Subject: RE: Spanish Translation Quote Request

Thank you Cara. It was very nice speaking with you. As discussed, your quote is based on the word count @.15 cents per word. The project updates would also be charged at the same rate of .15 cents per word.

I will be in touch soon.

Thanks again.

Hola Denise, Anna and Teresa!

We really want to do this work.

We unfortunately cannot provide an accurate and fair quote with the info provided.

Project 1 has a total of 403 words. We charge 0.15 cents per word, which would be a total of \$60.45.

Project 2 has a total of 684 words or 0.15 cents per word for a total of \$102.60.

We understand these documents (both project 1 and project 2) will be changed 15 times each. Unfortunately we can't give a price for each one of the documents without knowing how many words are in each of the documents or until you send us all of the documents that need to be translated.

To quote a job reasonably and fairly and to the best price and advantage of the government, we need to know the number of words in each change or new document. Please, when you can, send us the new text of each of the documents (30 in total) of this so we can give you an exact estimate cost of this project.

We think this is important work, and we'd love to get involved helping you with it at a fair and best price to everyone based on the actual work involved.

Thanks so much for keeping us top of mind for all of your translation work and opportunities. We most appreciate it!

¡Gracias!

Cara
