

RULE PROPOSALS

INTERESTED PERSONS

Interested persons may submit comments, information or arguments concerning any of the rule proposals in this issue until the date indicated in the proposal. Submissions and any inquiries about submissions should be addressed to the agency officer specified for a particular proposal.

The required minimum period for comment concerning a proposal is 30 days. A proposing agency may extend the 30-day comment period to accommodate public hearings or to elicit greater public response to a proposed new rule or amendment. Most notices of proposal include a 60-day comment period, in order to qualify the notice for an exception to the rulemaking calendar requirements of N.J.S.A. 52:14B-3. An extended comment deadline will be noted in the heading of a proposal or appear in subsequent notice in the Register.

At the close of the period for comments, the proposing agency may thereafter adopt a proposal, without change, or with changes not in violation of the rulemaking procedures at N.J.A.C. 1:30-6.3. The adoption becomes effective upon publication in the Register of a notice of adoption, unless otherwise indicated in the adoption notice. Promulgation in the New Jersey Register establishes a new or amended rule as an official part of the New Jersey Administrative Code.

COMMUNITY AFFAIRS

(a)

DIVISION OF FIRE SAFETY

Standard for the Certification of Fire Protection Equipment Contractors

Proposed Readoption with Amendments: N.J.A.C. 5:74

Proposed New Rules: N.J.A.C. 5:74-1.6 and 1.7

Proposed Repeal: N.J.A.C. 5:74-2.9

Authorized By: Jacquelyn A. Suárez, Commissioner, Department of Community Affairs.

Authority: N.J.S.A. 52:27D-25gg.

Calendar Reference: See Summary below for explanation of exception to calendar requirement.

Proposal Number: PRN 2024-093.

Submit written comments by October 4, 2024, to:

Geraldine Callahan
Department of Community Affairs
PO Box 800
Trenton, New Jersey 08625
Fax No. (609) 984-6696
Email: Geraldine.Callahan@dca.nj.gov

The agency proposal follows:

Summary

Pursuant to N.J.S.A. 52:14B-5.1, the rules at N.J.A.C. 5:74 were scheduled to expire on July 6, 2024. As the Department of Community Affairs (Department) filed this notice of proposal prior to the expiration date, that date is extended 180 days to January 2, 2025, pursuant to N.J.S.A. 52:14B-5.1.c(2). The rules establish standards for all matters relating to the training and certification of businesses and contractors who engage in, or are to be engaged in, the installation, service, repair, inspection, or maintenance of fire protection equipment. In addition, these standards have been adopted to ensure public safety and welfare, through the creation of training and certification requirements. The Department has reviewed the rules and determined that they should be readopted with amendments because the rules remain necessary, proper, reasonable, efficient, and responsive to the purposes for which they originally were promulgated. Additionally, the Department has chosen to amend the rules to implement new requirements at P.L. 2023, c. 186, the Fire Life Safety Damper and Smoke Control System Inspection Verification Act (the Act). Although the Act became effective immediately upon adoption, pursuant to Section 8 of the Act, the following statutory sections are inoperative until one year after adoption, or December 21, 2024: N.J.S.A. 52:27D-198.21 through 198.25 and applicable portions at N.J.S.A. 52:27D-25n

and 25q. However, “the Commissioner of Community Affairs may take any anticipatory steps necessary to effectuate this bill.” P.L. 2023, c. 186, § 8. The Commissioner believes that these amendments represent appropriate anticipatory steps that are necessary to effectuate the Act and will delay the effective dates of certain subsections in this rulemaking to align with the December 21, 2024, date when the relevant statutes become operative, based on the effective date of the notice of adoption of this rulemaking. The Department intends for the rules proposed for re-adoption with amendments, new rules, and a repeal to create comprehensive and mandatory examination, certification, re-certification, and continuing education requirements for contractors who install, service, repair, inspect, and maintain fire and/or smoke dampers and smoke control systems.

The provisions of the rules to be readopted along with the proposed amendments, new rules, and repeal are summarized below.

Subchapter 1. General Provisions

Subchapter 1 sets forth the general provisions related to the chapter.

The proposed amendments at N.J.A.C. 5:74-1.4 include the addition of several new definitions, all of which are carried over directly from P.L. 2023 c. 186. Additionally, the proposed amendments include the removal of mailing addresses from defined organizations. All mailing addresses can now be found at proposed new N.J.A.C. 5:74-1.6. Additionally, proposed new N.J.A.C. 5:74-1.7 sets forth a provision to streamline the submission of test reports from all fire protection contractors Statewide.

