CONSTRUCTION ADVISORY – UPDATE

****CUTLER STREET AND SCRIBNER PLACE – CITY OF CLIFTON****

(Newark) – The Passaic Valley Sewerage Commission (PVSC) is in the process of rehabilitating the Main Interceptor Sewer between Cutler Street and Scribner Place in the City of Clifton. PVSC anticipates that the work at these locations will continue and should be completed by the end of June 2015, or shortly thereafter.

As of March 9, 2015, all of the slip-lining scheduled for this area had been installed within the Main Interceptor Sewer. However, PVSC is in the process of replacing damaged pipe and continuing with the rehabilitation. This latest development will delay the commencement of the concrete work within the two (2) access shafts, minor repairs, and grouting work by about a month. Once this work is completed, backfilling and site restoration will be performed.

The Passaic Valley Sewerage Commission recognizes that this project will have an impact on the local community. We apologize for any inconvenience; however the work is essential to the future safety and health of Northern New Jersey residents.

Throughout the course of the project, PVSC will continue to provide updates to residents and commuters regarding the status of the work. The precise timing of the work is subject to change due to weather or other factors. Motorists are encouraged to check the home page of the PVSC website at www.nj.gov/pvsc for further travel information.
