Environmental Review for Activity/Project that is Categorically Excluded Subject to Section 58.5

Pursuant to 24 CFR 58.35(a)

Project Information

Project Name: Tropical Storm Ida Community Development Block Grant – Disaster Recovery (CDBG-DR) Long-Term Recovery and Mitigation Support Grants Homeowner Assistance and Recovery Program

Responsible Entity: New Jersey Department of Community Affairs (DCA)

Grant Recipient (if different than Responsible Entity):

State/Local Identifier: New Jersey

Preparer: ICF

Certifying Officer Name and Title: Samuel Viavattine, Deputy Commissioner

Grant Recipient (if different than Responsible Entity):

Consultant (if applicable): ICF
Point of Contact: Tanner Melendez and Steve Sherman, ICF

Direct Comments to:

DRM.EHPComments@dca.nj.gov
Division of Disaster Recovery and Mitigation
New Jersey Department of Community Affairs
101 South Broad Street
PO Box 823
Trenton, NJ 08625-0823

Project Location: 93 Old York Rd., Bridgewater Township, NJ 08807

Description of the Proposed Project [24 CFR 50.12 & 58.32; 40 CFR 1508.25]**:**

This is the site-specific review for activities eligible under the Homeowner Assistance Recovery Program (HARP). The proposed activity is reconstruction of the single-family residential structure at 93 Old York Rd., Bridgewater Township, NJ 08807 (HARP010978R). The structure was damaged as a result of Tropical Storm Ida. The structure was constructed in 1948. Proposed

work would include demolition, sitework, and design and construction of a 4-bedroom / 1,800 square-foot home according to program standards. The project was originally scoped as a rehabilitation with potential elevation; however, during feasibility review, it was determined that the project exceeded the rehabilitation threshold. As a result, the determination was flipped, and full demolition with reconstruction of a new, compliant structure was recommended to better achieve program standards and long-term resilience. All activities would be limited to the disturbed area of the previously developed lot. The location of the proposed activity can be seen in the Project Location Map in Appendix A.

Level of Environmental Review Determination:
Categorically Excluded per 24 CFR 58.35(a)(3)(i), and subject to laws and authorities at §58.5_____

Funding Information

Grant Number	HUD Program	Funding Amount
B-21-DF-34-0001	CDBG-DR, Homeowner Assistance and Recovery Program (HARP)	$456,100.00

Estimated Total HUD Funded Amount: $456,100.00

Estimated Total Project Cost (HUD and non-HUD funds) [24 CFR 58.32(d)]**:** $456,100.00

Compliance with 24 CFR 50.4, 58.5, and 58.6 Laws and Authorities

Record below the compliance or conformance determinations for each statute, executive order, or regulation. Provide credible, traceable, and supportive source documentation for each authority. Where applicable, complete the necessary reviews or consultations and obtain or note applicable permits of approvals. Clearly note citations, dates/names/titles of contacts, and page references. Attach additional documentation as appropriate.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.6		
Airport Hazards 24 CFR Part 51 Subpart D	Yes ☐ No ☒	The project is in compliance. There are no civil commercial service airports within 2,500 ft of the project site nor military airports within 15,000 ft of the project site. See Airport Hazard Map in Appendix B.

Coastal Barrier Resources Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]	Yes ☐ No ☒	The project is in compliance. The designated Coastal Barrier Resources System units in New Jersey are uninhabited and are not located along any of the 12 county HUD or Grantee MID areas (including Somerset County) (See Coastal Barrier Resources Map in Appendix C). Therefore, no project activities would occur on designated coastal barriers or in "otherwise protected areas," and the proposed project would have no impact on coastal barrier resources.
Flood Insurance Flood Disaster Protection Act of 1973 and National Flood Insurance Reform Act of 1994 [42 USC 4001-4128 and 42 USC 5154a]	Yes ☒ No ☐	There is a regulatory floodway mapped within the proposed action's property boundary and there is insurable property within the 100-year floodplain. See the FIRM map in Appendix D. The project is located within an NFIP participating community. Flood insurance is required. The applicant will be required to provide DCA a copy of the flood insurance policy or a paid receipt for the current annual flood insurance premium and a copy of the application for flood insurance. In addition, as a condition of HUD assistance as stated in 24 CFR 55.8(a)(1)(ii); a permanent covenant shall be applied to the property to restrict buildings or improvements that may modify or occupy the floodway. This requirement will be recorded as a permanent restrictive covenant on the property to ensure that future owners understand the flood insurance requirements. Site-specific conditions are included below.
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.5		
Clean Air Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93	Yes ☐ No ☒	The project is in compliance. Emissions associated with project activities are estimated to be well below de minimis thresholds under the General Conformity Rule. Section 176(c) of the Clean Air Act (CAA) requires that any federally funded activity in a nonattainment or maintenance area conforms to the State Implementation Plan (SIP). Conformance with the SIP requires the project activity not:

		• Cause or contribute to a new violation of any standard in any area; • Increase the frequency or severity of any existing violation of any standard in any area; or • Delay timely attainment of any standard or any required interim emission reduction or other milestones in any area. <u>Ozone</u> The State of New Jersey is in nonattainment for the 2015 8-Hour Ozone federal standard of 0.070 parts per million (ppm) and 2008 8-Hour Ozone. New Jersey's nonattainment areas are associated with two larger multi-state nonattainment areas: New York-Northern New Jersey-Long Island and Philadelphia-Wilmington-Atlantic City. Both of New Jersey's nonattainment areas have been classified as either "marginal" or "moderate" ozone nonattainment areas. Somerset County is classified as "Severe 15" for the 8-Hour 2008 standard and "Moderate" for the 8-Hour 2015 standard. The 8-Hour Ozone (1997) standard was revoked on April 6, 2015, and the 1-Hour Ozone (1979) standard was revoked on June 15, 2005. See Figure E-1 and Figure E-4 in Appendix E. <u>Emissions from proposed project</u> Direct emissions from project activities are associated with mobile sources used during reconstruction, rehabilitation, elevation, and mitigation activities, which include plate compactors, loaders, backhoes, cranes, tractors, and excavators. No or minimal indirect emissions associated with project activities are anticipated. Project activities would not delay attainment of NAAQS or contribute to a new or existing violation. Demolition and construction activities may contribute to temporary, short-term emissions of dust proximate to the

		project site but are not expected to affect air quality. Implementation of Best Management Practices (BMPs) during construction activities would contribute to dust suppression. See Figure E-3 and Figure E-4 in Appendix E for consultation with NJDEP for NAAQS and SIP compliance. Conclusion Project activities are not expected to have a significant impact on ozone, and the proposed action is not expected to exceed *de minimis* thresholds established under 40 CFR 93.153. Therefore, the proposed action is exempt from General Conformity requirements and is in compliance with the CAA.
Coastal Zone Management Coastal Zone Management Act, sections 307(c) & (d)	Yes ☐ No ☒	The project is in compliance. The application site is not in a designated Coastal Zone Management Area, the Upland Waterfront Development area, the New Jersey Hackensack Meadowlands District, or Tidelands Claims mapped area. See Coastal Zone Map in Appendix F.
Contamination and Toxic Substances 24 CFR Part 50.3(i) & 58.5(i)(2)	Yes ☒ No ☐	This project is in compliance. There were no federally listed toxics sites of concern within the review radius. There were no Superfund or Brownfield Sites found within 3,000 ft of the property. Toxic Releases, Water Discharges, Air Pollution, Hazardous Waste and Toxic Substances Control Act sites were not found within 250 ft of the property. There were no NJDEP state toxics sites identified within 250 ft. of the project site. The CDC National Environmental Public Health Tracking Network database was used to find radon testing results in Somerset County within the last 10 years. Seven (7) tests were available in Somerset County between 2016 and 2026. The average radon concentration for these tests is 2.59 pCi/L. Based on CDC data, radon concentrations in Somerset County do not exceed 4.0 pCi/L and therefore, testing or mitigation is not required. See Federal and State Toxics Maps and Somerset County radon testing results in

		Appendix G. Based on review of regulatory databases and other information sources, the applicant site DOES NOT appear to be located proximate to a site(s) of environmental concern or have any identified environmental concerns that could impact the site (See Site Inspection in Appendix N). Based on a build date of 1948, LBP and Asbestos measures are required prior to project activities. Mitigation measures for LBP and asbestos are described below.
Endangered Species Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402	Yes ☒ No ☐	This project is in compliance. USFWS provided response on 5/1/25 and 5/4/26 concurring with the determination that the proposed project is not likely to adversely affect federally listed Indiana Bat or proposed listed Tricolored Bat. See attached consultation request/concurrence. Mitigation measures and conditions are included below in the Conditions for Approval and Site-Specific Environmental Conditions Summary sections below.
Explosive and Flammable Hazards 24 CFR Part 51 Subpart C	Yes ☐ No ☒	The project is in compliance. HUD regulations require that there will be no increase in the number of housing units on the property than existed before Tropical Storm Ida. Project activities do not include construction that will increase residential density. No additional housing units will be added to the property.
Farmlands Protection Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658	Yes ☐ No ☒	The project is in compliance. Activities are contained within the applicant's pre-storm property. A change in land use will not occur. No required mitigation measures apply. Project activities on previously disturbed ground are compliant with the Farmlands Protection Policy Act.
Floodplain Management Executive Order 11988, particularly section 2(a); 24 CFR Part 55	Yes ☒ No ☐	The 0.2 percent annual chance flood approach was used to evaluate the project's location within the Floodplain of Concern. The applicant structure is located partially

		within the floodplain, and a portion of the applicant property is located within the FEMA regulatory floodway. Therefore, it was necessary to perform the 8-Step Floodplain Decision-Making Process. The first six steps of the 8-step floodplain decision making process in 24 CFR 55.20 were completed for the proposed project (See 8-Step Floodplain Analysis in Appendix D). The Early Floodplain/Wetland Notice was posted in English and Spanish on the NJDCA website on 2/27/2026 (See Early Floodplain Notices and Postings in Appendix D). As a part of the notice, NJ DCA held a public comment period for the public to "…express concern and provide information about these areas." No comments were received on the Early Floodplain Notice published on 2/27/2026 as part of Step 2 of the process (See No Comment Confirmation in Appendix D). It was concluded that there is no practicable alternative to implementing the proposed project in the Floodplain of Concern in Somerset County. Step 7 is the publication of a final floodplain notice, which will be combined with the Notice of Finding of No Significant Impact and the Notice of Intent to Request Release of Funds. The final notice will be published in accordance with 24 CFR Part 55 for a 15-day public comment period. All comments received during the comment period will be addressed prior to funds being committed to the proposed project. In addition, as a condition of HUD assistance as stated in 24 CFR 55.8(a)(1)(ii); a permanent covenant shall be applied to the property to restrict buildings or improvements that may modify or occupy the floodway. The total estimated project cost is $456,100.00. Based on an interior area of 1,640 square feet, the Market Structure

		Value is $360,964.00. Therefore, the cost of the proposed project is approximately 126% of the pre-storm value of the structure. Based on the proposed action reconstruction and the project cost, the project meets FEMA's definition of substantial improvement and elevation of the structure is required. Elevation activities in the floodplain must adhere to the most recent elevation requirements in accordance with the Flood Hazard Area Control Act rules (N.J.A.C. 7:13). Elevation requirements would be determined using the Floodplain of Concern elevation.
Historic Preservation National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800	Yes ☐ No ☒	The original project was in compliance. The structure was built in 1948. The project does require State Historic Preservation Office (SHPO) consultation. A Programmatic Agreement developed in accordance with National Historic Preservation Act Regulations at 36 CFR § 800.14(b) between the DCA and NJ Historic Preservation Office (HPO), the Advisory Council on Historic Preservation (ACHP), the Delaware Nation, Delaware Tribe of Indians, the Stockbridge-Munsee Community, the Absentee Shawnee Tribe of Indians of Oklahoma, and Shawnee Tribe provides the mechanism for evaluating site-specific effects on historic properties related to CDBG-DR funding activities for Tropical Storm Ida recovery. The Programmatic Agreement sets forth the procedures for: • Evaluating whether the funded activity has the potential to affect a historic property, regardless if any are known to exist at the project site; • If activities may have an effect, provides the process for determining whether the property is listed on or eligible for the National Register of Historic Places (NRHP); • If there is a historic property or district, assessing effects on the

		characteristics that qualify it for the NRHP. The initial proposed scope of work that entailed the construction of a utility building did not meet Tier II Programmatic Allowances for Above Ground Resources or for Archaeological resources and required National Historic Preservation Act Section 106 consultation. The updated proposed scope of work entails the reconstruction of the house, which includes filling in the basement and elevating all mechanics to above ground level. No Above Ground Historic Properties were within the APE, and no Above Ground Historic Properties would be affected by the proposed scope of work. No Archeological Historic Properties would be affected by the proposed scope of work. SHPO concurred no historic properties would be affected by the proposed project on July 31, 2025. The County of Somerset Cultural and Heritage Commission concurred no historic properties would be affected by the proposed project on July 23, 2025. Upon review of the updated proposed scope of work, the previous Section 106 Consultation findings remain valid as no additional archaeological or above ground resources were identified within the APE. SHPO concurred on April 9, 2026 that no historic properties would be affected by the proposed project. The comment period ended on April 18. 2026. Section 106 Consultation is concluded. See Historic Preservation Map in Appendix I.
Noise Abatement and Control Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B	Yes ☐ No ☒	The project is in compliance. The activities are contained within the applicant's pre-storm property. HUD has determined that 24 CFR Part 51 Subpart B is not applicable to disaster recovery programs provided that the disaster assistance is provided to save lives, protect property, protect public health and safety, remove debris and wreckage, or assistance

		that has the effect of restoring facilities substantially as they existed prior to the disaster. Therefore, project activities that do not increase residential density and involve rehabilitation or reconstruction on the same parcel of land do not require additional review. See Noise Email in Appendix J.
Sole Source Aquifers Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes ☐ No ☒	The project is in compliance. The project is located on a sole source aquifer, and the project activity consists of demolition and reconstruction of an existing structure. A Memorandum of Understanding (MOU) between HUD Region II and EPA Region II was established to assist the agencies in meeting the Sole Source Aquifer project review requirements. According to the MOU, EPA and HUD mutually agree that construction of individual residential structures containing 1-4 units would not create a significant hazard to public health, and are therefore excluded from further review. See Sole Source Aquifer Map and Region II MOU in Appendix K.
Wetlands Protection Executive Order 11990, particularly sections 2 and 5	Yes ☒ No ☐	The project is in compliance. There is an NWI-mapped wetland on subject property approximately 190 feet behind the project structure and another mapped wetland on the adjacent property approximately 50 feet from the structure (see Wetlands Map in Appendix L). While the wetlands map indicates there are wetlands present on the project property, based on the site inspection, there was no evidence of wetlands on or adjacent to the subject property (see Site Inspection in Appendix N). Project activities would involve reconstruction of a single-family property on a previously disturbed parcel. Because of the project activity's location within 150 ft of a mapped wetland, the 8-step decision-making process was required. The first six steps of the 8-step floodplain decision making process in 24 CFR 55.20 were completed for the proposed project (See 8-Step Floodplain Analysis in Appendix D). The Early

		Floodplain/Wetland Notice was posted in English and Spanish on the NJDCA website on 2/27/2026 (See Early Floodplain Notices and Postings in Appendix D). As a part of the notice, NJ DCA held a public comment period for the public to "…express concern and provide information about these areas." No comments were received on the Early Floodplain Notice published on 2/27/2026 as part of Step 2 of the process (See No Comment Confirmation in Appendix D). It was concluded that there is no practicable alternative to implementing the proposed project in the floodplain and wetland in Somerset County. Step 7 is the publication of a final floodplain notice, which will be combined with the Notice of Finding of No Significant Impact and the Notice of Intent to Request Release of Funds. The final public notice will be published in accordance with 24 CFR Part 55 for a 15-day public comment period. All comments received during the comment period will be addressed prior to funds being committed to the proposed project. Adverse wetlands impacts are not considered likely. BMPs for erosion and sedimentation control would be implemented as part of HARP. Such BMPs would include: • Wetlands on or in the vicinity of the project site are to be protected from any unnecessary construction activities or disturbance. • Vegetation and exposed soil are to be reestablished as soon as possible after work has been completed. • Existing drain inlets are to be protected from debris, soil, and sedimentation. • No heavy equipment is to be operated within wetlands. Using best management practices, no adverse impact to the wetland is expected. Site-specific conditions are included below.

Wild and Scenic Rivers Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes ☐ No ☒	The project is in compliance. As seen in the Wild and Scenic Rivers Map in Appendix M, the closest wild and scenic rivers are the Musconetcong between Warren and Morris County and the Lower Delaware Wild and Scenic River. There are no Wild and Scenic Rivers in Somerset County.

Field Inspection (Date and completed by)**:**
DCA Inspection Date: 2/11/2025
Inspection Report Preparer: ICF
Inspection Report Prepared Date: 1/15/2026

Summary of Findings and Conclusions:
Environmental analysis has been completed and determined that mitigation measures would be required to avoid adverse impacts to flood insurance, contamination and toxic substances, endangered species, floodplain management, and wetlands.

Based on the findings of this CEST, the project is not anticipated to have adverse impacts with implementation of the mitigation measures listed below.

Mitigation Measures and Conditions [40 CFR 1505.2(c)]

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Flood Insurance	Structures and insurable properties in, or partially in, the 100-year floodplain shown on the effective FEMA Flood Insurance Rate Map (FIRM), must be covered by flood insurance and the flood insurance must be maintained when ownership transfers [24 CFR 58.6(a)(1)]. No funding will be provided to any person who previously received federal flood disaster assistance conditioned on obtaining and maintaining flood insurance but failed to obtain and maintain the insurance [24 CFR 58.6(b)].
Contamination and Toxic Substances	The applicant must comply with all laws and regulations concerning the proper handling, removal, and disposal

	of hazardous materials (e.g., asbestos, lead-based paint) or household waste (e.g., construction and demolition debris, pesticides/herbicides, white goods). The structure was built prior to 1982, therefore Asbestos testing is required. All activities must comply with applicable federal, state, and county laws and regulations regarding asbestos, including but not limited to the following: • National Emission Standard for Asbestos, standard for demolition and renovation, 40 CFR 61.145 • National Emission Standard for Asbestos, standard for waste disposal for manufacturing, fabricating, demolition, and spraying operations, 40 CFR 61.150 • NJAC 7:26-2.12-Generator requirements for disposal of asbestos containing waste materials. • New Jersey Asbestos Control and Licensing Act, N.J.S.A. 34-5A-32 et seq. The structure was built prior to 1978. Therefore, LBP testing is required. All activities must comply with applicable federal, state, and local laws and regulations regarding lead-based paint, including but not limited to HUD's lead-based paint regulations in 24 CFR 35(b)(h)(j).
Endangered Species	The action agency will provide the project proponent/contractor with educational materials describing bat use of buildings. If any evidence of bat occupancy (e.g., live or dead bats, guano, staining at entry points) is observed before or during the project, the project proponent/contractor must immediately pause work on the structure and contact the action agency and the USFWS New Jersey Field Office for further guidance. If a federally listed bat species is determined to be present, the action agency must reinitiate consultation with the USFWS before continuing project activities that may cause disturbance to the bats. As requested by USFWS: "Implementing the above-described requirement for Indiana bats and NLEBs—to pause construction and notify the Service if any evidence of bat occupancy is found—would also allow for the identification and conservation of tricolored bats.

	If the proposed project is not completed prior to the effective date of a final rule to list the tricolored bat (anticipated in 2026), the project proponent should reinitiate coordination with the Service to determine if additional conservation measures may be appropriate to avoid adverse effects to the species."
Floodplain Management	Consistent with 24 CFR 55.8, a permanent covenant or comparable restriction will preserve all onsite floodplain and/or wetland areas from future development or expansion of existing uses in the floodplain. Any rehabilitation that does not expand the footprint of the buildings or the number of units on the site would be allowed within the Floodplain of Concern outside of the floodway. Elevation activities in the floodplain must adhere to the most recent elevation requirements in accordance with the Flood Hazard Area Control Act rules (N.J.A.C. 7:13). Elevation requirements would be determined using the Floodplain of Concern elevation.
Wetlands Protection	The action agency will implement and maintain erosion and sedimentation control measures to prevent deposition of sediment and eroded soil in on-site and off-site wetlands and waters and to prevent erosion in onsite and off-site wetlands and waters. The action agency will minimize soil compaction by minimizing project ground disturbing activities in vegetated areas, including lawns. Staging activities should occur in the front yard to further minimize any potential wetland disturbance.

Conditions for Approval

The following mitigation measures are required as conditions for approval of the project:

1. Acquire all required federal, state, and local permits prior to construction and comply with all permit conditions.
2. Must meet Green Building Standards as defined by one or more of the following categories: ENERGY STAR; EPA Indoor AirPlus; Leadership and Energy in Environmental Design (LEED); and/or ICC-700 National Green Building Standards.
3. If the scope of work of a proposed activity changes, the application for funding must be revised and resubmitted for reevaluation under NEPA.

Historic Preservation

4. All activities must comply with Section 106 of the National Historic Preservation Act per the implementing regulations 36 CFR Part 800. Compliance with Section 106 is achieved through the procedures set forth in the Programmatic Agreement among the, the New Jersey State Historic Preservation Officer, the Advisory Council on Historic Preservation, the Absentee Shawnee Tribe

of Indians of Oklahoma, the Delaware Nation, the Delaware Tribe of Indians, the Shawnee Tribe of Oklahoma, and the Stockbridge Munsee Band of Mohicans, as signed onto by the New Jersey Department of Community Affairs.

5. If project activities uncover archaeological deposits, including any Native American pottery, stone tools, bones, or human remains, the project shall be halted, and the applicant shall immediately stop work in the vicinity of the discovery and take reasonable measures to avoid or minimize harm to the finds. All archeological findings will be secured and access to the sensitive area restricted. The applicant will inform DCA and DCA will consult with the State Historic Preservation Office (SHPO) or Tribal Historic Preservation Office (THPO) and Tribes. Work in sensitive areas cannot resume until consultation is completed and appropriate measures have been taken to ensure that the project is in compliance with the National Historic Preservation Act (NHPA).

Floodplain Management and Flood Insurance

6. Structures and insurable properties in, or partially in, the 100-year floodplain shown on the effective FEMA Flood Insurance Rate Map (FIRM), must be covered by flood insurance and the flood insurance must be maintained when ownership transfers [24 CFR 58.6(a)(1)].
7. No funding will be provided to any person who previously received federal flood disaster assistance conditioned on obtaining and maintaining flood insurance but failed to obtain and maintain the insurance [24 CFR 58.6(b)].
8. All structures funded by the HARP Program, if in, or partially in, the 100-year floodplain shown on the effective FEMA Flood Insurance Rate Map, must be covered by flood insurance and the flood insurance must be maintained for the economic life of the structure [24 CFR 58.6(a)(1)]. This means no funding can be provided in municipalities not participating in or suspended from participation in the National Flood Insurance Program.

Endangered Species

9. **Indiana Bat and Northern Long-eared Bat**
    a. The project proponent will provide the contractor with educational materials describing bat use of buildings.
    b. During the project, if any evidence of bat occupancy (e.g., live or dead bats, guano, staining at entry points) is observed or suspected, the contractor must immediately pause work on the structure and contact the project proponent. In turn, the project proponent must contact the Service for further guidance.
    c. If a federally listed bat species is determined to be present, the federal action agency (or project proponent, if designated as a non-federal representative) must reinitiate consultation with the Service before continuing project activities that may disturb the bats.
10. **Tricolored Bat**
    a. If the proposed project is not completed prior to the effective date of a final rule to list the tricolored bat (anticipated in 2026), the project proponent should reinitiate coordination with the Service to determine if additional conservation measures may be appropriate to avoid adverse effects to the species.
11. **Bog Turtle**
    a. The NJ State Soil Conservation Committee's standards for soil erosion and sediment control will be utilized in BMP's for the property to minimize potential indirect effects to bog turtles and their habitat.
12. **Monarch Butterfly**
    a. The monarch butterfly (Danaus plexippus, proposed threatened) may occur within the action area. This project is not likely to jeopardize the continued existence of this species; therefore, ESA Section 7(a)(4) conference is not required. Once a final rule to list the monarch butterfly is published and goes into effect (typically 30–60 days after publication), Section 7(a)(2) requirements for consultation and Section 9 prohibitions

against unpermitted 'take' of the species will apply. If the proposed project is not completed prior to the effective date of a final rule to list the monarch butterfly, the action agency should assess the project's potential impacts to monarch butterflies and reinitiate consultation with the Service if remaining project activities 'may affect' the species. For assistance, contact the New Jersey Field Office. Information on the monarch butterfly is available at https://www.fws.gov/species/monarch-danaus-plexippus.

b. The Service encourages adherence to best management practices for avoiding impacts to the monarch from project activities and improving habitat where possible; https://www.fws.gov/media/narratives-and-best-practices-federally-listed-proposed-and-candidate-species-new-jersey

13. **Bald Eagles:**
    a. If any of the aforementioned activities (rehabilitation, demolition, or rebuilding) are planned to take place within 660 feet of an active or alternate bald eagle (*Haliaeetus leucocephalus*) nest during the nesting season (January through July or through fledging), it is recommended that the applicant or their designated agent coordinate with the New Jersey state agency responsible for wildlife management. For more information, please visit the Service's regional web page: https://www.fws.gov/program/eagle-management/eagle-incidental-disturbance-and-nest-take- permits.
14. **Migratory Birds:**
    a. The MBTA prohibits incidental injury and killing of birds (including nests, eggs, and chicks), including in your project's action area. Stressors to consider include vegetation removal or alteration (including spread of invasive species); ground disturbance; structures (e.g., window glass, tall features, overhead powerlines, entrapment hazards); lighting; noise; chemical hazards; features or activities that may promote feral cat or predator populations; and human presence. Migratory birds are protected year-round but are particularly vulnerable during their breeding season (March 15 September 15 for many species), during which we recommend conducting field surveys no more than five days before project activities to locate any nests, eggs, and flightless birds. If breeding birds are present in your action area, the Service recommends postponing activity and/or implementing conservation measures that minimize disturbance and avoid violating the MBTA. Please refer to the Migratory Birds section of your IPaC Report for additional information on birds of conservation concern that may occur in the action area, including their breeding season dates and web links to help identify stressors and inform conservation measures. For projects that cannot avoid impacts to migratory birds, proponents should contact the Service's Migratory Birds Project for information on permitting (https://www.fws.gov/program/migratory-bird-permit).
    b. If any native birds are nesting in the structures, it is important to avoid disturbing adults, nests, eggs, or chicks to prevent potential violations of the Migratory Bird Treaty Act. If nests are found or birds are regularly using the structures for roosting, it is recommended that the applicant or their designated agent coordinate with the Service's Field Office. Additionally, they should visit the Service's Migratory Bird Program website at https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory- birds for guidance on how to avoid and minimize impacts.

Wetlands Protection and Water Quality

15. Implement and maintain erosion and sedimentation control measures to prevent deposition of sediment and eroded soil in on-site and off-site wetlands and waters and to prevent erosion in onsite and off-site wetlands and waters.
16. Minimize soil compaction by minimizing project ground disturbing activities in vegetated areas, including lawns.