Subchapter 2. Administration of Permit and Certification Program

Subchapter 2 sets forth the rules pertaining to the Administration of Permit and Certification Program.

The proposed amendment at N.J.A.C. 5:74-2.1(l) deletes a cross-reference that no longer exists, without any change to the substance of the subsection, as the cross-reference is not necessary because “certificate holder” is defined at N.J.A.C. 5:74-1.4.

The proposed amendments at N.J.A.C. 5:74-2.2 include the removal of compliance dates that have long passed and are no longer necessary. Additionally, proposed new N.J.A.C. 5:74-2.2(c)7 and 8 add the classifications of fire protection contractors, fire, and/or smoke damper and smoke control system contractors, as required pursuant to P.L. 2023, c. 186, § 7. The effective dates of these amendments will be delayed until December 21, 2024 (if the notice of adoption is effective prior to that date).

The proposed amendments at N.J.A.C. 5:74-2.3 remove acronym expansions because all acronyms are sufficiently defined at N.J.A.C. 5:74-1.4. Also, proposed new N.J.A.C. 5:74-2.3(d)7 and 8 add the certification requirements with which fire and/or smoke damper and smoke control system contractors must comply pursuant to P.L. 2023, c. 186, § 7. The effective dates of these amendments will be delayed until December 21, 2024 (if the notice of adoption is effective prior to that date).

The proposed amendments at N.J.A.C. 5:74-2.4 delete language specific to the National Institute for Certification in Engineering

Technologies’ (NICET) continuing professional development points and add generic language that may be applied to any of the referenced certifying organizations. Existing N.J.A.C. 5:74-2.4(b)1 through 6, (c), (d), (e), (g), and (h) are proposed for deletion because requirements are already in place through NICET’s policies, and any change to NICET’s policies would create an unnecessary conflict with N.J.A.C. 5:74.

N.J.A.C. 5:74-2.9 is proposed for repeal, as it was an exemption related to the Dormitory Safety Trust Fund Act that required full compliance by the last day of the 48th month following the effective date of P.L. 2000, c. 56 (July 5, 2000).

The proposed amendments at N.J.A.C. 5:74-2.10 adjust fee amounts that have not been increased since the provisions were originally adopted. Additionally, a reinstatement fee was added due to the time-consuming process for staff to verify that all conditions for reinstatement of suspended business permits were resolved. The Department calculated what the fees would have been if the Department had authorized periodic increases matching the rate of inflation as determined by the United States Bureau of Labor Statistics. The proposed fee amounts are substantially lower than the rate of inflation and also reflect an annual increase equivalent to less than two percent since the fees were introduced.

As the Department has provided a 60-day comment period on this notice of proposal, this notice is exempted from the rulemaking calendar requirement pursuant to N.J.A.C. 1:30-3.3(a)5.

Social Impact

The rules proposed for readoption with amendments, new rules, and a repeal would have a positive social impact because they enhance public safety by ensuring adequately trained and certified personnel are installing, inspecting, testing, and maintaining fire protection equipment. The rules are necessary, reasonable, and proper for the purpose for which they were originally promulgated and will continue to protect the safety and well-being of the public.

Economic Impact

The Department would receive increased revenue from certification and permit fees from existing contractors that would be used to administer the existing programs. Additionally, the new statutorily required classifications of Smoke Damper, Fire Damper, Combination Fire and Smoke Damper, and Smoke Control System contractors would be required to pay the same fees currently required for existing contractors at the same three-year interval. The Department has determined that the proposed fee amounts are substantially lower than the rate of inflation and also slightly less than a two percent increase per year as well. The Department believes the benefit gained through enhanced public safety far outweighs the monetary cost to businesses.

Federal Standards Statement

A Federal standards analysis is not required because these rules proposed for readoption with amendments, new rules, and a repeal are not being proposed in order to implement, comply with, or participate in any program established pursuant to Federal law or pursuant to a State law that incorporates or refers to Federal law, standards, or requirements.

Job Impact

The Department does not anticipate the creation or loss of jobs due to the rules proposed for readoption with amendments, new rules, and a repeal. The rules would simply require that existing and new Smoke Damper, Fire Damper, Combination Fire and Smoke Damper, and Smoke Control System contractors be certified and continuously trained in accordance with statutory requirements.

Agriculture Industry Impact

The Department does not anticipate that these rules proposed for readoption with amendments, new rules, and a repeal will have any impact on the agriculture industry.

