## **Summary of Changes**

	·
June 29, 1999 Version 1.0 July 21, 1999	<ul> <li>Initial Release. Changes made since last draft:</li> <li>Changed "EGS" to "ESP" and "EDC" to "LDC" throughout the guideline. Added notes page with "LDC Definitions" and "ESP Definitions".</li> <li>Added "How to use the implementation guideline" page. In addition, changed all headers to the true X12 definition. Also corrected the Table on Page 4 to reflect X12 definitions and added the words "X12 Structure" to the title on that page.</li> <li>Added Note for New Jersey to indicate all utilities plan to send summarized data by</li> </ul>
Version 1.0a	<ul> <li>account (SU loop). No utility plans to send the data by meter (PM loop)</li> <li>Added note to clarify the utility will send the <u>current</u> transmission obligation and capacity obligation values. Historical Capacity and Transmission obligation is NOT being sent via this transaction.</li> <li>Corrected words in Example for transmission and capacity obligation.</li> <li>Added clarifying comment to SU loop to indicate there should be one SU loop for each unit of measurement (applies to all states).</li> </ul>
October 1, 1999 Version 1.0c	<ul> <li>Added Delaware Delmarva Information</li> <li>Moved rules from the data dictionary to the Notes section of the implementation guide.</li> <li>Clarified the PTD loops to indicate that there must be one loop per unit of measure.</li> <li>Clarifications to several NJ Use items.</li> <li>Clarification to examples.</li> </ul>
November 4, 1999 Version 1.1	This is a FINAL version for Pennsylvania and New Jersey
December 23, 1999 Draft version 1.1MD1	<ul> <li>Add Maryland use to document – the changes were added to the version 1.1 of the regional standards</li> <li>Added Data Dictionary</li> <li>Added Table of Contents</li> </ul>
January 17, 2000 Draft version 1.1MD2	Clarified REF*45 only used when LDC sending transaction.
February 24, 2000 Version 1.1MD3	Clarified use of Old Acct Number (REF*45) for MD
March 31, 2000 Version 1.1MD4	<ul> <li>Clarified use of FG loop for MD</li> <li>Add load profile and LDC rate code to FG loop for MD future use</li> <li>This transaction is considered FINAL for Maryland</li> </ul>
May 14, 2000 Version 1.2	This document is a new finalized version of PA and MD. NJ is still using Version 1.1.
August 11, 2000 Version 1.2a	Indicate PSEG will use the PTD01=PM loop, rather than the PTD01=SU loop.
September 10, 2000 Version 1.3	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Delmarva only).
October 19, 2001 Version 1.3rev01	<ul> <li>Incorporate Delaware Electric Coop (DEC) information for Delaware</li> <li>Incorporate PA Change Control 028 – change REF*11 from optional to conditional if supplier of record is requesting usage</li> </ul>
December 13, 2001 Version 1.3rev02	<ul> <li>Incorporate NJ Change Control to allow sending of LDC rate code and LDC load Profile in the "FG" loop.</li> <li>Incorporate DE Change Control to allow sending of LDC rate code and LDC load Profile in the "FG" loop. Indicate not used by DEC.</li> </ul>
January 9, 2002 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
December 10, 2003 Version 2.0.1	Incorporate changes for NJ – add TOU values to both PTD*SU and PTD*PM loops. FG loop – make REF*NH required, add optional REF*BF. Add REF*TU to PTD*PM loop.
May 12, 2004 Version 2.0.2	Incorporate changes for PA Change Control 040. This allows TOU information to be provided optionally.

