The percentage of Total Coverage of the State under <sup>4</sup> Enhanced-9-1-1	Quarterly	Maintain	100%	100.00%	100.00%	0.00%	100.00%

<sup>1</sup> Thirteen Physical SARs were held this quarter, seven are being hosted in the State's Shared IT Infrastructure or by an OIT Brokered Solution.

<sup>2</sup> Current quarter decrease due to an agency project implementation and server failures, which caused a backup to failure.

<sup>3</sup> Lower percentages were due to several printing problems on FAMIS and OMEGA check outputs.

<sup>4</sup> Enhanced 9-1-1 means an emergency telephone system that provides sophisticated features via computers and electronic switches so that calls can be selectively routed to one of multiple public-safety answering points (PSAPs) and, when answered, provides an Automatic Number Identification(ANI) and/or Automatic Location Information (ALI) display at the PSAP.

Investments in Geographic Information Systems (GIS) data are leveraged by using the same sources for common data sets in multiple applications. A single GIS data set, or map layer, typically describes one type of feature or characteristic, such as roads or municipal boundaries.

#### Sample Applications

Availability is measured as a percentage of total agreed uptime available over the period. (Scheduled downtime is not included).
