Baseline Document Change Announcement

Construction Cost Estimating Guidelines

BDC06T-06

December 8, 2006

Subject: Release of the Construction Cost Estimating Guidelines

Reference: BDC06T-09 Sample Plans

The Department hereby releases the Construction Cost Estimating Guidelines. It describes the use of the new Cost Estimation System software, which is part of the Trns•port suite of software. Included is a new method of handling non-standard pay item numbers. Additional information is available at <http://www.state.nj.us/transportation/business/trnsport/>.

The following are superseded:

- Contractor Payment System Front End (CPSFE) Manual released via BDC01T-04, dated November 29, 2001
- Construction Cost Estimation Preparation Manual for Preliminary Design released via BDC04T-08, dated August 19, 2004
- Construction Cost Estimation Preparation Manual for Final Engineer's Estimates released via BDC02T-02, dated April 4, 2002
- Construction Cost Estimation Review Manual (Preliminary and Final Design)
- Corrective Action Notice CAN055R, dated May 24, 2002

Instructions to Designers

The Engineer's Estimate for all new projects and projects that have not reached Final Design Submission (FDS) must be prepared using Trns•port Cost Estimation System (CES.) Projects that are between FDS and PS&E shall be handled on a case by case basis. If you have a project that is between FDS and PS&E or have any questions, please email Trnsport.Support@dot.state.nj.us.