Noise

17. Outfit all heavy equipment with operating mufflers.

18. If applicable, comply with local noise ordinance.
19. If application site is in a high noise area, then use appropriate Green Building Standard methods (see Condition 2) to attenuate.

Air Quality

20. Use water or chemical dust suppressant to control excessive dust in exposed areas.
21. Cover the load compartments of trucks hauling dust-generating materials.
22. Dust emissions either windblown or generated from construction activities should be controlled to prevent offsite impacts or material tracked onto the roadways. N.J.A.C. 7:27-5.2.
23. Air pollution including odors that are detectable offsite that are injurious to human health or would result in citizen complaints are prohibited. N.J.A.C. 7:27-5.2.
24. Wash heavy trucks and construction vehicles before site departure.
25. Reduce vehicle speed on non-paved areas and keep paved areas clean.
26. Retrofit older equipment with pollution controls.
27. Establish and follow specified procedures for managing contaminated materials discovered or generated during construction.
28. Obtain an air pollution control permit to construct and a certificate to operate for all equipment subject to N.J.A.C. 7:27-8.2(c). Such equipment includes, but is not limited to, the following:
    a. Commercial fuel combustion equipment rated with a maximum heat input of 1,000,000 British Thermal Units per hour or greater to the burning chamber (N.J.A.C. 7:27-8.2(c)1);
    b. Stationary storage tanks for volatile organic compounds with a capacity of 2,000 gallons and a vapor pressure of 0.02 pounds per square inch or greater (N.J.A.C. 7:27-8.2(c)9);
    c. Tanks, reservoirs, containers, or bins with capacity in excess of 2,000 cubic feet used for storage of solid particles (N.J.A.C. 7:27-8.2(c)10); and
    d. Stationary reciprocating engines with a maximum rated power output of 37 kW or greater, used for generating electricity, not including emergency generators (N.J.A.C. 7:27-8.2(c)21).
    e. The applicant should review the requirements of N.J.A.C. 7:27-8.2(c) 1-21 for stationary permitting requirements. This includes but is not limited to, construction equipment-stationary construction equipment or emergency generators, may require air pollution permits if it is located on the site for longer than one-year N.J.A.C. 7:27-8.2(d)15. There are general permits for boilers and emergency generators (https://www.state.nj.us/dep/aqpp/gp.html) if the units can meet the prescribed requirement in the general permits.

(Note: One- or two-family dwellings and dwellings of six or less family units, one of which is owner occupied, are exempt pursuant to NJSA 26:2C-9.2.)

29. Any vehicles involved on the project must adhere to the idling standards (less than 3 minutes) in N.J.A.C. 7:27-14 and 15. Minimize idling and ensure that all on-road vehicles and non-road construction equipment at the project site use ultra-low sulfur fuel (<15 ppm sulfur) in accordance with the federal Non- Road Diesel Rule (40 CFR Parts 9, 69, 80, 89, 94, 1039, 1051, 1065, 1068).
30. If possible, operate newer on-road diesel vehicles and non-road construction equipment equipped with tier 4 engines or an exhaust retrofit device.

Hazardous Materials

31. All activities must comply with applicable federal, state, and county laws and regulations regarding asbestos, including but not limited to the following:
    a. National Emission Standard for Asbestos, standard for demolition and renovation, 40 CFR 61.145
    b. National Emission Standard for Asbestos, standard for waste disposal for manufacturing, fabricating, demolition, and spraying operations, 40 CFR 61.150

c. NJAC 7:26-2.12-Generator requirements for disposal of asbestos containing waste materials.
d. New Jersey Asbestos Control and Licensing Act, N.J.S.A. 34-5A-32 et seq.

32. Applicant must comply with all laws and regulations concerning the proper handling, removal, and disposal of hazardous materials (e.g., asbestos, lead-based paint) or household waste (e.g., construction and demolition debris, pesticides/herbicides, white goods).
33. All activities must comply with applicable federal, state, and local laws and regulations regarding lead-based paint, including but not limited to HUD's lead-based paint regulations in 24 CFR 35(b)(h)(j).
34. All residential structures must be free of mold attributable to Tropical Storm Ida.
35. Radon testing and/or mitigation, as described below, is required for structures not in one of the following categories:
    a. Structures in municipalities NJDEP classifies as having low radon potential.
    b. Structures with unenclosed air space between the entire lowest floor and the ground
    c. Structures that have been evaluated by a radon professional and found to require neither testing nor mitigation to ensure that radon is below the standards of 4 picocuries per liter of air and 0.02 working levels, based on a physical inspection of the property, the characteristics of the buildings, and other valid criteria. The radon professional must meet the qualifications in the HUD Office of Multifamily Development Radon Policy, available at http://portal.hud.gov/hudportal/documents/huddoc?id=13-07ml.pdf, and must be a certified radon mitigation specialist under NJAC 7:28-27.

Reconstructed homes that are not in one of these three exempt categories must incorporate the radon-resistant construction techniques listed in NJAC 5:23-10.4. Homes to be rehabilitated that are not in one of the exempt categories must be tested for radon in accordance with accepted standards and the certification requirements in NJAC 7:28-27. All testing must be documented. If the radon level is below the standards of 4 picocuries per liter of air and 0.02 working levels, no further action is required. If the radon level is at or above either of the standards, radon mitigation measures must be implemented, and the home must be retested until radon levels below the standards have been achieved.

36. Comply with all laws, regulations, and industry standards applicable to aboveground and underground storage tanks, including the New Jersey underground storage tank regulations at NJAC 7:14B.
37. Employ spill mitigation measures immediately upon a spill of hazardous material.

Sole Source Aquifers

38. Comply with all laws, regulations, and industry standards.
39. Storage tanks below the base flood elevation must be watertight and must be anchored to resist floatation and lateral movement during a storm surge or other flood.
40. The total impervious area of a parcel must not be increased significantly. In general, an increase in impervious area of more than 30% will be considered significant. The threshold of significance may be greater than 30% for parcels on which the current impervious area is unusually low and may be less than 30% for parcels on which the current impervious area is unusually high.

Determination:

☐ This categorically excluded activity/project converts to Exempt, per 58.34(a)(12) because there are no circumstances which require compliance with any of the federal laws and authorities cited at §58.5. **Funds may be committed and drawn down after certification of this part** for this (now) EXEMPT project; OR

☒ This categorically excluded activity/project cannot convert to Exempt because there are circumstances which require compliance with one or more federal laws and authorities cited at §58.5. Complete consultation/mitigation protocol requirements, **publish NOI/RROF and obtain "Authority to Use Grant Funds"** (HUD 7015.16) per Section 58.70 and 58.71 before committing or drawing down any funds; OR

☐ This project is now subject to a full Environmental Assessment according to Part 58 Subpart E due to extraordinary circumstances (Section 58.35(c)).

Environmental and Historic Preservation Review Information

The Environmental and Historic Program of the Division of Disaster Recovery and Mitigation ensures that all funded projects meet federal compliance. The federal government requires all construction work done in Hurricane Ida recovery programs and Superstorm Sandy recovery programs that are funded with Community Development Block Grant Disaster Recovery (CDBG-DR) dollars be reviewed in a tiered environmental assessment to ensure projects undertaken will have no significant impact on the environment. Therefore, no construction work can begin on projects until all levels of environmental review have been complete and found to be in compliance. Public notices about the environmental review records for recovery projects are published in English and Spanish on this webpage.

Any individual, group, or agency disagreeing with a project's environmental review determination or wishing to comment on the project may submit written comments within a set public comment period to:

Division of Disaster Recovery and Mitigation, Environmental Historic Program
New Jersey Department of Community Affairs
101 South Broad Street
PO Box 823
Trenton, NJ 08625-0823

Public comments may also be submitted via email at DRM.EHPComments@dca.nj.gov.
When submitting a public comment, please be sure to reference the project name and location in the comment.

Public comments can additionally be submitted to:

Gerilee Bennett, Acting Division Director
Office of Disaster Recovery (ODR) Division, HUD
451 Seventh Street SW
Washington, D.C. 20410

The following are Hurricane Ida recovery projects that are currently in the environmental review public comment period:

Posted on February 27, 2026

Proposed Action under the Homeowner Assistance and Recovery Program (HARP)

Early Notice and Public Review of a Proposed Activity in a Floodplain and Wetland

Project Description: Demolition and reconstruction activities within the footprint of the existing structures to address storm-related damage.

Locations:

Early Notice and Public Review of a Proposed Activity in a Floodplain and Wetland

To: All interested Agencies, Groups, and Individuals

This is to give notice that the New Jersey Department of Community Affairs (DCA), as the Responsible Entity under 24 CFR Part 58, has determined that the following proposed actions under the Homeowner Assistance and Recovery Program (HARP): New Housing Development Program part of the *Tropical Storm Ida Action Plan For the State of New Jersey* (Action Plan) [CDBG-DR, grant number B-21-DF-34-0001] are located in the floodplain and wetland, and DCA will be identifying and evaluating practicable alternatives to locating the actions within the floodplain and wetland and the potential impacts on the floodplain/wetland from the proposed actions, as required by Executive Order 11988, Executive Order 11990, and in accordance with HUD regulations at 24 CFR 55.20 in Subpart C Procedures for Making Determinations on Floodplain Management and Protection of Wetlands.

The State of New Jersey will receive Community Development Block Grant Disaster Recovery (CDBG-DR) funding to support long-term recovery and mitigation efforts following Hurricane Ida. Hurricane Ida passed through New Jersey from September 1st through September 3rd, 2021, bringing lashing winds and torrential rains leading to catastrophic flash flooding over portions of central and northern New Jersey. In response, the State of New Jersey's Action Plan has allocated $68,928,700 to HARP in the 12 affected counties: Bergen, Essex, Hudson, Middlesex, Passaic, Somerset, Union, Gloucester, Hunterdon, Mercer, Morris, and Warren. The HARP will provide grants for activities necessary to restore storm-damaged homes, including rehabilitation, reconstruction, elevation, and/or other mitigation activities such as structural and utility retrofits, grading and slope stabilization, and drainage improvements.

The four (4) proposed project locations are as follows:

- [redacted]
- [redacted]
- [redacted]
- HARP010978R- 93 Old York Rd., Bridgewater Township, NJ 08807

The portions of property of these project locations are located within the floodway. All applicant structures are outside of the floodway and no funded activities will occur within the floodway.

DCA has determined on a site-specific basis as to whether the structures at the four (4) project locations are located within the floodplain by using the best available mapping data from the Federal Emergency Management Agency, United States Fish and Wildlife Service (USFWS) National Wetlands Inventory(NWI), and NJDEP. The structures at the four (4) project locations are located within the floodplain:

- [redacted]
- [redacted]
- [redacted]
  - [redacted]

- [redacted]
- HARP010978R- 93 Old York Rd., Bridgewater Township, NJ 08807
    - The structure is located within the 500-year floodplain. Additionally, there is insurable property within the 100-year floodplain.

All these project parcels are within 150 feet of a wetland. The proposed actions include demolition and reconstruction of the homes within the footprints of the existing lots. No work will occur directly within wetlands, and best management practices for erosion and sedimentation control will be used to minimize potential indirect impacts. Therefore, no impacts to wetlands are anticipated.

The proposed projects will be limited to demolition and reconstruction of the homes within the footprint of the existing lots and will maintain all natural and beneficial functions of the floodplain and wetland including floodwater storage and conveyance, groundwater discharge or recharge, erosion control, water quality maintenance, and habitat for flora and fauna. No funded activities will occur within the floodway. Due to the scope of demolition and reconstruction within the floodplain, elevation is required at the four (4) project locations. The structures will be designed so that the lowest habitable floor is elevated to the Design Flood Elevation determined by the Department of Environmental Protection, minimum Base Flood Elevation plus three (3) feet, or as required by the local jurisdiction, whichever is highest.

There are three primary purposes for this notice. First, people who may be affected by activities in the floodplain and wetland and those who have an interest in the protection of the natural environment should be given an opportunity to express their concerns and provide information about these areas. Commenters are encouraged to offer alternative sites outside of the floodplain and wetland, alternative methods to serve the same project purpose, and methods to minimize and mitigate project impacts on the floodplain/wetland. Second, an adequate public notice program can be an important public educational tool. The dissemination of information and request for public comment about floodplain can facilitate and enhance Federal efforts to reduce the risks and impacts associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the Federal government determines it will participate in actions taking place in floodplain, it must inform those who may be put at greater or continued risk.

Written comments must be received by DCA at the following address on or before March 15, 2026, Division of Disaster Recovery and Mitigation, New Jersey Department of Community Affairs, 101 South Broad Street, PO Box 823, Trenton, NJ 08625 and 609-292-3750, Attention: Samuel Viavattine, Deputy Commissioner. Additional project information, including floodplains and wetlands maps for each affected county, can be viewed from 9 AM to 5 PM at the above address and https://www.nj.gov/dca/ddrm/resources/environmental.shtml. Comments may also be submitted via email at DRM.EHPComments@dca.nj.gov.

Date: February 27, 2026

Aviso preliminar y revisión pública de actividad propuesta en llanura de inundación y humedal

A: Todas las agencias, grupos e individuos interesados en la actividad propuesta

Por medio del presente se notifica que el Departamento de Asuntos Comunitarios de Nueva Jersey (DCA, por sus siglas en inglés), en calidad de entidad responsable bajo 24 CFR, parte 58, ha determinado que la siguiente actividad propuesta bajo el Programa de Asistencia y Recuperación de Propietarios de Viviendas (HARP, por sus siglas en inglés): Programa de Desarrollo de Nuevas Viviendas, es parte del *Plan de Acción frente a los efectos de la Tormenta Tropical Ida para el Estado de Nueva Jersey* (Plan de Acción) [CDBG-DR, subvención número B-21-DF-34-0001], y se ubica en una llanura de inundación y un humedal. Por lo tanto, el DCA identificará y evaluará alternativas viables para establecer las acciones previstas dentro de la llanura de inundación y el humedal, así como los efectos potenciales de las actividades propuestas en esas zonas, como lo requieren la Orden Ejecutiva 11988 y la Orden Ejecutiva 11990, y conforme a las regulaciones del Departamento de Vivienda y Desarrollo Urbano de los Estados Unidos (HUD, por sus siglas en inglés) en 24 CFR 55.20, subparte C: Procedimientos para la toma de decisiones sobre la gestión de llanuras aluviales y protección de humedales.

El Estado de Nueva Jersey recibirá fondos del Bloque de Subvenciones para el Desarrollo de la Comunidad y Recuperación por Desastre (CDBG-DR, por sus siglas en inglés) para apoyar las iniciativas de recuperación y mitigación a largo plazo debido al embate del huracán Ida que atravesó Nueva Jersey entre el 1 de septiembre y el 3 de septiembre del 2021, con vientos azotadores y lluvias torrenciales, que conllevaron inundaciones repentinas catastróficas sobre partes del centro y norte de Nueva Jersey. Para atender los daños de la tormenta, el Plan de Acción del Estado de Nueva Jersey ha asignado $68,928,700 para el HARP en los 12 condados afectados: Bergen, Essex, Hudson, Middlesex, Passaic y Hudson. Somerset, Unión, Gloucester, Hunterdon, Mercer, Morris y Warren. El HARP proporcionará subvenciones para las actividades que sean necesarias con el fin de restaurar las viviendas dañadas por la tormenta, por medio de obras de rehabilitación, reconstrucción, elevación y/u otras de mitigación, tales como la modernización de estructuras y de servicios públicos, la nivelación y estabilización de pendientes, y mediante mejoras al drenaje.

Las cuatro (4) ubicaciones propuestas para los proyectos son las siguientes:

- [redacted]
- [redacted]
- [redacted]
- HARP010978R- 93 Old York Rd., Bridgewater Township, NJ 08807

Algunas áreas específicas donde se ubica el proyecto se encuentran dentro del cauce de inundación. Sin embargo, las estructuras del solicitante están fuera del cauce de inundación y no se financiarán actividades dentro de este cauce.

El DCA ha determinado, con base en un análsis específico del sitio, si las estructuras en las cuatro (4) ubicaciones del proyecto se encuentran dentro de la llanura de inundación con el uso de los mejores datos de cartografía disponibles de la Agencia Federal de Manejo de Emergencias, el Inventario Nacional de Humedales del Servicio de Pesca y Vida Silvestre de los Estados Unidos (USFWS, por sus siglas en inglés) y el Departamento de Protección Ambiental de Nueva Jersey (NJDEP, por sus siglas en inglés).

Las estructuras en las cuatro (4) ubicaciones del proyecto se encuentran dentro de la llanura de inundación:

- [redacted]
- [redacted]
- [redacted]
  - [redacted]
  - [redacted]
- HARP010978R- 93 Old York Rd., Bridgewater Township, NJ 08807
  - La estructura se encuentra dentro de la llanura de inundación de 500 años. Además, existe una propiedad asegurable dentro de la llanura inundable de 100 años.

Todas estas parcelas del proyecto están a 150 pies de un humedal. Las acciones propuestas incluyen la demolición y reconstrucción de las viviendas dentro del área cubierta por los lotes existentes. No se realizará en forma directa ningún trabajo dentro de los humedales, y se usarán las mejores prácticas de manejo para el control de la erosión y la sedimentación para minimizar los posibles impactos indirectos. Por lo tanto, no se prevén impactos en los humedales.

Los proyectos propuestos se limitarán a la demolición y reconstrucción de las viviendas dentro del área de los lotes existentes y se mantendrán todas las funciones naturales y beneficiosas de la llanura de inundación y los humedales, incluyendo el almacenamiento y el acarreo de aguas de inundación, la descarga o recarga de aguas subterráneas, el control de la erosión, el mantenimiento de la calidad del agua y hábitat para la flora y la fauna. No se financiarán actividades dentro del cauce de inundación. Debido al alcance de la demolición y reconstrucción dentro de la llanura de inundación, se requiere elevar las cuatro (4) ubicaciones del proyecto y se diseñarán las estructuras para que el piso más bajo habitable se eleve a la Elevación de Diseño ante Inundaciones, determinada por el DEP, es decir, a la mínima Elevación de Inundación Base más tres (3) pies, o según la requiera la jurisdicción local, a la que sea más alta.

Este aviso tiene tres propósitos principales. En primer lugar, dar oportunidad de expresar sus preocupaciones y proporcionar información sobre estas zonas a las personas que puedan verse afectadas por las actividades en la llanura de inundación y los humedales, así como a las que tienen interés en la protección del medio ambiente natural. Se exhorta a quienes deseen enviar comentarios a ofrecer sitios alternativos fuera de la llanura de inundación y el humedal, otros métodos con el mismo propósito del proyecto, y métodos para minimizar y mitigar los efectos del proyecto en la llanura de inundación y el humedal. En segundo lugar, un programa adecuado de avisos públicos puede ser una importante herramienta educativa pública, ya que la difusión de información y la solicitud de comentarios públicos sobre llanuras de inundación pueden facilitar y mejorar las iniciativas federales para reducir los riesgos e impactos asociados con la ocupación y modificación de estas áreas especiales. Tercero, como cuestión de

equidad, cuando el Gobierno federal determina que participará en acciones que tienen lugar en llanuras de inundación, debe informar a quienes puedan estar en mayor o continuo riesgo.

El DCA recibirá los comentarios por escrito en la siguiente dirección en o antes del 15 de marzo de 2026, **Division of Disaster Recovery and Mitigation, New Jersey Department of Community Affairs, 101 South Broad Street, PO Box 823, Trenton, NJ 08625 and 609-292-3750, Attention: Samuel Viavattine, Deputy Commissioner.** Se puede obtener información adicional del proyecto, incluyendo sobre las llanuras de inundación y los mapas de humedales para cada condado afectado, en la dirección anterior, entre las 9 a.m. y 5 p.m., y en https://www.nj.gov/dca/ddrm/resources/environmental.shtml. Los comentarios también pueden enviarse por correo electrónico a DRM.EHPComments@dca.nj.gov.

Date: 27 de febrero de 2026

U.S. Department of Housing and Urban Development Community Development Block Grant Disaster Recovery

New Jersey Department of Community Affairs Homeowner Assistance of Recovery Program (HARP)

8-STEP DECISION MAKING PROCESS

Somerset County, New Jersey

Introduction

The Homeowner Assistance Recovery Program (HARP), as proposed by the New Jersey Department of Community Affairs (NJ DCA) is in response to extreme rainfall and significant flash flooding caused by Tropical Storm Ida and aims to address the State's need for housing, especially safe, decent, and affordable housing.

This document summarizes the 8-step floodplain and wetland decision making process completed for HARP as proposed by NJ DCA.

HARP would provide funding for homeowners of single-family homes (one to four residential units) within the twelve most impacted counties (Bergen, Essex, Hudson, Middlesex, Passaic, Somerset, Union, Gloucester, Hunterdon, Mercer, Morris, Warren). HARP provides grants to eligible property owners for activities necessary to restore their storm-damaged structures, including rehabilitation, reconstruction, elevation, and/or other mitigation activities. Owners with structures or insurable property located partially or wholly within the Special Flood Hazard Area (SFHA) or other New Jersey Department of Environmental Protection (NJDEP)-designated flood risk areas would be required to obtain and maintain flood insurance. The homeowner will be required to provide DCA a copy of the flood insurance policy or a paid receipt for the current annual flood insurance premium and a copy of the application for flood insurance. In addition, as a condition of HUD assistance as stated in 24 CFR 55.8(a)(1)(ii); a permanent covenant shall be applied to the property to restrict buildings or improvements that may modify or occupy the floodway and permanent flood insurance would be placed on the property to ensure that flood insurance is maintained when ownership transfers.

The proposed project (HARP010978) is located at 93 Old York Rd., Bridgewater Township, Somerset County, NJ 08807

Step 1: Determine whether the action is located in a Federal Flood Risk Management Standard floodplain or wetland.

NJ DCA has determined on a site-specific basis as to whether a parcel is located within the floodplain or a wetland by using the best available mapping data from the Federal Emergency Management Agency, United States Fish and Wildlife Service National Wetlands Inventory, and NJDEP. The 0.2 percent annual chance flood approach was used to determine whether the action is located in a

floodplain. The subject parcel at the proposed project location is partially located within the floodway, and according to the FIRM (Panel 34035C0141E, effective 9/28/2007), the insurable property is located partially within the 100-year floodplain (Zone AE). The floodway covers a significant portion of the back yard on the southern extent of the property. The structure is not impacted by the floodway.

The proposed project location is partially located within a Freshwater Pond wetland and a Freshwater Forested/Shrub wetland, as identified by the USFWS National Wetland Inventory. However, proposed work will be limited to reconstruction activities within the footprint of the existing structure. Based on the proposed action of reconstruction within the existing developed footprint at the project location, no impacts to wetlands are anticipated. Best management practices for erosion and sedimentation control will be used to minimize potential impacts.

NJ DCA has determined that project activities associated with HARP may be located in, or affect, the floodplain and/or wetlands. When required, homes would be elevated above the floodplain elevation as identified on the best available floodplain maps in accordance with federal, state, and local regulations.

Project activities with structures or insurable property located partially or wholly within the 100-year floodplain would be required to participate in the National Flood Insurance Program (NFIP). The NFIP requirement is not applicable to projects with structures or insurable property located in Zone X or those outside of all SFHA floodplains.

Step 2: Notify the public for early review of the proposal and involve the affected and interested public in the decision-making process.

A 15-day "Early Notice and Public Review of a Proposed Activity in a Floodplain and Wetland" was published on February 27, 2026 on the NJ DCA website. The notice was available in English and Spanish. The 15-day comment period expired on March 15, 2026.

DCA provided confirmation on March 16, 2026, that no comments were received from the public in response to the Early Notice.

Step 3: Identify and evaluate practicable alternatives.

HARP provides grants to eligible homeowners of single-family homes (one to four units). The program assists property owners in achieving safe and code-compliant housing that meets minimum property standards through rehabilitation, reconstruction, elevation, and/or other mitigation activities. Other alternatives would not serve to meet the dual purpose of helping the property owner rebuild and to rebuild in such a way as to better withstand the next major storm event.

New Jersey is the most densely populated state in the country and therefore, a policy to prohibit any development in the floodplain is not considered practicable due to the great number of parcels located within the floodplain and wetlands in the counties most affected by Hurricane Ida.

The only practicable alternative would be the No Action Alternative, which would mean that applicants would not receive grants under HARP. As a result, these property owners would not be provided financial assistance to rehabilitate, reconstruct, elevate, or otherwise mitigate their homes to

better withstand the next storm event. Thus, their properties would be more vulnerable to future flooding conditions. Therefore, the No Action Alternative would neither address the State's need for safe, decent, and affordable housing, nor would it require homes within the floodplain to be elevated to the highest standard for flood protection.

Step 4: Identify Potential Direct and Indirect Impacts of Associated with the Occupancy or Modification of the Floodplain and Wetlands

The proposed project would involve rehabilitation, reconstruction, and/or other mitigation activities to a storm-damaged single-family home (one to four units) on a previously developed parcel within the floodplain and wetland. Thus, the proposed project would enable the homeowner to reconstruct their home but would not expand the housing stock relative to conditions prior to Hurricane Ida and thereby would not increase floodplain or wetland occupancy. Homes within the floodplain would be required to be elevated if they meet the substantial improvement requirement, thereby reducing future damages from flooding. The only exceptions to this requirement are historic structures that are listed on the National Register of Historic Places, determined eligible for listing on the National Register, determined to contribute to a historic district, listed on the state inventory of historic places, or listed on the inventory of historic places of a community with a certified historic preservation program (see definition of historic structure in 44 CFR 59.1). These structures would have elevation height requirements considered on a case-by-case basis. The total estimated project cost is $456,100.00. Based on an interior area of 1,640 square feet, the Market Structure Value is $360,964.00. Therefore, the cost of the proposed project is approximately 126% of the pre-storm value of the structure. Based on the proposed action reconstruction and the project cost, the project meets FEMA's definition of substantial improvement and elevation of the structure is required. Elevation activities in the floodplain must adhere to the most recent elevation requirements in accordance with the Flood Hazard Area Control Act rules (N.J.A.C. 7:13). Elevation requirements would be determined using the Floodplain of Concern elevation.

Step 5: Where practicable, design or modify the proposed action to minimize the potential adverse impacts to lives, property, and natural values within the floodplain and to restore, and preserve the values of the floodplain and wetlands.

Property owners participating in HARP would be required to adhere to the following conditions to minimize the threat to property, minimize losses from flooding, and benefit floodplain and wetland values:

1. With the exception of historic structures (as defined in 44 CFR 59.1), all proposed reconstruction, substantial improvements (as defined in 44 CFR 59.1), and elevation activities in the floodplain must adhere to the most recent elevation requirements in accordance with the Flood Hazard Area Control Act rules (N.J.A.C. 7:13). Elevation requirements would be determined using the Floodplain of Concern elevation.
2. The elevation of historic structures would be considered on a case-by-case basis.
3. Structures and insurable properties in, or partially in, the 100-year floodplain shown on the effective FEMA Flood Insurance Rate Map (FIRM), must be covered by flood insurance and the flood insurance must be maintained when ownership transfers [24 CFR 58.6(a)(1)].
4. In the case of "Coastal High Hazard" areas, a registered professional engineer is to either develop, review or approve, per the associated location, specific Applicant elevation plans that

demonstrate the design meets the current standards for Coastal High Hazard zones in FEMA regulation 44 CFR Part 60.3(e) as required by HUD Regulation 24 CFR Part 55.1 (c)(3).

