PRESUMPTIVE WHOLESALE PRICING FOR THE MONTH OF JULY 2024

The New Jersey milk market continues to be affected by varying pricing levels of conventional fluid milk. The Division has decided after review and survey of the current marketing conditions that presumptive pricing now must include Skim, 1%, and 2% as part of the general announcement. The Division will continue to survey the wholesale market at the point where the milk enters retail sales to determine the current market average and presumed price for each type of conventional packaged milk.

According to N.J.A.C. 2:48-1.1 New Jersey is divided into two milk marketing areas and the Department announces in its monthly Class 1 Advanced Milk Price Announcement, two prices of raw milk cost converted to container size to determine variable cost. There for their will be two presumptive retail milk prices established each month which will follow the areas out lined in the regulation. For simplicity the area north of I-195 shall utilize the North Jersey Presumptive Price and the area south of I-195 shall utilize the South Jersey Presumptive Pricing

Each and every dealer is involved in the presumptive prices situation and will have the ability to justify their variable cost as outlined in N.J.A.C 2:52-7. The presumptive variable wholesale price established must be maintained until said dealer presents information with back up documentation showing in detail their variable cost of each type of milk product being sold below the presumptive price. If the variable cost is justified upon review by the Department, then and only then will the dealer or store be allowed to sell at or above their established variable cost.

JULY 2024 prices reflect adjustments to the rapidly changing costs of processing, packaging, labor and distribution being experienced by the industry. Each month's presumptive announcement will reflect the changes in this discovery of variable costs associated throughout the industry. These changes are above and beyond the changes in the raw milk price movement. In addition, stop charges, fuel assessments and other delivery charges are incorporated into the presumptive prices since they are also included in the variable cost. Some fuel surcharges or stop charges may be listed separately by dealers on billing slips which will be reflected in a lower price per unit.

PRESUMPTIVE WHOLSALE PRICING FOR THE MONTH JULY 2024

	North Jersey		South Jersey	
	Gallons	½ Gallons	Gallons	½ Gallons
<u>Whole Milk (4.6 – 6.0% BF)</u>	\$4.8462	\$2.8374	\$4.8403	\$2.8344
<u>Whole Milk (3.6 – 4.5% BF)</u>	\$4.1725	\$2.5145	\$4.1668	\$2.5115
Whole Milk (3.25 BF)	\$3.8846	\$2.3485	\$3.8789	\$2.3448
2%	\$3.5150	\$2.1691	\$3.5045	\$2.1672
1%	\$3.2160	\$1.9986	\$3.2059	\$1.9942
Skim	\$2.9775	\$1.8918	\$2.9683	\$1.8901

Quantity Discounts – since the New Jersey Milk Control Act licenses stores based on volume N.J.A.C.2:56-1.2, a presumptive wholesale discount can be justified based on volumes into individual stores.

License Fee	Volume of all Milk Milk products	% presumptive discount off presumptive wholesale
\$30	less than 500 qt equivalents per week	use presumptive wholesale
\$60	501 – 1500 qt equivalents per week	3% discount
\$90	1501 – 3000 qt equivalents per week	5% discount
\$120	more than 3001 qt equivalents per	7% discount

NOTE: Their will only be one presumptive retail price announced and all retail sales to consumers must follow that pricing until justified. The wholesale discount is not and will not be used as a justification for stores to sell below the presumptive retail price.

NOTE: Dealers must check store licenses. The amount that the store paid for a license is listed on the license. Any dealer found supplying store with a discount higher than the license fee paid will be in violation for not proving the variable cost prior to selling below the presumptive.
