Route 1&9/Route 35 Interchange, South of interchange to Tappan Street	046B

The existing structure is in very poor condition, has substandard underclearance, and is extremely functionally obsolete. The tight substandard radii of the existing ramps poses a serious safety problem (overturning) to trucks. In addition, the lack of acceleration/deceleration lanes results in dangerous traffic weave patterns. The obsolete cloverleaf interchange configuration will be replaced with a diamond interchange configuration, with vastly improved ramp geometries and acceleration/deceleration lanes. The project will also improve the drainage at Hudson Boulevard.

This project is funded under the provisions of Section 13 of P.L. 1995, c.108. Total construction funding is \$31,150,000.

The Federal FY 2003 National Corridor Planning and Development Program provided funding of \$850,000 for this project.

The following special Federal appropriations were allocated to this project. TEA-21/366 \$\$7,229,223 (balance available \$1,142,988). Also included under this apportionment is Route 1, Conrail (DB 047B) and Route 1&9/35 Interchange (DB 046B). In addition, this project received Federal appropriations in FY 2004/National Corridor Planning and Development Program \$850,000.