5. Wetlands on or in the vicinity of the project site are to be protected from any unnecessary construction activities or disturbance.
6. Vegetation and exposed soil are to be reestablished as soon as possible after work has been completed.
7. Existing drain inlets are to be protected from debris, soil, and sedimentation.
8. No heavy equipment is to be operated within wetlands.

Therefore, the requirements of HARP will help ensure a minimal adverse impact to the floodplain and wetland at the proposed project location.

Step 6: Reevaluate the Alternatives.

The analysis in Steps 4 and 5 provides no basis for modifying the preliminary conclusion reached in Step 3.

In the absence of the proposed actions, the applicant would not receive financial assistance to rehabilitate, reconstruct, or otherwise repair their storm-damaged structure, and may not be able to afford to do so on their own. As a result, the property owner would not be provided financial assistance to rehabilitate, reconstruct, or elevate their home and thus their property would be more vulnerable to future flooding conditions. Thus, the No Action alternative would neither address the State's need for safe, decent, and affordable housing, nor would it require homes within the floodplain to be elevated to the highest standard for flood protection. Additionally, selecting alternative project locations outside of the floodplain is not considered practicable due to the great number of parcels located within the floodplain and wetlands in the counties most affected by Hurricane Ida.

Step 7: Determination of No Practicable Alternative

It is the determination of NJ DCA that there is no practicable alternative to locating the proposed project in the floodplain and wetland. This is due to 1) the need to provide safe and affordable housing; 2) the desire not to displace residents; and 3) the ability to mitigate and minimize impacts on human health, public property and floodplain and wetland values.

A final notice will be posted on the NJ DCA website and will be available in English and Spanish. The notice will explain the reasons why the modified project must be located in the floodplain, offer a list of alternatives considered at Steps 3 and 6, and describe all mitigation measures at Step 5 taken to minimize adverse impacts and preserve natural and beneficial floodplain values.

Step 8: Implement the Proposed Action

Step 8 is implementation of the proposed project. NJ DCA will ensure that the mitigating measures identified in the steps above are implemented.

Air Quality Emissions Estimates

Step 1: Obtain national data that relates residential housing spending to diesel fuel usage from Evaluation of Methodologies to Estimate Nonroad Mobile Source Usage, prepared by Sierra Research for the Office of Mobile Sources, U.S. Environmental Protection Agency (report number SR93-03-02, March 19, 1993, Table 7-4 on page 7-6). Based on the 1987 Census of Construction, $1,200 of off-highway fuel is used for every million dollars of single-family housing (SFH) construction. Also, $880 of off-highway fuel is used for every million dollars of non-SFH residential construction. Assuming the Tropical Storm Ida construction activities will be a mix of SFH and non-SFH residential construction, an average value of $1,040 of off-highway fuel per million dollars of construction will be used.

Step 2: Convert the diesel fuel usage factor to gallons of fuel per million dollars ($M) of current residential construction spending. An average 1987 diesel price of $0.55 per gallon is from page 7-10 of the Sierra report. To convert the construction spending from 1987 dollars to current dollars, producer price indices (PPI) for finished goods less food and energy were obtained for 1987 (113.3) and 2022 (242.771) from U.S. Department of Labor Bureau of Labor Statistics.[1] The diesel fuel usage factor is converted as follows:

$1,040 fuel/$M1987constn X 1 gal diesel/$0.55 X 113.3/242.771 = 882.47 gal diesel/$Mconstn

Step 3: Obtain emission factors in terms of annual tons of pollutant per million gallons of nonroad diesel fuel to enable the estimation of pollutant emissions per million dollars of construction

[1] https://www.bls.gov/ppi/detailed-report/ppi-detailed-report-december-2022.pdf.

spending. As part of the New Jersey Superstorm Sandy Recovery Program, the NJDEP ran the EPA NONROAD model to produce annual construction pollutant emissions and fuel usage. The NONROAD results were used to generate emission factors by considering the total annual construction pollutant emissions for the twelve counties along with the total diesel fuel used by the construction equipment. This resulted in emission factors of 6.90, 64.89, 5.51 and 0.13 pollutant tons per million gallons of diesel fuel for VOC, NOx, PM2.5 and SO2 respectively. Using the emission factors from the NONROAD model and 882.47 gal diesel/$Mconstn from Step 2, the following emission factors are calculated: 0.0078, 0.0735, 0.00624 and 0.00015 annual tons of pollutant per million dollars of residential construction spending for VOC, NOx, PM2.5 and SO2 respectively.

Step 4: Apply the emission factors to the projected spending for Tropical Storm Ida recovery projects. The spending for the project is estimated to be $120 million over a 24-month period beginning mid-2023 and ending mid-2025. Although construction will take place over the course of the 24-month period, for a conservative analysis the full funding amount will be considered for a single year of emissions estimates. General conformity emissions are estimated for each impacted nonattainment area. Of the 12 counties in which HUD-funded Tropical Storm Ida recovery projects will be concentrated, 10 are in the northern ozone nonattainment area and 2 are in the southern nonattainment area. The northern PM2.5 nonattainment area includes 11 of the 12 counties. Therefore, for the ozone precursor pollutants (VOC and NOx), 2024 project construction spending is assumed to be $20 million for the southern ozone nonattainment area and $100 million for the northern ozone nonattainment area, and for PM2.5, 2024 project construction spending is assumed to be $110 million.[2] Using these spending assumptions and the emission factors from Step 3, the following are the estimated 2024 emissions:

Table E-3: Estimated VOC, NO_x, and PM2.5 Emissions for 2024

Nonattainment Area	VOC (tons/year)	NOx (tons/year)	PM2.5 (tons/year)	SO2 (tons/year)
Ozone Northern	.78	7.35	N/A	N/A
Ozone Southern	.156	1.47	N/A	N/A
PM2.5 Northern	N/A	N/A	.69	.02
General Conformity Limits	25	25	100	100

[2] This assumes that the $120 million in project spending is split evenly between the 12 counties, for a total of $10 million for each county.

Figure E-3: NJDEP Air Quality Consultation Request Letter and Email Transmittal

Figure E-4: NJDEP Consultation Response

ENVIRONMENTAL FINDING: The project is in compliance. A Tier 1 was completed which analyzed the total program air quality impacts for HARP, SRRP, and Smart Move projects. While this CEST falls outside of the scope of the Tier 1, the analysis conducted for air quality is applicable for this application because the Tier 1 found that program activities would not have any significant impact on ozone, and the proposed actions for the program are not expected to exceed de minimis thresholds. Given the scope of this site-specific action, reconstruction of the single-family structure would not exceed de minimis thresholds.

Subject: NJ DCA Tier 1 Environmental Assessment Air Quality Evaluation

Dear Mr. Pepe,

The New Jersey Department of Community Affairs (DCA) is preparing a Tiered Environmental Review to process applications for long-term recovery and mitigation efforts following Tropical Storm Ida through Federal U.S. Department of Housing and Urban Development (HUD) Community Development Block Grant – Disaster Recovery (CDBG-DR) funds. CDBG-DR funds will be used to restore storm-damaged homes, including rehabilitation, reconstruction, elevation and/or other mitigation activities (including structural and utility retrofits, grading and slope stabilization, and drainage improvements) from the remnants of Tropical Storm Ida in 2021. DCA, acting as the Responsible Entity in lieu of HUD, is required under the Clean Air Act to evaluate the potential air quality impacts of the proposed projects.

DCA is notifying your agency so that you can review the proposed compliance process to meet the National Ambient Air Quality Standards (NAAQS) and New Jersey State Implementation Plan (SIP).

Proposed Project Background

DCA has allocated CDBG-DR funds for the Homeowner Assistance and Recovery Program (HARP), the Small Rental Repair Program (SRRP), and Smart Move Program. Provided below is a detailed description of each program:

- Homeowner Assistance and Recovery Program (HARP) - Provides grants to eligible homeowners for expenses necessary to restore their storm-damaged homes, including rehabilitation, reconstruction, elevation, and/or other mitigation activities. Mitigation activities could include, but are not limited to, structural and utility retrofits to make the building more resistant to floods, grading and slope stabilization, and drainage improvements. Eligible structure types include single-family homes, duplexes, triplexes, townhomes, modular homes, manufactured homes, and condominiums.
- Small Rental Repair Program (SRRP) - Provides zero interest forgivable loans to owners of rental properties for activities necessary to restore storm-damaged rental housing for low- and moderate-income renters, including rehabilitation, reconstruction, elevation, and/or other

mitigation activities. Mitigation activities include, but are not limited to, structural and utility retrofits to make the building more resistant to floods, grading and slope stabilization, and drainage improvements.

- Smart Move Program - Subsidizes the new development of quality, energy-efficient, resilient, and affordable single-family housing in lower risk areas within or near disaster-impacted communities that are participating in Blue Acres buyout programs as well as disaster impacted first-time homebuyers with incomes at or below 120% AMI. The program aims to provide safe housing for relocating residents and new affordable housing in low-risk areas.

The geographic extent of these programs will be the 12 counties determined eligible for funding under presidential declaration DR-4614 and identified under New Jersey's Ida Recovery Action Plan, located on the DCA website: https://www.nj.gov/dca/ddrm/home/idaactionplan.shtml. Counties include Bergen, Essex, Gloucester, Hudson, Hunterdon, Mercer, Middlesex, Morris, Passaic, Somerset, Union, and Warren (**Attachment 1**).

Review Procedures

Through the environmental review procedures and applicable mitigation measures, DCA intends for proposed CDBG-DR funded activities to avoid negative impacts to air quality during construction and operations of the proposed projects. The proposed review procedures describe how DCA will act as the responsible federal entity to oversee and document that the proposed action complies with state and federal regulations.

Since site-specific locations are not known at this time, DCA intends to complete a tiered environmental review, made up of a broad review (Tier 1) and a site-specific review (Tier 2). The first tier will be 12 county-wide environmental reviews, which examine all environmental topics listed in the U.S. HUD regulations for CDGB-DR funding, including 24 CFR 58.5 and 58.6, and National Environmental Policy Act (NEPA). The second tier will require analysis at the site-specific review level. Each site-specific project will be assigned to one of the following activity categories.

1) **Rehabilitation**: Repairing (possibly including elevating) homes and small rental properties that sustained damage as a result of Tropical Storm Ida but were not so severely damaged that reconstruction is required. The rehabilitation must result in a housing unit that meets minimum property standards, the State of New Jersey's Uniform Construction Code, and the HUD Office of Community Planning and Development's Green Building Retrofit checklist, when applicable ("Proposed Action 1").
2) **Reconstruction within existing footprint**: Construction of a new dwelling on the existing property within 20.0 percent of the original (first-floor) building footprint ("Proposed Action 2").
3) **Reconstruction beyond existing footprint**: Construction of a new dwelling on the existing property that exceeds 20.0 percent of the original (first-floor) building footprint ("Proposed Action 3").
4) **New Construction**: New construction of single-family homes. The new developments will be built outside the 500-year floodplain and the inland or coastal climate adjusted floodplain, as defined by DEP. The site and housing designs will include additional resilience and energy efficiency construction standards, which will be defined in the program guidelines. ("Proposed Action 4").

DCA understands that New Jersey is currently in nonattainment status in some areas for 8-hour ozone (2008; 2015) and sulfur dioxide (portion of Warren County). DCA's review of the NAAQS, the NJ SIP, and

previous emissions estimates for the NJ Sandy recovery project[1] have resulted in a determination that the proposed actions would not be expected to equal or exceed the *de minimis* thresholds established under 40 CFR 93.153 and would therefore be exempt from general conformity requirements.

Best management practices will be required for all construction activities by way of mandatory mitigation measures:

- Use of water in exposed areas to control excessive dust.
- Covering trucks hauling soil and other materials to prevent dust generation.
- Minimize idling of all vehicles.
- Retrofitting older equipment with pollution control measures.

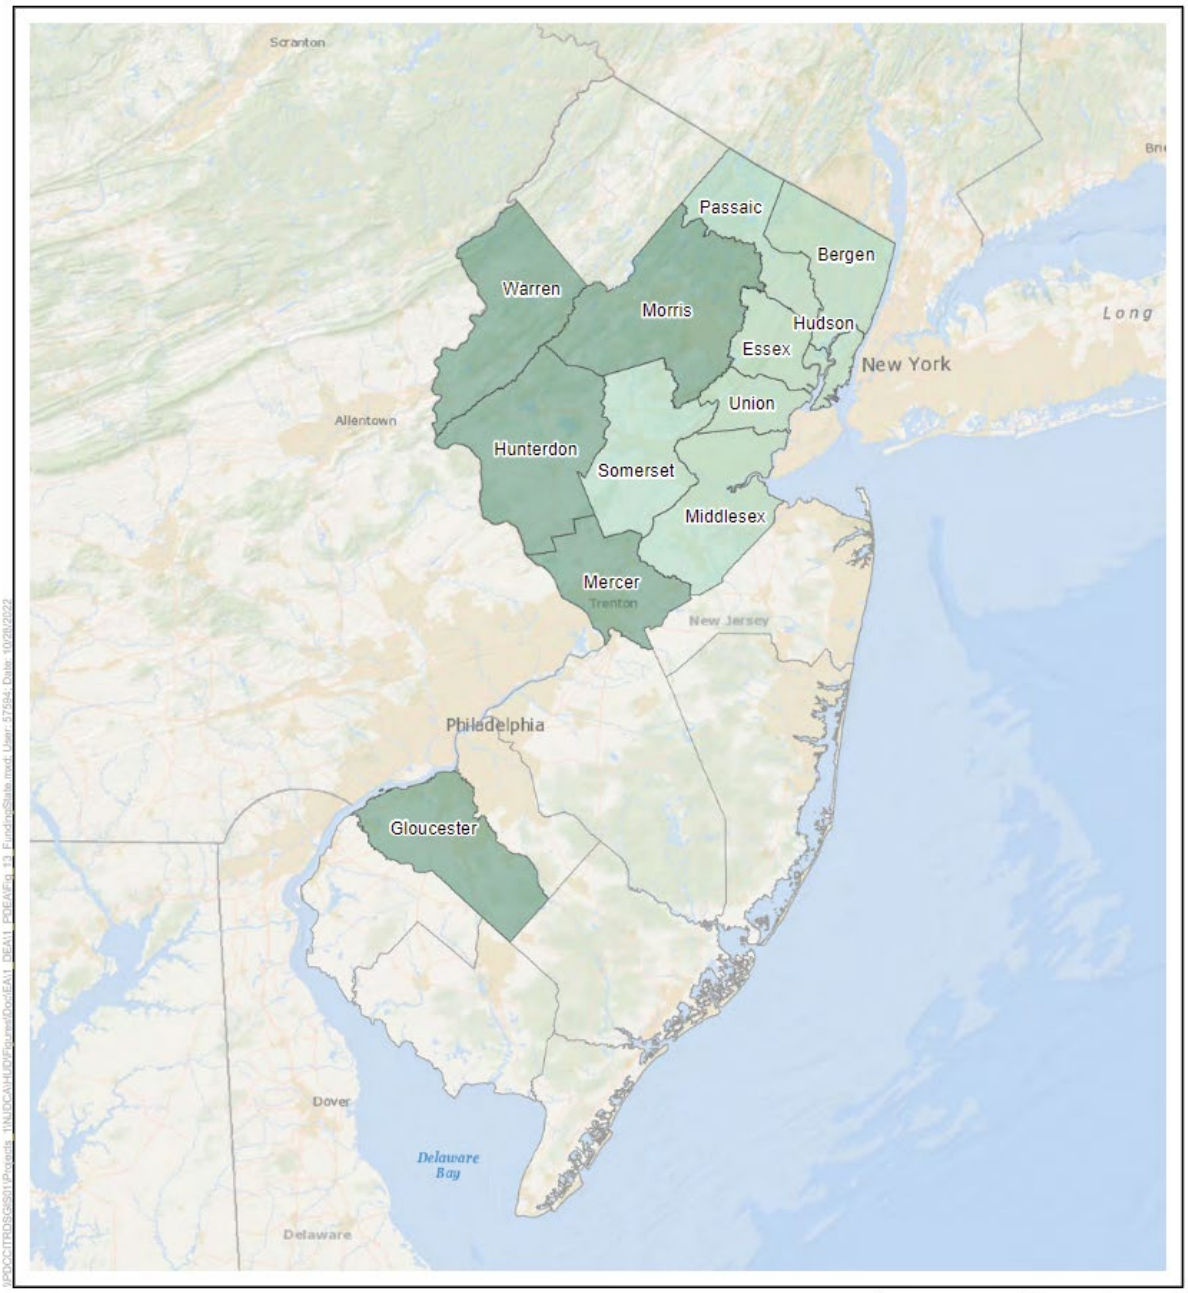

Thank you for your assistance with this matter. Please provide your response to Samuel Viavattine via e-mail at [redacted]

Sincerely,

Samuel Viavattine, Deputy Commissioner
New Jersey Department of Community Affairs
PO Box 823
Trenton, NJ 08625

Attachment 1: Counties eligible for Tropical Storm Ida funding.
Attachment 2: AQ Emissions Estimate.

[1] Provided in Attachment 2. The emissions estimates were prepared in 2013 with a projection to 2014 for analysis purposes. The programs being evaluated as part of the Tropical Storm Ida recovery project would expend up to approximately $119 million in federal funds; the Hurricane Sandy recovery project evaluated the estimated emissions from approximately $1.8 billion in federal funding.

Attachment 1: Counties Eligible for HARP, SRRP and Smart Move Funding

Attachment 2

Methodology to Estimate Emissions from the Housing Rehabilitation, Reconstruction, Elevation, and Mitigation Associated With Hurricane Sandy—Use of Fuel for Residential Construction and Average Pollutant Emission Factors

Step 1: Obtain national data that relates residential housing spending to diesel fuel usage from Evaluation of Methodologies to Estimate Nonroad Mobile Source Usage, prepared by Sierra Research for the Office of Mobile Sources, U.S. Environmental Protection Agency (report number SR93-03-02, March 19, 1993, Table 7-4 on page 7-6). Based on the 1987 Census of Construction, $1,200 of off-highway fuel is used for every million dollars of single family housing (SFH) construction. Also, $880 of off-highway fuel is used for every million dollars of non-SFH residential construction. Assuming the Superstorm Sandy construction activities will be a mix of SFH and non-SFH residential construction, an average value of $1,040 of off-highway fuel per million dollars of construction will be used.

Step 2: Convert the diesel fuel usage factor to gallons of fuel per million dollars ($M) of current residential construction spending. An average 1987 diesel price of $0.55 per gallon is from page 7-10 of the Sierra report. To convert the construction spending from 1987 dollars to current dollars, producer price indices (PPI) for finished goods less food and energy were obtained for 1987 (113.3) and 2012 (182.4) from http://data.bls.gov/pdq/SurveyOutputServlet . The diesel fuel usage factor is converted as follows:

$1,040 fuel/$M1987constn X 1 gal diesel/$0.55 X 113.3/182.4 = 1,175 gal diesel/$Mconstn

Step 3: Obtain emission factors in terms of annual tons of pollutant per million gallons of nonroad diesel fuel to enable the estimation of pollutant emissions per million dollars of construction spending. The NJDEP ran the EPA NONROAD model to produce 2014 annual construction pollutant emissions and fuel usage for the nine New Jersey counties in which Superstorm Sandy recovery efforts will be concentrated. Details regarding the results of the NONROAD model runs are provided in the appendix. The NONROAD results were used to generate emission factors by considering the total annual construction pollutant emissions for the nine counties along with the total diesel fuel used by the construction equipment. This resulted in emission factors of: 6.90, 64.89, 5.51 and 0.13 pollutant tons per million gallons of diesel fuel for VOC, NOx, PM2.5 and SO2 respectively. Using the emission factors from the NONROAD model and 1,175 gal diesel/$Mconstn from Step 2, the following emission factors are calculated: 0.00811, 0.0762, 0.00647 and 0.00015 annual tons of pollutant per million dollars of residential construction spending for VOC, NOx, PM2.5 and SO2 respectively.

Step 4: Apply the emission factors to the projected spending for the Superstorm Sandy rebuilding project. The spending for the project is estimated to be $1.8 billion over a 24 month period beginning mid-2013 and ending mid-2015. The focus of this analysis will be the 2014 calendar year because project construction emissions are expected to be highest in that year (half of $1.8 billion or $900 million). General conformity emissions are estimated for each impacted nonattainment area. Of the nine counties in which HUD-funded Superstorm Sandy recovery projects will be concentrated, six are in the northern ozone nonattainment area and three are in the southern nonattainment area. However, the shoreline length is roughly equally split between the northern and southern ozone nonattainment areas. Six of the nine counties are in the northern

PM2.5 nonattainment area. Therefore, for the ozone precursor pollutants (VOC and NOx), 2014 project construction spending is assumed to be $450 million (half of $900 million) for each nonattainment area and for PM2.5, 2014 project construction spending is assumed to be $600 million (2/3 of $900 million). Using these spending assumptions and the emission factors from Step 3, the following are the estimated 2014 emissions:

Table 1: Estimated VOC, NO_x and PM2.5 Emissions Associated with HUD-Funded Housing Projects

Nonattainment Area	VOC (tons/year)	NOx (tons/year)	PM2.5 (tons/year)	SO2 (tons/year)
Ozone Northern	4	34	NA	NA
Ozone Southern	4	34	NA	NA
PM2.5 Northern	NA	NA	4	0.09
General Conformity Limits	25	100	100	100

The methodology used to determine the emissions estimates in Table 1: Estimated VOC, NO_x and PM2.5 Emissions Associated with HUD-Funded Housing Projects is consistent with the damage reported by county and the method of distribution of funds included in the New Jersey Department of Community Affairs, Community Development Block Grant Disaster Recovery Action Plan (March 2013).[1]

Subject: [EXTERNAL] RE: NJ DCA Hurricane Ida Tier 1 EAs

Good Morning,

Hope you had a nice holiday. I just wanted to follow up on the request below. For HUD-funded CDBG-DR Tier 1 (county-wide) environmental assessments, should we send consultation letters regarding Air Quality, Endangered Species and Contamination and Toxic Substances to the Office of Permitting and Project Navigation or to the relevant NJDEP divisions (i.e.. Division of Air Quality)?

Thank you,
Steven

Subject: NJ DCA Hurricane Ida Tier 1 EAs

Good Morning,

ICF is supporting DCA in drafting 12 county-wide Tier 1 HUD Community Development Block Grant-Disaster Recovery Environmental Assessments (EAs). The Tier 1 EAs will analyze the proposed program actions of providing housing assistance for properties that were impacted from Hurricane Ida or areas located within or near disaster-impacted communities. These actions include activities necessary to restore homeowners/landlords' storm-damaged homes, including rehabilitation, reconstruction, elevation and/or other mitigation activities. While the Tier 1 EAs will be a broad county-wide review of environmental impacts, the subsequent Tier 2s will be site-specific reviews of reconstruction, rehabilitation or new construction of housing structures.

In developing the Tier 1 EAs, we wanted to confirm the proposed approach and obtain guidance on a few environmental resource sections. Provided below are those resources along with some additional details of which we are requesting information. Where applicable, we are modeling the approaches based on the NJ Sandy Recovery Program.

- **Air Quality**:

    - Confirmation of the proposed Broad County Tier 1 and Site-Specific Tier 2 approach
- **Endangered Species**
    - Confirmation of the proposed Broad County Tier 1 and Site-Specific Tier 2 approach
    - Guidance on incorporating state listed species and critical habitat in environmental reviews
    - Guidance on required state permits and/or mitigation measures
- **Contamination and Toxic Substances**
    - Confirmation of the proposed Broad County Tier 1 and Site-Specific Tier 2 approach
    - Confirmation of search radius/clearance requirements for toxic sites (ex: superfund, brownfield, RCRA…)
    - Guidance on required state listed sites to analyze within range of the proposed action

While we do not anticipate that permits will be required for the Broad County-wide Tier 1 EAs, there may be some permits for the subsequent site-specific Tier 2 environmental reviews of mostly single-family structures. Do you know which points of contact I should reach out to at DEP for the above resources categories? We will be sending along a letter and email to the appropriate points of contact which detail the proposed action (for Tier 1s and Tier 2s) along with the proposed approaches.

Thanks,
Steve

Steven Sherman | Senior Environmental Planner, Environment & Planning | [redacted]

RE: Request for Guidance: NJ Department of Community Affairs Hurricane Ida Tier 1 Environmental Assessment
12 counties: Passaic, Bergen, Hudson, Essex, Union, Morris, Warren, Hunterdon, Sommerset, Middlesex, Mercer, Gloucester.

The New Jersey Department of Environmental Protection's (Department) Office of Permitting and Project Navigation (OPPN) distributed for review and comment a request for guidance on the proposed approach to prepare the NJ DCA Tier 1 Environmental Assessment. ICF International is supporting the Department of Community Affairs in drafting 12 county-wide Tier 1 HUD Community Development Block Grant-Disaster Recovery Environmental Assessments (EAs). The Tier 1 EAs will analyze the proposed program actions of providing housing assistance for properties that were impacted from Hurricane Ida or areas located within or near disaster-impacted communities. These actions include activities necessary to restore homeowners/landlords' storm-damaged homes, including rehabilitation, reconstruction, elevation and/or other mitigation activities. While the Tier 1 EAs will be a broad county-wide review of environmental impacts, the subsequent Tier 2s will be site-specific reviews of reconstruction, rehabilitation, or new construction of housing structures.

Based on the information provide for review, the Department offers the following comments for your consideration:

Division of Land Resource Protection
Bureau of Tidelands
The review process should include an analysis of potential Tidelands ownership. Tidelands refers to all lands that are now or were formerly flowed by the mean high tide of a natural waterbody (such as the ocean, bays, and tidal sections of rivers and creeks, and includes marshlands inundated by the tide). The State of New Jersey owns in fee simple all lands that are flowed by the tide up to the high-water line and claims ownership of those formerly flowed tidelands as delineated on the Tidelands Claims Maps. In those areas that are still flowed by the tide, the claim line is not static, and are subject to continuing shoreline processes where the State's Tidelands ownership can extend to the current mean high water line that may be inshore of the mapped claim line. Tidelands concerns property ownership rights and regulatory permit approval does not convey nor relinquish the State's ownership rights. The existing structure or continued use thereof, or the construction, reconstruction, placement of fill and/or shoreline stabilization work are examples of activities that may require Tidelands approval via a lease, license, or grant if the activity or structure is located within currently flowed Tidelands or Tidelands claim area.

