Baseline Document Change Announcement

Nuclear Density Gauge

BDC10S-04

April 26, 2010

SUBJECT: Revision to Subpart 156.03.05 of the 2007 Standard Specifications

Subpart 156.03.05 of the Standard Specifications has been revised to require calibration of nuclear density gauge every 24 months; and for the Contractor to supply a replacement gauge when the gauge is out for calibration and repairs. The Department now has a NJDEP license instead of a USNRC license.

The following revision has been incorporated in Standard Input, SI2007 as of April 26, 2010.

156.03.05 Nuclear Density Gauge

THE LAST PARAGRAPH IS CHANGED TO:

Provide a nuclear density gauge for the exclusive use of the ME using one of the following methods:

1. Purchase a nuclear density gauge under the Contractor's New Jersey Department of Environmental Protection (NJDEP) License or the Contractors United States Nuclear Regulatory Commission (USNRC) license.
2. Lease a nuclear density gauge from a New Jersey Department of Environmental Protection (NJDEP) or United States Nuclear Regulatory Commission (USNRC) licensed third party on the Department's New Jersey Department of Environmental Protection (NJDEP) License.

The Contractor is barred from purchasing gauges on the Department's New Jersey Department of Environmental Protection (NJDEP) license. Perform calibration and servicing of the gauge, other than routine wipe tests, every 24 months. The ME may direct additional calibrations, when necessary. Supply a replacement gauge for the Department's use during the calibration and servicing period.

Implementation Code R (ROUTINE)

Changes must be implemented in all applicable Department projects scheduled for Final Design Submission at least one month after the date of the BDC announcement. This will allow designers to make necessary plan, specifications, and estimate/proposal changes without requiring the need for an addenda or postponement of advertisement or receipt of bids.
