	Summary of Changes
January 1, 2001 Version 0.1	Draft 0.1
January 9, 2001 Version 0.2	<ul> <li>Add clarification to definition to use of DTM*245</li> <li>Clarify Notes section on LIN segment</li> <li>Correct Notes section on ASI segment</li> <li>Correct Notes section on REF*7G segment</li> <li>Remove B14 as valid REF*7G code</li> <li>Correct description of REF*1P segment, and when it is used.</li> <li>Add clarification to REF*11 regarding use of punctuation</li> </ul>
January 18, 2001 Version 1.0	<ul> <li>Transaction FINAL for Pennsylvania</li> <li>Transaction not reviewed for New Jersey, Delaware, Maryland</li> </ul>
October 19, 2001 Version 1.0rev01	Incorporate Delaware Electric Coop (DEC) information for Delaware
December 13, 2001 Version 1.0rev02	Incorporate PA Change Control 038 – add clarification that DTM*245 may be revisited if other LDCs use transaction.
January 9, 2002 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
July 4, 2009 Version 2.0.2D	Incorporate PA Change Control 047
January 24, 2010 Version 2.1	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
November 4, 2010 Version 2.1.1D	Incorporate PA Change Control 069 – PECO use of transaction beginning in 2011.
February 28, 2011 Version 3.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 16, 2012 Version 3.01	Incorporate PA Change Control 093 (Admin Changes)

	General Notes
Use	ESP to LDC - The Notice of Intent to Drop Request should be used when a utility has a requirement that the supplier must provide advance notice of intent to terminate a contract when there is reasonable belief that a customer's contract will be terminated. The supplier must send this transaction to the utility as a request. The utility will respond with an "acceptance".
	<b>Note:</b> The ESP must still send the drop request transaction at the appropriate time. The LDC will not drop a customer based on receipt of a notice of intent to drop transaction.
	LDC to ESP - Notice of Intent to Drop can be sent from the EDC to the EGS to notify the EGS of the impending possibility of a customer termination for non-payment.
One Account per 814	One customer account per 814.
Tracking number on Request and Response transactions	On the request, the LIN01 is a unique tracking number for each line item (LIN) in this transaction. This number must be unique over all time, and is assigned by the sender of the request transactions. This number must be returned on the response transaction (accept or reject), in the same element (LIN01).
Multiple LINs	There is only one LIN per account per 814
Response per LIN	There will be one 814 advance notice of intent to drop response for each 814 advance notice of intent to drop request.
Echoing Data on Reject	If a transaction is rejected due to invalid information, the Response may echo back the invalid data along with the reason code.
LDC Definitions:	The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:  • EDC – Electric Distribution Company (Pennsylvania, Delaware)  • LDC – Local Distribution Company (New Jersey)  • EC – Electric Company (Maryland)
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:  • EGS – Electric Generation Supplier (Pennsylvania)  • TPS – Third Party Supplier (New Jersey)  • ES – Electric Supplier (Delaware)  • ES – Electricity Supplier (Maryland)

	Pennsylvania Notes
Rules:	<ul> <li>ESP to LDC (Duquesne Light ONLY)</li> <li>Duquesne Light requires the EGS to provide advance notice of intent to terminate a contract when there is reasonable belief that a customer's contract will be terminated.</li> <li>PECO does not support the ESP initiated 814ND transaction.</li> <li>LDC to ESP</li> <li>Both Duquesne and PECO will send the 814ND to notify the ESP of the impending possibility of a customer termination for non-payment. The response 814ND from the ESP to both Duquesne Light and PECO is optional.</li> <li>The EDC to EGS 814ND does not supersede the 814 Drop. In the event the EGS does not receive the normal 814 drop after receipt of the 814ND, the customer has not been terminated for non-payment.</li> <li>Transaction timelines</li> <li>Duquesne - The EDC to EGS 814ND will be sent 7 days prior to the normal 814 Drop which will only be sent if the account is actually terminated for non-payment.</li> <li>PECO - The EDC to EGS 814ND will be sent 30 days prior to the normal 814 Drop ONLY if the account is actually terminated for non-payment. This does not imply the customer will be dropped 100% of the time as they still are given time to pay their past due balance before PECO finals the account. (In the scenario that a customer is pending enrollment with a new EGS and pending drop with a current EGS, PECO will send an 814 AND transaction to both EGSs.)</li> </ul>

	New Jersey Notes
Rules:	This transaction is not used in New Jersey.

	Delaware Notes
Rules:	This transaction is not used in Delaware

	Maryland Notes
Rules:	This transaction is not used in Maryland.

**ST** Transaction Set Header **Segment:** 

**Position:** 010

Loop:

Level: Heading Mandatory Usage:

Max Use:

**Purpose:** To indicate the start of a transaction set and to assign a control number

**Syntax Notes:** 

**Semantic Notes:** The transaction set identifier (ST01) is used by the translation routines of the

interchange partners to select the appropriate transaction set definition (e.g., 810

selects the Invoice Transaction Set).

# **Comments:**

PA Use:	Required
NJ Use:	N/A
DE Use:	N/A
MD Use:	N/A
Example:	ST*814*00000001

# **Data Element Summary**

Must Use	ST02	329	<b>Transaction Set Control Number</b>	M	AN 4/9
			Identifying control number that must be unique within the transaction	ant franction	1

Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set

BGN Beginning Segment **Segment:** 

020 **Position:** 

Loop:

Level: Heading Mandatory Usage:

Max Use:

**Purpose:** To indicate the beginning of a transaction set **Syntax Notes:** If BGN05 is present, then BGN04 is required. 1 **Semantic Notes:** BGN02 is the transaction set reference number.

