This map illustrates the distribution of National Telecommunications and Information Administration (NTIA) approved BEAD Challenge broadband serviceable locations (BSLs) that are considered eligible for funding following the completion of New Jersey's BEAD Challenge process. Please note that locations to be awarded through New Jersey's Broadband Infrastructure Deployment Equity (NJBIDE) Pilot Program have been removed and are not considered eligible. Additionally, while Version 4 (Dec 31, 2023 availability date) of the CostQuest Fabric was used during New Jersey's state-led challenge process, the current map reflects updates to align with locations included in Version 6 of the Fabric.