Regulatory Flexibility Analysis

The rules proposed for readoption with amendments, new rules, and a repeal place compliance requirements upon all businesses including “small businesses” as defined in the New Jersey Regulatory Flexibility Act, N.J.S.A. 52:14B-16 et seq. Specifically, each contractor who installs, maintains, services, and/or repairs fire and/or smoke dampers or smoke control systems will have to be certified by the Department, or the

contractor must have a certified employee who has obtained a business permit from the Department to perform the work. Thereafter, there will be training and re-certification requirements for contractors and their employees. The costs of the rules are discussed in the Economic Impact above. The Department does not anticipate that contractors or their employees will need to enlist professional services in order to comply with these regulatory requirements. As the health, safety, and welfare of the public is affected by the installation, service, repair, and/or maintenance of fire and/or smoke dampers and smoke control systems, all certification and other requirements must be uniform for all businesses. It is impractical to determine the number of contractors that will be affected by this rulemaking due to the nature of the business with contractors coming from both union and non-union shops.

Housing Affordability Impact Analysis

The rules proposed for readoption with amendments, new rules, and a repeal only impact the certification of fire protection contractors. Although there is a theoretical possibility that the small fee increases and certification requirements could be reflected in the cost of housing, these cost increases are not significant in the context of the value of a home. Additionally, the provisions for fire and/or smoke dampers and smoke control systems are statutorily exempted pursuant to N.J.S.A. 52:27D-198.23 from single- and two-family and attached single-family dwellings. Thus, the Department believes that there is an extreme unlikelihood that the rules proposed for readoption with amendments, new rules, and a repeal will have any impact on the affordability of housing in New Jersey, or evoke a change in the average cost associated with housing.

Smart Growth Development Impact Analysis

The rules proposed for readoption with amendments, new rules, and a repeal concern only the certification of fire protection contractors. As such, the Department does not anticipate any impact to housing production within Planning Areas 1 and 2, or within designated centers, pursuant to the State Development and Redevelopment Plan.

Racial and Ethnic Community Criminal Justice and Public Safety Impact

The Department has determined that this rulemaking will not have an impact on pretrial detention, sentencing, probation, or parole policies concerning adults and juveniles in the State. Accordingly, no further analysis is required.

Full text of the rules proposed for readoption may be found in the New Jersey Administrative Code at N.J.A.C. 5:74.

Full text of the proposed amendments, new rules, and repeal follows (additions indicated in boldface **thus**; deletions indicated in brackets [thus]):

SUBCHAPTER 1. GENERAL PROVISIONS

5:74-1.4 Definitions

The following terms shall have the meanings indicated except where the context clearly requires otherwise.

...
“Combination fire and smoke damper” means a device that meets both the fire damper and smoke damper requirements.
...

“Dedicated smoke control system” means a smoke control system and components that are installed for the sole purpose of providing smoke control and that upon activation of the systems operate specifically to perform the smoke control function.
...

“Fire damper” means a device installed in ducts and air transfer openings designed to close automatically upon detection of heat and resist the passage of flame. Fire dampers are classified for use in either static systems that will automatically shut down in the event of a fire, or in dynamic systems that continue to operate during a fire. A dynamic fire damper is tested and rated for closure under elevated temperature airflow.
...

“HVAC” means heating, ventilation, and air conditioning.
“ICB” means the International Certification Board.

...
 “NAFED” means the National Association of Fire Equipment Distributors, Inc., 180 North Wabash Avenue, Suite 401, Chicago, Illinois 60601.]

“NFPA” means the National Fire Protection Association[, 1 Batterymarch Park, Quincy, Massachusetts 02269].

“NICET” means the National Institute for Certification in Engineering Technologies[, 1420 King Street, Alexandria, Virginia 22314].

...
“Smoke control system” means an engineered system that includes all methods that can be used singly, or in combination, to modify smoke movement, including engineered systems that use mechanical fans to produce pressure differences across smoke barriers to inhibit smoke movement.

“Smoke damper” means a device installed in ducts and air transfer openings designed to resist the passage of smoke. The device is installed to operate automatically, controlled by a smoke detection system, and where required, is capable of being positioned from a fire command center.

...
“TABB” means the Testing, Adjusting and Balancing Bureau of the International Certification Board.

5:74-1.6 Referenced standards and organizations

(a) Copies of NAFED’s standards referenced in this chapter may be obtained by writing to: 180 North Wabash Avenue, Suite 401, Chicago, Illinois 60601.