Bureau of Flood Hazard Area and Stormwater Engineering

Flood hazard authorization will be required for the various types of projects which include reconstruction within the existing footprint (Proposed Action 2), reconstruction beyond the existing footprint (Proposed Action 3), and new construction (Proposed Action 4). If the rehabilitation (Proposed Action 1) of a home result in a substantial improvement, then a flood hazard authorization will be required. For reference, a substantial improvement is one in which the cost of doing the work equals or exceeds 50% of the market value of the home. Regardless, if rehabilitation involves elevating a home, a flood hazard authorization will be required.

DCA relies on the Uniform Construction Code (UCC). The UCC governs elevations of the lowest floor of a building. This is consistent with the Flood Hazard Rules, however, may need further analysis. UCC and Flood Hazard differs for additions to buildings that do not result in a substantial improvement. The UCC does not require the floor of the addition to be at any specific elevation, however, the Flood Hazard regulations requires the floor of the addition to be elevated at least one foot above the flood hazard elevation. This inconsistency can lead to compliance issues and frustration on the part of building owners.

Whether categorized into Proposed Actions 2 or 3, any reconstruction of an existing building cannot extend into the floodway. In cases where the original footprint is in the floodway, deviations from this footprint upon reconstruction may not necessarily qualify for authorization under the Flood Hazard Area Control Act Rules.

Please be aware that encroachment into the riparian zone is minimized, and where unavoidable, does not exceed allowable regulatory limits.

If you have any questions, please contact Christina Albizati at [redacted]

Historic Preservation Office

The Historic Preservation Office (HPO) is consulting with the Department of Community Affairs (DCA) regarding these programs, pursuant to Section 106 of the National Historic Preservation Act. DCA is in the process of drafting a Programmatic Agreement (PA) to address historic preservation consultation for these programs. The PA will govern all consultation processes and exemptions for each of DCA's United States Department of Housing and Urban Development-funded programs related to Hurricane Ida. As a result, we look forward to further consultation with DCA regarding the development and implementation of this agreement.

If additional consultation with the HPO is needed for this undertaking, please reference the HPO project number 23-0494 in any future calls, emails, submissions, or written correspondence to help expedite your review and response.

If you have any questions, please contact Jesse West-Rosenthal at [redacted]

New Jersey Division of Fish Wildlife

The Office of Environmental Review is reviewing the additionally submitted documents and will follow up with written guidance.

If you have any questions, please contact Kelly Davis at [redacted]

If you have any questions regarding the Endangered and Non-Game Species Program, please contact Kathy Clark at [redacted]

Division of Resilience Engineering & Construction

Bureau of Climate Resilience Design & Engineering

The following comments are based on the approach for each level of review to comply with Environmental Assessment Contamination and Toxic Substance Approach Comments, under 24 CFR 58.5 (i)(2)(i). As noted, HUD requires the proposed project site and adjacent areas be free of hazardous materials, contamination, toxic chemicals and gases, and radioactive substances, where a hazard could affect the health and safety of occupants of the property or conflict with the intended utilization of the property.

Tier 1 Approach:

Hazards: It is recommended in HUD policies, along with Federal, State and local standards, that following hazards be included in this section of the Tier 1: Radon, Asbestos, Lead-based Paint (LBP) and Mold. As well as best management practices on the overall approach, including demolition guidance for residences that contain asbestos and LBP, and how these hazards will be assessed in the site-specific Tier 2 reviews. All residential structures funded by HUD should be "free and clear" of the above noted items.

EPA Screening: The general approach of utilizing EPA's NEPAssist at the counties level for a broad review is acceptable, with understanding that a site-specific review will be needed to catch any additional EPA sites that may be listed after the Tier 1 is complete.

Tier 2 Approach:

Screening and Review Criteria: While utilizing NJDEP GeoWeb, there is a known contaminated sites list (KCSL) that is useful for the initial site screening. It is recommended that DCA generate a detailed review process that identifies the exact criteria used to "clear" and "not clear" project sites. This detailed process should include what mitigation is appropriate with certain hazards. The review process criteria should identify what specific documents or maps will be used to support any determination and who will be making those determinations.

Document Review: If the document review is an Open Public Records Act (OPRA) file review request, online documents only, the qualifications to perform the review must be noted on behalf of DCA. It is recommended for DCA staff to be trained on GeoWeb information to understand the information and to establish the connected databases that can be used determine site-specific SRP information.

Consultation: DCA intends to determine that the site and/or facilities do not conflict with the intended use of the project, and clarify how the information is determined. Including if there are multiple media concerns and transport concerns via soil, groundwater, and vapor. It is recommended that DCA document a review diagram of when consultation is needed and who they intend to consult with when these transport and potential exposure concerns are identified. This may be an internal meeting with SRP staff to agree on consultation criteria including time frame, contacts, and consultation product.

Site Inspections: Site inspections should include past and/or present evidence of Underground Storage Tanks (USTs) and/or Aboveground Storage Tanks (ASTs) not only on the property or within a structure but adjacent to the structure/property. It is recommended that the site inspection identify hazards such as asbestos, LBP, or mold.

Phase 1 Reviews: It is unclear the purpose of a Phase 1 at this stage of the funding. If all the above-noted items were reviewed and the hazards and mitigation requirements the Phase 1 would be the document needed for a purchaser to protect their property investment. The Tier 2's are essentially the documents that protect HUD's investment. On previous HUD-funded projects, Phase 1 documents were typically provided by commercial entities to protect their investment. The project team utilizes that Phase 1 and any other site remediation-type documents to support remediation of a hazard or that no hazard exists. The project team would confirm those hazards with the Tier 2 review. It is not recommended DCA perform Phase 1 reviews.

If you have any questions, please contact Kim McEvoy at [redacted]

Air Permitting

N.J.S.A. 26:2C-9.2d exempts (1) One- or two-family dwellings and (2) A dwelling of six or less family units, one of which is owner occupied from air permitting.

The applicant should review the requirements of N.J.A.C. 7:27-8.2(c) 1-21 for stationary permitting requirements. This includes but is not limited to, construction equipment-stationary construction equipment or emergency generators, may require air pollution permits if it is located on the site for longer than one year N.J.A.C. 7:27-8.2(d)15.

There are general permits for boilers and emergency generators (https://www.state.nj.us/dep/aqpp/gp.html) if the units can meet the prescribed requirement in the general permits.

Idling Vehicles- any vehicles involved on the project must adhere to the idling standards (less than 3 minutes) in N.J.A.C. 7:27-14 and 15.

Air pollution including odors that are detectable offsite that are injurious to human health or would result in citizen complaints are prohibited. N.J.A.C. 7:27-5.2.

Fugitive Dust - dust emissions either windblown or generated from construction activities should be controlled to prevent offsite impacts or material tracked onto the roadways. N.J.A.C. 7:27-5.2.

If you have any questions, please contact Danny Wong at [redacted]

Air Bureau of Evaluation and Planning

The Air Quality Evaluation states the 12 counties determined eligible for funding include: Bergen, Essex, Gloucester, Hudson, Hunterdon, Mercer, Middlesex, Morris, Passaic, Somerset, Union, and Warren.

Bergen, Essex, Hudson, Hunterdon, Middlesex, Morris, Passaic, Somerset, Union, and Warren counties are part of the New York, Northern New Jersey, Long Island, and Connecticut (NY-NJ-CT) ozone nonattainment area, while Gloucester and Mercer counties are part of the Philadelphia-Wilmington-Atlantic City (PA-NJ-MD-DE) ozone nonattainment area. On October 7, 2022, the U.S. Environmental Protection Agency (USEPA) issued two final rules that reclassified New Jersey's nonattainment areas. 87 FR 60926 reclassified the NY-NJ-CT nonattainment area from "serious" to "severe" nonattainment for the 75 ppb 2008 8-hour ozone National Ambient Air Quality Standard (NAAQS), and 87 FR 60897 reclassified the PA-NJ-MD-DE nonattainment area from "marginal" to "moderate" for the 70 ppb 2015 8-hour ozone NAAQS. In the Federal General Conformity regulation (40 CFR 93.153), the corresponding de minimis level for a "severe" nonattainment area is 25 tons per year (tpy) for NOx or VOC, and 100 tpy for NOx and 50 tpy for VOC for a "moderate" nonattainment area. The effective date of these rules is November 7, 2022.

It is recommended that the applicant ensure that the correct classifications and thresholds are included in the draft Environmental Assessments and used to determine compliance with General Conformity regulations.

More information on the reclassification of the NY-NJ-CT nonattainment area for the 2008 8-hour ozone standard can be found here: https://www.govinfo.gov/content/pkg/FR-2022-10-07/pdf/2022-20458.pdf.

More information on the reclassification of the PA-NJ-MD-DE nonattainment area for the 2015 8-hour ozone standard can be found here: https://www.govinfo.gov/content/pkg/FR-2022-10-07/pdf/2022-20460.pdf.

Attachment 2 of the Air Quality Evaluation ("Methodology to Estimate Emissions from the Housing Rehabilitation, Reconstruction, Elevation, and Mitigation Associated with Hurricane Sandy – Use of Fuel for Residential Construction and Average Pollutant Emission Factors") contains the methodology used to estimate emissions for New Jersey Sandy Recovery projects that took place during a 24 month period beginning mid-2013 and ending mid-2015. While the Department accepted this methodology for the evaluation of the analogous Sandy recovery projects, please note that use of this methodology with all of the Sandy assumptions would result in very conservative (high) estimates of emissions from the upcoming Ida recovery projects. The producer price indices (PPI) for finished goods less food and energy (from 2012), and the nonroad equipment emission factors (from 2014) can be updated to more recent values that will result in directionally lower project emissions estimates.

For example, the most recently available PPI for finished goods less food and energy for the year 2022 (242.771) can be found here: https://www.bls.gov/ppi/detailed-report/ppi-detailed-report-december-2022.pdf.

If you have any questions, please contact Connor Milligan at [redacted]

Thank you for providing the New Jersey Department of Environmental Protection the opportunity to comment on the Request for Guidance: NJ Department of Community Affairs Hurricane Ida Tier 1 Environmental Assessment. Should you have any questions or need additional information, please contact Hannah Locke at the Office of Permitting and Project Navigation at [redacted]

Sincerely,

David Pepe, Director

Project Code: 2025-0074153
Project Name: HARP010978R

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

If the enclosed list indicates that any listed species may be present in your action area, please visit the New Jersey Field Office Project Review Guide web page as the next step in evaluating potential project impacts: http://www.fws.gov/northeast/njfieldoffice/Endangered/consultation.html

On the New Jersey Field Office consultation web page you will find:

- habitat descriptions, survey protocols, and recommended best management practices for listed species;
- recommended procedures for submitting information to this office; and
- links to other Federal and State agencies, the Section 7 Consultation Handbook, the Service's wind energy guidelines, communication tower recommendations, the National Bald Eagle Management Guidelines, and other resources and recommendations for protecting wildlife resources.

The enclosed list may change as new information about listed species becomes available. As per Federal regulations at 50 CFR 402.12(e), the enclosed list is only valid for 90 days. Please return to the IPaC website at regular intervals during project planning and implementation to obtain an updated species list. When using IPaC, be careful about drawing the boundary of your Project Location. Remember that your action area under the ESA is not limited to just the footprint of the project. The action area also includes all areas that may be indirectly affected through impacts

such as noise, visual disturbance, erosion, sedimentation, hydrologic change, chemical exposure, reduced availability or access to food resources, barriers to movement, increased human intrusions or access, and all areas affected by reasonably foreseeable future that would not occur without ("but for") the project that is currently being proposed.

We appreciate your concern for threatened and endangered species. The Service encourages Federal and non-Federal project proponents to consider listed, proposed, and candidate species early in the planning process. Feel free to contact this office if you would like more information or assistance evaluating potential project impacts to federally listed species or other wildlife resources. Please include the project code in the header of this letter with any correspondence about your project.

Attachment(s):

- Official Species List
- USFWS National Wildlife Refuges and Fish Hatcheries
- Bald & Golden Eagles
- Migratory Birds
- Wetlands

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

New Jersey Ecological Services Field Office
4 E. Jimmie Leeds Road, Suite 4
Galloway, NJ 8205
(609) 646-9310

PROJECT SUMMARY

Project Code: 2025-0074153
Project Name: HARP010978R
Project Type: Residential Construction
Project Description: The proposed activity is reconstruction (Proposed Action 2) of the single-unit residential structure at the address listed above. The structure was damaged as a result of Tropical Storm Ida. The existing structure would be demolished and replaced with a new single-unit residential structure. The lowest occupied floor of the new structure would be elevated at least 2 feet above the highest applicable 100-year flood level determined using the best available data. Construction of the new dwelling on the existing property is within 20.0 percent of the original (first-floor) building footprint. A map showing the location of the proposed activity is attached.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.55724645,-74.65722308555397,14z

Counties: Somerset County, New Jersey

ENDANGERED SPECIES ACT SPECIES

There is a total of 3 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

MAMMALS

NAME	STATUS
Indiana Bat *Myotis sodalis* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/5949 General project design guidelines: https://ipac.ecosphere.fws.gov/project/RZK44DYLBBFVRKKMCBL4LKJFEM/documents/generated/10545.pdf	Endangered
Tricolored Bat *Perimyotis subflavus* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/10515 General project design guidelines: https://ipac.ecosphere.fws.gov/project/RZK44DYLBBFVRKKMCBL4LKJFEM/documents/generated/10545.pdf	Proposed Endangered

INSECTS

NAME	STATUS
Monarch Butterfly *Danaus plexippus* There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/9743 General project design guidelines: https://ipac.ecosphere.fws.gov/project/RZK44DYLBBFVRKKMCBL4LKJFEM/documents/generated/10545.pdf	Proposed Threatened

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The Bald and Golden Eagle Protection Act of 1940.
2. The Migratory Birds Treaty Act of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

There are Bald Eagles and/or Golden Eagles in your project area.

Measures for Proactively Minimizing Eagle Impacts
For information on how to best avoid and minimize disturbance to nesting bald eagles, please review the National Bald Eagle Management Guidelines. You may employ the timing and activity-specific distance recommendations in this document when designing your project/ activity to avoid and minimize eagle impacts. For bald eagle information specific to Alaska, please refer to Bald Eagle Nesting and Sensitivity to Human Activity.

The FWS does not currently have guidelines for avoiding and minimizing disturbance to nesting Golden Eagles. For site-specific recommendations regarding nesting Golden Eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

If disturbance or take of eagles cannot be avoided, an incidental take permit may be available to authorize any take that results from, but is not the purpose of, an otherwise lawful activity. For assistance making this determination for Bald Eagles, visit the Do I Need A Permit Tool. For assistance making this determination for golden eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

Ensure Your Eagle List is Accurate and Complete
If your project area is in a poorly surveyed area in IPaC, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the Supplemental Information on Migratory Birds and Eagles, to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to bald or golden eagles on your list, see the "Probability of Presence Summary" below to see when these bald or golden eagles are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Sep 1 to Jul 31
Golden Eagle *Aquila chrysaetos* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds elsewhere

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

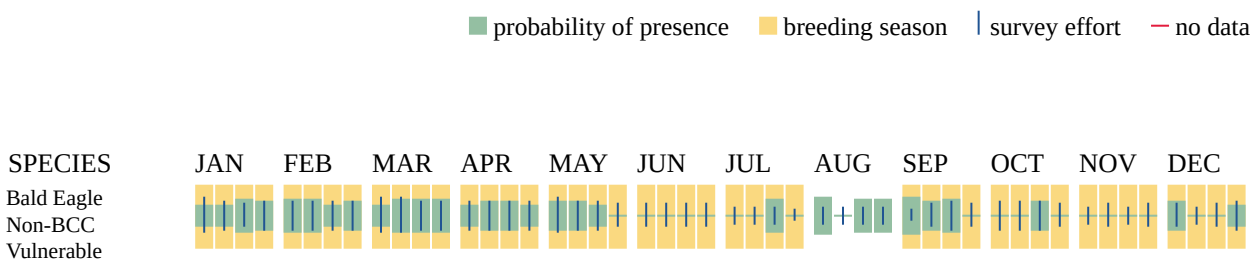

Probability of Presence (■)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (■)
Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)
Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Golden Eagle
Non-BCC
Vulnerable

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management

MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) [1] prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service).

---

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the "Probability of Presence Summary" below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Sep 1 to Jul 31
Black-billed Cuckoo *Coccyzus erythropthalmus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9399	Breeds May 15 to Oct 10

NAME	BREEDING SEASON
Chimney Swift *Chaetura pelagica* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9406	Breeds Mar 15 to Aug 25
Golden Eagle *Aquila chrysaetos* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds elsewhere
Grasshopper Sparrow *Ammodramus savannarum perpallidus* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8329	Breeds Jun 1 to Aug 20
King Rail *Rallus elegans* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/8936	Breeds May 1 to Sep 5
Prairie Warbler *Setophaga discolor* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9513	Breeds May 1 to Jul 31
Red-headed Woodpecker *Melanerpes erythrocephalus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9398	Breeds May 10 to Sep 10
Rusty Blackbird *Euphagus carolinus* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9478	Breeds elsewhere
Wood Thrush *Hylocichla mustelina* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9431	Breeds May 10 to Aug 31

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

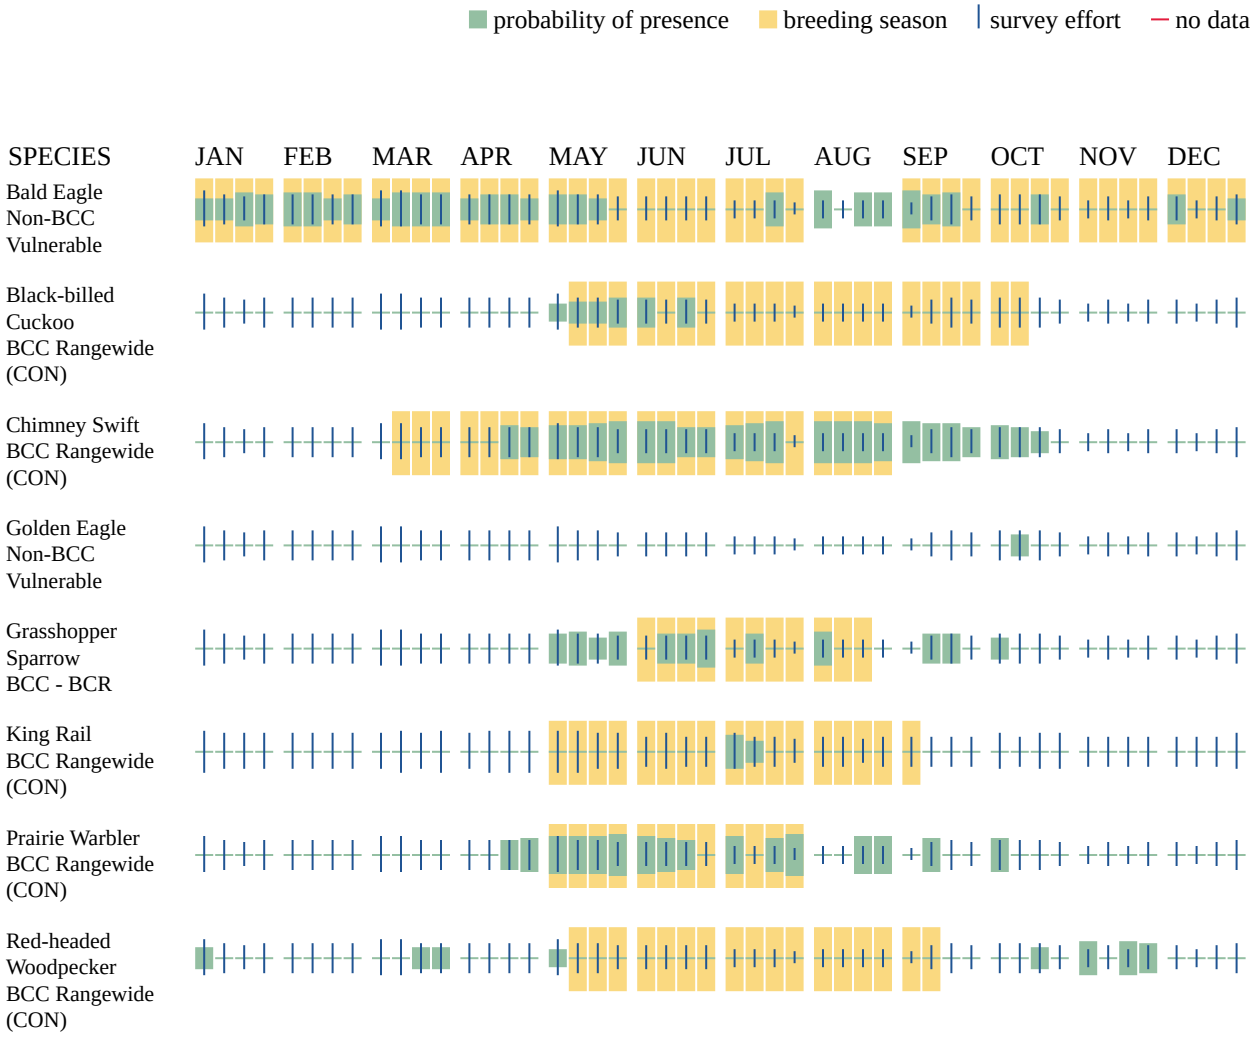

Probability of Presence (■)

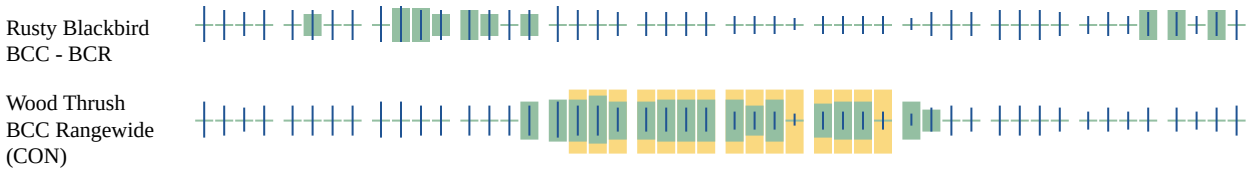

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (■)
Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)
Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Additional information can be found using the following links:

- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

WETLANDS

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

THERE ARE NO WETLANDS WITHIN YOUR PROJECT AREA.

IPAC USER CONTACT INFORMATION

LEAD AGENCY CONTACT INFORMATION

Lead Agency: Department of Housing and Urban Development

United States Department of the Interior

FISH AND WILDLIFE SERVICE
New Jersey Ecological Services Field Office
4 E. Jimmie Leeds Road, Suite 4
Galloway, NJ 8205
Phone: (609) 646-9310

In Reply Refer To: 05/01/2026 14:17:07 UTC
Project code: 2025-0074153
Project Name: HARP010978R

Federal Nexus: yes
Federal Action Agency (if applicable): Department of Housing and Urban Development

Subject: Federal agency coordination under the Endangered Species Act, Section 7 for 'HARP010978R'

Dear Nicholas Smith-Herman:

This letter records your determination using the Information for Planning and Consultation (IPaC) system provided to the U.S. Fish and Wildlife Service (Service) on May 01, 2026, for "HARP010978R" (here forward, Project). This project has been assigned Project Code 2025-0074153 and all future correspondence should clearly reference this number.

The Service developed the IPaC system and associated species' determination keys in accordance with the Endangered Species Act of 1973 (ESA; 87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.) and based on a standing analysis. All information submitted by the Project proponent into the IPaC must accurately represent the full scope and details of the Project. Failure to accurately represent or implement the Project as detailed in IPaC or the Northeast Determination Key (DKey), invalidates this letter. ***Answers to certain questions in the DKey commit the project proponent to implementation of conservation measures that must be followed for the ESA determination to remain valid.***

To make a no effect determination, the full scope of the proposed project implementation (action) should not have any effects (either positive or negative effect(s)), to a federally listed species or designated critical habitat. Effects of the action are all consequences to listed species or critical habitat that are caused by the proposed action, including the consequences of other activities that are caused by the proposed action. A consequence is caused by the proposed action if it would not occur but for the proposed action and it is reasonably certain to occur. Effects of the action may occur later in time and may include consequences occurring outside the immediate area involved in the action. (See § 402.17). Under Section 7 of the ESA, if a federal action agency makes a no effect determination, no further consultation with, or concurrence from, the Service is required (ESA §7). If a proposed Federal action may affect a listed species or designated critical

habitat, formal consultation is required (except when the Service concurs, in writing, that a proposed action "is not likely to adversely affect (NLAA)" listed species or designated critical habitat [50 CFR §402.02, 50 CFR§402.13]).

The IPaC results indicated the following species is (are) potentially present in your project area and, based on your responses to the Service's Northeast DKey, you determined the proposed Project will have the following effect determinations:

Species	Listing Status	Determination
Indiana Bat (*Myotis sodalis*)	Endangered	NLAA

Conclusion
The Service concurs to the above-mentioned determination(s) of may affect, not likely to adversely affect. This concurrence confirms receipt of your agencies coordination required under Section 7(a)(2) of the ESA.

Other Species and Critical Habitat that May be Present in the Action Area

In addition to the species listed above, the following species and/or critical habitats may also occur in your project area and are not covered by this conclusion:

- Monarch Butterfly *Danaus plexippus* Proposed Threatened
- Tricolored Bat *Perimyotis subflavus* Proposed Endangered

If no changes occur with the Project or there are no updates on listed species, no further consultation/coordination for this project is required for the species identified above. However, the Service recommends that project proponents re-evaluate the Project in IPaC if: 1) the scope, timing, duration, or location of the Project changes (includes any project changes or amendments); 2) new information reveals the Project may impact (positively or negatively) federally listed species or designated critical habitat; or 3) a new species is listed, or critical habitat designated. If any of the above conditions occurs, additional consultation with the Service should take place before project implements any changes which are final or commits additional resources.

Please Note: If the Action may impact bald or golden eagles, additional coordination with the Service under the Bald and Golden Eagle Protection Act (BGEPA) (54 Stat. 250, as amended, 16 U.S.C. 668a-d) by the prospective permittee may be required. Please contact the Migratory Birds Permit Office, (413) 253-8643, or PermitsR5MB@fws.gov, with any questions regarding potential impacts to Eagles.

If you have any questions regarding this letter or need further assistance, please contact the New Jersey Ecological Services Field Office and reference the Project Code associated with this Project.

Action Description
You provided to IPaC the following name and description for the subject Action.

1. Name

HARP010978R

2. Description

The following description was provided for the project 'HARP010978R':

> The proposed activity is reconstruction (Proposed Action 2) of the single-unit residential structure at the address listed above. The structure was damaged as a result of Tropical Storm Ida. The existing structure would be demolished and replaced with a new single-unit residential structure. The lowest occupied floor of the new structure would be elevated at least 2 feet above the highest applicable 100-year flood level determined using the best available data. Construction of the new dwelling on the existing property is within 20.0 percent of the original (first-floor) building footprint. A map showing the location of the proposed activity is attached.

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.5572475,-74.65722373942842,14z

QUALIFICATION INTERVIEW

1. As a representative of this project, do you agree that all items submitted represent the complete scope of the project details and you will answer questions truthfully?

   Yes

2. Does the proposed project include, or is it reasonably certain to cause, intentional take of listed species?

   Note: This question could refer to research, direct species management, surveys, and/or studies that include intentional handling/encountering, harassment, collection, or capturing of any individual of a federally listed threatened, endangered, or proposed species.