	Version 6.4
January 20, 2006 Version 2-0-3D	<ul> <li>Incorporate NJ Change Control 005 (NJ CleanPower program changes)</li> <li>Incorporate NJ Change Control 006 to reflect current practices</li> </ul>
October 23, 2006 Version 2-0-4D	<ul> <li>Incorporate PA Change Control 043 (Add K4 – kilovolt amperes)</li> <li>Incorporate NJ Change Control 009 (NJ Clean Power – RECO unmetered)</li> <li>Incorporate NJ Change Control 011 (Clarify PSEG use of LDC Rate Type)</li> </ul>
November 3, 2006 Version 2-0-5D	<ul> <li>Incorporate NJ Change Control 012 (Change Billing Cycle (REF*BF) to indicate it will be required for all utilities. PSEG and RECO will be implementing in 1Q 2007).</li> </ul>
February 12, 2007 Version 2-0-6F	Considered FINAL for PA and NJ
July 4, 2009 Version 2-0-8D	<ul> <li>Incorporate NJ Change Control PSEG-E-HU (Indicate PSEG will send SU loop, will send REF*NH in FG loop) Incorporate PA Change Control 049 (PTD*FG, QTY*KC, QTY*KZ required for PJM participants)Incorporate PA Change Control 052 (REF*BF required for PJM participants)</li> <li>Incorporate PA Change Control 053 (REF*NH required for PJM participants)</li> <li>Incorporate PA Change Control 054 (REF*LO required for PJM participants)</li> <li>Incorporate PA Change Control 055 (PECO modifications RT loop)</li> <li>Incorporate MD Change Control RM17-HU</li> </ul>
January 24, 2010 Version 2.1	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
November 4, 2010 Version 2.1.1D	<ul> <li>Incorporate PA Change Control 65 (REF*LF and REF*SV required for First Energy)</li> <li>Incorporate PA Change Control 71 (add QTY01=KA as optional)</li> <li>Incorporate MD Change Control – Admin (Admin/Cleanup for MD)</li> </ul>
February 28, 2011 Version 3.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 16, 2012 Version 3.01	<ul> <li>Incorporate PA Change Control 081 (Clarify RT loop)</li> <li>Incorporate PA Change Control 085 (REF*KY)</li> <li>Incorporate PA Change Control 090 (REF03 in REF*KY)</li> <li>Incorporate PA Change Control 093 (admin updates)</li> <li>Incorporate MD Change Control 008 (clarify PEPCO HU/HI support)</li> <li>Incorporate MD Change Control 010 (PEPCO AMI Support)</li> </ul>
March 8, 2013 Version 6.0	<ul> <li>Moving to v6.0 to align versions across all transaction sets</li> <li>Cleaned up references to Allegheny and APS throughout document</li> <li>Incorporate PA Change Control 087 (add DTM segments to be used with QTY*KC and QTY*KZ to denote current and future values)</li> <li>Incorporate PA Change Control 095 (REF03 in REF*KY)</li> <li>Incorporate PA Change Control 101 (remove AMT*LD from request; rescinds CC 58)</li> <li>Incorporate PA Change Control 102 (increase REF*BF length in Data Dictionary)</li> <li>Incorporate PA Change Control 103 (uniform net meter consumption reporting)</li> <li>Incorporate MD Change Control 014 (make REF*LF &amp; REF*SV same as PA)</li> </ul>
March 17, 2014 Version 6.1	<ul> <li>Incorporate PA Change Control 114 (add REF*PR to PTD*FG &amp; PTD*RT loops)</li> <li>Incorporate MD Change Control 026 (PHI new CIS; changes to 867HU)</li> <li>Incorporate MD Change Control 029 (uniform net meter data reporting)</li> <li>Incorporate MD Change Control 030 (Net Meter Indicator in REF*KY)</li> <li>Incorporate NJ Change Control Electric 015 (Net Meter Indicator in REF*KY)</li> <li>Incorporate NJ Change Control Electric 016 (uniform net meter data reporting)</li> <li>Incorporate NJ Change Control Electric 019 (ACE new CIS: changes to 867HU/HI)</li> <li>Incorporate NJ Change Control Electric 028 (clarify RECO support of 867HU)</li> <li>Incorporate NJ Change Control Electric 031 (RECO removal from IG)</li> <li>Incorporate NJ Change Control Electric 032 (PSE&amp;G admin updates)</li> </ul>
February 18, 2015 Version 6.2	<ul> <li>Incorporate NJ Change Control Electric 035 (REF*MG in PTD*FG to Optional)</li> <li>Incorporate MD Change Control 037 (clean up MD notes section)</li> </ul>

