**Baseline Document Change Announcement**

**Public Sidewalk Curb Ramps  
Detectable Warning Surfaces  
BDC03D-05**

**July 27, 2004**

**SUBJECT: 2001 Standard Roadway Construction Details-Sheet CD-607-1 Public Sidewalk Curb Ramps, and Sheet CD-607-2 Concrete and HMA Driveways and Sidewalks (Metric and English Units)**

**REFERENCE: 2001 Standard Specifications for Road and Bridge Construction-Section 607 Sidewalks and Driveways (Metric and English Units)-BDC03S-23 dated July 26, 2004**

Roadway Construction detail sheet CD-607-1 has been revised to comply with the American Disability Act (ADA) Accessibility Guidelines which requires public sidewalk curb ramp to be delineated by detectable warning surfaces as shown in the construction details. Public Sidewalk Curb Ramps with truncated domes will provide better detection to the visually impaired individual. Also, Note No. 8 has been revised to describe other requirements.

It is also necessary to re-issue Sheet CD-607-2, since details CD-607-1.1 & CD-607-1.2 although unchanged, have been moved to Sheet CD-607-2 as CD-607-2.9 and CD-607-2.10 respectively.

This BDC announcement must be read in conjunction with the referenced BDC announcement. Also, a BDC announcement to provide corresponding changes to the Roadway Design Manual will be released shortly.

**Implementation Code R (ROUTINE)**

Changes must be implemented in all applicable Department projects scheduled for Final Design Submission at least one month after the date of the BDC announcement. This will allow designers to make necessary plan, specifications, and estimate/proposal changes without requiring the need for an addenda or postponement of advertisement or receipt of bids.