   No

3. Is the action authorized, permitted, licensed, funded, or being carried out by a Federal agency in whole or in part?

   Note: for projects in Pennsylvania: Projects requiring authorization under Section 404 of the Clean Water Act and/or Section 10 of the Rivers and Harbors Act would be considered as having a federal nexus. Since the U.S. Army Corps of Engineers (Corps) has issued the Pennsylvania State Programmatic General Permit (PASPGP), which may be verified by the PA Department of Environmental Protection or certain Conservation Districts, the need to receive a Corps authorization to perform the work under the PASPGP serves as a federal nexus. As such, if proposing to use the PASPGP, you would answer ‘yes’ to this question.

   Yes

4. Are you including in this analysis all impacts to federally listed species that may result from the entirety of the project (not just the activities under federal jurisdiction)?

   Note: If there are project activities that will impact listed species that are considered to be outside of the jurisdiction of the federal action agency submitting this key, contact your local Ecological Services Field Office to determine whether it is appropriate to use this key. If your Ecological Services Field Office agrees that impacts to listed species that are outside the federal action agency's jurisdiction will be addressed through a separate process, you can answer yes to this question and continue through the key.

   Yes

5. Are you the lead federal action agency or designated non-federal representative requesting concurrence on behalf of the lead Federal Action Agency?

   Yes

6. Is the lead federal action agency the Natural Resources Conservation Service?

   No

7. Will the proposed project involve the use or storage of herbicide?

   No

8. Will the proposed project involve herbaceous native vegetation removal (including prescribed fire that would result in burning of plants) or mowing?

   No

9. Does any component of the project associated with this action include activities or structures that may pose a collision risk to **birds** (e.g., plane-based surveys, land-based or offshore wind turbines, new or enlarged communication towers or broadcast towers, high voltage transmission lines, any type of towers with or without guy wires)?

   No

10. Will the proposed project involve demolition, rehabilitation, property elevation, renovation, and/or rebuilding of one or more existing buildings (e.g., residential, commercial and industrial buildings, or utilities)? Note: if project activities include modification of bridges and/or culverts, answer this question "No".

    Yes

11. Is the entire project footprint, including staging areas, currently developed or hard surfaced (i.e., the site consists entirely of existing roads, sidewalks, buildings, driveways, routinely mown grass etc.) and does not contain any undeveloped and/or previously undisturbed vegetated areas, including any trees that may be impacted by the project?

    Yes

12. Does your project involve excessive noise (e.g. jackhammer or other equipment use outside a building that requires hearing protection for the operator), new hydrological impacts (e.g., changes to stormwater discharge), or impacts to structures that are being used by any federally endangered or threatened species (e.g., roosting Indiana bats, nesting piping plover or roseate tern using gravel or paved surfaces, etc.) or are there known reports of species using areas within the project footprint? Note: If unsure, answer yes. To determine whether impacts will occur, contact the appropriate Ecological Field Office to discuss, or conduct a site survey to ensure that listed species are not present.

    Yes

13. Will completion of this project require clearing or land disturbance of any areas that were not already developed and/or disturbed prior to the start of the proposed project? Note: Examples of land disturbance may include, but are not limited to, grading, tree or vegetation removal, excavation, etc.

    No

14. Does the project area intersect the boundary of VAFO?

    Automatically answered
    No

15. Is the project being funded, lead, or managed in whole or in part by U.S Fish and Wildlife Restoration and Recovery Program (e.g., Partners, Coastal, Fisheries, Wildlife and Sport Fish Restoration, Refuges)?

    No

16. Does any component of the project associated with this action include activities or structures that may pose a collision risk to **bats** (e.g., plane-based surveys, land-based or offshore wind turbines)?

    No

17. Will the proposed project result in permanent changes to water availability or water quality where **bats** may be present?

    Yes

18. Will the proposed project involve blasting where bats may be present?

    No

19. Will the proposed project involve earth moving or ground disturbance that could cause erosion, sedimentation, and/or contamination within waterbodies potentially used by bats?
    Note: Answer yes if erosion and sediment control measures will be used.

    Yes

20. Will erosion and sedimentation control Best Management Practices (BMPs) associated with applicable state and/or federal permits be applied to the project? If BMPs have been provided by and/or coordinated with and approved by the appropriate Ecological Services Field Office, answer "Yes" to this question.

    No

21. Does the project intersect the Indiana bat species list area?

    Automatically answered
    Yes

22. Are there any caves, mines, or mine features that are suitable for hibernating Indiana bats within the area expected to be impacted by the project?

    No

23. Has a presence/probable absence bat survey (acoustic or mist-net summer active season survey) following the USFWS's Range-wide Indiana Bat and Northern long-eared Bat Survey Guidelines been conducted within the action area?

    No

24. Does the project involve removal or modification of a human-made structure (barn, house, or other building) known or suspected to contain roosting bats? **Note:** Most maintenance and general human disturbance in and around structures will not affect Indiana bats as bats roosting in human structures are adjusted to a certain level of routine noise and are generally expected to roost away from areas with excessive disturbance. Answer 'no' if the proposed action will not include disturbance to human structures known or suspected to contain roosting bats or if the structure does not offer suitable roosting habitat for northern long-eared bats. If unsure, answer 'yes.'

    No

25. Does the project include removal/modification of an existing culvert?

    No

26. Does the project include removal/modification of an existing bridge?

    No

27. Are trees present within 1000 feet of the action area?

    Note: If there are trees within the action area that are of a sufficient size to be potential roosts for bats (i.e., live trees and/or snags ≥5 inches dbh (12.7 centimeter), answer "Yes". If unsure, answer “Yes.” Or refer to the USFWS' Range-wide Indiana Bat and Northern Long-Eared Bat Survey Guidelines for definitions and an assessment form that will assist you in determining if suitable habitat is present within your project's action area. Suitable summer habitat for Indiana bat consists of a wide variety of forested/wooded habitats where they roost, forage, and travel and may also include some adjacent and interspersed non-forested habitats such as emergent wetlands and adjacent edges of agricultural fields, old fields and pastures. This includes forests and woodlots containing potential roosts (i.e., live trees and/or snags ≥5 inches dbh (12.7 centimeter) that have exfoliating bark, cracks, crevices, and/or hollows), as well as linear features such as fencerows, riparian forests, and other wooded corridors. These wooded areas may be dense or loose aggregates of trees with variable amounts of canopy closure. Individual trees may be considered suitable habitat when they exhibit the characteristics of a potential roost tree and are located within 1,000 feet (305 meters) of other forested/wooded habitat.

    Yes

28. Will the project include tree cutting, other means of knocking down or bringing down trees, or tree trimming?

    No

29. Will the project result in the use of prescribed fire?

    No

30. Does the project include temporary or permanent lighting of roadway(s), facility(ies), and/or parking lot(s)?

    No

31. Does the project area intersect the Birdwing Pearlymussel species list area?

    Automatically answered
    No

32. Does the project area intersect the Dromedary Pearlymussel species list area?

    Automatically answered
    No

33. Does the project area intersect the Finerayed Pigtoe species list area?

    Automatically answered
    No

34. Does the project area intersect the Slabside Pearlymussel species list area?

    Automatically answered
    No

35. Do you have any other documents that you want to include with this submission?

    No

PROJECT QUESTIONNAIRE

1. Approximately how many acres of trees would the proposed project remove?

   0.0

2. Approximately how many total acres of disturbance are within the disturbance/ construction limits of the proposed project?

   0.1

3. Briefly describe the habitat within the construction/disturbance limits of the project site.

   residential

Project code: 2025-0074153
Project Name: HARP010978R

Federal Nexus: yes
Federal Action Agency (if applicable): Department of Housing and Urban Development

Subject: Record of project representative's no effect determination for 'HARP010978R'

Dear Nicholas Smith-Herman:

This letter records your determination using the Information for Planning and Consultation (IPaC) system provided to the U.S. Fish and Wildlife Service (Service) on May 04, 2026, for 'HARP010978R' (here forward, Project). This project has been assigned Project Code 2025-0074153 and all future correspondence should clearly reference this number. **Please carefully review this letter.**

Ensuring Accurate Determinations When Using IPaC

The Service developed the IPaC system and associated species' determination keys in accordance with the Endangered Species Act of 1973 (ESA; 87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.) and based on a standing analysis. All information submitted by the Project proponent into IPaC must accurately represent the full scope and details of the Project.

Failure to accurately represent or implement the Project as detailed in IPaC or the **Northern Long-eared Bat and Tricolored Bat Range-wide Determination Key (Dkey)**, invalidates this letter. ***Answers to certain questions in the DKey commit the project proponent to implementation of conservation measures that must be followed for the ESA determination to remain valid.***

Determination for the Northern Long-Eared Bat and/or Tricolored Bat

Based upon your IPaC submission and a standing analysis, your project has reached the following effect determinations:

Species	Listing Status	Determination
Tricolored Bat (*Perimyotis subflavus*)	Proposed Endangered	No effect

Federal agencies must consult with U.S. Fish and Wildlife Service under section 7(a)(2) of the Endangered Species Act (ESA) when an action *may affect* a listed species. Tricolored bat is proposed for listing as endangered under the ESA, but not yet listed. For actions that may affect a proposed species, agencies cannot consult, but they can *confer* under the authority of section 7(a)(4) of the ESA. Such conferences can follow the procedures for a consultation and be adopted as such if and when the proposed species is listed. Should the tricolored bat be listed, agencies must review projects that are not yet complete, or projects with ongoing effects within the tricolored bat range that previously received a NE or NLAA determination from the key to confirm that the determination is still accurate.

To make a no effect determination, the full scope of the proposed project implementation (action) should not have any effects (either positive or negative), to a federally listed species or designated critical habitat. Effects of the action are all consequences to listed species or critical habitat that are caused by the proposed action, including the consequences of other activities that are caused by the proposed action. A consequence is caused by the proposed action if it would not occur but for the proposed action and it is reasonably certain to occur. Effects of the action may occur later in time and may include consequences occurring outside the immediate area involved in the action. (See § 402.17).

Under Section 7 of the ESA, if a federal action agency makes a no effect determination, no consultation with the Service is required (ESA §7). If a proposed Federal action may affect a listed species or designated critical habitat, formal consultation is required except when the Service concurs, in writing, that a proposed action "is not likely to adversely affect" listed species or designated critical habitat [50 CFR §402.02, 50 CFR§402.13].

Other Species and Critical Habitat that May be Present in the Action Area

The IPaC-assisted determination key for the northern long-eared bat and tricolored bat does not apply to the following ESA-protected species and/or critical habitat that also may occur in your Action area:

- Indiana Bat *Myotis sodalis* Endangered
- Monarch Butterfly *Danaus plexippus* Proposed Threatened

You may coordinate with our Office to determine whether the Action may affect the animal species listed above and, if so, how they may be affected.

Next Steps

If there are no updates on listed species, no further consultation/coordination for this project is required with respect to the species covered by this key. However, the Service recommends that project proponents re-evaluate the Project in IPaC if: 1) the scope, timing, duration, or location of the Project changes (includes any project changes or amendments); 2) new information reveals the Project may impact (positively or negatively) federally listed species or designated critical habitat; or 3) a new species is listed, or critical habitat designated. If any of the above conditions

occurs, additional coordination with the Service should take place to ensure compliance with the Act.

If you have any questions regarding this letter or need further assistance, please contact the New Jersey Ecological Services Field Office and reference Project Code 2025-0074153 associated with this Project.

Action Description
You provided to IPaC the following name and description for the subject Action.

1. Name

HARP010978R

2. Description

The following description was provided for the project 'HARP010978R':

> The proposed activity is reconstruction (Proposed Action 2) of the single-unit residential structure at the address listed above. The structure was damaged as a result of Tropical Storm Ida. The existing structure would be demolished and replaced with a new single-unit residential structure. The lowest occupied floor of the new structure would be elevated at least 2 feet above the highest applicable 100-year flood level determined using the best available data. Construction of the new dwelling on the existing property is within 20.0 percent of the original (first-floor) building footprint. A map showing the location of the proposed activity is attached.

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@40.5572475,-74.65722373942842,14z

DETERMINATION KEY RESULT

Based on the information you provided, you have determined that the Proposed Action will have no effect on the species covered by this determination key. Therefore, no consultation with the U.S. Fish and Wildlife Service pursuant to Section 7(a)(2) of the Endangered Species Act of 1973 (87 Stat. 884, as amended 16 U.S.C. 1531 *et seq.*) is required for those species.

QUALIFICATION INTERVIEW

1. Does the proposed project include, or is it reasonably certain to cause, intentional take of listed bats or any other listed species?

   Note: Intentional take is defined as take that is the intended result of a project. Intentional take could refer to research, direct species management, surveys, and/or studies that include intentional handling/encountering, harassment, collection, or capturing of any individual of a federally listed threatened, endangered or proposed species?

   No

2. Is the action area wholly within Zone 2 of the year-round active area for northern long-eared bat and/or tricolored bat?

   Automatically answered
   No

3. Does the action area intersect Zone 1 of the year-round active area for northern long-eared bat and/or tricolored bat?

   Automatically answered
   No

4. Does any component of the action involve leasing, construction or operation of wind turbines? Answer 'yes' if the activities considered are conducted with the intention of gathering survey information to inform the leasing, construction, or operation of wind turbines.

   No

5. Is the proposed action authorized, permitted, licensed, funded, or being carried out by a Federal agency in whole or in part?

   Note for projects in Pennsylvania: Projects requiring authorization under Section 404 of the Clean Water Act and/or Section 10 of the Rivers and Harbors Act would be considered as having a federal nexus. Since the U.S. Army Corps of Engineers (Corps) has issued the Pennsylvania State Programmatic General Permit (PASPGP), which may be verified by the PA Department of Environmental Protection or certain Conservation Districts, the need to receive a Corps authorization to perform the work under the PASPGP serves as a federal nexus. As such, if proposing to use the PASPGP, you would answer ‘yes’ to this question.

   Yes

6. Is the Federal Highway Administration (FHWA), Federal Railroad Administration (FRA), or Federal Transit Administration (FTA) funding or authorizing the proposed action, in whole or in part?

   No

7. Are you an employee of the federal action agency or have you been officially designated in writing by the agency as its designated non-federal representative for the purposes of Endangered Species Act Section 7 informal consultation per 50 CFR § 402.08?

   Note: This key may be used for federal actions and for non-federal actions to facilitate section 7 consultation and to help determine whether an incidental take permit may be needed, respectively. This question is for information purposes only.

   Yes

8. Is the lead federal action agency the Environmental Protection Agency (EPA) or Federal Communications Commission (FCC)? Is the Environmental Protection Agency (EPA) or Federal Communications Commission (FCC) funding or authorizing the proposed action, in whole or in part?

   No

9. Is the lead federal action agency the Federal Energy Regulatory Commission (FERC)?

   No

10. [Semantic] Is the action area located within 0.5 miles of a known bat hibernaculum or winter roost? Note: The map queried for this question contains proprietary information and cannot be displayed. If you need additional information, please contact your state wildlife agency.

    Automatically answered

    No

11. Does the action area contain any winter roosts or caves (or associated sinkholes, fissures, or other karst features), mines, rocky outcroppings, or tunnels that could provide habitat for hibernating bats?

    No

12. Is the action located in New England (CT, MA, ME, NH, RI, or VT)?

    No

13. Will the action cause effects to a bridge?

    Note: Covered bridges should be considered as bridges in this question.

    No

14. Will the action result in effects to a culvert or tunnel at any time of year?

    No

15. Are trees present within 1000 feet of the action area? **Note:** If there are trees within the action area that are of a sufficient size to be potential roosts for bats answer "Yes". If unsure, additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines.

    Yes

16. Does the action include the intentional exclusion of bats from a building or building-like structure? **Note:** Exclusion is conducted to deny bats' entry or reentry into a building. To be effective and to avoid harming bats, it should be done according to established standards. If your action includes bat exclusion and you are unsure whether northern long-eared bats or tricolored bats are present, answer "Yes." Answer "No" if there are no signs of bat use in the building/structure. If unsure, contact your local Ecological Services Field Office to help assess whether northern long-eared bats or tricolored bats may be present. Contact a Nuisance Wildlife Control Operator (NWCO) for help in how to exclude bats from a structure safely without causing harm to the bats (to find a NWCO certified in bat standards, search the Internet using the search term "National Wildlife Control Operators Association bats"). Also see the White-Nose Syndrome Response Team's guide for bat control in structures.

    No

17. Does the action involve removal, modification, or maintenance of a human-made building-like structure (barn, house, or other building) **known or suspected to contain roosting bats?**

    No

18. Will the action cause construction of one or more new roads open to the public?

    For federal actions, answer 'yes' when the construction or operation of these facilities is either (1) part of the federal action or (2) would not occur but for an action taken by a federal agency (federal permit, funding, etc.).

    No

19. Will the action include or cause any construction or other activity that is reasonably certain to increase average night-time traffic permanently or temporarily on one or more existing roads? **Note:** For federal actions, answer 'yes' when the construction or operation of these facilities is either (1) part of the federal action or (2) would not occur but for an action taken by a federal agency (federal permit, funding, etc.). .

    No

20. Will the action include or cause any construction or other activity that is reasonably certain to increase the number of travel lanes on an existing thoroughfare?

    For federal actions, answer 'yes' when the construction or operation of these facilities is either (1) part of the federal action or (2) would not occur but for an action taken by a federal agency (federal permit, funding, etc.).

    No

21. Will the proposed Action involve the creation of a new water-borne contaminant source (e.g., leachate pond, pits containing chemicals that are not NSF/ANSI 60 compliant)?

    Note: For information regarding NSF/ANSI 60 please visit https://www.nsf.org/knowledge-library/nsf-ansi-standard-60-drinking-water-treatment-chemicals-health-effects

    No

22. Will the proposed action involve the creation of a new point source discharge from a facility other than a water treatment plant or storm water system?

    No

23. Will the action include drilling or blasting?

    No

24. Will the action involve military training (e.g., smoke operations, obscurant operations, exploding munitions, artillery fire, range use, helicopter or fixed wing aircraft use at night)?

    No

25. Will the proposed action involve the use of herbicides or pesticides (e.g., fungicides, insecticides, or rodenticides)?

    No

26. Will the action include or cause activities that are reasonably certain to cause chronic or intense nighttime noise (above current levels of ambient noise in the area) in suitable summer habitat for the northern long-eared bat or tricolored bat during the active season? Chronic noise is noise that is continuous or occurs repeatedly again and again for a long time. Sources of chronic or intense noise that could cause adverse effects to bats may include, but are not limited to: road traffic; trains; aircraft; industrial activities; gas compressor stations; loud music; crowds; oil and gas extraction; construction; and mining. **Note:** Additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines.

    No

27. Does the action include, or is it reasonably certain to cause, the use of permanent or temporary artificial lighting within 1000 feet of suitable forested northern long-eared bat or tricolored bat roosting habitat? **Note:** Additional information defining suitable summer habitat for the northern long-eared bat and tricolored bat can be found in the USFWS' Range-wide Indiana Bat and Northern long-eared bat Survey Guidelines.

    No

28. Will the action include tree cutting or other means of knocking down or bringing down trees, tree topping, or tree trimming?

    No

29. Will the proposed action result in the use of prescribed fire?

    Note: If the prescribed fire action includes other activities than application of fire (e.g., tree cutting, fire line preparation) please consider impacts from those activities within the previous representative questions in the key. This set of questions only considers impacts from flame and smoke.

    No

30. Does the action area intersect the tricolored bat species list area?

    Automatically answered
    Yes

31. Is the action area located within 0.5-mile of radius of an entrance/opening to any known tricolored bat hibernacula or winter roost?

    Note: The map queried for this question contains proprietary information and cannot be displayed. If you need additional information, please contact your state wildlife agency.

    Automatically answered
    No

32. [Semantic] Is the action area located within 0.25 miles of a culvert that is known to be occupied by northern long-eared or tricolored bats? **Note:** The map queried for this question contains proprietary information and cannot be displayed. If you need additional information, please contact your State wildlife agency.

    Automatically answered
    No

33. Has a presence/probable absence bat survey targeting the tricolored bat and following the Service's Range-wide Indiana Bat and Northern Long-Eared Bat Survey Guidelines been conducted within the project area?

    No

34. Is suitable summer habitat for the tricolored bat present within 1000 feet of project activities? (If unsure, answer ""Yes."") **Note:** If there are trees within the action area that may provide potential roosts for tricolored bats (e.g., clusters of leaves in live and dead deciduous trees, Spanish moss (*Tillandsia usneoides*), clusters of dead pine needles of large live pines) answer ""Yes."" For a complete definition of suitable summer habitat for the tricolored bat, please see the Service's Range-wide Indiana Bat and Northern long-eared Bat Survey Guidelines.

    Yes

35. Do you have any documents that you want to include with this submission?

    No

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Morgan,

Thank you – I always appreciate when applicants send us thorough, well-organized consultation packages!

To move forward, I have two questions:

1. There is a small chance that Indiana bats, northern long-eared bats, or tricolored bats could roost in the houses that are going to be renovated. Since the probability is low, we don't find it necessary to request a bat survey for any of the projects. Instead, we'd like to request that we incorporate a condition in our consultation for each project: if evidence of bat occupancy is observed before or during construction/renovation, then the project will need to be paused and our office will need to be notified. **Would you agree to this condition?**
    a. More formally, this would be the condition: "The action agency will provide the project proponent/contractor with educational materials describing bat use of buildings. If any evidence of bat occupancy (e.g., live or dead bats, guano, staining at entry points) is observed before or during the project, the project proponent/contractor must immediately pause work on the structure and contact the action agency and the USFWS New Jersey Field Office for further guidance. If a federally listed bat species is determined to be present, the action agency must reinitiate consultation with the USFWS before continuing project activities that may cause disturbance to the bats."
    b. I've attached a PDF that shows how to find evidence of bat occupancy.

2. One project (HARP012071, at 258 N. Livingston Avenue) has a stream and wetlands within the project area, and there is a large wetland complex downstream of the project site. In consideration of potential indirect effects to bog turtles, **would you agree to implement erosion and sediment control measures at the site?** Please let me know.

If you have any questions, feel free to ask!

Best wishes,
Sarah Crestol

[redacted]

Bats roosting out in the open (sort of)…look for them in corners, along center beams, and in tight spots where they feel warm & safe.

Often you won't see bats (especially from late summer through early spring, when they probably aren't there). But droppings are left behind wherever they've roosted. This is guano…

< Guano beneath bat houses on a barn

Line of bats roosting in narrow space between ceiling joists

Guano visible on lath & plaster attic walls

Small guano pile & some sprinkles on attic ducts

Guano is heaviest beneath favorite roost spots and exits

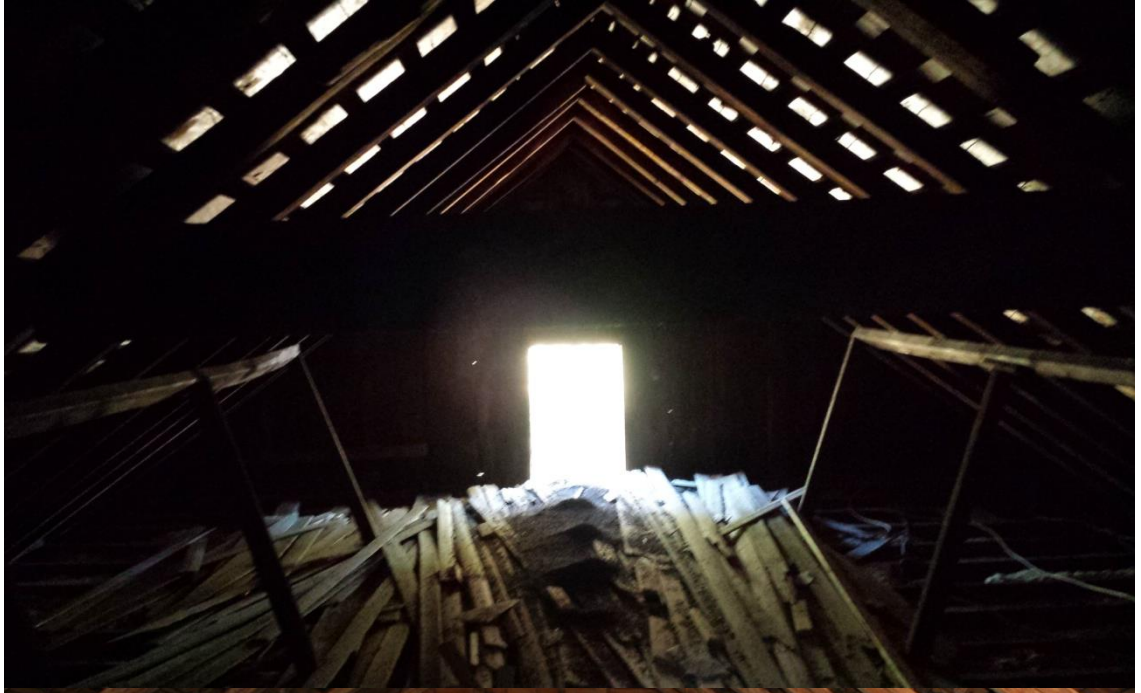

< Looking up at a colony of bats in a bat house. They can really cram in together.

It's not unusual to see a fallen pup beneath a roost. Sometimes they slip off their mom or the roost surface and can't get back up. At left is a very young (few days old) pup; at right is one that's a little older (~3 weeks).

Guano is common along the center line of attics & barns, because bats like to roost in the peaks where it's warmer and snugger. The top photo shows guano piles made by a colony of ~50 big brown bats. The barn loft in the bottom photo had >1,000 little brown bats before White-nose Syndrome hit (now there are 80 left).