(b) Copies of NFPA’s standards referenced in this chapter may be obtained by writing to: NFPA, 1 Batterymarch Park, Quincy, MA 02269.

(c) Copies of NICET’s standards referenced in this chapter may be obtained by writing to: 1420 King Street, Alexandria, Virginia 22314.

(d) Copies of ICB’s and TABB’s standards referenced in this chapter may be obtained by writing to: 3180 Fairview Park Drive, Suite 400, Falls Church, Virginia 22042.

5:74-1.7 Submission of fire protection test reports

(a) Fire protection contractors shall be responsible for the submission of all system inspections, tests, and maintenance records required pursuant to the State Fire Prevention Code, N.J.A.C. 5:70-3. Electronic submission through the Division’s fire protection contractor database is required within five business days of the inspection.

1. Submission through the Division’s fire protection contractor database shall meet the requirement of forwarding records to the fire official in compliance with the State Fire Prevention Code, N.J.A.C. 5:70-3.

SUBCHAPTER 2. ADMINISTRATION OF PERMIT AND CERTIFICATION PROGRAM

5:74-2.1 Business permits

(a)-(k) (No change.)

(l) A certificate holder[, as prescribed in N.J.A.C. 5:74-1.8,] shall not be used to qualify more than one fire protection equipment business.

(m)-(n) (No change.)

5:74-2.2 Certifications required

(a) [After June 30, 2003, no] No fire protection contractor shall engage in the installation, service, repair, inspection, or maintenance of fire protection equipment without holding or employing a person who holds a valid certificate of certification issued in accordance with this chapter.

1. Persons holding a license to engage in the fire alarm business pursuant to P.L. 1997, [c.305] c. 305 (N.J.S.A. 45:5A-23 et seq.) [by March 1, 2004,] or who are electrical contractors as defined in section 2 [of] at P.L. 1962, [c.162] c. 162 (N.J.S.A. 45:5A-2), are exempt from the requirement of obtaining a certificate of certification [under] pursuant to this chapter to engage in the fire alarm business to the extent that such persons are acting within the scope of practice of their profession or occupation.

2.-6. (No change.)

(b) (No change.)

(c) The following certified classifications are hereby established:

1. An “All Fire Protection Equipment Contractor” is authorized to install, service, repair, inspect, and maintain all fire protection equipment **set forth at (c)2, 3, 4, 5, and 6 below;**

2.-4. (No change.)

5. A “Portable Fire Extinguisher Contractor” is authorized to install, service, repair, inspect, and maintain all portable fire extinguishers; [and]

6. A “Kitchen Fire Suppression System Contractor” is authorized to install, service, repair, inspect, and maintain all kitchen fire suppression systems[.];

7. A “Smoke Damper, Fire Damper, and Combination Fire and Smoke Damper Contractor” is authorized to install, service, repair, inspect, and maintain all smoke dampers, fire dampers, and combination fire and smoke dampers; and

8. A “Smoke Control System Contractor” is authorized to install, service, repair, inspect, and maintain all smoke control systems.

(d)-(f) (No change.)

5:74-2.3 Requirements for certification

(a)-(b) (No change.)

(c) Examination requirements shall be administered by the [National Institute For Certification In Engineering Technologies (NICET,)] and the National Association of Fire Equipment Distributors (NAFED,)] and ICB/TABB using testing criteria and procedures adopted in this chapter. Minimum passing test scores shall conform to NICET, [and] NAFED, and ICB/TABB standards. Retesting shall follow NICET, [and] NAFED, and ICB/TABB requirements and guidelines. All NICET, [and] NAFED, and ICB/TABB examination fees, certification fees, renewal fees, and program delivery fees are solely those of NICET, [and] NAFED, and ICB/TABB, and are authorized by this chapter to be collected separate from the fees established by this chapter. The Contractor Certification and Emblems Unit within the Division of Fire Safety may administer examinations on behalf of NICET, [and] NAFED, and ICB/TABB.

(d) The following certification requirements are hereby established for the fire protection contractor classifications:

1.-6. (No change.)

7. A Smoke Damper, Fire Damper, and Combination Fire and Smoke Damper Contractor shall maintain a valid certification issued by ICB/TABB in the following area: Fire and Smoke Damper Contractor, or equivalent, as determined by the Unit.

i. All persons performing inspection, testing, and maintenance of Smoke Dampers, Fire Dampers, and Combination Fire and Smoke Dampers shall be employed by a Smoke Damper, Fire Damper, and Combination Fire and Smoke Damper Contractor, and shall maintain a valid certification issued by ICB/TABB in the following area: Fire and Smoke Damper Technician, or equivalent, as determined by the Unit.