# May 18, 2018 Version 6.4

March 14, 2017 Version 6.3	<ul> <li>Incorporate NJ Change Control Electric 038 (Future PLC value/date for JCPL)</li> <li>Incorporate MD Change Control 043 (Future PLC value/date for Potomac Edison)</li> </ul>
	• Incorporate MD Change Control 045 (Aggregate Net Energy Metering family identifier in REF*AN)
March 18, 2018	• Incorporate PA Change Control 140 (Update to REF*KY gray box)
Version 6.4	• Incorporate PA Change Control 147 (Incorporate Citizens & Wellsboro into IG)
	• Incorporate NJ Change Control Electric 044 (Update to REF*KY gray box)
	Incorporate MD Change Control 050 (Update to REF*KY gray box)

#### **General Notes**

Use

- Historical Usage will be provided to an ESP upon Request. The request will be made using the 814E and 814HU documents.
- Historical Usage can be requested for an entity that is already a customer of the ESP
- Historical Usage can be requested for any customer that has not restricted the release of their historical usage. This is state dependent, some states allow this scenario, others do not.
- The Historical Usage Transaction Set is sent by the LDC only one time per ESP request. No corrections or changes will be transmitted. The Historical Usage data is correct for the point in time that is it requested. Subsequent adjustments to Historical Usage will not be transmitted to the ESP.
- If providing history totalized for an account, use "SU" (Summary) in PTD01, else if providing history by meter, use "PM" (Physical Meter) in PTD01.

LDC Definitions:

The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:

- EDC Electric Distribution Company (Pennsylvania, Delaware)
- LDC Local Distribution Company (New Jersey)
- EC Electric Company (Maryland)

**ESP Definitions:** 

The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:

- EGS Electric Generation Supplier (Pennsylvania)
- TPS Third Party Supplier (New Jersey)
- ES Electric Supplier (Delaware)
- ES Electricity Supplier (Maryland)

Renewable Energy Provider Definition: The term Renewable Energy Provider in this document refers to the party that provides Renewable Energy Credits (RECs). This party does not provide generation to the account. Each state may refer to the Renewable Energy Provider by a different acronym:

• GPM – Green Power Marketer (New Jersey)

**Note:** The transaction will either have an ESP or a Renewable Energy Provider, but not both.

#### Pennsylvania Notes

The Pennsylvania default is 12 months of Historical Usage, the following EDCs offer more than 12 months...

a. PECO – default is 24 months

#### Requirements for uniform support of Net Metered Customers

- SU (Account Services Summary) Loop –reports consumption summarized/totalized for account by unit of measure for net metered customers. (Citizens & Wellsboro, First Energy, PPL, and UGI support)
  - 1. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
  - 2. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
  - 3. In either scenario, the QTY02 will never be signed negative.
- RT (Rate) Loop –reports consumption summarized/totalized by rate and by unit of measure for net metered customers. (PECO supports)
  - 1. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
  - 2. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
  - 3. In either scenario, the QTY02 will never be signed negative.
- PM (Meter Detail) Loop reports consumption provided by meter by unit of measure for net metered customers: (Duquesne only)
  - 1. Single meter reporting both in and out flow.
    - a. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
    - b. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
    - c. In either scenario, the QTY02 will never be signed negative.

#### **Maryland Notes**

#### Demand

 Measured/Billed Demand – add note to Demand segment to indicate PE, BGE, Pepco and Delmarva do not store measured demand, and will send Billed demand.

#### Historical Interval Usage

Maryland EDI CC 15 added support of the EDI 867 Historical Interval (HI) transaction for Maryland. As of 1/28/13 the actual implementation dates have yet to be determined or if the historical data will be provided at the account or meter level for all ECs.