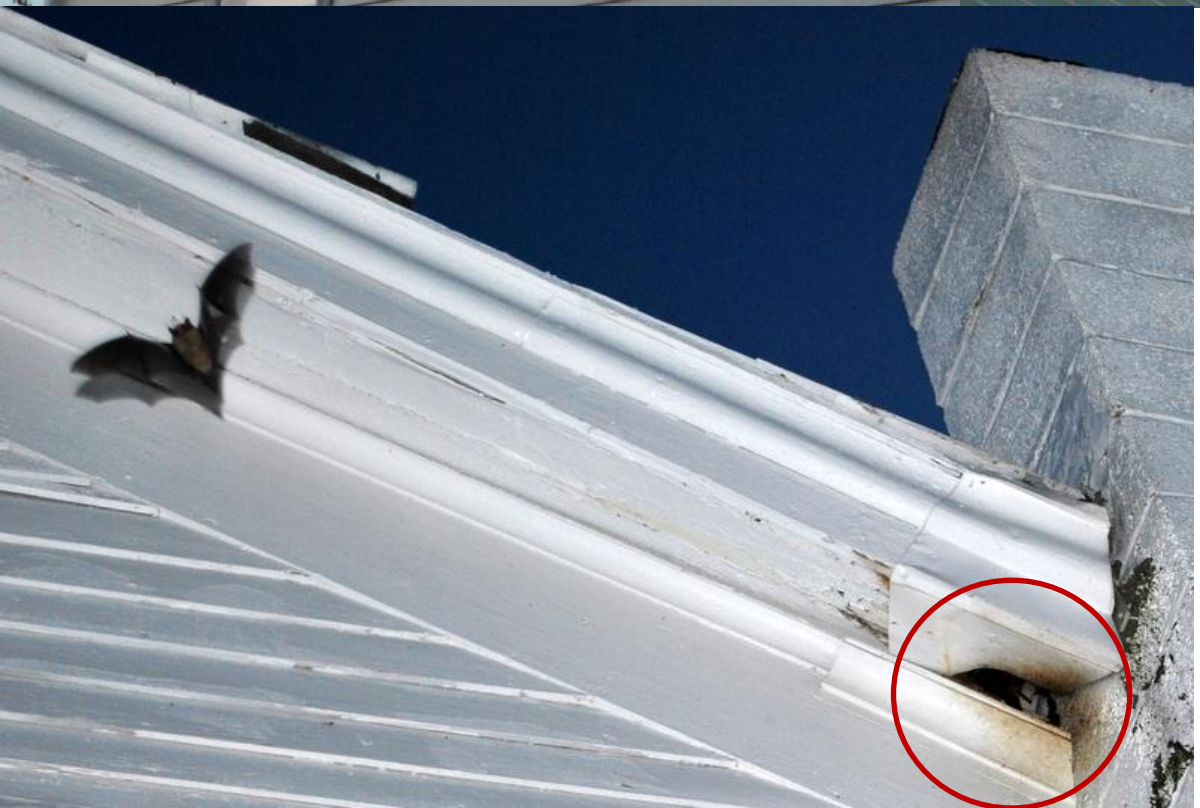

Bats are not rodents and they can't chew or claw their way into a structure. But they only need a space ~1/2" wide to enter a building. Unscreened (or torn screen) attic vents are a common entry point.

From the outside, look for small openings (>1/2”) or stains from the bats’ body oils, which build up over time as the bats leave & re-enter the structure nightly spring through late summer.

Attic vents, the peaks of eaves, and the corners where building materials don’t quite fit together are common bat entry points.

< The dirty look of this shutter is from the guano of bats roosting behind it. Also look for droppings beneath shutters.

Sometimes it's hard to identify the bats' entry/exit point…maybe it's too high up or not obvious. Watch to see where the bats exit from at dusk (or enter at dawn).

< A big brown bat exiting her barn roost at dusk

To: Kate Marcopul, Administrator and Deputy State Historic Preservation Officer, New Jersey Historic Preservation Office

From: Nicholas Smith-Herman, Division of Disaster Recovery and Mitigation, Environmental & Historic Preservation, Department of Community Affairs

Date: March 11, 2026

RE: Homeowner Assistance and Recovery Program (HARP) Application
Re-evaluation of Updated Scopes of Work

The U.S. Department of Housing and Urban Development (HUD) awarded the State of New Jersey Community Development Block Grant-Disaster Recovery (CDGB-DR) funds to support long-term recovery and mitigation efforts following Hurricane Ida (DR-4614) through the New Jersey (NJ) Department of Community Affairs (DCA). HUD has determined that this program is an undertaking subject to compliance with Section 106 of the National Historic Preservation Act (NHPA) and its implementing regulations, 36 CFR Part 800. HUD has authorized NJ DCA to initiate consultation with the New Jersey Historic Preservation Office (NJ HPO) on its behalf. Section 106 consultation for the Tier 2 reviews that was initiated in our letter to your office dated February 14, 2024, for NJ HPO project number HPO-C2024-157. In subsequent letters, we continued Section 106 consultation for the Tier 2 reviews of specific HARP applications detailed in the **Table 1**, below.

The purpose of this memo is to address our re-evaluation of the proposed scope of work since the previous Section 106 consultation for the Tier 2 reviews was conducted. We have re-evaluated the proposed scope of work and have determined that demolition and reconstruction of the existing residence would better achieve program standards and long-term resilience due to multiple risk factors. The existing building would be demolished and replaced with a new residence. The lowest occupied floor of the new building would be elevated at least two feet above the highest applicable 100-year flood level determined using the best available data. Construction of the new residence on the existing property would be within 20.0 percent of the original (first floor) building footprint.

Table 1 below provides details of nine Tier 2 review previously subject to Section 106 consultation with your office. For each of the Tier 2 reviews identified in the table below, DCA previously determined, and SHPO concurred that no historic properties are present within the APE, and that no historic properties would be affected by the proposed rehabilitation scope of work. In the re-evaluation of the revised proposed scope of work to infill the basement and reconstruct the residence, DCA has determined that the Section 106 findings of **No Historic Properties Affected** remain valid.

	HARP011531R	[redacted]	[redacted]	[redacted]	[redacted]	[redacted]

I concur with your finding that there are no historic properties affected within the project's area of potential effects. Consequently, pursuant to 36 CFR 800.4(d)(1), no further Section 106 consultation is required unless additional resources are discovered during project implementation pursuant to 36 CFR 800.13.

Re: Hurricane Ida Community Development Block Grant – Disaster Recovery: Long-Term Recovery and Mitigation Support Grants, Invitation to Consult as a Consulting Party under Section 106 of the National Historic Preservation Act

Dear Mayor Moench,

This letter is to follow up with you regarding our previous invitation to consult with our office as a consulting party under Section 106 of the National Historic Preservation Act (Section 106). In an effort to address long-term recovery and mitigation efforts following Hurricane Ida (DR-4614), HUD-funded grants will be used to address impacts on housing from the hurricane that resulted in the need for rehabilitation, reconstruction, restoration of open space, or other work. Under HUD regulation 24 CFR 58.4, the New Jersey Department of Community Affairs (NJDCA) has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes of features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association. NJDCA, HUD's Responsible Entity, previously initiated consultation under Section 106 of the National Historic Preservation Act with your organization for the previously proposed undertaking, in accordance with 36 CFR Part 800. The previous correspondence to you included the Tier 2 Site Specific Review for the grant application that is the subject of this letter, which is identified in the table below. The Tier 2 Site Specific Review provided details about the subject property, the evaluation of the subject property for eligibility to be listed in the National Register of Historic Places, and NJDCA's findings regarding the proposed project.

The previously proposed undertaking entailed rehabilitation activities to the residence located on the parcel for the grant application that is the subject of this letter, which is identified in the table below. However, since our previous correspondence with you, the proposed undertaking has been re-evaluated, and it has been determined that demolition and reconstruction of the existing residence would better achieve program standards and long-term resilience due to multiple risk factors. The existing building would be demolished and replaced with a new residence. The lowest

occupied floor of the new building would be elevated at least two feet above the highest applicable 100-year flood level determined using the best available data. Construction of the new residence on the existing property would be within 20.0 percent of the original (first floor) building footprint.

Table 1 below details the Tier 2 Site Specific Review(s) for which your organization previously received correspondence.

NJDCA has re-opened the Section 106 process with the New Jersey Historic Preservation Office (NJHPO) and maintained the project's previously established Area of Potential Effects (APE) for both archaeological and historic architectural resources.

We respectfully request your continued participation as a consulting party regarding the proposed revised scope of work and seek any additional input on any cultural resources that you may be aware of or have concerns about for which you have jurisdiction and that fall within the project boundaries. To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days.

If you have any questions, comments, or concerns about the proposed project as it relates to cultural resources, please contact me.

Thank you for your consideration and cooperation.

Sincerely,

Re: Hurricane Ida Community Development Block Grant – Disaster Recovery: Long-Term Recovery and Mitigation Support Grants, Invitation to Consult as a Consulting Party under Section 106 of the National Historic Preservation Act

To Whom It May Concern,

This letter is to follow up with you regarding our previous invitation to consult with our office as a consulting party under Section 106 of the National Historic Preservation Act (Section 106). In an effort to address long-term recovery and mitigation efforts following Hurricane Ida (DR-4614), HUD-funded grants will be used to address impacts on housing from the hurricane that resulted in the need for rehabilitation, reconstruction, restoration of open space, or other work. Under HUD regulation 24 CFR 58.4, the New Jersey Department of Community Affairs (NJDCA) has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes of features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association. NJDCA, HUD's Responsible Entity, previously initiated consultation under Section 106 of the National Historic Preservation Act with your organization for the previously proposed undertaking, in accordance with 36 CFR Part 800. The previous correspondence to you included the Tier 2 Site Specific Review for the grant application that is the subject of this letter, which is identified in the table below. The Tier 2 Site Specific Review provided details about the subject property, the evaluation of the subject property for eligibility to be listed in the National Register of Historic Places, and NJDCA's findings regarding the proposed project.

The previously proposed undertaking entailed rehabilitation activities to the residence located on the parcel for the grant application that is the subject of this letter, which is identified in the table below. However, since our previous correspondence with you, the proposed undertaking has been re-evaluated, and it has been determined that demolition and reconstruction of the existing residence would better achieve program standards and long-term resilience due to multiple risk factors. The existing building would be demolished and replaced with a new residence. The lowest occupied floor of the new building would be elevated at least two feet above the highest applicable

100-year flood level determined using the best available data. Construction of the new residence on the existing property would be within 20.0 percent of the original (first floor) building footprint.

Table 1 below details the Tier 2 Site Specific Review(s) for which your organization previously received correspondence.

NJDCA has re-opened the Section 106 process with the New Jersey Historic Preservation Office (NJHPO) and maintained the project's previously established Area of Potential Effects (APE) for both archaeological and historic architectural resources.

We respectfully request your continued participation as a consulting party regarding the proposed revised scope of work and seek any additional input on any cultural resources that you may be aware of or have concerns about for which you have jurisdiction and that fall within the project boundaries. To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days.

If you have any questions, comments, or concerns about the proposed project as it relates to cultural resources, please contact me.

Thank you for your consideration and cooperation.

Re: Hurricane Ida Community Development Block Grant – Disaster Recovery: Long-Term Recovery and Mitigation Support Grants, Invitation to Consult as a Consulting Party under Section 106 of the National Historic Preservation Act

Dear Ms. Bundy,

In an effort to address long-term recovery and mitigation efforts following Hurricane Ida (DR-4614), HUD-funded grants will be used to address impacts on housing from the hurricane that resulted in the need for rehabilitation, reconstruction, restoration of open space, or other work. These activities include grants to eligible homeowners and landlords for activities necessary to restore their storm-damaged homes, including rehabilitation, reconstruction, elevation, and/or other mitigation activities. These mitigation activities include, but are not limited to, structural and utility retrofits to make the building more resistant to floods, grading and slope stabilization, and drainage improvements.

Under HUD regulation 24 CFR 58.4, the New Jersey Department of Community Affairs (NJDCA) has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes of features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association. NJDCA, HUD's Responsible Entity, is initiating consultation under Section 106 of the National Historic Preservation Act with your organization for the proposed undertaking in accordance with 36 CFR Part 800.

For the grant application that is the subject of this letter, as identified below, NJ DCA is submitting required documentation under cover of this letter for consultation with your organization.

HARP Identification No.	Address	Date of Construction
HARP010978	93 Old York Road, Bridgewater 08807	1948

NJDCA has initiated the Section 106 process with the New Jersey Historic Preservation Office (NJHPO) and established the project's Area of Potential Effects (APE) for both archaeological and historic architectural resources.

We respectfully request your participation as a consulting party regarding the Proposed Project and seek your input on any cultural resources that you may be aware of or have concerns about for which you have jurisdiction and that fall within the project boundaries. RE: Homeowner Assistance and Recovery Program (HARP) Application
HARP010978
93 Old York Road
Bridgewater Township, NJ 08807

Dear Ms. Marcopul,

The U.S. Department of Housing and Urban Development (HUD) awarded the State of New Jersey Community Development Block Grant-Disaster Recovery (CDGB-DR) funds to support long-term recovery and mitigation efforts following Hurricane Ida (DR-4614) through the New Jersey (NJ) Department of Community Affairs (DCA). HUD has determined that this program is an undertaking subject to compliance with Section 106 of the National Historic Preservation Act (NHPA) and its implementing regulations, 36 CFR Part 800. HUD has authorized NJ DCA to initiate consultation with the New Jersey Historic Preservation Office (NJ HPO) on its behalf. This letter serves as a continuation of the Section 106 consultation for the Tier 2 reviews that was initiated in our letter to your office dated February 14, 2024, for NJ HPO project number HPO-C2024-157.

Project Activities & Area of Potential Effects

These HUD-funded grants will be used to address impacts on housing from the hurricane that resulted in the need for rehabilitation, reconstruction, restoration of open space, or other work. These activities include grants to eligible homeowners and landlords for activities necessary to restore their storm-damaged homes, including rehabilitation, reconstruction, elevation, and/or other mitigation activities. These mitigation activities include, but are not limited to, structural and utility retrofits to make the building more resistant to floods, grading and slope stabilization, and drainage improvements. Attached to this letter is a packet of information pertaining to the parcel covered by this letter. The packet includes a map showing the location of the proposed activities. Therefore, the Area of Potential Effects (APE) for each Tier 2 review is defined as the tax parcel associated with the application.

Project #25-1741-1,-2
HPO-G2025-311

Programmatic Agreement

NJ DCA has hired ICF to conduct Tier 2 reviews pursuant to the PA. ICF's staff of Secretary of the Interior-Qualified Architectural Historians and Archaeologists reviewed the HARP program and proposed activities to determine that the PA Tier I and Tier II Allowances do not apply to the applications due to the nature of the proposed activities. The proposed activities that are not covered by PA Allowances include an addition to the building to house utilities. Therefore, the attached packet of information provides the Tier 2 Site-Specific Review for the application that is the subject of this letter.

Tier 2 Site-Specific Reviews

For the grant application that is the subject of this letter, as identified below, NJ DCA is submitting the required documentation under cover of this letter for consultation with NJ HPO.

Bridgewater Township

HARP010978	93 Old York Road, Bridgewater Township, NJ 08807	1948

Findings

As noted in the attached information packet for this application, NJ DCA has determined there are no known archaeological resources located within the APE for this application and the potential for intact pre-colonial or historic-era archaeological resources within the APE is low. Additionally, NJ DCA has determined there are no historic properties located within the APE for this application. Therefore, NJ DCA finds No Historic Properties Affected for this Tier 2 review.

Consultation

Pursuant to the PA, NJ DCA is inviting the following local governments to consult on the Section 106 review of the applications, as follows:

Bridgewater Township
Mayor Matthew Moench
Municipal Building
100 Commons Way
Bridgewater, NJ 08807
Via email: mayor@bridgewaternj.gov

Somerset County Cultural & Heritage Commission
Kaitlin Bundy, Manager
20 Grove Street
Somerville, NJ 08876

Via email: info@somersethistorynj.org

NJ DCA welcomes any additional potential consulting party suggestions from NJ HPO.

NJ DCA will continue to review any application received under this program pursuant to the PA. Any applications that require consultation with NJ HPO and other entities will be submitted for review in accordance with the initiation letter and the PA.

We look forward to working with you.

Sincerely,

Nicholas Smith-Herman

I concur with your finding that there are no historic properties affected within the project's area of potential effects. Consequently, pursuant to 36 CFR 800.4(d)(1), no further Section 106 consultation is required unless additional resources are discovered during project implementation pursuant to 36 CFR 800.13.

Re: Hurricane Ida Community Development Block Grant – Disaster Recovery: Long-Term Recovery and Mitigation Support Grants, Invitation to Consult as a Consulting Party under Section 106 of the National Historic Preservation Act

Dear Mayor Moench,

In an effort to address long-term recovery and mitigation efforts following Hurricane Ida (DR-4614), HUD-funded grants will be used to address impacts on housing from the hurricane that resulted in the need for rehabilitation, reconstruction, restoration of open space, or other work. These activities include grants to eligible homeowners and landlords for activities necessary to restore their storm-damaged homes, including rehabilitation, reconstruction, elevation, and/or other mitigation activities. These mitigation activities include, but are not limited to, structural and utility retrofits to make the building more resistant to floods, grading and slope stabilization, and drainage improvements.

Under HUD regulation 24 CFR 58.4, the New Jersey Department of Community Affairs (NJDCA) has assumed HUD's environmental review responsibilities for the project, including tribal consultation related to historic properties. Historic properties include archaeological sites, burial grounds, sacred landscapes of features, ceremonial areas, traditional cultural places and landscapes, plant and animal communities, and buildings and structures with significant tribal association. NJDCA, HUD's Responsible Entity, is initiating consultation under Section 106 of the National Historic Preservation Act with your organization for the proposed undertaking in accordance with 36 CFR Part 800.

For the grant application that is the subject of this letter, as identified below, NJ DCA is submitting required documentation under cover of this letter for consultation with your organization.

HARP Identification No.	Address	Date of Construction
HARP010978	93 Old York Road, Bridgewater 08807	1948

NJDCA has initiated the Section 106 process with the New Jersey Historic Preservation Office (NJHPO) and established the project's Area of Potential Effects (APE) for both archaeological and historic architectural resources.

We respectfully request your participation as a consulting party regarding the Proposed Project and seek your input on any cultural resources that you may be aware of or have concerns about for which you have jurisdiction and that fall within the project boundaries. To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days.

If you have any questions, comments, or concerns about the Proposed Project as it relates to cultural resources, please contact me.

Thank you for your consideration and cooperation.

Sincerely,

Nicholas Smith-Herman

Hello,

The U.S. Department of Housing and Urban Development (HUD) awarded the State of New Jersey Community Development Block Grant—Disaster Recovery (CDBG-DR) funds to support long-term recovery and mitigation efforts following Hurricane Ida. Activities under the Homeowner Assistance and Recovery Program (HARP) include rehabilitation, reconstruction, elevation, and/or other mitigation activities.

New Jersey Department of Community Affairs (DCA) has initiated the Section 106 Consultation process with the New Jersey Historic Preservation Office (NJHPO) and established the project's Area of Potential Effects (APE) for both archaeological and historic architectural resources. With the attached invitation, we respectfully request your participation as a consulting party regarding the proposed projects. To meet project timeframes, if you would like to be a consulting party on this project, please let us know of your interest within 30 days by **August 11, 2025.**

Please let me know if you have any questions.

Re: Hurricane Ida Community Development Block Grant – Disaster Recovery: Long-Term Recovery and Mitigation Support Grants, Invitation to Consult as a Consulting Party under Section 106 of the National Historic Preservation Act (93 Old York Road, Bridgewater, NJ 08807)

Dear Mr. Smith-Herman,

On behalf of the Somerset County Cultural & Heritage Commission, I would like to respond to your letter regarding the project located at 93 Old York Road, Bridgewater, NJ 08807. Staff have reviewed the attached documents, consulted resources such as NJHPO's LUCY GIS and the Somerset County Cultural Resource Survey (1989) and believe that there are no impacts to cultural or historic resources surrounding this property. Although the nearby Raritan Power Canal is an eligible historic district, the disturbance around the structure in question eliminates any risk of effecting historic resources.

We appreciate your correspondence and thank you for the opportunity to comment on this project.

Sincerely,

Josephine T. Taranto

Somerset County Is An Equal Opportunity Employer

Tier 2 Site-Specific Review
HARP010978

Tier 2 Site Specific Review
HARP010978
93 Old York Road, Bridgewater Township
Somerset County, New Jersey 08807
Tax Parcel ID: 1806_122_25
Date of Construction: 1948

ICF Archeologist Adam C. S. Kazmi and ICF Historians Jean Stoll and April Scudder prepared the documentation for this Tier 2 Site Specific Review. They completed digital research and aerial photography and historic map analysis. They meet the qualifications of an archeologist and historic preservation professional as defined in Title 35 of the Code of Federal Regulations, Part 61.

Proposed Scope of Work

The proposed scope of work for the subject application includes electrical wiring & breaker box relocation, water heater & boiler replacement & relocation, which do meet the PA allowances, and construction of an attached 10’ x 10’ Utility Room, which does not meet PA allowances.

The Area of Potential Effect (APE) is defined as the tax parcel associated with the address since the proposed project activities are limited to the parcel.

Environmental Setting

Geology and Topography

The APE is situated within the Piedmont physiographic province which is mainly underlaid by slightly folder and faulted sedimentary rocks of the Triassic and Jurassic age dating to 240-140 million years ago (Dalton 2003). The Piedmont is characterized by a low rolling plain divided by a series of higher ridges underlain by slightly folded sedimentary rocks of the Triassic and Jurassic age (240 to 140 million years old) and Igneous rocks of the Jurassic age (Dalton 2003). Elevation across the Piedmont in New Jersey ranges from sea level at Newark Bay to 885 feet at High Mountain but generally averages between 100 and 400 feet (Dalton 2003). Local bedrock geology within the parcel is the Passaic Formation Sandstone and Siltstone facies, an interbedded sequence of reddish-brown, and less coming marron or purple, sandstone and pebbly sandstone, pebble conglomerate, siltstone, shaly siltstone and silty shale (Dalton 2003).

Hydrology

The APE is 0.07 miles north of the Raritan Water Power Canal and approximately 0.40 miles north of the Raritan River. The Raritan Water Power Canal was originally constructed in the 1840s and was listed within the NRHP in 2001. The Raritan Water Power Canal Headgate is located 1.40 miles west of the APE and the canal ultimately drains back into the Raritan River 1.08 miles east by northeast of the APE. The Raritan River basin drains approximately 1,100 square miles stretching from north-central New

Jersey to the Raritan Bay at Perth Amboy, where it ultimately drains into the Atlantic Ocean approximately 20.9 miles east by southeast of the APE.

Climate and Vegetation

Climate within the APE is consistent with the Central Climate Zone. The climate of this region can vary dramatically between urban, paved locations and unpaved areas due to the “heat island” effect. Buildings and paved surfaces retain more heat, thereby affecting the local temperatures. Because of the prevalence of paved surfaces, nighttime temperatures in heavily developed parts of the zone are regularly warmer than surrounding suburban and rural areas. The warmest month within Somerset County is July with a maximum temperature of 91.9 degrees Fahrenheit and the coldest month is January with a minimum temperature of 25.4 degrees Fahrenheit. Annual precipitation averages at 46.70 inches, with a maximum of 69.31 inches and a minimum of 29.84 inches. August is the rainiest month of the year in Somerset County and February is the driest month (NJSC 2025).

The APE is located within the Triassic Lowlands ecoregion. This region is underlain by Triassic-age sedimentary rock (brownish red, Triassic shale, sandstone, argillite, and siltstone) and consists of broad ridges and wide valleys. Today, much of the landscape is characterized by a mosaic of agricultural land and suburban/urban development (Woods et al. 2007). In areas not impacted by urbanization or agricultural use, native vegetation consists largely of mixed oak forests, with some northern areas also consisting of poplar, beech, ash, maple, and hickory trees. Within floodplains, red maple, swamp hardwoods, and mixed oaks are representative of native vegetation.

Soils

Soil series within the APE consist of Dunellen sandy loam (DunB, 3 to 8 percent slopes) north of the subject residence and Bowmansville silt loam (BoyAt, 0 to 2 percent slopes) adjacent to and south of the residence. Dunellen sandy loams are well-drained and characteristically found on outwash plains and derive from sandstone, with typical profiles consisting of an A horizon of sandy loam from 0 to 35 cm below ground surface (bgs), a B horizon of sandy loam from 35 to 79 cmbgs, and a C horizon of sandy loam transitioning to loamy sand from 79 to 178 cmbgs. Bowmansville silt loams are found within flood plains and are characteristically poorly drained. These soils are derived from loamy alluvium deposited by flood events. Typical profiles consist of an A horizon from 0 to 43 cmbgs of silt loam, a B horizon from 43 to 96 cmbgs of clay loam transitioning to sandy clay loam, and a C horizon from 96 to 152 cmbgs of fine sandy loam transitioning to stratified gravel and sand (NRCS 2025).

Background Research

Historic aerial photographs, historic map review, New Jersey State Archive Early Land Records, and any other pertinent literature were also considered. The earliest aerial photographs are from 1931 shows a rural setting, with Old York Road extant (NETR 2025). The property is extant on the 1953 aerial photograph, along with many

homes in the Bradley Gardens residential development north of Old York Road (NETR 2025).

The earliest topographic map available from 1891 shows Old York Road, just north of the Water Power Company's Raceway (Raritan Water Power Canal today), in a rural setting. Subsequent topographic maps in 1893, 1898, and 1900 show no buildings on Old York Road in the area of the property (USGS 2025). The 1943 topographic map shows the Bradley Gardens residential development, but the property at 93 Old York Road is not shown extant. The 1955 topographic map is the first to show the property as extant (USGS 2025).

New Jersey State Archive Early Land Records is a database of state land records. These records range from 1650 to 1996. However, records that post-date 1785 are kept at the county level and are generally not included in this database. More than 500 records for Somerset County were returned during the search, and more than 500 records were returned that are specific to Bridgewater Township. While some of these records may pertain to the property location or properties within one-half mile, the records are mainly handwritten surveyor notes or land patents without maps or graphics, and it is unclear if any records contain evidence of historic archaeological resources within the APE.

Results of New Jersey HPO Cultural Resources Geographic Information System

The data contained within the New Jersey Historic Preservation Office (HPO) Cultural Resources Geographic Information System (CRGIS) is produced and maintained by the HPO to provide accurate cultural resource information to governments, regulated customers, and the public. The dataset includes a vector grid of approximately one-half-mile cells indicating the presence or absence of Archeological Districts or Sites that:

1. Are National Historic Landmarks;
2. Are included in the New Jersey or National Registers of Historic Places;
3. Have been determined Eligible for inclusion in the registers through federal or state processes administered by the HPO;
4. Have been designated as Local Landmarks or Districts by local governments; or
5. Have been identified through early twentieth century state-wide archeological survey, modern cultural resource survey, or other documentation on file at the HPO.

A search of the applicant's address found that eligible archaeological resource(s) are not within a half-mile vector grid of the APE. There are no known eligible archaeological resources within a half-mile mile of the APE. As such, no survey reports pertaining to eligible archaeological resource(s) were requested from the

New Jersey HPO. There are no previously recorded archaeological resources within the APE.

ICF historians also reviewed the HPO CRGIS to identify properties previously listed in the National Register of Historic Places (NRHP) within a half-mile buffer of the subject property. The property located at 93 Old York Road, Bridgewater Township has not been previously determined eligible for NRHP listing, and it is not located within a historic district. There is one NRHP-eligible historic property 0.06 miles southeast of the property (Raritan Water Power Canal).

Historic Context

To evaluate the subject property for NRHP eligibility under Criteria A, B, C, and D, the following provides a brief historic context of the property.

Bridgewater, located in Somerset County, was founded in 1749. Initially established as a farming community, the town played a pivotal role during the American Revolution. Its strategic location near the Raritan River made it a key site for military encampments, including the Middlebrook Cantonment, where George Washington and his troops stationed during the winter of 1778-1779. One notable site is the Van Veghten House, which served as the headquarters for Quartermaster General Nathanael Greene. This historical landmark showcases the area's Revolutionary War heritage and architectural evolution, transitioning from early colonial to Greek Revival styles over the years. It was incorporated in 1798, as one of New Jersey’s original 104 townships.

