****CONSTRUCTION ADVISORY****

****CUTLER STREET AND SCRIBNER PLACE – CITY OF CLIFTON****

(Newark) – The Passaic Valley Sewerage Commission (PVSC) is in the process of rehabilitating the Main Interceptor Sewer between Cutler Street and Scribner Place in the City of Clifton. (Click here for Engineer's Report on specific details). PVSC anticipates that the work at these locations will continue over the next several months; the work is expected to be completed by May 2015 or shortly thereafter.

By January 30, 2015, all of the slip-lining scheduled for this area is expected to be installed, with the exception of the Main Interceptor Sewer between Cutler Street and Scribner Place. PVSC is currently in the process of reviewing a Value Engineering Construction Proposal (VECP), which would modify the method of the rehabilitation and significantly reduce the impact on the local community, as a substantially large bypass pumping and piping arrangement would be eliminated and ease the inconvenience to local residents..

The Passaic Valley Sewerage Commission recognizes that this project will have an impact on the local community. We apologize for any inconvenience; however the work is essential to the future safety and health of Northern New Jersey residents.

Throughout the course of the project, PVSC will continue to provide updates to residents and commuters regarding the status of the work. The precise timing of the work is subject to change due to weather or other factors. Motorists are encouraged to check the home page of the PVSC website at <http://www.nj.gov/pvsc/> for further travel information.
