

**FY 2004 TRANSPORTATION CAPITAL PROGRAM  
New Jersey Department of Transportation Projects**

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
<b>13                      Inland Waterway Canal Bridge</b>	<b>00369</b>

The main operating system of this drawbridge is 29 years old, obsolete, and replacement parts are not available. The system has been inspected and found to be in poor condition and in need of complete replacement. The system is currently operating erratically, with a recurrence of failures. This bridge is located over the Intracoastal Waterway, and the US Coast Guard requires NJDOT to open the bridge "on demand" of an approaching vessel. Water currents in the canal are swift, and the canal has no provisions for marine vessels to dock or tie-off in the event of a bridge operation failure.