Bridgewater's development accelerated in the twentieth century, transitioning from its agricultural roots to a suburban community. The construction of the Bridgewater Commons Mall and its proximity to major highways like I-287 and Route 22 transformed it into a commercial hub. Today, Bridgewater is known for its blend of historic sites and modern amenities, reflecting its journey from a colonial settlement to a thriving township.

The house at 93 Old York Road, Bridgewater Township sits on the border between a residential area to the north and rural property and the Duke Foundation to the south. Development in the neighborhood is first shown on topographic maps from 1943 with Bradley Gardens developed to the north of Old York Road. Property records indicate a construction date of 1948. The house first appears in historic aerial photographs from 1953. The house has retained its original footprint with the addition of a rear (south) deck, although material alterations have occurred. These include siding, window, and door replacement.

Expected Archeological Potential

The goals of the background research were to identify the parcel’s proximity to known historic properties and archaeological sites and determine the likelihood of the presence of intact subsurface archaeological deposits.

A search of the applicant's address found that eligible archaeological resource(s) are not within a half-mile vector grid of the APE. There are no known eligible archaeological resources within a half-mile mile of the APE. As such, no survey reports pertaining to eligible archaeological resource(s) were requested from the New Jersey HPO. There are no previously recorded archaeological resources within the APE.

Due to suburban development within the APE in conjunction with frequent flooding in the southern portion of the APE, there is a low potential for encountering unknown, intact, and potentially NRHP-eligible archaeological sites during project implementation.

Historic Resources Review

The following provides ICF historians' evaluation of the property for NRHP eligibility under Criteria A, B, C, and D.

To be eligible under Criterion A, the property would need to be associated with events that made a significant contribution to local, state, or national history. The subject property was constructed in 1948 as a single-family residence. Research did not yield any information that the subject property was the site of an important historical event or pattern of events that helped shape the built environment in Bridgewater Township. The property did not serve as a catalyst for residential development because the trend was already established for the neighborhood. As such, the subject property is not significant under NRHP Criterion A.

The property would need to be associated with a significant person or persons to be eligible under Criterion B. Historic research, including newspaper searches, has not revealed any significant associations with the lives of persons important to history at the local, state, or national level. Research did not yield evidence of the property being the home or workplace of any person who contributed to the history of Bridgewater Township. As such, the subject property is not significant under NRHP Criterion B.

For eligibility under Criterion C, the property must embody the distinctive characteristics of a type, period, or method of construction, possess high artistic value, or be considered the work of a master. The subject property is an example of a Minimal Traditional single-family home. The property is a common example of its type and does not exhibit any high artistic value. Research did not uncover any information regarding architect or builder and the property is likely not the work of a master. Furthermore, it does not represent a significant or distinguishable entity whose components may lack individual distinction. As such, the subject property is not significant under NRHP Criterion C.

This property also does not appear to be part of a historic district as there is no indication of a cohesive collection of resources that would comprise a historic district.

To be eligible under Criterion D, the property must have yielded or be likely to yield important information in history or prehistory. Typical of similar buildings, the subject property does not have any potential to yield important information regarding

construction or engineering materials, methods, or technologies used in the 1940s. As such, the subject property is not significant under NRHP Criterion D.

For these reasons, this property has been determined not eligible for NRHP-listing under Criteria A, B, C, and D. Therefore, an assessment of effects of the proposed project on the subject property was not undertaken.

Findings

Based on the review of the subject property, NJ DCA has determined the potential for intact pre- colonial or historic-era archaeological resources within the APE is minimal. Additionally, NJ DCA has determined there are no historic properties located within the APE of this Tier 2 review. Therefore, NJ DCA finds No Historic Properties Affected for this Tier 2 review.

Subject: FW: Noise and above ground storage tanks - New Jersey

NEIL SULLIVAN | Principal | [redacted] | icfi.com
ICF INTERNATIONAL | 9300 Lee Highway, Fairfax, VA 22031 | [redacted]

From: Schopp, Danielle L [redacted]
Sent: Monday, March 18, 2013 12:32 PM
To: Sullivan, Neil
Cc: Potter, James M; Rivera, Nelson A; Furda, Michael R; Fretwell, Therese J; Sanders, Jerimiah J
Subject: RE: Noise and above ground storage tanks - New Jersey

Neil,
As discussed, noise is not applicable for a disaster recovery program including reconstruction and rehabilitation that meets the requirement at 24 CFR 51.101(a)(3).

In addition, ASD requirements do not apply because the definition for HUD assisted projects at 24 CFR Part 51.201 is predicated on whether the HUD project increases the number of people exposed to hazardous operations; therefore, the environmental review for grants to elevate, rehabilitate, or reconstruct housing that existed prior to the disaster where the number of dwelling units is not increased is not required to apply 24 CFR Part 51 Subpart C.

Mike Furda, as the FEO for New Jersey, is available for questions, follow up or additional guidance.

Thanks,
Danielle

Danielle Schopp, JD, MPA

From: Sullivan, Neil [redacted]
Sent: Monday, March 18, 2013 10:26 AM
To: Schopp, Danielle L
Subject: Noise and above ground storage tanks - New Jersey

Danielle,

Just to follow up on our call on Thursday, NJ DEP requested that I e-mail you and confirm that there is no need to conduct a noise analysis for rehab and reconstruction projects (as defined by HUD) for 1-4 unit homes (the subject of NJ's first Tier 1 EA). Your comment that the analysis is unnecessary is based on the citation below at 24 CFR Part 51.101(a)(3). Can you please confirm that NJ can just cite the highlighted text below and avoid doing noise and AST analysis for both rehab and reconstruction projects?

Thanks
Neil

24 CFR Part 51.101(a)(3)
HUD support for new construction. HUD assistance for the construction of new noise sensitive uses is prohibited generally for projects with unacceptable noise exposures and is discouraged for projects with normally unacceptable noise exposure. (Standards of acceptability are contained in § 51.103(c).) This policy applies to all HUD programs providing assistance, subsidy or insurance for housing, manufactured home parks, nursing homes, hospitals, and all programs providing assistance or insurance for land development, redevelopment or any other provision of facilities and services which are directed to making land available for housing or noise sensitive development. The policy does not apply to research demonstration projects which do not result in new construction or reconstruction, flood insurance, interstate land sales registration, or any action or emergency assistance under disaster assistance provisions or appropriations which are provided to save lives, protect property, protect public health and safety, remove debris and wreckage, or assistance that has the effect of restoring facilities substantially as they existed prior to the disaster.

MEMORANDUM OF UNDERSTANDING

BETWEEN

THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
REGION II, NEW YORK, NEW YORK

AND

THE ENVIRONMENTAL PROTECTION AGENCY
REGION II, NEW YORK, NEW YORK

PURPOSE and GOAL

This Memorandum of Understanding (MOU) is established to assist the Environmental Protection Agency (EPA), Region II, and the Department of Housing and Urban Development (HUD), Region II, in meeting the Sole Source Aquifer (SSA) project review requirements of Section 1424(e) of the 1974 Safe Drinking Water Act (SDWA) PL 93-523.

The MOU establishes a formal agreement of each agency's responsibilities and the procedures to be followed in evaluating the potential groundwater impact of projects/activities submitted for HUD Federal financial assistance which are located within the project review area of a designated SSA in Region II.

Under Section 1424(e), an aquifer may be designated by EPA as a SSA if it is determined that the aquifer is the sole or principal source of drinking water for an area and, if contaminated, would create a significant hazard to public health. Following designation, no commitment of Federal financial assistance may be entered into for any project/activity within the SSA project review area which the EPA Administrator determines may contaminate the aquifer so as to create a significant hazard to public health.

The overall goal is to ensure that each project/activity receiving Federal financial assistance in a SSA project review area is designed and constructed in a manner that will prevent the introduction of contaminants into the SSA in quantities that may create a significant hazard to public health.

GEOGRAPHIC AREAS AFFECTED

This MOU applies to HUD federal financially assisted projects/activities in the project review area of all current and future designated SSAs in Region II.

Attachment 1, Designated SSAs in Region II, lists the designated SSA areas within the states of New York and New Jersey in EPA, Region II; the date of designation; and the Federal Register Notice citation. Attachment 1 also provides a map of the SSA project review area boundary for each of the designated aquifers. When any other SSAs are designated in Region II, EPA will notify HUD in writing.

DEFINITIONS

Significant Hazard to Public Health:

A level of contaminant which causes or may cause the aquifer to:

(a) Exceed any (1) maximum contaminant level set forth in any promulgated National Primary Drinking Water Standard; (2) state standard where more stringent than the Federal standard; (3) public health advisory level for currently unregulated contaminants; at any point where the water may be used for drinking purposes, or

(b) May otherwise adversely affect the health of persons, or

(c) May require a public water system to install additional treatment to prevent such adverse effect.

Federal Financial Assistance:

Financial benefits provided directly as aid to a project by a department, agency, or instrumentality of the federal government in any form including contracts, grants and loan guarantees. Actions or projects carried out by the federal government itself do not involve federal financial assistance.

Actions performed for the federal government by contractors should be distinguished from contracts entered into specifically for the purpose of providing financial assistance, and will not be considered programs or actions receiving Federal financial assistance.

Federal financial assistance is limited to benefits earmarked for a specific project or action and directly awarded to the project or action. Indirect assistance, e.g., in the form of a loan to a developer by a lending institution which in turn receives federal assistance not specifically related to the project in question is not federal financial assistance under Section 1424(e).

SSA Project Review Area:

The area within which federal financially assisted projects/activities will be reviewed, which includes the designated area and may include all or a portion of the streamflow source area(s). The designated area can include the area above the aquifer, the area which recharges the aquifer (possibly including all or a portion of the streamflow source area) and the area where the population served by the aquifer resides. Streamflow source zone is defined as the upstream headwaters area of losing streams (streams contributing to recharge to Ground Water) that drain into the recharge area. The extent of the SSA project review area is outlined in the Federal Register designation notice for that SSA. Attachment 1 lists the Federal Register Notice citation and provides a map of the SSA project review area.

MOU ATTACHMENTS

Attachment 1: Designated SSAs in Region II

Attachment 2: A. Non-Housing Initial Screen Criteria
B. Housing Initial Screen Criteria

Attachment 3: SSA Preliminary Review Information Requirements

Attachment 4: Hazardous Constituents

ENVIRONMENTAL REVIEW RESPONSIBILITY

Pursuant to Section 1424(e) of the SDWA, EPA is responsible for designating SSAs and reviewing federal financially assisted projects/activities within SSA project review areas.

Pursuant to the National Environmental Policy Act (NEPA) and other provisions of law, HUD is responsible for environmental review and decision making except in those cases delegated by law such as with Community Development Block Grant Program (CPD). Environmental responsibility includes compliance with Section 1424(e) of the SDWA.

EIS EARLY NOTIFICATION/SCOPING

If an Environmental Impact Statement (EIS) is prepared for a project/activity in a SSA project review area, HUD or its grant recipients that assume by law environmental responsibilities and EPA shall coordinate at the earliest possible time so that the draft EIS contains EPA's SSA review determination. This is to ensure that any possible groundwater contamination has been considered.

This early notification will serve to initiate consultations with the developer to determine the scope of study that may be necessary if any formal groundwater quality assessment is required.

REVIEW PROCESS:
COMMUNITY PLANNING AND DEVELOPMENT (CPD) and HOUSING PROGRAM

The general procedures to be followed by HUD, its delegated agencies and EPA in reviewing HUD federal financially assisted activities and determining their potential impact on the SSA are outlined below. The overall goal is to ensure that each project/activity receiving federal financial assistance is designed and constructed in a manner that will prevent the introduction of contaminants into the SSA in quantities that may create a significant hazard to public health. Two levels of potential review are: (1) Initial Screen/Preliminary Review, and (2) Formal Section 1424(e) Review.

I. Excluded Projects/Activities

EPA and HUD mutually agree that the following list of project/activity categories would not create a significant hazard to public health:

-Construction of individual new residential structures containing from one to four units

-Funding of planning grants

-Rehabilitation of residential units

-Funding of all other grants for non-construction projects/activities

-Projects identifed as exempt in 24 CFR 58.34

These categories of projects/activities are therefore excluded from the Initial Screen/Preliminary Review requirements as outlined in Sections II and III below. Potential CPD recipients; states; other delegated agencies and HUD are responsible for making this determination for their respective programs. EPA may request information on these projects/activities and conduct a review if EPA determines it to be necessary.

II. CPD Applications/Final Statements

A. Initial Screen/Preliminary Review

HUD shall notify all potential CPD recipients, including states that are administering HUD programs (Non-Entitlement Small Cities Program, etc.) and other delegated agencies with jurisdiction in SSA project review areas of the SSA review requirements under Section 1424(e) and of their responsibility as outlined in this MOU.

Potential CPD recipients shall conduct an initial screen of CPD projects/activities proposed for HUD federal financial assistance prior to submission of an application or final statement to HUD. Attachment 2.A, Non-Housing Initial Screen Criteria, shall be used for CPD projects/activities that do not involve housing; and Attachment 2.B, Housing Initial Screen Criteria, for CPD projects/activities involving housing only.

EPA shall be notified of any projects/activities which result in a positive response to one of the criteria questions in Attachment 2. Where a project/activity meets one of the criteria in Attachment 2, the information in Attachment 3, SSA Preliminary Review Information Requirements, shall also be completed and forwarded to EPA along with applicable project/final statement information.

Upon receipt of the above, EPA will conduct it's Preliminary Review. If additional information is required, EPA will inform the potential CPD recipient and HUD. The potential CPD recipient shall be responsible for submitting to EPA any additional information requested in a timely manner.

Based on the information provided, EPA will make its determination on whether to complete its review at this stage and provide SSA review clearance, or proceed to a Formal Section 1424(e) Review. The project/activity may be cleared as is, or with modifications.

B. Timeframe for **Preliminary Review** and Notification

Within fifteen calendar days of EPA's receipt of the project's final statement, Attachment 2 and Attachment 3, EPA will notify the potential CPD recipient and HUD of one or more of the following:

-the project/activity has received SSA review clearance
-the project/activity requires modifications to receive SSA review clearance
-additional environmental information is required
-additional time to review the project, is required
-the project/activity raises major environmental concerns requiring interagency consultation
-a Formal Section 1424(e) Review is required

If EPA does not notify HUD within 15 days of receipt of the project, HUD should proceed with its project review.

HUD shall not authorize a release of funds until all outstanding issues with regard to the subject project/activity have been resolved.

C. Formal Section 1424(e) Review

Should a Formal Section 1424(e) Review be required, EPA shall formally notify the potential CPD recipient and HUD of this decision. If additional information is required, the potential CPD recipient shall be responsible for submitting the requested information to EPA in a timely manner. EPA may also schedule a public hearing to gather additional information.

Based on the information provided, EPA shall make a determination to either approve the project/activity, request more information, suggest modifications or disapprove the project/activity.

III. **Housing Program Applications**

A. Initial Screen/Preliminary Review

HUD shall notify all of its field offices of the SSA review requirements under Section 1424(e) and of their responsibilities as outlined in this MOU.

HUD shall conduct an initial screen of housing projects proposed for HUD Federal financial assistance. Attachment 2.B, Housing Initial Screen Criteria, shall be used for this review. EPA shall be notified of any projects which result in a positive response to one of the criteria questions in Attachment 2.B. Where a project meets one of the criteria in Attachment 2.B, the information in Attachment 3, SSA Preliminary Review Information Requirements, shall also be completed and forwarded to EPA along with the applicable project information.

Upon receipt of the above, EPA will conduct its Preliminary Review. If additional information is required, EPA will inform the HUD field office who shall than be responsible for submitting to EPA the requested information in a timely manner.

Based on the information provided, EPA will make its determination on whether to complete its review at this stage and provide SSA review clearance or proceed to a Formal Section 1424(e) Review. The project may be cleared in its existing form, or with modifications.

B. Timeframe for **Preliminary Review** and Notification

Within fifteen calendar days of EPA's receipt of the pertinent environmental information from the housing application, Attachment 2 and Attachment 3, EPA will notify HUD of one or more of the following:

- -the project has received SSA review clearance
- -the project requires modifications to receive SSA review clearance
- -additional environmental information is required
- -additional time to review the project is required
- -the project raises major environmental concerns requiring interagency consultation
- -a Formal Section 1424(e) Detailed Review is required

The project environmental clearance needed for project approval shall not be considered complete (appropriate sign-offs) until outstanding SSA issues with regard to the subject project have been satisfactorily resolved.

If EPA does not notify HUD within 15 days of receipt of the project, HUD should proceed with its project review.

C. Formal Section 1424(e) Review

Should a Formal Section 1424(e) Review be required, EPA shall formally notify HUD of this decision. If additional information is required, HUD shall be responsible for submitting the requested information to EPA in a timely manner. A public hearing may be held to gather additional information.

Based on the information provided, EPA shall make a determination to either approve the project, request more information, suggest modifications or disapprove the project.

D. Local Area Certification For Housing Environmental Review

If the community is wholly or partially within a SSA project review area boundary, the local certified agency shall have the same responsibility as HUD in meeting the SSA review requirements as outlined in Section 1424(e) and this MOU.

GENERAL PROCEDURAL MATTERS

Materials submitted to EPA by HUD or the applicant will be addressed to the attention of:

Chief, Environmental Impacts Branch
U.S. EPA Region II
26 Federal Plaza, Room 500
New York, New York 10278

Chief, Environmental Review Section
USEPA Region 2
290 Broadway, 25th floor
New York, NY 10007

The following representatives will serve as liaisons for HUD and EPA respectively. The liaisons will maintain communication as needed regarding projects/activities affecting the SSAs and this MOU.

HUD: Regional Office Environmental Officer
(212) 264-0793

EPA: Chief, Environmental Impacts Branch
(212) 264-1840

Chief, Environmental Review Section
212-637-3738

This MOU is subject to revision upon agreement by both parties.

NON-HOUSING PROJECT/ACTIVITY INITIAL SCREEN CRITERIA
(For projects in a designated Sole Source Aquifer area)

The following list of criteria questions are to be used as an initial screen to determine which **non-housing** projects/activities should be forwarded to the Environmental Protection Agency (EPA) for Preliminary Sole Source Aquifer (SSA) Review. (For housing projects/activities see Attachment 2.B) If any of the questions are answered affirmatively, Attachment 3, SSA Preliminary Review Requirements, should also be completed. The application/final statement, this Attachment, Attachment 3, and any other pertinent information should than be forwarded to EPA at the address below.

Any project/activity not meeting the criteria in this Attachment, but suspected of having a potential adverse effect on the Sole Source Aquifer should also be forwarded. Contact EPA if you have any questions.

Chief, Environmental Impacts Branch
USEPA, Region II
26 Federal Plaza, Room 500
New York, New York 10278
(212) 264-1840

Chief, Environmental Review Section
USEPA Region 2
290 Broadway, 25th floor
New York, NY 10007
212-637-3738

CRITERIA QUESTIONS

	YES	NO	N/A
1. Is the project/activity located within a currently designated or proposed groundwater sensitive area such as a special Ground Water Protection Area, Critical Supply Area, Wellhead Protection Area etc.? [This information can be obtained from the County or Regional planning board, the local health department, the State health department or the State environmental agency.]	___	___	___
2. Is the project/activity located within a one half mile radius (2640 feet) of a current or proposed public water supply well or wellfield? [This information can be obtained from the local health department, the State health department or the State environmental agency.]	___	___	___

3. Will the project/activity include or directly cause: (check appropriate items)

- construction or expansion of solid waste disposal, recycling or conversion facilities	___	___	___
- construction or expansion or closure of landfills	___	___	___
- construction or expansion of water supply facilities (i.e., treatment plant, pump house, etc.)	___	___	___
- construction or expansion of on-site wastewater treatment plants or sewage trunk lines, greater than 1/4 mile	___	___	___
- construction or expansion of gas or petroleum trunk lines, greater than 1200 feet	___	___	___
- construction or expansion of railroad spurs or similar extensions	___	___	___
- construction or expansion of municipal sewage treatment plants	___	___	___

4. Will the project/activity include storage or handling of any hazardous constituents as listed in Attachment 4, Hazardous Constituents? ___ ___ ___

   If these constituents are used during the construction phase of the project, than an assurance statement must be provided indicating that chemicals will be used in a safe and proper manner, and that they will be promptly removed after construction is completed.

5. Will the project/activity include bulk storage of petroleum in underground or above ground tanks in excess of 1100 gallons? ___ ___ ___

6. Will the project/activity require a federal or state discharge elimination permit or modification of an existing permit? ___ ___ ___

ATTACHMENT 2.B

HOUSING/PROJECT INITIAL SCREEN CRITERIA
(For projects in a designated Sole Source Aquifer area.)

The following list of criteria questions are to be used as an initial screen to determine which **housing** projects/activities should be forwarded to the Environmental Protection Agency (EPA) for Preliminary Sole Source Aquifer (SSA) Review. (For non-housing projects see Attachment 2.A). If any of the questions are answered affirmatively, Attachment 3, SSA Preliminary Review Requirements, should also be completed. The application/final statement, this Attachment, Attachment 3, and applicable project information than be forwarded to EPA at the address below.

Any project not meeting the criteria in this Attachment, but suspected of having a potential adverse effect on the Sole Source Aquifer should also be forwarded. Contact EPA if you have any questions.

Chief, Environmental Impacts Branch

Chief, Environmental Review Section
USEPA Region 2
290 Broadway, 25th floor
New York, NY 10007
212-637-3738

	ENCLOSED YES	NO
I. Project/Activity Location		
1. Provide the geographic location and total acreage of the project/activity site. Include a site location map which identifies the site in relation to the surrounding area. [Examples of maps which can be used include: 1:24,000 or 1:25,000 U.S. Geological Survey quadrangle sheet, Hagstroms Street Map.]	___	___
2. If applicable, identify which groundwater sensitive areas (Special Ground Water Protection Area, Critical Supply Area, Wellhead Protection Area etc.) the project/activity is located within or adjacent to. [This information may be obtained from the County or Regional planning board, the local health department, the State health department or the State environmental agency.]	___	___
II. Nature of Project/Activity		
3. Provide a general narrative describing the project/activity including but not limited to: type of facility; type of activities to be conducted; number and type of units; number of residents etc. Provide the general layout of the project/activity site and a site-plan if available.	___	___

III. Public Water Supply

4. Provide a description of plans to provide water supply. ___ ___

5. Provide the location of nearby existing or proposed public water supply wells or wellfields within a one half mile radius (2640 feet) of the project/activity. Provide the name of the supplier(s) of those wells or wellfields. This information should be available from the local health department, State health department or the State environmental agency. If private wells are to be used, then information necessary to obtain a well drilling permit should be provided. ___ ___

V. Wastewater and Sewage Disposal

6. Provide a description of plans to handle wastewater and sewage disposal. If the project/activity is to be served by existing public sanitary sewers provide the name of the sewer district. ___ ___

7. Provide a description of plans to handle storm water runoff. ___ ___

8. Identify the location, design, size of any on-site recharge basins, dry wells, leaching fields, retention ponds etc. ___ ___

VI. Use, Storage, Transport of Hazardous or Toxic Materials **(Applies only to non-housing projects/activities)**

9. Identify any products listed in Attachment 3, Hazardous Constituents, of the Housing and Urban Development-Environmental Protection Agency Memorandum of Understanding which may be used, stored, transported, or released as a result of the construction activity. ___ ___

10. Identify the number and capacity of underground storage tanks at the project/activity site. Identify the products and volume to be stored, and the location on the site. ___ ___

11. Identify the number and capacity of above ground storage tanks at the project/activity site. Identify the products and volume to be stored, and the location on the site. ___ ___

ATTACHMENT 4 HAZARDOUS CONSTITUENTS

Source: adapted from 40 CFR Ch.I (7-1-87 Edition)
Part 261, App. VII

Common Name	Chemical abstracts name
Acetonitrile	Same
Acetophenone	Ethanone, 1-phenyl-
2-Acetylaminofluorene	Acetamide, N-9H-fluoren-2yl-
Acetyl Chloride	Same
1-Acetyl-2-thiourea	Acetamide, N-(aminothioxymethyl)-
Acrolein	2-Propenal
Acrylamide	2-Propenamide
Acrylonitrile	2-Propenenitrile
Aflatoxins	Aflatoxin
Aldicarb	Propanal, 2-methyl-2-(methylthio)-, O[(methylamino)carbonyl]oxime
Aldrin	1,4:5,8-Dimethanonapthalene, 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydro-, (1alpha, 4alpha, 4beta, 5alpha, 8alpha, 8beta)-
Allyl alcohol	2-Propen-1-ol
Allyl chloride	1-Propane, 3-chloro-
Aluminum phosphide	Same
4-Aminobiphenyl	(1,1'-Biphenyl)-4-amine
5-(Aminomethyl)-3-isoxazolol	3(2H)-isoxazolone, 5-(aminomethyl)-
4-Aminopyridine	4-Pyridineamine
Amitrole	1H-1,2,4-Triazol-3-amine
Ammonium vandate	Vanadic acid, ammonium salt
Aniline	Benzenamine
Antimony and compounds, NOS	Antimony
Aramite	Sulfurous acid, 2-chlorethyl-, 2-[4-(1,1-dimethylethyl) phenoxy]-1-methylethyl ester
Arsenic and compounds, NOS	Arsenic
Arsenic acid	Arsenic acid AsH3O4
Arsenic pentoxide	Arsenic oxide As2O5
Arsenic trioxide	Arsenic oxide As2O3
Auramine	Benzamine, 4,4'-carbonimidoylbis[N,N-dimethyl-
Azaserine	L-Serine, diazoacetate (ester)
Barium and compounds NOS	Barium
Barium cyanide	Same
Benz[c]acridine	Same
Benz[a]anthracene	Same
Benzal chloride	Benzene, (dichloromethyl)-
Benzene	Same
Benzenearsonic acid	Arsonic acid, phenyl-
Benzidine	[1,1'-Biphenyl]-4,4'-diamine
Benzo[b]fluorathene	Benz[e]acephenanthrylene
Benzo[j]fluorathene	Same
Benzo[a]pyrene	Same

p-Benzoquinone	2,5-Cyclohexadiene-1,4-dione
Benzotrichloride	Benzene, (trichloromethyl)-
Benzyl chloride	Benzene, (chloromethyl)-
Beryllium and compounds NOS	Beryllium
Bis(2-chloromethoxy)ethane	Ethane, 1,1'-[methylenebis(oxy)]bis[2-chloro-
Bis(2-chloroethyl)ether	Ethane, 1,1'-oxybis[2-chloro-
Bis(2-chloroisopropyl)ether	Propane, 2,2'-oxybis[2-chloro-
Bis(chloromethyl)ether	Methane, oxybis[chloro-
Bis(2-ethylhexyl) phthalate	1,2-Benzenedicarboxylic acid, bis(2-ethylhexyl) ester.
Bromoacetone	2-Propanone, 1-bromo-
Bromoform	Methane, tribromo-
4-Bromophenyl phenyl ether	Benzene, 1-bromo-4-phenoxy
Brucine	Strychnidin-10-one, 2,3-dimethoxy
Butyl benzyl phthalate	1,2-Benzenedicarbozylic acid, butyl phenylmethyl
Cacodylic acid	arsenic acid, dimethyl-
Cadmium and compounds NOS	Cadmium
Calcium chromate	Chromic acid, calcium salt
Calcium cyanide	Same
Carbon disulfide	Carbon bisulfide
Carbon oxyfluoride	Carbonic difluoride
Carbon tetrachloride	Methane, tetrachloro-
Chloral	Acetaldehyde, trichloro-
Chlorambucil	Benzenebutanoic acid, 4-[bis(2-chloroethyl)amino-
Chlordane, alpha and gamma isomers	4,7-Methano-1H-indene, 1,2,4,5,6,7,8,8-octachloro-2,3,3a,4,7,7a-hexahydro-
Chlorinated benzenes, NOS	
Chlorinated ethane, NOS	
Chlorinated fluorocarbons NOS	
Chlorinated naphthalene, NOS	
Chlorinated phenol, NOS	
Chlornaphazine	2-Naphthalenamine, N,N-bis(2-chloroethyl)-
Chloroacetaldehyde	Acetaldehyde, chloro-
Chloroalkyl ethers, NOS	
p-Chloroaniline	Benzenamine, 4-chloro-
Chlorobenzene	Benzene, chloro-
Chlorobenzilate	Benzeneacetic acid, 4-chloro-alpha-(4-chlorophenyl)-alpha-hydroxy-, ethyl ester
p-Chloro-m-cresol	Phenol, 4-chloro-3-methyl-
1-Chloro-2,3-epoxypropane	Oxirane, (chloromethyl-)
2-Chloroethyl vinyl ether	Ethene, (2-chloroethoxy)-
Chloroform	Methane, trichloro-
Chloromethyl methyl ether	Methane, chloromethoxy-
beta-Chloronaphthalene	Napthalene, 2-chloro-
o-Chlorophenol	Phenol, 2-chloro-
1-(o-Chlorophenyl) thiourea	Thiourea, (2-chlorophenyl)-
Chloroprene	2-Chloro-1,3-butadiene
3-Chloropropionitrile	Propanenitrile, 3-chloro-
Chromium and compounds NOS	Chromium
Chrysene	Same
Citrus red No. 2	2-Napthalenol, 1-[(2,5-dimethoxyphenyl)azo]-
Coal tars	
Copper cyanide	Copper cyanide CuCN