#### Historical Usage Reporting

**BG&E Note:** If this is a Historical Usage (HU) request for an interval account, the response will be accepted with a status of "SNP". This informs the supplier that the historical interval data is available on the web. If this is a Historical Usage (HU) request for a non-interval account, the response will be accepted and the historical usage will be provided via an 867HU. As of January 16, 2014 BGE supports EDI requests for pre-enrollment historical data

**Delmarva MD & PEPCO MD Note:** Effective with new CIS, the supplier will receive 867HU for non-interval billed accounts and the 867HI for interval billed accounts. Historical Usage requests will be processed as follows:

LIN05	Scenario	REF1P Code	867 Action
LIN05 =	HU available on non-interval account	No REF1P sent	867HU sent
HU			
LIN05 =	HU not available	REF1P = HUU	No 867 sent
HU			
LIN05 = HI	HI available	No REF1P sent	867HI sent
LIN05 = HI	Neither historical interval detail or	REF1P = HIU	No 867 sent
	summary data available		
LIN05 = HI	HI data unavailable BUT summary HU	No REF1P sent	867HU sent
	data is available		
LIN05 = HI	HI request on non-interval account	No REF1P sent	867HU sent

**Potomac Edison Note:** PE will provide an 867HU (Monthly Historical Information) for all Historical usage (HU) requests. Requests for historical interval data must be made outside of EDI.

#### Historical Usage Reporting Level

- Providing historical monthly data
  - Delmarva, PEPCO, Potomac Edison & BGE- totalized to account level (PTD\*SU loop)

#### Net Meter Data Reporting Requirements

- Maryland EDI Change Control 029 adopted uniform net meter data reporting for Maryland. Utility support as of December 2014...
  - BGE est. by end of 1Q 2015
  - PHI (Delmarva & PEPCO) with new CIS
  - Potomac Edison (FE) –by end of 2Q 2015 (IU/HIU)

#### Net Meter Data Reporting Requirements (Cont.)

- SU (Account Services Summary) Loop –reports consumption summarized/totalized for account by unit of measure for net metered customers. (Delmarva, PEPCO, Potomac Edison and BGE)
  - 1. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
  - 2. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
  - 3. In either scenario, the QTY02 will never be signed negative.

#### **New Jersey Notes**

#### Historical Usage Information

**Atlantic City Electric:** Effective with new CIS, the supplier will receive 867HU for non-interval billed accounts and the 867HI for interval billed accounts. Historical Usage requests will be processed as follows:

LIN05	Scenario	REF1P Code	867 Action
LIN05 =	HU available on non-interval account	No REF1P sent	867HU sent
HU			
LIN05 =	HU not available	REF1P = HUU	No 867 sent
HU			
LIN05 = HI	HI available	No REF1P sent	867HI sent
LIN05 = HI	Neither historical interval detail or summary data available	REF1P = HIU	No 867 sent
LIN05 = HI	HI data unavailable BUT summary HU data is available	No REF1P sent	867HU sent
LIN05 = HI	HI request on non-interval account	No REF1P sent	867HU sent

**Rockland Electric Company:** follows the New York EDI 867 Historical Usage standard. The NY standard does not include PTD\*FG loop which is required for the other NJ electric utilities in PJM.

