2025 Hemp Seed/Propagule Request

State of New Jersey

DEPARTMENT OF AGRICULTURE

PO Box 330

TRENTON NJ 08625-0330

Compliance with Federal THC Limit

License holders must use only seed, propagules, or plants that are demonstrated to conform to the 0.3% Total-THC limit. Documentation of measured THC levels shall be submitted to NJDA with this request. Documentation shall also include the name, address, email, and telephone number of both the lab, and the seed source. Seed, propagules, or plants from outside of New Jersey which are not reviewed and approved by the NJDA are prohibited from use. Any license holder found using seed, propagules, or plants not reviewed and approved by the NJDA may be subject to revocation of the Licensing Agreement in addition to any civil or criminal liabilities that may exist.

Intellectual Property

License holders are prohibited from growing for replication any intellectual property or genetic lines for which they do not have a license or written permission from the property owner. A copy of any license or permission from the property owner shall be provided in writing to the NJDA upon request. The NJDA shall not approve a Domestic Seed/Propagule Request form unless the License Holder affirms in writing that the Licensee's planned activities will not infringe on the intellectual property rights of any person.

Domestic Seed and/or Plant Acquisition (from within the United States)

All seed and/or plants sourced from within the United States, but outside of New Jersey, must be pre-approved by the NJDA. License holders shall submit the Domestic Seed/Propagule Request form to NJDA at least three (3) weeks in advance of any proposed transfer of materials.

The seed and/or propagule source must be a participant in a "duly recognized Hemp Program," i.e., an institute of higher education or an individual or company working under the authority of 7 U.S.C. § 5940 or § 7 U.S.C. 1639 et seq.

It is the license holder's responsibility to ensure that the transfer or sale of any hemp material from another program complies with all applicable laws and policies in the originating state.

License holders whose operations included the use of potential landrace varieties of hemp, or any other varieties or genetic lines of unknown heritage must contact the NJDA Hemp Program manager to arrange for replication and testing of the variety before it may be grown in New Jersey.

Official Use Only:

****All Varieties must have a valid COA attached to your seed/propagule form for approval**