Creosote	Same
Cresols (Cresylic acid)	Phenol, methyl-
Crotonaldehyde	2-Butenal
Cyanides (soluble salts and complexes) NOS	
Cyanogen	Ethanedinitrile
Cyanogen bromide	Same
Cyanogen chloride	Same
Cycasin	beta-D-Glucopyranoside, (methyl-ONN-azoxy)methyl..
2-Cyclohexyl-4,6-dinitrophenol	Phenol, 2-cyclohexyl-4,6-dinitro-
Cyclophosphamide	2H-1,3,2-Oxazaphosphorin-2-amine, N,N-bis) 2-chloroethyl)tetrahydro-, 2-oxide
2,4-D, salts and esters	Acetic acid, (2,4-dichlorophenoxy)-, salts and esters..
Daunomycin	5,12-Napthacenedione,(8S-cis)-8-acetyl-10-[(3-amino-2,3,6-trideoxy-alpha-L-lyxo-hexoypranosyl)oxy]-7,8,9,10-tetrahydro-6,8,11-trihydroxy-1-methoxy-
DDD	Benzene, 1,1'-(2,2-dichloroethylidene)bis[4-chloro-
DDE	Benzene, 1,1'-(dichloroethenylindene)bis[4-chloro-
DDT	Benzene, 1,1'-(2,2,2-trichloroethylidene)bis[4-chloro-.
Diallate	Carbamothioic acid, bis(1-methylethyl)-S-(2,3-dichloro-2-propenyl) ester
Dibenz[a,h]acridine	Same
Dibenz[a,j]acridine	Same
Dibenz[a,h]anthracene	Same
7H-Dibenzo[c,g]carbazole	Same
Dibenzo[a,e]pyrene	Naptho[1,2,3,4-def]chrysene
Dibenzo[a,h]pyrene	Dibenzo[b,def]chrysene
Dibenzo[a,i]pyrene	Benzo[rst]pentaphene
1,2-Dibromo-3-chloropropane	Propane, 1,2-dibromo-3-chloro-
Dibutylphthalate	1,2-Benzenedicarboxylic acid, dibutyl ester
o-Dichlorobenzene	Benzene, 1,2-dichloro-
m-Dichlorobenzene	Benzene, 1,3-dichloro-
p-Dichlorobenzene	Benzene, 1,4-dichloro-
Dichlorobenzene NOS	Benzene, dichloro-
3,3'-Dichlorobenzidine	[1,1'-Biphenyl]-4,4'-diamine, 3,3'-dichloro-
1,4-Dichloro-2-butene	2-Butene, 1,4-dichloro-
Dichlorodifluoromethane	Methane, dichlorodifluoro-
1,2-Dichloroethylene	Ethene, 1,2-dichloro-, (E)-
Dichloroethylene, NOS	Dichloroethylene
1,1-Dichloroethylene	Ethene, 1,1-dichloro-
2,4-Dichlorophenol	Phenol, 2,4-dichloro-
2,6-Dichlorophenol	Phenol, 2,6-dichloro-
Dichlorophenylarsine	Arsonous dichloride, phenyl-
Dichloropropane, NOS	Propane, dichloro-
Dichloropropanol, NOS	Propanol, dichloro-
Dichloropropene, NOS	1-Propene, dichloro-
1,3-Dichloropropene	1-Propene, 1,3-dichloro-
Dieldrin	2,7:3,6-Dimethanonaphth[2,3-b]oxirene,3,4,5,6,9,9-hexachloro-1a,2,2a,3,6,6a,7,7a-octahydro-, (1aalpha,2beta,2aalpha,3beta,6beta,6aalpha, 7beta,7aalpha)-
1,2:3,4-Diepoxybutane	2,2'-Bioxirane

Diethylarsine	Arsine, diethyl-
1,4 Diethyleneoxide	1,4 Dioxane
N,N'-Diethylthydrazine	Hydrazine, 1,2-diethyl-
O,O-Diethyl S-methyldithiophosphate	Phosphorodithioic acid, O,O-diethyl S-methyl ester
Diethyl-p-nitro phenyl phosphate	Phosphoric acid, diethyl-4-nitrophenyl ester
Diethylphthalate	1,2-Benzenedicarboxylic acid, diethyl ester
O,O-Diethyl O-pyrazinyl phosphorothioate	Phosphorothioic acid, O,O-diethyl O-pyrazinyl ester
Diethylstilbesterol	Phenol, 4,4'-(1,2-diethyl-1,2-ethenediyl)bis,(E)
Dihydrosafrole	1,3 Benzodioxole, 5-propyl-
3,4-Dihydroxy-alpha-(methylamino) methyl benzyl alcohol	(+ -)-1,2-Benzenediol, 4-[1-hydroxy-2-(methylamino)ethyl]-
Diisopropylfluorophosphate (DFP)	Phosphorofluoridic acid, bis(1-methylethyl)ester
Dimethoate	Phosphorodithioic acid, O,O-dimethyl S-[2-
3,3'-Dimethoxybenzidine	[1,1'-Biphenyl]-4,4'-diamine, 3,3'-dimethoxy-
p-Dimethylaminoazobenzene	Benzenamine, N,N-dimethyl-4-(phenylazo)-
7,12-Dimethylbenz[a]anthracene	Benz[a]anthracene, 7,12-dimethyl
3,3'-Dimethylbenzidine	[1,1'-Biphenyl]-4,4'-diamine, 3,3'-dimethyl-
Dimethylcarbamoyl chloride	Carbamic chloride, dimethyl-
1,1-Dimethylhydrazine	Hydrazine, 1,1-dimethyl-
1,2-Dimethythydrazine	Hydrazine, 1,2-dimethyl-
alpha, alpha-Dimethylphenethylamine	Benzeneethanamine, alpha,alpha-dimethyl-
2,4-Dimethylphenol	Phenol, 2,4-dimethyl-
Dimethylphthalate	1,2-Benzenedicarboxylic acid, dimethyl ester
Dimethyl sulfate	Sulfuric acid, dimethyl ester
Dinitrobenzene, NOS	Benzene, dinitro-
4,6-Dinitro-o- cresol and salts	Phenol, 2-methyl-4,6-dinitro- and salts
2,4-Dinitrophenol	Phenol, 2,4-dinitro-
2,4-Dinitrotoluene	Benzene, 1-methyl-2,4-dinitro-
2,6-Dinitro toluene	Benzene, 2-methyl-1,3-dinitro-
Dinoseb	Phenol, 2-(l-methylpropyl)-4,6-dinitro-
Di-n-octylphthalate	1,2-Benzenedicarboxylic acid, dioctyl ester
Diphenylamine	Benzenamine, N-phenyl-
1,2-Diphenylhydrazine	Hydrazine, 1,2-diphenyl-
Di-n-propylnitrosamine	1-Propanamine, N-nitroso-N-propyl-
Disulfoton	Phosphorodithioic acid, O,O-diethyl S-[2-(ethylthio)ethyl] ester
Dithiobiuret	Thioimidodicarbonic diamide
Endosulfan	6,9-Methano-2,4,3-benzodioxathiepen, 6,7,8,9,10,10 -hexachloro-1,5,5a,6,9,9a-hexahydro-,3-oxide
Endothal	7-Oxabicyclo[2.2.1]heptane-2,3-dicarboxylic acid
Endrin	2,7:3,6-Dimethanonapth[2,3-b]oxirene,3,4,5,6,9,9-hexachloro-1a,2,2a,3,6,6a,7,7a-octahydro-,1aalpha, 2beta,2abeta,3alpha,6alpha,6abeta,7beta,7aalpha)-
Ethyl carbamate (urethane)	Carbamic acid, ethyl ester
Ethyl cyanide	Propanenitrile
Ethylenebisdithiocarbamic acid, salt and esters	Carbamodithioic acid, 1,2-ethanediylbis-, salts and esters
Ethylene dibromide	Ethane, 1,2-dibromo-
Ethylene dichloride	Ethane, 1,2-dichloro-
Ethylene glycol monoethyl ether	Ethanol, 2-ethoxy-
Ethyleneimine	Aziridine

Ethylene oxide	Oxirane
Ethylenethiourea	2-Imidazolidinethione
Ethylidene dichloride	Ethane, 1,1-dichloro-
Ethyl methacrylate	2-Propenoic acid, 2-methyl-, ethyl ester
Ethylmethane sulfonate	Methanesulfonic acid, ethyl ester
Famphur	Phosphorothioic acid, 0-[4-[(dimethylamino) sulfonyl] phenyl] O,O-dimethyl ester
Fluoranthene	Same
Fluorine	Same
Fluoroacetamide	Acetamide, 2-fluoro-
Fluoroacetic acid, sodium salt	Acetic acid, fluoro-, sodium salt
Formaldehyde	Same
Glycidylaldehyde	Oxiranecarboxyaldehyde
Halomethane, NOS	
Heptachlor	4,7-Methano-1H-indene, 1,4,5,6,7,8,8-heptachloro-3a,4,7,7a-tetrahydro-
Heptachlor epoxide	2,5-Methano-2H-indeno[1,2b]oxirene,2,3,4,5,6,7,7-heptachloro- 1a,1b,5,5a,6,6a-hexahydro-alpha, beta and gamma isomers)
Hexachlorobenzene	Benzene, hexachloro-
Hexachlorobutadiene	1,3-Butadiene, 1,1,2,3,4,4-hexachloro-
Hexachlorocyclopentadiene	1,3-Cyclopentadiene, 1,2,3,4,5,5-hexachloro-
Hexachlorodibenzo-p-dioxins	
Hexachlorodibenzofurans	
Hexachloroethane	Ethane, hexachloro-
Hexachlorophene	Phenol, 2,2'-methylenebis[3,4,6-trichloro-
Hexachloropropene	1-Propene, hexachloro-
Hexaethyltetraphosphate	Tetraphosphoric acid, hexaethyl ester
Hydrazine	Same
Hydrogen cyanide	Hydrocyanic acid
Hydrogen fluoride	Hydrofluoric acid
Hydrogen sulfide	Same
Indeno[1,2,3cd]pyrene	Same
Iron dextran	Same
Isobutyl alcohol	1-Propanol, 2-methyl-
Isodrin	1,4:5,8-Dimethanonaphthalene, 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydrol-1alpha,4alpha, 4beta,5beta,8beta,8beta-
Isosafrole	1,3-Benzodioxole, 5-(1-propenyl)-
Kepone	1,3,4-Metheno-2H-cyclobuta[cd]pentalen-2-one, 1,1a,3,3a,4,5,5,5a,5b,6-decachlorooctahydro-
Lasiocarpine	2-Butenoic acid, 2-methyl-,7-[(2,3-dihydroxy-2-(1-methoxyethyl)-3-methyl-1-oxobutoxy)methyl]-2,3,5,7a-tetrahydro-1H-pyrrolizin-1-ester, [1S-[1alpha(Z),7(2s,3R),7alpha]]-
Lead and compounds NOS	
Lead acetate	Acetic acid, lead(2 +) salt
Lead phosphate	Phosphoric acid, lead (2 +) salt
Lead subacetate	Lead, bis(acetato-O)tetrahydroxytri-
Lindane	Cyclohexane, 1,2,3,4,5,6-Hexachloro-
Maleic anhydride	2,5-Furandione
Maleic hydrazide	3,6-Pyridazinedione, 1,2-dihydro-

Malonoitrile	Propanedinitrile
Melphalan	L-Phenylalanine, 4-[bis(2-chloroethyl)amino]-
Mercury fulminate	Fulminic acid, mercury (2 +) salt
Mercury and compounds NOS	Same
Methacrylonitrile	2-Propanenitrile, 2-methyl-
Methapyrilene	1,2-Ethanediamine, N,N-dimethyl-N'-2-pyridinyl-N'-(2-thienylmethyl)-
Methomyl	Acetimidic acid, N-[(methylcarbamoyl)oxy]thio-, methyl ester
Methoxychlor	Benzene, 1,1'-(2,2,2-trichloroethylidene)[4-methoxy-
Methyl bromide	Methane, bromo-
Methyl chloride	Methane, chloro-
Methylchlorocarbonate	Carbonchloridic acid, methyl ester
Methyl chloroform	Ethane, 1,1,1-trichloro-
3-Methylcholanthrene	Benz[j]aceanthrylene, 1,2-dihydro-3-methyl-
4,4'-Methylenebis(2-chloroaniline)	Benzenamine, 4,4'-methylenebis[2-chloro-
Methylene bromide	Methane, dibromo-
Methylene chloride	Methane, dichloro-
Methyl ethyl ketone (MEK)	2-Butanone
Methyl ethyl ketone peroxide	2-Butanone, peroxide
Methyl hydrazine	Hydrazine, methyl-
Methyl iodide	Methane, iodo-
Methyl isocyanate	Methane, isocyanato-
2-Methyllactonitrile	Propanenitrile, 2-hydroxy-2-methyl-
Methyl methacrylate	2-Propenoic acid, 2-methyl-, methyl ester
Methyl methanesulfonate	Methanesulfonic acid, methyl ester
Methyl parathion	Phosphorothioic acid, O,O-dimethyl O-(4-nitrophenyl) ester
Methylthiouracil	4(1H)-Pyrimidinone, 2,3-dihydro-6-methyl-2-thioxo-
Mitomycin C	Azirino[2',3':3,4]pyrrolo[1,2-a]indole-4,7-dione,6amino-8[[(aminocarbonyl)oxy]methyl]-1,1a,2,8,8a,8b-hexahydro-8a-methoxy-5-methyl-[1aR-(1aalpha,8beta,8aalpha,8alpha)]-
MNNG	Guanidine, N-methyl-N'-nitro-N-nitroso-
Mustard gas	Ethane, 1,1'-thiobis[2-chloro-
Napthalene	Same
1,4-Naphthloquinone	1,4-Naphthalenedione
alpha-Naphthylamine	1-Naphthalenamine
beta-Naphthylamine	2-Naphthalenamine
alpha-Naphthylthiourea	Thiourea, 1-naphthalenyl-
Nickel and compounds NOS	Same
Nickel carbonyl	Nickel carbonyl, (T-4)-
Nickel cyanide	Same
Nicotine and salts	Pyridine, (S)-3-(1-methyl-2-pyrrolidinyl)-, and salts
Nitric oxide	Nitrogen oxide NO
p-Nitroaniline	Benzenamine, 4-nitro-
Nitrobenzene	Benzene, nitro-
Nitrogen dioxide	Nitrogen oxide NO2
Nitrogen mustard and hydrochloride salt	Ethanamine, 2-chloro, N-(2-chloroethyl)-N-methyl-, and hydrochloride salt
Nitrogen mustard N-oxide and hydrochloride salt	Ethanamine, 2-chloro-N-(2-chloroethyl)-N-methyl, N-oxide, and hydrochloride salt

Nitroglycerin	1,2,3-Propanetriol, trinitrate
p-Nitrophenol	Phenol, 4-nitro-
2-Nitropropane	Propane, 2-nitro-
4-Nitroquinoline-1-oxide	Quinoline, 4-nitro-1-oxide-
Nitrosamine, NOS	
N-Nitrosodi-n-butylamine	1-Butanamine, N-butyl-N-nitroso-
N-Nitrosodiethanolamine	Ethanol, 2,2'-(nitrosoimino)bis-
N-Nitrosodiethylamine	Ethanamine, N-ethyl-N-nitroso-
N-Nitrosodimethylamine	Methamine, N-methyl-N-nitroso-
N-Nitro-N-ethyl urea	Urea, N-ethyl-N-nitroso-
N-Nitrosomethylethylamine	Ethanamine, N-methyl-N-nitroso-
N-Nitroso-N-methylurea	Urea, N-methyl-N-nitroso-
N-Nitroso-N-methylurethane	Carbamic acid, methylnitroso-, ethyl ester
N-Nitrosomethylvinylamine	Vinylamine, N-methyl-N-nitroso-
N-Nitrosomorpholine	Morpholine, N-nitroso-
N-Nitrosonornicotine	Pyridine, 3-(1-nitroso-2-pyrrolidinyl)-,(S)-
N-Nitrosopiperidine	Piperidine, 1-nitroso-
Nitrosopyrrolidine	Pyrrolidine, 1-nitroso-
N-Nitrososarcosine	Glycine, N-methyl-N-nitroso-
5-Nitro-o-toluidine	Benzenamine, 2-methyl-5-nitro-
Octamethylprophosphoramide	Diphosphoramide, octamethyl-
Osmium tetroxide	Osmum oxide (OsO4)
Paraldehyde	1,3,5-Trioxane, 2,4,6-trimethyl-
Parathion	Phosphorothioic acid, O,O-diethyl O-(4-nitrophenyl) ester
Pentachlorobenzene	Benzene, pentachloro-
Pentachlorodibenzo-p-dioxins	
Pentachlorodibenzofurans	
Pentachloroethane	Ethane, pentachloro-
Pentachloronitrobenzene (PCNB)	Benzene, pentachloronitro-
Pentachlorophenol	Phenol, pentachloro-
Phenacetin	Acetamide, N-(4-ethoxyphenyl)-
Phenol	Same
Phenylenediamine	Benzenediamine
Phenylmercury acetate	Mercury, (acetato-O)phenyl-
Phenylthiourea	Thiourea, phenyl-
Phosgene	Carbonic dichloride
Phosphine	Same
Phorate	Phosphorodithioic acid, O,O-diethyl S-[(ethylthio)methyl] ester
Phthalic acid esters, NOS	
Phthalic anhydride	1,3-isobenzofurandione
2-Picoline	Pyridine, 2-methyl-
Polychlorinated biphenyls NOS	
Potassium cyanide	Same
Potassium silver cyanide	Argentate(1-), bis(cyano-C)-, potassium
Pronamide	Benzamide, 3,5-dichloro-N-(1,1-dimethyl-2-propynyl)-
1,3-Propane sultone	1,2-Oxathiolane, 2,2-dioxide
n-Propylamine	1-Propanamine
Propargyl alcohol	2-Propyn-l-ol
Propylene dichloride	Propane, 1,2-dichloro-
1,2-Propylenimine	Aziridine, 2-methyl-

Propylthiouracil	4(1H)-Pyrimidinone, 2,3-dihydro-6-propyl-2-thioxo-
Pyridine	Same
Reserpinen	Yohimban-16-carboxylic acid, 11,17-dimethoxy-18-[(3,4,5-trimethoxybenzoyl)oxy]-, methyl ester
Resorcinol	1,3-Benzenediol
Saccharin and salts	1,2-Benzisothiazol-3(2H)-one, 1,1-dioxide and salts
Safrole	1,3-Benzodioxole, 5-(2-propenyl)-
Selenium dioxide	Selenious acid
Selenium and compounds, NOS	Selenium
Selenium sulfide	Same
Selenourea	Same
Silver and compounds NOS	Silver
Silver cyanide	Same
Silvex (2,4,5-TP)	Propanoic acid, 2-(2,4,5-trichlorophenoxy)-
Sodium cyanide	Same
Streptozotocin	D-Glucopyranose, 2-deoxy-2-(3-methyl-3-nitrosoureido)-
Strontium sulfide	Same
Strychnine and salts	Strychnidin-10-one arid salts
TCDD	Dibenzo[b,e] [1,4]dioxin, 2,3,7,8-tetrachloro-
1,2,4,5-Tetracholorobenzene	Benzene, 1,2,4,5-tetrachloro-
Tetrachlorodibenzo-p-dioxins	
Tetrachlorodibenzofurans	
Tetrachloroethane, NOS	Ethane, tetrachloro-, NOS
1,1,1,2-Tetrachloroethane	Ethane, 1,1,1,2-tetrachloro-
1,1,2,2-Tetrachloroethane	Ethane, 1,1,2,2-tetrachloro-
Tetrachloroethylene	Ethene, tetrachloro-
2,3,4,6-Tetrachlorophenol	Phenol, 2,3,4,6-tetrachloro-
Tetraethyldithiopyrophosphate	Thiodiphosphoric acid, tetraethyl ester
Tetraethyl lead	Plumbane, tetraethyl-
Tetraethylpyrophosphate	Diphosphoric acid, tetraethyl ester
Tetranitromethane	Methane, tetranitro-
Thallium and compounds NOS	Thallium
Thallic oxide	Thallium (III) oxide
Thallium (I) acetate	Acetic acid, thallium (1+) salt
Thallium (I) carbonate	Carbonic acid, dithallium (1+) salt
Thallium (I) chloride	Thallium chloride
Thallium (I) nitrate	Nitric acid, thallium (1+) salt
Thallium selenite	Thallium selenide
Thallium (I) sulfate	Sulfuric acid, thallium salt
Thioacetamide	Ethanethioamide
Thiofanox	2-Butanone, 3,3-dimethyl-1-(methythio)-, O-[(methylamino)carbonyl]oxime
Thiomethanol	Methanethiol
Thiophenol	Benzenethiol
Thiosemicarbazide	Hydrazinecarbothioamide
Thiourea	Same
Thiram	Thioperoxydicarbonic diamide, Tetramethyl-
Toluene	Benzene, methyl-
Toluenediamine	Benzenediamine, ar-methyl-
2,4-Toluenediamine	1,3-Benzenediamine, 4-methyl-

2,6-Toluenediamine	1,3-Benzenediamine, 2-methyl-
3,4-Toluenediamine	1,2-Benzenediamine, 4-methyl-
Toluene diisocyanate	Benzene, 2,4-diisocyanato-1-methyl-
p-Toluidine	Benzenamine, 4-methyl-
o-Toluidine hydrochloride	Benzenamine, 2-methyl-,hydrochloride
Toxaphene	Same
1,2,4-Trichlorobenzene	Benezene, 1,2,4-trichloro
1,1,2-Trichloroethane	Ethane, 1,1,2-trichloro
Trichloroethylene	Ethene, trichloro
Trichloromethanethiol	Methanethiol, trichloro-
Trichloromonofluoromethane	Methane, trichlorofluoro-
2,4,5-Trichlorophenol	Phenol, 2,4,5-trichloro-
2,4,6-Trichlorophenol	Phenol, 2,4,6-trichloro-
2,4,5-T	Acetic acid, (2,4,5-trichlorophenoxy)-
Trichloropropane, NOS	
1,2,3-Trichloropropane	Propane, 1,2,3-trichloro-
O,O,O-Triethylphosphorothioate	Phosphorothioic acid, O,O,O-triethyl ester
sym-Trinitrobenzene	Benzene, 1,3,5-trinitro
Tris (1-aziridinyl)phosphine sulfide	Aziridine, 1,1'1"-phosphinothioylidynetris-
Tris (2,3-dibromopropyl)phosphate	1-Propanol, 2,3-dibromo-, phosphate (3:1)
Trypan blue	2,7-Naphthalendisulfonic acid, 3,3'-[(3,3'-dimethyl [1,1'-biphenyl]- 4,4'-diyl)bis(azo)]bis[5-amino-4-hydroxy-, tetrasodium salt
Uracil mustard	2,4(1H,3H)-Pyrimidinedione, 5-[bis(2-chloroethyl)amino]-
Same as CAS name	Undecamethylenediamine, N,N' -bis(2-chlorobenzyl)-dihydrochloride
Vanadium pentoxide	Vanadium oxide V2 O3
Vinyl chloride	Ethene, chloro-
Warfarin	2 H-1-Benzopyran-2-one, 4-hydroxy-3-(3-oxo-1-phenylbutyl)-
Zinc cyanide	Same
Zinc phosphide	Zinc phosphide P2 Zn3

NOS (not otherwise specified) signifies those members of the general class not specifically listed by name in this appendix.

Appendix N: Site Inspection

Site Inspection Report

Applicant ID: HARP010978R	
Address: 93 Old York Rd., Bridgewater Township, NJ 08807	
	DCA Inspection Date: 2/11/2025
Enviro. Site Inspection Report Preparer: ICF	**Enviro. Site Inspection Report Prepared Date:** 1/15/2026
Program Type: HARP	**Project Description:** Reconstruction
Location Verified By: House number	**Parcel Status:** Structure exists

General Property Conditions:

Was the property accessible? Yes

Any general safety or environmental hazards on or adjacent to subject property? No

Was the building occupied at time of visit? Yes

Is there a city posting indicating property is condemned? No

General Comments: No further comments.

Environmental Observations:

Wetlands:

1. **Is there any evidence of wetlands on or adjacent to the subject property?** No
   If Yes, how far is the wetland from the subject structure?

   Additional information (such as description of wetlands, vegetation present, if present on or adjacent to the property…):

Endangered Species:

1. **Are there any signs of relevant Threatened or Endangered Species?** No
   If Yes, provide additional information:

Contamination and Toxic Substances:

1. **Are there any signs the property is or was previously used for commercial or industrial purposes?** No

   If Yes, provide additional information:

2. **Are there any above ground storage tanks (including 55-gallon drums) located on or adjacent to the subject property?** No

   If yes, state location of tank/drum, number of tanks/drums, use of tank.

   2a. Is the tank/drum labeled? (If yes, take a photo of label) Yes / No