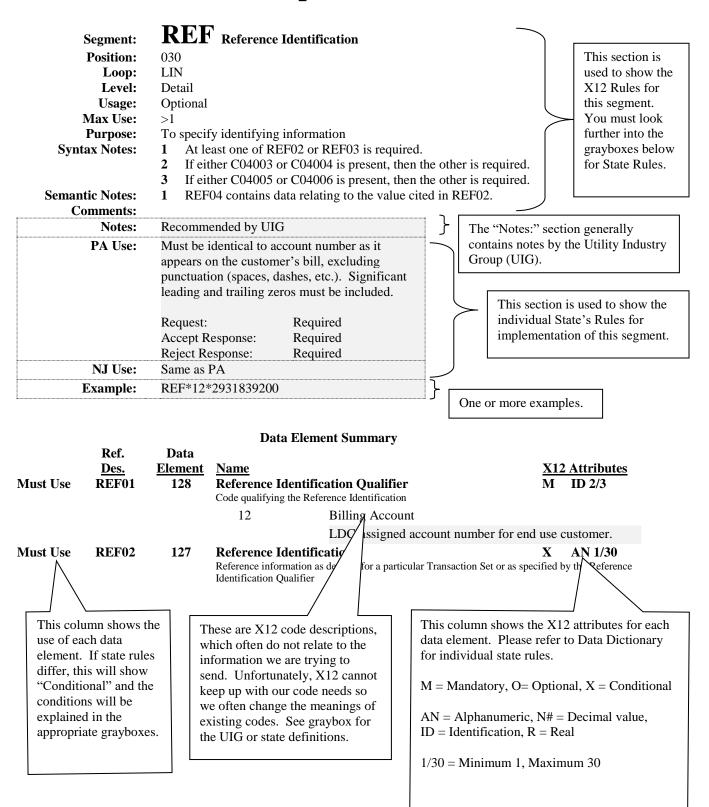

- Rockland Electric sends PLC in REFPR segment of BQ loop
- NSPL is provided manually upon request, contact Rockland Electric for details

#### Net Meter Data Reporting Requirements

NJ EDI Change Control Electric 016 mandates specific data requirements in support of net metered customers. Implementation by utility as follows...

- o Atlantic City Electric with new CIS (est. early 2015)
- O JCP&L 4Q 2014 (867MU/HU) and 1Q 2015 (867IU)
- o PSE&G currently supported, see below for additional PSE&G notes
- SU (Account Services Summary) Loop –reports consumption summarized/totalized for account by unit of measure for net metered customers. (used by Atlantic City Electric JCP&L)
  - 1. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
  - 2. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
  - 3. In either scenario, the QTY02 will never be signed negative.
- SU (Account Services Summary) Loop –reporting both consumption and billed usage for net metered customers. (used by PSE&G Only)
  - 1. Reports customer's billed usage in the QTY01 = QD. This value is the billed usage amount which is the net of the generation/consumption..
  - 2. Reports customer's actual KH consumption in the MEA segment. The QTY01 less the MEA03 = customer's generation KH.
  - 3. In either location (QTY02/MEA03) the value will never be signed negative.

### How to Use the Implementation Guideline

# 867 Historical Usage X12 Structure

Functional Group ID=PT

#### **Heading:**

	Pos. <u>No.</u>	Seg. <u>ID</u>	Name	Req. <u>Des.</u>	Max.Use	Loop <u>Repeat</u>	Notes and Comments
Must Use	010	ST	Transaction Set Header	M	1		
Must Use	020	BPT	Beginning Segment for Product Transfer and Resale	M	1		
			LOOP ID - N1			5	
	080	N1	Name	O	1		
	120	REF	Reference Identification	O	12		

#### **Detail:**

	Pos. <u>No.</u>	Seg. <u>ID</u>	Name LOOP ID - PTD	Req. Des.	Max.Use	Loop Repeat	Notes and Comments
Must Use	010	PTD	Product Transfer and Resale Detail	M	1	71	
	030	REF	Reference Identification	O	20		
			LOOP ID - QTY			>1	
	110	QTY	Quantity	О	1		
	160	MEA	Measurements	O	40		
	210	DTM	Date/Time Reference	O	10		

#### **Summary:**

	Pos.	Seg.	Name	Req. Des.	Max.Use	Loop Repeat	Notes and Comments
	<u>No.</u>	<u>ID</u>	LOOP ID - CTT	<u>Des.</u>	<u>wax.use</u>	<u>Repeat</u>	Comments
	010	CTT	Transaction Totals	О	1		n1
Must Use	030	SE	Transaction Set Trailer	M	1		

#### **Transaction Set Notes**

1. The number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the value of quantities (QTY02) for each QTY segment.

#### **Data Dictionary for 867 Historical Usage**

Appl Field	Field Name	Description	EDI Element	Loop / Related EDI Qualifier	Data Type
1	Purpose Code	Transaction Set Purpose	BPT01 = <b>52</b>		X(2)
2	Transaction Reference Number	Unique Number identifying this transaction.	BPT02		X(30)
3	System Date	Date this transaction was generated from sender's system	BPT03		9(8)

#### PTD Loop for Historical Usage that is Summarized/Totalized by Rate (PTD01 = RT)

A PTD Loop will be provided for each type of consumption measured for the overall account (PTD01=SU) or by meter (PTD01 = PM) or by rate (PTD01=RT) in addition to the PTD loop that provides Scheduling Determinants when appropriate