BGN03 is the transaction set date.

3 BGN04 is the transaction set time.

BGN05 is the transaction set time qualifier.

BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

Segment: LIN Item Identification

Position: 010
Loop: LIN
Level: Detail
Usage: Optional

Max Use: 1

**Purpose:** To specify basic item identification data

**Syntax Notes:** 1 If either LIN04 or LIN05 is present, then the other is required.

- If either LIN06 or LIN07 is present, then the other is required.
- 3 If either LIN08 or LIN09 is present, then the other is required.
- 4 If either LIN10 or LIN11 is present, then the other is required.
- 5 If either LIN12 or LIN13 is present, then the other is required.
- 6 If either LIN14 or LIN15 is present, then the other is required.
- 7 If either LIN16 or LIN17 is present, then the other is required.
- 8 If either LIN18 or LIN19 is present, then the other is required.
- 9 If either LIN20 or LIN21 is present, then the other is required.
- 10 If either LIN22 or LIN23 is present, then the other is required.
- 11 If either LIN24 or LIN25 is present, then the other is required.
- 12 If either LIN26 or LIN27 is present, then the other is required.
- 13 If either LIN28 or LIN29 is present, then the other is required.
- 14 If either LIN30 or LIN31 is present, then the other is required.

**Semantic Notes:** 1 LIN01 is the line item identification

**Comments:** 1 See the Data Dictionary for a complete list of IDs.

2 LIN02 through LIN31 provide for fifteen different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

Notes: The LIN segment indicates the product and service being requested. LIN03 is used to identify the product (electric vs. gas) and LIN05 is used to identify the service being requested. For example, LIN\*1\*SH\*EL\*SH\*CE indicates that the product is electric and 'generation services' is the service being requested. CE PA Use: Request: Required Accept Response: Required Reject Response: Required if it was provided on the request. NJ Use: N/A **DE Use:** N/A MD Use: N/A **Examples:** LIN\*ADVDROP200112000000001\*SH\*EL\*SH\*CE

7G Data Quality Reject Reason

Reject reasons associated with a reject status notification.

# **Rules for Rejection Reason Codes**

The codes on the next several pages have been identified by the UIG to convey rejection reasons. Only the codes listed for each service are valid for that service. If you require additional codes, send an email to the appropriate state's listserver.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, an E-mail must be sent to the appropriate state's listserver by the party sending the code, to notify the market participants about the text explanation for A13. This information will be compiled and new codes will be issued on a periodic basis.

PA Listserver: <a href="mailto:edtwg@ls.eei.org">edtwg@ls.eei.org</a>
NJ Listserver: <a href="mailto:njbpu@ls.eei.org">njbpu@ls.eei.org</a>

### 127 **Reference Identification**

X AN 1/30

Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

raemmieumon Quammer			
LDC Confirmation			
Response to ESP			
X	008	Account exists but is not active	
X	A13	Other (Explanation Required in REF03)	
X	A76	Account Not Found	
		This includes invalid account numbers as well as no account	
		number being found.	
X	A77	Name Specified Does Not Match Account	
X	A84	Invalid Relationship (not ESP of record)	
X	A91	Service is not offered at customer's location	
		For instance, used to indicate that this is a gas only account, no electric service exists on the account.	
X	ACI	Action Code (ASI01) invalid	
X	API	Required information missing (REF03 Required)	
X	DIV	Date Invalid	
X	MTI	Maintenance Type Code (ASI02) invalid	
X	UND	Cannot identify ESP	
X	UNE	Cannot identify LDC	

Optional REF03 352 Description

 $\mathbf{X}$ AN 1/80

A free-form description to clarify the related data elements and their content Used to further describe the rejection reason code sent in REF02. Code "A13" requires text explanation in this element.

Segment: REF Reference Identification (1P=Status Reason)

Position: 030
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

**Purpose:** To specify identifying information

**Syntax Notes:** 1 At least one of REF02 or REF03 is required.

If either C04003 or C04004 is present, then the other is required.
If either C04005 or C04006 is present, then the other is required.

**Semantic Notes:** 1 REF04 contains data relating to the value cited in REF02.

**Comments:** 

Notes:	This iteration of the REF segment is used to convey status reason codes on a response to a Request. The status reason codes are conveyed in this segment rather than in the ASI03				
	to allow for multiple status reasons.				
PA Use:	Request: Not Used				
	Accept Response: Required when status information must be conveyed				
	Reject Response: Required when status information must be conveyed	•			
NJ Use:	N/A				
DE Use:	N/A				
MD Use:	N/A				
Example:	REF*1P*A13*ADDITIONAL REASON TEXT HERE				

# **Data Element Summary**

	Ref.	Data		
	Des.	<b>Element</b>	Name	X12 Attributes
Must Use	REF01	128	Reference Identification Oualifier	M ID 2/3

Code qualifying the Reference Identification

1P Accessorial Status Code

Used in the instance where the 814 Request is accepted, but additional status information must be provided; e.g. code W09, special off-cycle meter read cannot be performed.

# **Rules for Status Reason Codes**

The codes on the next several pages have been identified by the UIG to convey status reasons. Only the codes listed for each service are valid for that service. If you require additional codes, send an email to the appropriate state's listserver.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, an E-mail must be sent to the appropriate state's listserver by the party sending the code, to notify the market participants about the text explanation for A13. This information will be compiled and new codes will be issued on a periodic basis.