8. A Smoke Control System Contractor shall maintain a valid certification issued by ICB/TABB in the following area: Smoke Control Systems Contractor, or equivalent, as determined by the Unit.

i. All persons performing inspection, testing, and maintenance of Smoke Control Systems shall be employed by a Smoke Control System Contractor, and maintain a valid certification issued by ICB/TABB in the following area: Smoke Control Systems Technician, or equivalent, as determined by the Unit.

ii. Smoke Control Systems Technicians shall also maintain a valid certification issued by ICB/TABB in the following area: Testing, Adjusting, and Balancing Technician, or equivalent, as determined by the Unit.

5:74-2.4 Renewal of certifications

(a) (No change.)

(b) Recertification is achieved by accumulating [a prescribed number of continuing professional development points as developed and adopted by NICET, specifically Operational Policy #30, 2008 Revision, (Continuing Professional Development). Total points required for recertification are:

1. All Fire Protection Equipment Contractor—90 continuing professional development points;
2. Fire Sprinkler System Contractor—90 continuing professional development points;
3. Special Hazard Fire Suppression System Contractor—90 continuing professional development points;
4. Fire Alarm System Contractor—90 continuing professional development points;
5. Portable Fire Extinguisher Contractor—90 continuing professional development points; and
6. Kitchen Fire Suppression System Contractor—90 continuing professional development points] **the continuing education and/or experience requirements of the respective certifying organization for the certification held in accordance with N.J.A.C. 5:74-2.3(d).**

[(c) Where the certificate holder has obtained NICET certification, as required by this chapter, he or she shall submit a renewal application to NICET, meet the requirements of NICET Operational Policy #30, 2008 Revision, to obtain renewal of issued certifications, and pay the required fee as may be established by NICET.

(d) Where the certificate holder has obtained NAFED certification, as required by this chapter, documentation shall be sent to NAFED who shall review and award continuing professional development points to Portable Fire Extinguisher and Kitchen Fire Suppression System Contractors.

(e) Where the certificate holder has obtained certification, as required by this chapter, using the experience provision provided herein, documentation shall be sent to NICET who shall review and award continuing professional development points in accordance with (b) above.]

[(f)] (c) Once the certificate holder has been recertified by [NICET, or has been determined by NICET to meet the required continuing professional development points] **the respective certifying agency for the certification held in accordance with N.J.A.C. 5:74-2.3(d)**, a renewal application may be submitted to the Contractor Certification and Emblems Unit to renew certificates issued pursuant to this chapter.

[(g) The Division shall accept the renewal of NICET certifications, and other official correspondence from NICET, as meeting the continuing education requirements of this chapter.

(h) The renewal of NICET certifications, and evaluation of continuing professional development criteria, shall directly reflect the type and specialty of certifications issued pursuant to this chapter.]

5:74-2.9 [Exemption, certain] (Reserved)

[Notwithstanding the provisions of this chapter, the Division will exempt from the requirements of this chapter any person engaged in the installation of fire protection equipment in dormitories pursuant to P.L. 2000, c.56 (N.J.S.A. 52:27D-198.7 et seq.). The exemption shall apply only for work performed pursuant to P.L. 2000, c.56 (N.J.S.A. 52:27D-198.7 et seq.) and only for such time as is necessary to complete work performed pursuant to that Act.]

5:74-2.10 Fees

(a) No application for a permit or certification shall be acted upon unless the application is accompanied by a fee as follows:

1. The initial application fee for a business permit shall be [\$250.00] **\$350.00.**
2. The initial application fee for a certificate of certification shall be [\$75.00] **\$100.00.**
3. The three-year renewal application fee for a business permit shall be [\$250.00] **\$350.00.**
4. The three-year renewal application fee for a certificate of certification shall be [\$75.00] **\$100.00.**
5. The application fee for an amended permit shall be [\$50.00] **\$70.00.**
6. The application fee for an amended certificate shall be [\$25.00] **\$35.00.**
7. **Reinstatement of a suspended business permit shall require a fee of \$150.00.**

(b) (No change.)

(c) Issuance of a duplicate business permit or certificate is authorized by this chapter and shall require a fee of [\$25.00] **\$35.00** for each permit or certificate printed.
