrevocable escrow fund held by the Escrow Agent, an amount which, when combined with interest earnings thereon, is at least equal to the sum of the outstanding principal amount of the bonds, the interest to accrue thereon to and including the first optional redemption date thereof, and the premium required to redeem the bonds outstanding on such date. Accordingly, the trust account assets and the liability for defeased bonds are not included in the Authority's financial statements.

Certain transactions defeased the outstanding bond issues with a resultant reduction in annual debt service during the term of the issues. The debt service savings, together with any accounting gain or loss that will be deferred, accrue to the respective institutions.

### 7. Refunded Bond Issues (continued)

Refunded bonds outstanding at December 31, 2003 comprise the following:

	Principal	Definede	d I		D		_