15.1	Loop Identification	Indicates if usage is provided totalized or by meter.	$PTD01 = \mathbf{RT}$		X(2)
15.2	Profile Group	A code for the Load Profile used for this rate. Differs by LDC. Codes posted on LDC's Web site.	REF02	PTD: REF01= <b>LO</b>	X(30)
15.3	LDC Rate Code	Code indicating the rate a customer is being charged by LDC per tariff. Codes posted on LDC's Web site	REF02	PTD: REF01= <b>NH</b>	X(30)
15.4	LDC Rate Sub-Class	Code to provide further classification of LDC Rate Code	REF02	PTD: REF01= <b>PR</b>	X(30)
15.5	Quantity Qualifier	Represents whether the quantity is actual or estimated:  KA = Estimated Quantity Delivered QD = Actual Quantity Delivered 87 = Actual Quantity Received (Net Meter)  9H = Estimated Quantity Received (Net Meter)	QTY01		X(2)
15.6	Quantity Delivered	Represents quantity of consumption delivered for billing period.	QTY02	QTY01	9(15)
15.7	Quantity Delivered Unit of Measurement	Indicates unit of measurement for quantity of consumption delivered during billing period.	QTY03		X(2)
15.8	Consumption	Represents quantity of consumption delivered for service period. Contains the difference in the meter readings (or as measured by the meter) multiplied by various factors, excluding Power Factor.	MEA03	MEA02 = <b>PRQ</b>	9(9).9(4)
15.9	Unit of Measure	Unit of measure for readings.	MEA04		X(2)
15.10	Measurement Significance Code	Code used to benchmark, qualify, or further define a measurement value.	MEA07		X(2)
15.11	Service Period Start	Start date of the period for which these readings are provided	DTM02	QTY: DTM01 = <b>150</b>	X(8)

1	5.12	End date of the period for which these readings are provided	DTM02	QTY: DTM01 = <b>151</b>	X(8)

#### PTD Loop for Historical Usage that is provided by Meter (PTD01 = PM)

A PTD Loop will be provided for each type of consumption measured for the overall account (PTD01=SU) or by meter (PTD01 = PM) or by rate (PTD01=RT) in addition to the PTD loop that provides Scheduling Determinants when appropriate

21	Loop Identification	Indicates if usage is provided totalized or by meter.	$PTD01 = \mathbf{PM}$		X(2)
22	Meter Number	Serial number of this specific meter (may have multiple meters)	REF02	PTD: REF01 = $\mathbf{MG}$	X(30)
23	Meter Type	Code indicating type of consumption measured & interval at which measurements are taken.	REF02	PTD: REF01 = <b>MT</b>	X(5)
24	Type of metering used for billing	Indicates the type of metering information that will be sent on the 867 transaction.	REF02= 41 (off peak) 42 (on peak) 43 (intermediate) or 51 (totalizer)	NM1: REF01 = TU REF03 = Meter Type (See REF*MT)	X(2)
24.1	Quantity Qualifier	Represents whether the quantity is actual or estimated:  KA = Estimated Quantity Delivered QD = Actual Quantity Delivered 87 = Actual Quantity Received (Net Meter) 9H = Estimated Quantity Received (Net Meter)	QTY01		X(2)
25	Quantity Delivered	Represents quantity of consumption delivered for billing period.	QTY02	QTY01	9(15)
26	Quantity Delivered Unit of Measurement	Indicates unit of measurement for quantity of consumption delivered during billing period.	QTY03		X(2)
27	Consumption	Represents quantity of consumption delivered for service period. Contains the difference in the meter readings (or as measured by the meter) multiplied by various factors, excluding Power Factor.	MEA03	MEA02 = <b>PRQ</b>	9(9).9(4)
28	Unit of Measure	Unit of measure for readings.	MEA04		X(2)
29	Measurement Significance Code	Code used to benchmark, qualify, or further define a measurement value.	MEA07		X(2)
30	Service Period Start	Start date of the period for which these readings are provided	DTM02	QTY: DTM01 = <b>150</b>	X(8)
31	Service Period End	End date of the period for which these readings are provided	DTM02	QTY: DTM01 = <b>151</b>	X(8)

