The Titan is offered by Clarin to provide additional frame strength and durability to select Clarin models as designated. The Titan design addresses the needs of certain customers looking for a chair that can withstand additional load stresses.

The Titan's additional strength is achieved by the addition of metal support components to the chair. These structural features include extra stretchers, X-frame reinforcements and a modified seat frame.

Based on test results from an independent third party BIFMA approved test facility and in accordance with the applicable tests used in ANSI/BIFMA testing (modified for additional load requirements), it was determined that the Clarin Titan folding chair design is strong enough for everyday typical use by a 350 lb user.

The Clarin frame warranty for the Titan version is 8 years, subject to the other terms and conditions of the standard Clarin warranty, including without limitation the exclusions for misuse and abuse.

While the Weather Fighter Treatment does provide additional protection against exposure to certain weather conditions, Clarin does not recommend keeping or storing chairs outdoors where they are exposed directly to rain or other extreme weather conditions. Clarin's warranty does not cover defects caused by direct exposure to rain or other extreme weather conditions for extended periods of time. Clarin's Weather Fighter Treatment includes: the application of a pre-coat to the chair frame before painting and the use of stainless steel washers to help prevent rust; the use of marine grade vinyl and weather resistant threads to help protect the upholstery; and the use of plastic seat and back boards in lieu of fiberboard to help prevent warping.</i>
