Web Response

I am fortunate to live in the Highlands Region and I am a strong advocate of the current plan, which has been producing positive gains for all New Jersey residents. By protecting our critical water supplies, reducing flooding, and preserving wildlife habitat through sensible limits on development, the Act is promoting the healthy future of our state. Water is an absolute necessary resource and we must all protect our drinking water. Let's learn from the recent mistakes from other areas of the country - we must not take any chances with this vital resource necessary for all life (i.e. fracking, development or pipelines in or near a watershed). Thank you.