#### PTD Loop for Scheduling Determinants (PTD01 = FG)

This PTD provides Scheduling Determinants when appropriate

# **May 18, 2018** Version 6.4

				Versi	on 6.4
32	Loop Identification	Indicates if usage is provided totalized or by meter.	$PTD01 = \mathbf{FG}$		X(2)
33	Loss Factor	Loss Factor	REF02	PTD:REF01= <b>LF</b>	X(30)
34	Profile Group	A code for the Load Profile used for this customer. Differs by LDC. Codes posted on LDC's Web site.		PTD: REF01= LO	X(30)
35	LDC Rate Code	Code indicating the rate a customer is being charged by LDC per tariff. Codes posted on LDC's Web site	REF02	PTD: REF01= <b>NH</b>	X(30)
36	LDC Rate Sub-Class	Code to provide further classification of LDC Rate Code	REF02	PTD: REF01= <b>PR</b>	X(30)
37	LDC Billing Cycle	LDC Cycle on which the bill will be rendered	REF02	PTD: REF01= <b>BF</b>	X(4)
38	Service Voltage	Service voltage	REF02	PTD:REF01= <b>SV</b>	X(30)
39	Meter Number	Meter Number	REF02	PTD: REF01=MG	X(2)
40	Special Meter Configuration Code	Used to convey there's a special meter present on the account. For example, Net Metering	REF02	PTD: REF01 = <b>KY</b>	X(3)
40.1	Special Meter Configuration Information	PPLEU-used to report the max K1 (demand) the special meter supports	REF03	PTD: REF01 = <b>KY</b>	X(80)
41	Aggregate Net Energy Meter Role	The role of the customer account in the Aggregate Net Energy Meter family	REF02	PTD: REF01= AN	X(30)
42	Peak Load Contribution	Peak load contributions provided to PJM for Installed Capacity calculation (coincident with PJM Peak).	QTY02	PTD: QTY01 = <b>K</b> C	9(15)
43	Unit of Measure	Indicates unit of measurement for quantity of consumption delivered during billing period.	QTY03 = <b>K1</b>	$PTD: QTY01 = \mathbf{QD}$	X(2)
44	Network Service Peak Load	Customer's peak load contribution provided to PJM for the Transmission Service calculation (coincident with LDC peak).	QTY02	PTD: QTY01 = <b>KZ</b>	9(15)
45	Quantity Delivered Unit of Measurement	Indicates unit of measurement for quantity of consumption delivered during billing period.	QTY03 = <b>K1</b>	PTD: QTY01 = <b>QD</b>	X(2)

Segment: ST Transaction Set Header

**Position:** 010

Loop:

Level: Heading Usage: Mandatory

Max Use: 1

Purpose:

To indicate the start of a transaction set and to assign a control number

Syntax Notes:

**Semantic Notes:** 

The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

**Comments:** 

Commicion	
PA Use:	Required
NJ Use:	Required

				Represents actual electricity equivalent hours; billable when usage meets or exc parameters		
			K4	Kilovolt Amperes (KVA)		
			KH	Kilowatt Hour (KWH)		

Segment: MEA Measurements

Position: 160
Loop: QTY
Level: Detail
Usage: Optional
Max Use: 40

**Comments:** 

Purpose: To specify physical measurements or counts, including dimensions, tolerances, variances,

and weights (See Figures Appendix for example of use of C001)

**Syntax Notes:** 1 At least one of MEA03 MEA05 MEA06 or MEA08 is required.

2 If MEA05 is present, then MEA04 is required.3 If MEA06 is present, then MEA04 is required.

4 If MEA07 is present, then at least one of MEA03 MEA05 or MEA06 is required.

5 Only one of MEA08 or MEA03 may be present.

**Semantic Notes:** 1 MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.

1 When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed, use MEA05 as the

negative (-) value and MEA06 as the positive (+) value.

Notes:	The MEA segment is sent for each QTY loop. The MEA will indicate the "time of use" that applies to the QTY. If meter readings are included in the MEA, they will indicate the "time of use" that the meter readings apply to.
PA Use:	Optional field for time of use other than totalizer (MEA07=51). Optional for time of use equal to totalizer (MEA07=51) if that is the only time of use on the account.
NJ Use:	Must use for time of use other than totalizer (MEA07=51). Optional for time of use equal to totalizer (MEA07=51) if that is the only time of use on the account.  Note: For PSE&G net metered customer, the customer's actual KH consumption is reported in the MEA03. The MEA03 less the QTY02 equals customer generation.
DE Use:	Not Used
MD Use:	Not Used
Examples:	MEA**PRQ*14*K1***51 (If meter measures multiple things, you need to send multiple QTY loops, one for each unit of measurement).

#### **Data Element Summary**

Must Use	Des. REF01	Element 128	Name Reference Identification Qualifier Code qualifying the Reference Identification			X12 Attributes M ID 2/3	
			MT	Meter Type			
				Billing Data Types and Interval Freque	encies	3	
Must Use	REF02	127	Reference Identification and Identification Qualifier	cation as defined for a particular Transaction Set or as spe	X cified t	AN 1/30 by the Reference	

When REF01 is MT, the meter type is expressed as a five-character field. The first two characters are the type of consumption, the last three characters are the metering interval. "COMBO" is used for a meter that records more than one measurement. Valid values can be a combination of the following values:

Type of (	Consumption	Metering In	terval
K1	Kilowatt Demand	Nnn	Number of minutes from 001 to 999
K2	Kilovolt Amperes Reactive Demand	ANN	Annual
K3	Kilovolt Amperes Reactive Hour	BIA	Bi-annual
K4	Kilovolt Amperes	BIM	Bi-monthly
K5	Kilovolt Amperes Reactive	DAY	Daily
KH	Kilowatt Hour	MON	Monthly
T9	Thousand Kilowatt Hours	QTR	Quarterly

#### For Example:

KHMON Kilowatt Hours Per Month

K1015 Kilowatt Demand per 15 minute interval

#### **Other Valid Codes**

COMBO This code is used to indicate that the meter has multiple measurements, e.g., one

meter that measures both kWh and Demand.

 $\ QTY \ \ {\it Quantity} \ ({\it KC=Peak} \ {\it Load} \ {\it Contribution})$ **Segment:** 

**Position:** 110 Loop: QTY Detail Level: **Usage:** Optional

Max Use:

**Purpose:** To specify quantity information

**Syntax Notes:** At least one of QTY02 or QTY04 is required.

Only one of QTY02 or QTY04 may be present.

**Semantic Notes:** QTY04 is used when the quantity is non-numeric.

Each QTY/MEA/DTM loop conveys consumption information about one metering period.
Required for PJM participants. The QTY/DTM loop may be sent twice depending on the time of year the Historical Usage is being provided. (PLC is effective June 1 - May 31) One iteration will show the current PLC and a second iteration will show the PLC that will be effective in the period defined in the DTM segment. Currently the PA EDCs change the PLC effective June 1st. Once the EDCs are aware of what the next effective PLC will be (typically in December) they should begin providing it on transactions.
For example, in February 2010 the PLC values would be reported as: QTY*KC*476*K1
DTM*007****RD8*20090601-20100531
QTY*KC*450*K1
DTM*007****RD8*20100601-20110531
Whereas in September 2010 the PLC value would include only one loop because the following year's PLC is undetermined: QTY*KC*450*K1 DTM*007****RD8*20100601-20110531
Required. For the Peak Load Contribution in effect when the transaction is requested. Required for the Future Peak Load Contribution for JCPL when calculated and available. See PA Notes for implementation. NJ Note: PSE&G sends Capacity Obligation to PJM and suppliers.
Same as NJ
Required. This will be the Peak Load Contribution in effect when the transaction is requested. Potomac Edison – follows PA use of effective dates where Future Peak Load Contribution is sent when calculated and available.
